# INTRODUCTORY.

THIS work is a development and extension of that originally issued by the present publishers under the title of "A STANDARD DICTIONARY OF THE ENGLISH LANGUAGE." The endeavor has been to retain all those characteristic features which have stood the test of time, criticism, and popular approval, while adding all new information demanded by the world's advance in twenty years, and all new features that may promote ready and effective consultation. To attain this end, every word has been reexamined, every quotation, definition, or other item studied anew, with a view of bringing all to the highest attainable perfection by reediting and resetting. There has been in addition the strenuous endeavor to gather from every field of scholarship, art, science, exploration, commerce, industry, or invention, all new matter of real value and utility.

The governing principles of this, as of the earlier work, have been those announced by Dr. ISAAC K. FUNK in the introductory statement prefacing the original STANDARD, November 23, 1893, in the following words:

"The chief function of a dictionary is to record usage; not, *except in a limited degree*, to seek to create it. Yet, when custom or usage

#### Function of the Dictionary.

varies, it is important that a dictionary should be most careful, in its preferences, to give its sanction to the best forms and tendencies. It has manifold opportunities to render good service to the language by characterizing certain words and variant forms of words, and certain meanings or usages, as archaic or obsolete, as foreign, dialectic, or provincial, as colloquial, vulgar, slang, or low, as inelegant or erroneously formed. In the STANDARD the aim has been to help, so far as this may legitimately be done in a work of the kind, to simplify and perfect the language.

"The editors of the various departments have been urged to keep always in mind that the essentials of a good dictionary are *comprehensiveness, accuracy, and simplicity.*"

## I. THE VOCABULARY.

The "FUNK & WAGNALLS NEW STANDARD DICTIONARY OF THE ENGLISH LANGUAGE," based upon these principles, will be found to be decidedly in advance of previous editions of the STANDARD DICTIONARY in the number of words it contains. The first edition of this book contained 304,000 terms. Subsequently a supplement aggregating more than 13,000 terms was added, increasing the vocabulary proper to 317,000 terms. In the making of the present work no less than 513,000 terms of all kinds were critically examined, revised, or defined. Of these, 63,000 were rejected: (1) as dead beyond all hope of revival; (2) as obsolescent; (3) as of little or no value; and (4) as

#### Terms Excluded.

of such rare or specific use as to be manifestly without the scope of a dictionary designed for practical and popular purposes. Many of these rejected terms were mere obsolete variant forms of living words as used in the early stages of printing. Certain words current in the earlier periods of the history of the language are now omitted because, by the modern standard of culture, they are no longer approved. The decay of once useful words with lapse of time is one of the sure laws of language. Very many words used in the earlier stages of the sciences and of the mechanic arts have become obsolete, because displaced by the advancement of knowledge or the progress of invention. With obsoletes have been excluded many new words which have won transitory recognition, but give no evidence of value or permanence, such as minutely technical terms in science or industry, considered worthless by specialists in their own departments; experimental words, proposed even by some master in philosophy or science, but not adopted or given currency by other workers in the same field; nonce-words, used once by some gifted author, but never securing general acceptance.

While thus resolutely rejecting much, the purpose has been held steadily in view that the vocabulary should, first of all, embrace *all the live words* of the English language as used in the standard

speech and literature of the day. It has been deemed wise to include, in addition, those terms that are commonly used, dialectically or

otherwise, by large numbers of people in different parts of the English-speaking world. This body of terms has been augmented considerably by the territorial growth of the United States and of Great Britain, through the introduction of words in daily use among the peoples enjoying the protection of these two nations in their recently acquired dependencies, and also through the impulse given under the new flag to the development of various branches of science, commerce, industry, or manufacture, with special local applications.

The English language has been so greatly enriched by words drawn from dialectal sources and enlisted for general use that

#### Dialectal Terms.

sufficient reason is manifest for recording them in a popular dictionary. Such words are worthy of special consideration, and not infrequently provincial usages will well repay a careful study. The American school of Dialect Story-writing has contributed many new terms, while HALL CAINE, CROCKETT, WATSON (Ian Maclaren), and BARRIE have increased the original vocabulary of Manx and of Scottish terms. The Irish revival also has made it necessary to place on record not only new words but the names of persons and places that have been brought to the front through this revival. In this work the Editors had the valued assistance of Dr. DOUGLAS HYDE. Some space is allotted also to the English dialect spoken in Ireland which the recent labors of Dr. P. W. JORCE have made available.

New terms of Latin or Greek derivation are constantly and freely introduced in the arts and sciences. The absorption of French words is unabated, as is evidenced by such terms as *automobile, charmeuse, chauffeur, garage, hangar, limousine, massage, pannier, sabotage, tonneau*, etc.

In the vast realm of science the growth during the past quarter of a century has proved phenomenal. Geology and Mineralogy have supplied thousands of new words. The terminology of Botany, has been completely recast (see THE BOTANICAL SCIENCES). In Chemistry, the discovery of new elements has enriched our vocabulary, and their practical application has exerted a marked influence

#### Increase in Scientific Terminology.

on our civilization, while a wealth of new words has been evolved as a result of expert research seeking for the improvement or cheapening of commercial processes, as, for instance, in the case of paints and dyes. The field of radioactivity is a fertile source for the coinage of new terms, and in the department of Electricity a large number of the additions are due to developments in Telephony, Telegraphy, Electrical Traction, and allied branches. The departments of Aeronautics (including Aviation), Motoring, and Motor-boating have supplied a varied and wholly new terminology. Astronomers and meteorologists have named for us new phenomena; explorers have given us new words—Rear-Admiral ROBERT E. PEARY and Sir ERNEST H. SHACKLETON have used a number which are not to be found in the earlier editions of dictionaries. THEODORE ROOSEVELT in his *African Game Trails* has employed many Anglo-African terms for the first time. The definitions of these terms were submitted to him, and he reviewed them personally. The terms used in Forestry and Logging are based upon work done for the United States Forestry Service by GIFFORD PINCHOT, as Chief Forester, and published by the United States Government, and the vocabulary of Meteorology has been greatly enlarged under the direction of Dr. WILLIS L. MOORE, Chief of the United States Weather Bureau, Washington, D. C., by Prof. C. F. TALMAN, Librarian of the Bureau, who defined and edited all the terms in this department. The terms in Numismatics, including the table of Coins, were amplified, defined, or edited by Dr. T. L. COMPARETTE, Curator of the United States Mint at Philadelphia, by courtesy of the UNITED STATES TREASURY DEPARTMENT, BUREAU OF THE MINT.

Again, the requirements of Commerce, of the Manufacturing Industries, of the Arts, of Finance, of Insurance—life, fire, and

marine—as well as of Agriculture, Engineering, Eugenics, Political Economy, Sociology, etc., have made the coinage of many new words imperative. Political life, especially in the United States, has fashioned for itself new words, meanings, or phrases, many of which have passed into general use.

The total number of proper names included in the present edition is approximately 65,000, of which the personal and biographical entries aggregate 16,000, and the geographical names more than 30,000. Biblical names, mythological names, and bibliographical entries are all given with equal completeness.

The selection of the biographical names included was made with great care after a complete survey of the names found in the leading encyclopedias of biography—American, English, French, German, Austrian, Spanish, Italian, Russian, Danish, etc.—and in the latest dictionaries of biography and annual handbooks.

Bibliographical names are followed, where necessary, by the name of the author and the title of the book in which they occur. In order that this department may serve as a guide to the characters and contents of the principal works of fiction, brief descriptions of the personages considered are given.

The geographic names selected embrace, in general, places of historic, literary, political, or scientific interest. The purpose is to supply such information as (1) the areas of continents; (2) the areas, capitals, and populations of countries, provinces, and states; (3) the areas and capitals of amts, counties, departments, kens, vilayets, etc.; (4) the geographic position of boroughs, cities, towns, and villages, together with any important fact or event connected with them; (5) the heights of mountains; (6) the lengths of rivers; (7) the sizes of lakes, etc. For greater convenience in keeping abreast with the publications of the censuses of various European countries, the NEW STANDARD DICTIONARY prints statistics of population separately. (See STATISTICS OF POPULATION OF THE WORLD, pp. 2792-2808.)

## II. SPELLING.

In the spelling of words this dictionary generally prefers the simpler form when two ways of spelling the same word are used by acknowledged authorities. In its efforts to help in the simplification of spelling it is conservative, while favoring progress along the lines of reform agreed upon almost unanimously by the leading philologists of America and England. The forms adopted and officially recommended for use by the AMERICAN PHILOLOGICAL ASSOCIATION, the AMERICAN SPELLING REFORM ASSOCIATION, and the SIMPLIFIED SPELLING BOARD are given place, braced together under the usual forms, the first being indicated by \* or PHIL. Soc., and the last by \* or S. S. printed after the word. Where usage in England differs from that in America, as in the spelling of *meter* (metre), *theater* (theatre), *favor* (favour), *labor* (labour), *surprize* (surprise), etc., the form preferred in England is also given. In all words fully Anglicized "e" is preferred in this work to the diphthongs "æ" and "œ," as in *e[æ]sthetics*, *fe[æ]tus*, *home[œ]opathy*. In cases, however, where diphthongal forms are still largely or prevailingly used in current literature, the two forms, in deference to usage, have been braced together in vocabulary place. In general, and in harmony with modern practise, the use of the diæresis is discontinued.

To indicate promptly and clearly the correct way of writing words derived from proper names, these words, as well as all proper names, are printed with initial capital letters. In the treatment of the vocabulary of the sciences the aim has been to follow the system of spelling and capitalization recognized as authoritative in each science.

The decisions of the UNITED STATES GEOGRAPHIC BOARD, of the GEOGRAPHIC BOARD OF CANADA, and of the CENSUS OF INDIA, are followed in the spelling of American, Canadian, and Indian names respectively. The authority followed for the British Isles is the CENSUS OF THE UNITED KINGDOM.

In order to supply a standard as well as to assist in the correction of existing confusion in both literary and lexicographic usage, the division of words into syllables in writing and printing and the com-

pounding of words have been reduced to a logical system by the foremost expert on these subjects in the United States. As a means of distinguishing a hyphenated compound from a syllabicated word, the German double hyphen is used for the first and an ordinary single hyphen for the second. Thus, in *an''ti-A-mer'i-can*, the double hyphen indicates that a hyphen is to be retained after the *anti* in ordinary writing or printing where the syllabic single hyphens (with the accents) disappear, so that the word will be regularly written or printed as *anti-American*. See THE DIVISION OF WORDS INTO SYLLABLES, p. xxix, 12, and COMPOUND WORDS, pp. xxx, xxxi.

## III. PRONUNCIATION.

The pronunciations in this dictionary are, in the main, based on the principles laid down in previous editions of this work by the late Prof. FRANCIS A. MARCH, LL.D. Words whose pronunciations are disputed were referred to an International Advisory Committee of experts in English speech.

In respelling words for pronunciation in the present work two keys are used, but quite independently of each other. Each word is respelled first (Key 1) in the Revised Scientific (or National Education Association) Alphabet, and second (Key 2) in what is commonly called the "text-book key." The use of two systems of notation is necessary during the period of transition from the second or old key to the new.

Of these the Revised Scientific Alphabet (Key 1) is a simple, logical system, in which the aim is to have one sign for each sound, and one sound for each sign, and in which only one diacritical mark is used—the macron or mark of length. Its basic principle, now adopted by many learned societies throughout the world, is the use of the fundamental vowel-letters in their Continental or so-called Roman values.

The second key (Key 2), long used in text-books and in the older dictionaries, preserves the letters of the regular spelling, but attempts to discriminate their sounds by various diacritical marks. The first key may be characterized as the more scientific, while the second is less exact and more cumbersome. For full explanation of these keys, see SPELLING AND PRONUNCIATION, pp. xxiii to xxix.

As a rule, pronunciation is indicated for every word in the dictionary by respelling the word in full phonetically, but it is occasionally shown by merely separating the syllables by hyphens and accent-marks. The endeavor has been to omit nothing that any one can ever need, and respellings are often given which may not be necessary. In this respect, as in others, it has been held preferable to include too much rather than too little. If a word has two or more pronunciations, the first pronunciation given is the one preferred by this dictionary.

Exceptions to the respelling of words in this work are as follows:

1. Many obsolete words and some words almost obsolete are not respelled, as they are now of little importance in the spoken language.

2. Words beginning with combining forms (as *aero-*, *electro-*) are often given in groups and not respelled.

3. Respellings are omitted after some words with prefixes like *dis-*, *mis-*, *out-*, *over-*, *un-*, when the derivative is almost or only a nonce-word, as *disimprison*; but each prefix widely used is followed by the reference, "For respellings not given below, see the primitive words." Full respelling is given, however, in every case in which it is likely to be needed, as with *disband*, *disinherit*, *dismantle*, *misuse*, *output*, *overthrow*, *unknown*.

4. In a few instances, mainly of proper names, the respelling of a first element is given only with the first word in a series containing it, as in Biblical names with *Beth*.

Correctness in pronunciation, like correctness in diction, depends upon the consensus of usage among educated people. There are many words in the language regarding the correct pronunciation of which expert orthoepists and scholars as well as dictionaries do not agree.

The correctness of English pronunciation should obviously be determined by the best and widest usage among the English-speaking peoples. Systematic endeavor has been made in this work to ascer-

tain the consensus of usage throughout the English-speaking world, by selecting from scholars and professors of English in all the great centers of English civilization an Advisory Committee of twenty-five persons, to serve as witnesses to give testimony regarding the usage in those centers, and as a jury to decide upon rival claims in doubtful cases. Disputed pronunciations have been referred to this Advisory Committee, thus composed of prominent philologists in American, British, Canadian, Australian, South-African, and East-Indian educational institutions. The decisions reached by this committee are recorded, together with the preferences of each of the leading dictionaries, in a separate section. This section is referred to by the arbitrary symbol (XIII), which is printed after the respelling of nearly every vocabulary term concerning the pronunciation of which there is any doubt.

#### IV. THE DEFINITIONS.

The plan of defining by definitive statement rather than by synonym, steadfastly followed in the first edition of the STANDARD, has been even more carefully carried out in the present work. The aim has been to produce definitions that are clear, concise, and exact.

Definitions are expressed briefly when few words are sufficient, but encyclopedic treatment is also employed when this is material to a correct understanding of the meaning or importance of the word.

Wherever practicable, the definitive statement is followed by some illustrative phrase or phrases, showing how the word, in the sense defined, may be used in connection with other words. Thus, after the first definition of the adjective *auxiliary* will be found the following illustrative phrases: "as, *auxiliary* troops; an *auxiliary* means."

If a word has two or more meanings, the most common meaning has been given first; that is, preference is given to the order of usage over the historical order. The average man (speaking in a general way) goes to a dictionary to find one or more of three things about a word: (1) Its correct spelling; (2) its correct pronunciation; (3) its most common *present* meaning. It has been the purpose to enable him to get this information with ease and certainty; and hence nothing has been permitted to stand between the vocabulary word and its most obvious or important *current* meaning. This reverses the usual or historical method followed by lexicographers, which is to give first the etymology of the word; next, the meaning nearest the root meaning, often obsolete; and then the subsequent meanings, the present or current meaning often coming last. *But this last meaning is precisely the one most commonly sought after.* The average man is thus embarrassed and confused. It was thought better not to follow a system simply because it is logically or philosophically correct, if, practically, it hinders rather than helps the inquirer. Precedent should give way to convenience.

Special pains have been taken to make the definitions given in this work authoritative by presenting exact and recent meanings and distinctions, by giving a definite clue to the great departments and divisions of knowledge, to which special meanings are referred, and by making the general definitions comprehensive and exhaustive.

Each set of words was defined or submitted to and passed upon by a specialist in the science, art, or branch of knowledge in which the terms are included. The absolute necessity for submitting each definition, if it is to be accepted as authoritative, to an expert in its proper department is so self-evident as to need none but passing reference. The ablest specialists that could be secured were engaged for this work, the list of whose names runs up into the hundreds; among them may be especially mentioned LORD AVEBURY, FRANK BAKER, EDWARD EMERSON BARNARD, SIR GEORGE BIRDWOOD, SIR DAVID BRUCE, FRANK W. CLARKE, PHILANDER P. CLAXTON, T. L. COMPARETTE, ANDREW S. DRAPER, HENRY VAN DYKE, HENRY GANNETT, THEODORE N. GILL, THEODORE W. HUNT, DOUGLAS HYDE, FRANK H. KNOWLTON, GEORGE T. LADD, EMANUEL LASKER, JOHN PENTLAND MAHAFFY, JAMES BRANDER MATTHEWS, SIR HIRAM MAXIM, WILLIAM H. MAXWELL, S. M. MITRA, WILLIS

L. MOORE, ROBERT E. PEARY, EARL ROBERTS, SLATIN PASHA, GEORGE OTIS SMITH, FRANCIS HOVEY STODDARD, ALICE VINTON WAITE, HARVEY W. WILEY, DEAN C. WORCESTER, ORVILLE WRIGHT, WU TING FANG, and ELLA FLAGG YOUNG.

*Anthropology* is defined under its two great divisions of *Physical* and *Cultural Anthropology*, with an extensive finding-list of subordinate terms and of the sciences that minister to each branch of the subject. At *man*, with its numerous derivatives and compounds, is given also a full-page plate of typical heads, illustrating the various

*Race-Types of Mankind.* In the branches of *Anthropology, Archeology and Antiquities.* *Archeology* and *Antiquities* may be mentioned many comprehensive definitions, as those of the *Code of Hammurabi, cromlech, dolmen, hieroglyphic, iconomatic*, (with an illustration of a typical iconomatic inscription) *Minoan, Moabite stone, mound* (with a description of the work of the mound-builders under *Indian mound*), *Nestorian tablet, pyramid* (showing the dimensions and exterior and interior plan of the great pyramid at Ghizeh), *Rosetta stone*, etc.

Architecture and Art have received definitions as full as possible within the space-limitations imposed, frequent cross-references and illustrations being added with a

*Architecture and Art.* view to consolidating the whole. Representative definitions will be found at *Arabian, arch, architecture* (with finding-list), *buttress, Byzantine, capital, column, frieze, Henri-Deux, hypostyle, Norman, perpendicular, pointed, rafter, Renaissance, rock-temple*, and *roof*. In the field of art the definitions will be found to be concise, yet illuminating. As typical examples may be cited those at *art* (with encyclopedic note), *Babylonian school, chiaroscuro, Flemish, impressionism, perspective, Pre-raphaellism, relief, Renaissance painting, school of painting, and sculpture*. The illustrations of famous paintings, etc., are referred to under PICTORIAL ILLUSTRATIONS.

In the Departments of Construction, Engineering, Handicraft, and Mechanical terms in general, the Editors had the advantage of consulting CHARLES ALLEN MUNN, A.B., editor of *The Scientific American*, whose specialized knowledge, assistance, and suggestions proved of immeasurable value. The aim was to cover civil and mechanical engineering and their allied trades as completely as is possible in a popular dictionary. No effort has been spared to make the definitions at once comprehensive and illuminating, and in all explanatory matter, from that covering the most complex of our modern mechanical triumphs to the description of common household tools, to use language free from unnecessary technicalities. For example, the definitions of *chassis, engine, locomotive, marine engine, motor-boat*, the treatment of *automobile* under *motor-vehicle*, and the extended definitions and descriptions under *printing-press* may be cited, with their illustrations. The illustrations under *locomotive* and *printing-press* are particularly noteworthy and show at a glance the state of perfection each department of manufacture has attained. Under *wire* will be found a very complete treatment of the different varieties and a table of *gages*, with diagrams of the United States and British standard *wire-gages*. At *watch* is shown the interior of an American open-faced watch, with the various portions of the works explained and described individually, and a complete list of parts given.

Modern *steel* and *iron-construction* are fully covered under *construction*, with a full-page plate, and under *concrete* are given a definition and an illustration of a monolithic concrete house, furnished by THOMAS A. EDISON. At *viaduct* are a comprehensive definition and an illustration, and at *bridge* are given definitions and illustrations of the principal types of bridge-construction. Under *Panama Canal* are furnished the principal facts and statistics relative to this great engineering and constructive achievement, with a profile section of the canal showing the location and elevation of the locks.

Handicraft terms have been gathered with great completeness, and in most cases will be found grouped under the different trade-names, the more important

*Handicrafts and Trades.* of them are defined in vocabulary place. There are many thousands of handicraft terms; as, among plumbers, *dummy, eel-pump, putty-joint, riser*; among house-builders, *mouse, deadening*; in the manufacture of

brick, clapper, cuckhold, Dutch clinker, unsoiling. Such terms are used particularly in builders' specifications, in handbooks, in commercial and news reports, in contracts, in court-rooms, and in conversation, and they are finding their way more and more into literature. Such common mechanical aids as the bell, pulley, wedge, and wheel are exhaustively covered, while such tools as adz, ax, chisel, drill, file, hammer, saw, etc., are described with all their special modifications.

Aviation and Aeronautics have been very fully covered under the personal supervision of ORVILLE WRIGHT, with the aid of many illustrative diagrams, among which may be mentioned the full-page plates at *aeronautics* and *aviation*, with the definitions and finding-lists under these words, and the definitions of such technical terms as *aeroplane*, *biplane*, *dirigible*, *helicopter*, *hydroaeroplane*, *monoplane*, *volplane*, etc., which afford in brief a complete exposition of the art of aviation as it exists to-day.

In selecting the terms in Medicine, Surgery, and their allied sciences, Anatomy, Physiology, Pathology, and Bacteriology, an attempt was made to determine: (1) whether the term is in actual use or has been in use during a period that would naturally bring it under the notice of a general reader; (2) whether it is likely to remain in use for an appreciable time. It is believed that the vocabulary will be found unusually full in this respect. Representative definitions in these branches are those at *medicine*, *eye* (with illustration of the inner structure of the eye), *muscular system* (with illustration showing location of the principal muscles), *nerve*, *nervous system* (with front view of the human nervous system), *arterial system* (with chart showing the circulatory system of the body as a whole and of the principal organs respectively), *antidote* (giving a list of the proper antidotes to be used in the more common cases of poisoning), *skeleton*, *craniometry* (with tables of craniometrical points, lines, planes, angles, and indexes), *brain* (with a view of the median section of the human brain), *heart* (with encyclopedic note and illustration), *blood*, *circulation of the blood* (with explanatory note and illustration), *fever* (characterizing various types), *lung*, *cell*, *epithelium*, *germ*, *germ-layer*, *metabolism*, *phthisis*, *tuberculosis*, *cancer*, *tumor*, *surgery*, *bone* (with a list and illustration of the bones in the human body). Under *bacteriology* are included a full-page illustration in colors of the forms of *bacteria* and a full description (under *culture*) of the various methods for their propagation, and at *Roentgen Rays* are given two full-page plates showing apparatus and radiographs of different parts of the body, outlining the anatomical structure, as well as a comprehensive definition of this form of radiant energy.

The definition of *law* is very full and complete. Under this are given clear definitions of *civil*, *common*, and *constitutional law*, *martial law*, *natural law*, *positive law*, *statute law*, etc. Then, under *act* will be found an extensive list of the most important acts of English and United States legal history, as the *Act of Elizabeth*, the *Act of Rescission*, the *Carey Act* (or *Desert Act*), the *Morrill Act*, the *Sherman Act*, etc., with dates and general terms of each. Some important *acts*, as the *Act of Settlement*, *Act of Uniformity*, etc., are listed with reference to the second element, as *settlement*, *uniformity*, etc., where the definition is fully given. Turning then to *case*, there will be found a long array of the most celebrated or important *cases* decided under English or American law, as the *American Tobacco Company case*, the *bank-tax case*, the *Northern Securities case*, the *Standard Oil case*, etc., under United States Law; *Bradlaugh's case*, *Bushnell's case*, *McNaghten's case*, etc., under English Law; the *McLeod case*, under International Law, etc.

It should be mentioned here that under *law* is also given a very extensive definitive list of the various uniformities recognized as *laws* in science, mathematics, language, etc.; as, *Ampere's laws*, *Arago's law*, *Coulomb's law*, *Grimm's law*, *Malthus's law*, *Mendel's law*, and numerous others.

In the Department of Language the word *language* itself has a very comprehensive definition, showing how languages are grouped

according to structure, etc., with which is associated a Table of the *Principal Languages of the World*, based on T. G. TUCKER'S *Introduction to the Natural History of Language*, in which the various languages are grouped under divisions, subfamilies, and branches, and details are given of the principal characteristics, development, and regional scope of each. At *alphabet* is an encyclopedic article relative to the origin of the alphabet, and under *Aryan*, *Indo-Chinese*, and *Indo-European* are valuable definitions. In the department of *grammar* proper may be noted the definition of *grammar*, and those at *adjective*, *case*, *conjugation*, *noun*, *plural* (giving rules for the formation of plurals of English words), and *pronoun*.

In defining the terms used in Psychology—including Psychophysics and Experimental and Physiological Psychology—and in Philosophy—including Metaphysics, Ethics, and much of Logic, Esthetics, and Theology—great pains were taken to overcome, so far as possible, the difficulties inhering in the very nature of the conceptions which it is intended to cover by these terms. Of these difficulties, perhaps the chief consists in the largely abstract character of the conceptions themselves.

Another difficulty arises from the fact that these branches of learning so largely make use of common words, but with specialized meaning. Such words as *Consciousness*, *Thought*, *Feeling*, *Pleasure*, *Pain* are among the most difficult of all words to define exactly. Even more conspicuously is this true of such words as *Soul*, *Mind*, *Relation*, *Time*, and *Space* in their metaphysical signification; while such purely negative conceptions as the *Unconscious*, the *Unknowable*, the *Unrelated*, and certain uses of the words *Absolute*, *Infinite*, etc., do not, properly speaking, admit of definition at all. The endeavor has been to give in each case the best definition consistent with the limitations of the subject.

In the consideration of new psychological terms the standing of the originator of the new word, the stress of need for it, the amount of acceptance which it has already gained, and the importance of the distinctions, or the alleged discovery, or the new thought, which it is intended to mark out, must all be taken into account. The main topics in this department have been treated in an encyclopedic manner. Among these may be cited those of *philosophy* and *psychology*, which are especially full, and those under *attention*, *being*, *consciousness*, *desire*, *ego*, *fatigue*, *Hegelianism*, *idea*, *idealism*, *Kantianism*, *method* (under which head many methods in these departments are defined), *mind*, *Platonism*, *reaction*, *reflection*, and *self*.

In the Departments of Mathematics and Physics, the list of terms will be found to include everything of value required by a popular dictionary. In writing the definitions designed for general use the aim was to make them clear to the ordinary reader and to avoid formulas and technical terminology wherever possible. The dominant idea governing the work was that it was designed for a general dictionary—not a technical cyclopedia. Occasional terms so very simple that it seemed useless to define them for the dictionary-user of ordinary intelligence have been omitted.

Among the more important astronomical definitions, all of which have been covered very fully, may be cited those at *astronomy* (which has a finding-list of the more important terms in the science), *comet*, *constellation*, *satellite*, and *star* (all of which have Tables associated with them), *aurora*, *eclipse*, *Leonid*, *Perseid*, *precession*, and the names of the planets, including the *earth*, together with the *sun* and *moon*, all of which have been treated in a statistical manner after reference to the most recent discoveries. Compare also the definition of *telescope*, describing and classifying the different classes, and the full treatment of the *spectroscope*.

Definitions in the Department of Electrical Engineering are based, so far as possible, upon the Standardization Rules of the AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS. Terms relating to modern electrical theory and the multifarious manifestations of the existence of electrons were defined only after a considera-

tion of the most recently published results of investigation by the Cambridge school of physicists. The more common terms in both Theoretical and Applied Electricity are defined so as to include those meanings which are commonly ascribed to them in standard text-books and in representative electrical periodicals. A number of words have been excluded because they are not currently accepted, because they are based upon a misunderstanding of the underlying theory of facts, because they are misleading, or because their use has been inhibited by conventional scientific agreement.

The industrial applications of Electricity in the many practical activities it controls have been treated with insistence upon scientific accuracy joined with the utmost attainable simplicity, to make them clear, as far as the subject permits, to the non-technical reader. Here may be specified *telephone* (explaining both the ordinary Manual System and the Automatic, now largely used in the Western United States and elsewhere), *telegraph*, and *wireless telegraphy*. Illustrations of apparatus used are supplied especially in the full-page plates of *Wireless Telegraphy* and *Wireless Telephony*. Electric Traction and Electric Lighting are very fully treated.

Great care has been exercised in the treatment of Music and Musical Instruments, many special points receiving encyclopedic treatment, as in the definitions of *counter-point*, *harmony*, *key*, *mode*, *music*, *neume*,

*notation*, *note*, *opera*, *orchestra*, *pitch*, *staff*, and *tone*. Under *opera* is also given a list of the more important operas, with their composers and dates of production. The different instruments are comprehensively treated, as in the cases of *harp*, *organ*, and *pianoforte*, and a full-page plate of musical instruments is given at *musical*, and at *national* a four-page insert appears, showing the opening bars, original words, and English translation of many *National and Patriotic Songs* of the world.

Naval, Military, and Nautical Expressions have been treated very fully, much care being taken to differentiate between the United

States and foreign usages and to give the latest information, whenever possible, covering new developments in the various branches. Illustrations have been used profusely, as in the full-page plates at *ship*, *steamship* (showing the "Imperator," a representative modern ocean passenger-steamer, and a number of typical steam-vessels), and at *war-ship*, giving views of many representative vessels of the American and British navies. Among the definitions, which are full, several being illustrated by cuts, may be mentioned those at *army*, *battle-ship*, *cannon*, *cruiser*, *dreadnaught*, *epaulet*, *fortification*, *gun*, *knot*, *navy*, *propeller*, *quartermaster*, *semaphore*, *squadron*, *steamboat*, *submarine*, and *torpedo*.

The Department of Games has been very fully covered, illustrative diagrams being given wherever practicable. Thus, plans of the field

in each case, together with a finding-list of the principal terms used in the game, are given under *baseball*, *court-tennis*, *cricket*, *football* (diagrams of both American and Association fields), *lacrosse* and *lawn-tennis*. Under *golf* (all terms under which head were passed upon by W. J. TRAVIS, sometime champion of the world) is given a finding-list and an illustration of different styles of clubs; under *boxing*, *fencing*, and *single-stick* are shown the various positions of attack and defense; under *swimming* the different strokes are illustrated, as well as the proper positions to be taken in effecting a rescue; under *wrestling* are shown the various holds and falls, etc. *Chess* (passed upon by EMANUEL LASKER, champion of the world) and *checkers* or *drafts* are exhaustively covered, with all their terms, the moves and the principal openings being given in each case, and under *bridge* is given a table showing the method of scoring and a finding-list of the principal terms.

For the Department of Biology the terms presented were gathered from an extensive reading of recent biological literature, and the additions reflect a profound change in the nature of the activities of biologists at the present time. Whereas, a few years ago, the additions came largely from the systematists, now the new terms represent conceptions in Morphology, Physiology, Bacteriology, and Experimental Medicine. Improved technique and refinement of ob-

servation react mutually with new hypotheses and new theories. The result is that investigators are prone to coin new terms to express a theory believed to be warranted by the partial evidence before them. Such terms as remain unnoticed by their contemporaries are excluded; such as have been widely quoted are included and follow the definition given by the author in his original paper, altho some of these have already become rare. On the other hand, care has been taken to make as complete as possible the list of terms and the definitions concerning technical operations or results.

In the Botanical sciences unprecedented progress has been made in recent years. Ecology, Histology, Taxonomy, Cytology, and Phytogeography have been practically reconstituted. Extensive investigations into all these subjects have impressed new meanings on old

#### Botany.

terms and have necessitated the coinage of hundreds of new terms. The terminology of Botany required complete recasting through the action of the International Conference of Botanists held in Vienna in 1905, thus making it necessary to rewrite most of the definitions in this science. Economic Forestry has a terminology peculiar but indispensable. Thus the scientific vocabulary of the vegetable kingdom will be found to have greatly increased in this new work.

The vegetable kingdom comprises over 200,000 species. To compress botanical terminology within the limits of a general dictionary, some method of exclusion must be adopted. All words were judged on their individual merits. But terms interesting only historically, or ephemeral words and phrases, have been omitted.

While full provision is made for the reasonable needs of the scientist, the stronger claims of the general reader are not overlooked. Vernacular plant-names, with their synonyms and the definitions in horticulture and floriculture, will be found unusually numerous and full. The leaves and fruit of trees are pictured in connection with the appropriate definitions, as at *beech*, *birch*, *chinkapin*, *maple*, *walnut*, etc., and a full-page plate in colors of *Typical Woods* further illustrates this topic. *Flowers* are very fully treated under their common as well as under their botanical names (see *lily*, *rose*, *violet*, etc.), and two full-page plates in which *Flowers*, *Wild* and *Cultivated*, are delineated in half-tone engraving.

For years to come the exports of the island possessions of the United States must be mainly agricultural. Special effort was made to include in this work the native names of all economically valuable plants cultivated in Porto Rico, Guam, Hawaii, and the Philippines. Definitions are also given of most of the tropical plants now naturalized in California, Florida, and the southwestern United States.

Under Agriculture prominent terms are extensively listed, supplying the material for cross-references. Lists of various varieties of agricultural products are very extensive (see *apple*, *coffee*, *cotton*, *grape*, *orange* [note the description of the *seedless orange* and the method of its propagation], *peach*, *pear*, *plum*, *tea*, *tobacco*, etc.).

Agricultural implements are very fully treated, as at *harrow*, *hoe*, *mower*, *picker*, *plow*, *reaping-machine*, and *threshing-machine*, and a full-page plate of Agricultural Machinery is given. Diseases of plants, with the insects or other agents producing them, are treated (as at *boll-weevil*, *phyloxera*, etc.). Varieties of domestic animals are listed and described. (See *cattle*, *dog*, *fowl*, *goat*, *horse*, *sheep*, *swine*, etc.), with illustrative plates of typical specimens. In the treatment of the names of domestic and some other animals the *female* is named under the definition of the *male*, thus serving both as antonym and as remembrancer.

In the Department of Zoology the rules of inclusion and exclusion followed in the first edition were followed also in this, with slight

#### Zoology and Its Branches.

modifications to permit of the recording of terms now common in current literature. Changes in scientific nomenclature of zoological terms that have been suggested but not yet universally accepted are not followed. Through discoveries, experiments, and investigations by special experts attached to the UNITED STATES DEPARTMENT OF AGRICULTURE, the range of the Animal Kingdom has been greatly widened, and the information thus gleaned has been made available to the Editors. In addition, the Editor of the department himself contributed a large number of definitions of new

terms now current among the English-speaking peoples of Cuba, Guam, Porto Rico, Hawaii, and the Philippine Islands. In this department material assistance was rendered by Mr. WILLIAM CHURCHILL, sometime United States Consul-General at Samoa and Tonga, who also contributed many Samoan, Melanesian, and Polynesian terms current in English literature. Here, also, the practical and popular element has been given place beside the scientific. The various animals, wild and tame, have been defined and pictured with great fulness and clearness, and with especial care to discriminate the different varieties by locality and characteristics, as the *Arabian* and the *Bactrian camel*, etc. (See *Bear*, *Camel*, *Cat*, *Lion*, *Tiger*, etc.) Note also the domestic animals referred to in the section AGRICULTURE, above. Birds of all varieties are defined and pictured under their familiar names (with addition of their scientific classification), and a full-page plate of *Birds* is added.

In the branches of Entomology and Ichthyology the definitions will be found in harmony with accepted modern scholarship and the results of scientific and expert investigation. The practical importance of many entomological subjects has been held constantly in mind. (See *Boll-weevil*, *Boll-worm*, *Browntail*, *Gipsy-moth*, *Mosquito*, etc.) Attention may here be called to

#### Entomology and Ichthyology.

the full-page plate of *Butterflies and Moths of Europe and America*, with the popular

and the scientific name of each. In the branch of Ichthyology the definition of *fish* has been treated encyclopedically, and a finding-list of the principal fishes is given in connection with it, together with an illustration showing the skeletal structure of a fish. Among other noteworthy definitions are those at *cod*, *cuttlefish*, *dolphin*, *lobster*, *porpoise*, *ray*, *salmon*, and *shark*.

Of Chemical terms and definitions submitted, a few were eliminated as obsolete or unimportant; the majority, however, were carefully considered as to proper chemical phraseology, questions of fact, and correctness of formulation as regards composition. To

this end resort was constantly had to the latest available literature and original papers. All terms submitted received a second checking, both as regards questions of fact and for the detection of typographical errors, that they might correspond to the latest facts and present day conceptions. The Table of Chemical Elements has been expanded to meet the latest discoveries, so that it now contains 81 elements, giving with each the *derivation* of the name, the chemical *symbol* used in formulas, etc., the *atomic weight*, the *specific gravity*, the *fusing- or melting-point*, the *valence*, the *date when discovered*, the *name of the discoverer*, and a compendious statement of *where and how found*. In connection with this a very full statement relative to what is termed the *periodic law* underlying the elements has been given under *periodic*, together with a table of the Periodic System, indicating the method under which the elements have been grouped according to this system.

In the Department of Geology a systematic revision was made of all the terms appearing in previous editions, in order to make all descriptive matter conform to the latest discoveries and conclusions of eminent geologists

#### Geology.

throughout the world. By this means it is hoped that the geological definitions as a whole will be found to be entirely comprehensible by a layman and yet sufficiently thorough to afford reliable information for the student. In the various branches consultations were held with leading experts about all doubtful and disputed terms, as, for instance, with Prof. CHARLES PALACHE, of Harvard University, regarding crystallography, in the effort to eliminate as far as possible the errors found in various works of reference upon this subject. The definitions of many recently proposed terms were submitted to their authors, who passed upon them personally, and no term was admitted that is not recognized as authoritative by expert usage.

The double-page Table of Geological History was prepared with the utmost pains, after consultation with various geologists of the UNITED STATES GEOLOGICAL SURVEY, and in accordance with the views expressed by a number of other eminent geologists, who have carefully discussed the various details of its system and scope. It is believed to be considerably in advance of anything of a similar nature heretofore published in the English language as regards the

stratigraphy of America and Europe, being, as it is, the first serious effort to collate in a comprehensive form the geological growth of the two continents in such a shape as to be readily accessible to, and available for use by, the general reader. In its preparation no one authority was followed throughout, but the eclectic plan was adopted of consulting all available good authorities and deciding doubtful cases according to the preponderance of evidence. Where matters are extremely uncertain a tentative adherence is given to the more convincing evidence, and a note directs attention to the fact that the question still remains unsettled. It is hoped that this table, by its fulness, its scientific accuracy, and its inclusion of the latest geological information, may be of material service to all who consult it.

Full as the many specifications above given may appear, they are but pointers to the wealth of information to be found by the reader who will follow any subject with intelligent study from definition to definition throughout the work.

## V. ETYMOLOGY.

The same general plan of concise treatment which characterized the work of this department in the first edition of the STANDARD DICTIONARY, is followed in the present work. The etymologies, which were prepared under the direction of Prof. FRANCIS A. MARCH, Ph.D., trace the meaning of any given word back in a direct line, avoiding mere guesses at derivation and the temptation to make

#### Conservative Methods Followed.

extended incursions into cognate languages. The advantages of giving, along with the English word, the word similar to it in sound, form, or idea, in the Dutch, French, German, Italian, Spanish, or Swedish, have not appeared sufficient to justify the use of so much valuable space. Bearing in mind that a popular dictionary should aim to provide the information in easily accessible form, words derived from languages whose alphabets differ in the forms of their letters from those of the Roman letters, as the Arabic, Greek, Hebrew, Sanskrit, etc., are transliterated so as to be easily read by any one not familiar with the words in their native dress.

## VI. AIDS TO CONSULTATION.

The main purpose kept in view throughout this work has been to present its contents in such a way that the reader shall always

#### One Alphabetical Order Throughout.

have *direct and easy access* to the information he seeks. Therefore the plan of placing all proper names, whether Biblical, classical, or personal, geographical or bibliographical, in their alphabetical places in the main vocabulary was adopted, so that the reader may find the data he requires as readily and expeditiously as possible. This

#### Proper Names in Alphabetical Place.

method is a distinct advance upon that formerly in vogue of giving in several separate alphabetical groups various lists of proper names, classified as Bible, bibliographical, Greek and Roman, biographical, and geographical, often compelling the reader to turn to a number of these alphabetical groups, according to the plan of the work, before finding the information sought. In this edition of the STANDARD DICTIONARY the inquirer has to look for the term that he seeks in *but one place*—a detail in which this work differs from all its predecessors. It is believed that the method

#### One Word One Place.

here introduced—*every word in its own place throughout the alphabet*, no matter what the word may be—will so commend itself by its simplicity and convenience that the only question will be why it has not always been employed.

In order that the reader who wishes to trace the relation of terms in the sciences, or in other cognate subjects, to one another may do so with ease, cross-references are made between correlated terms in such a way that a complete survey of the science or subject is afforded. By a system of grouping terms, which originated with the first edition of this work, the facts pertaining to the subjects grouped are not only made easily accessible, but also permit of more comprehensive treatment. An examination of the text under such headings as are given below will illustrate the system. *Abbreviations and degrees* are distributed in alphabetical place throughout the text, but the

#### Grouping and Correlation.

chief of these are also grouped under the parent term. The names of *authors, battles, coins, colors, constellations, dyes, elements, flowers, fruits, grasses, languages, measures, orders of merit, precious stones, stocks and tribes, stars, typical shades and hues* (see *SPECTRUM*), *weights, etc.*, are tabulated and, in addition, all the more important of them are defined in their alphabetical places in the vocabulary. Lists of the more common *Americanisms* and *Britishisms* in use are grouped, for the first time in a popular dictionary, under the one or the other of these terms, but are defined in their respective places in the book. This plan of classifying terms under a general group-name serves a double purpose. It supplies the means of comparison and serves as a word-remembrancer or guide to the finding of some forgotten word of which the parent term is known. Yet in all such groups the method of *one alphabetical order throughout* will be found to have been steadily maintained.

Certain self-explanatory terms, or words whose meaning is too easily understood to require definition, are grouped under such prefixes as *in-, inter-, un-*, prepositions like *under*, etc. When necessary the reader is reminded of these groups where they occur by specific reference given at the foot of the page.

Another exclusive feature of this work, adopted for the benefit of those seeking the pronunciation of words, is the placing of the key-words indicating the systems of pronunciation used in this dictionary at the *top of the page* instead of at the bottom, enabling the student to follow the key-line with increased facility.

The key-words at the top of the pages present to the reader the first defined term on the left-hand page and the last defined term on the right-hand page. This enables any one who consults the book to see at a glance whether the word sought occurs upon either of the two facing pages to which he may turn.

Thus, if one is seeking the word *livid*, and opens to pages 1446-1447, he will find in the upper corner of each of these two pages the key-words  $\left\{ \begin{array}{l} \text{literal} \\ \text{little} \end{array} \right\}$ , showing instantly that *livid* can not be there contained. No searching down the columns is necessary. One has simply to turn the page. Then, in either upper corner of pages 1448-1449 will be found the key-words  $\left\{ \begin{array}{l} \text{little} \\ \text{Livistonia} \end{array} \right\}$ , showing that somewhere within the limits of those two pages *livid* will surely be found. This system will, it is believed, greatly facilitate the rapid location of any word desired.

## VII. SYNONYMS AND ANTONYMS.

A characteristic feature of this work is its plan of presenting Synonyms and Antonyms. This department, which has been largely amplified, and now embraces 7,500 separate lists and discussions of more than 23,000 synonymous terms, not only gives lists of synonyms, but in brief paragraphs of comparison undertakes to bring out simply and clearly the finer, nicer distinctions between words similar in meaning, especially with reference to established usage at the present day.

The facts, principles, and plan of this portion of the work are thus stated by the Editor of this department:

The English, as a composite language, has a large number of words, especially those of Latin and French origin, that were originally almost or quite identical in meaning with corresponding Saxon words. With the advance of the language these have been steadily differentiated in meaning or use, until it has become exceedingly difficult to find any two words that are not distinct from each other at some point or in some respect. This process, still actively going on, is constantly enriching the language, enabling the writer or speaker to find an exact term to express almost any shade of thought as no other word could quite so perfectly express it.

In this work, therefore, the term *synonyms* has been used in a general sense to denote pairs or groups of words similar in meaning or associated in use, and has even been extended in some instances to include the discussion in a single article of contrasted terms. Thus such words as *induction* and *deduction*, *infection* and *contagion*, *imagination* and *fancy* can be more fully defined by comparison and contrast than would be possible by the treatment of each term separately.

The method of discrimination constantly followed has been to take in each group some one word whose meaning is well known or capable of being

succinctly stated, and to compare similar and dissimilar words with this central term, thus avoiding the vagueness often produced by easy sliding from synonym to synonym, while at the same time preserving the unity of the group.

Where a word has accepted usage in more than one prominent sense, synonyms have been given at one point for a single signification, and references made to other points for treatment of other meanings. In accordance with the general plan of the work, the synonyms have been held closely to present popular usage. Many elegant archaisms and recondite literary uses of interest to scholars have been left to the definitions and dropped from the synonyms.

Synonym discussion gives *definition by comparison*, each word better understood and better remembered because of its differentiation from others. One who understands the art of selection can choose promptly from any group the very word needed in a particular case, thus giving to a single sentence an instant definiteness and conclusiveness such as could not be attained by a paragraph of explanation.

The interchangeableness of words is also an important consideration. Frequent use of a single word in one sentence or paragraph gives the effect of repetitiousness, and hence wearisomeness, of thought. This is often instantly relieved by the substitution of an interchangeable word. To make such interchange discreetly and effectively, one must know the exact content of each of the words compared—knowledge which only the adequate study of synonyms can impart.

Antonyms, or the opposite meanings of words, are given freely in this work. They are not to be found in any other dictionary. Antonyms have the advantage of *definition by contrast*. The meaning of a word is often made clearer by the sharp statement of what it is *not*, as when we note that *pure* signifies "*not* adulterated or mixed," "*not* defiled, polluted, sullied, or tainted," "*not* immodest or indelicate." A statement is often made more effective by vigorous antithesis. Nearly 5,000 antonyms are given.

## VIII. QUOTATIONS.

In the treatment of illustrative quotations this dictionary is believed to be more distinctly representative of the literature of the English-speaking world than any other similar work. More than 100,000 volumes were read to supply the 2,000,000 quotations submitted. About 32,000 selections were made from this vast aggregation, from modern books including the very latest standard works of reference. Avoiding the common practise of spelling the words given to illustrate their usage in the forms preferred by the dictionary quoting them, the NEW STANDARD DICTIONARY has taken pains to follow the author's spelling to the letter in every case. The places of quotations used to verify or illustrate the meanings of words are so indicated that they can be easily found—the name of the author and the title of the work, the volume, chapter, and page, and usually the name of the publisher and date of publication being given: as, *Prescott Ferdinand and Isabella* vol. ii, pt. ii, ch. 1, p. 236. [L. 1860.]; which means that the quotation given is to be found in Prescott's "*Ferdinand and Isabella*" in volume ii, part ii, chapter 1, page 236, in the edition published in 1860 by Lippincott. The abbreviations used to indicate publishers will be found on pp. xxxvi, xxxvii. Stock dictionary quotations—that is, those that have done service for years in dictionaries—were discarded, with few exceptions, and their places supplied by others believed to illustrate better the meaning of the words defined, while giving additional authority for their use in any specified sense. Practically all English literature from Chaucer's time to the present was ransacked for this purpose.

With the standard literature of the past, the current literature of the present was also recognized. Much of the English printed in our periodical press is of the purest type in use to-day; none is more forceful; none more incisive. The modern newspapers and magazines are true molders of thought and accurately reflect the culture of the time, especially in relation to the English-speaking peoples, inasmuch as of the total of 70,000 periodicals published throughout the world no less than 35,000 are in the English language. Therefore the daily papers and the periodical press have been freely drawn upon to illustrate by quotation the virile language of the time

Newspapers and  
Periodicals Quoted.

## IX. PICTORIAL ILLUSTRATIONS.

The pictorial illustrations made especially for this work were produced in accordance with the rule that pictures in a dictionary should be definitive of the objects. A dictionary should not be a picture-book; yet this rule has been deviated from so far as to permit the admission of a few pictures, largely because of their historic or general encyclopedic value. The drawing and engraving of the illustrations were done in harmony with the general plan of the dictionary, that of having the work of each department committed, so far as feasible, to specialists.

Wherever possible, typical specimens of the fine arts are given. Reproductions of famous pictures by FRA ANGELICO, ROSA BONHEUR, DELLA ROBbia, GUSTAVE DORÉ, DRÖLLING, GÉRÔME, MICHELANGELO, JEAN FRANÇOIS MILLET, NICCOLO PISANO, RAFFAEL, GUIDO RENI, RUBENS, VELASQUEZ, PAUL VERONESE, LEONARDO DA VINCI, and others are used.

## Reproductions of Masterpieces.

The pictorial illustrations number more than 7,000. If the items included in each picture-group were taken into consideration, the total would amount to more than 10,000. As a rule, every illustration given in this work has been inserted to serve a definite purpose—to supplement verbal definition by pictorial demonstration. Often it is much easier to show by a picture what a thing really is than to define it by mere words.

## Wealth of Illustrative Matter.

Special efforts were made to supply up-to-date illustrations, as will be seen by consulting the maps of the *poles* and any illustrations of the various mechanical devices and appliances. Many of these have been already mentioned under the topics to which they specifically apply. In Electricity, Engineering, Handicrafts, and Mechanical Arts in general, the very latest model available has been secured and presented, as will be seen under *aeroplane*, *caisson*, *chassis*, *marine engine*, *motor-boat*, *printing-press*, *steamship*, *three-high rolls*, *turbine*, *watch*, *wireless telegraphy*, *wireless telephony*, etc.

## Up-to-date Presentation of Technical Subjects.

In some cases, the better to aid comparison, a system of grouping has been adopted. A systematic plan of illustrating all sports, games, popular pastimes, setting-up exercises, etc., with accessories and dimensions, where needed, has been carefully carried out.

Among the full-page illustrations are a reproduction, in facsimile, of the *Declaration of Independence*; new full-page plates in black and white prepared under the direction of the

## Typical Illustrations.

AERONAUTICAL CHAMBER OF COMMERCE OF AMERICA, of New York, showing in pictorial form the history and development of *aeronautics* and *aviation*, and giving detailed views of the latest models of *aeroplanes*; two plates of modern *steel construction*, prepared under the personal direction of M. M. LE BRUN, architect and designer of the Metropolitan Tower, New York, and CASS GILBERT, architect and designer of the Woolworth Building, New York; two plates of *motor-vehicles*, including passenger and industrial and commercial vehicles, and showing the detailed mechanism of a typical car, prepared with the aid of the SOCIETY OF AUTOMOTIVE ENGINEERS and AUTOMOBILE TOPICS of New York; a plate of *wireless telephony* prepared by the WESTERN ELECTRIC COMPANY, New York, and one of *wireless telegraphy*, prepared by the RADIO CORPORATION OF AMERICA; and a remarkably clear plate of *diamonds* and *pearls*, prepared under the direction of DR. GEORGE F. KUNZ, gem expert of TIFFANY & COMPANY. This plate shows some of the world's noted diamonds, cut and uncut, with the sizes and weights of diamonds and pearls.

The plates of *fire-fighting appliances*; of the *leaves* of various trees; of *flowers*; of *birds*; of *dogs*, *horses*, *cattle*, *sheep*, and *swine*; the *table of geological history*, etc., will be found highly instructive. The many colored plates distributed throughout the book, as those of *bacteria*, *flags of the nations*, *coins*, *national coats of arms*, *pilot- and signal-flags*, the *solar spectrum* and *standard colors*, etc., are not only highly informing in themselves, but are striking examples of the lithographer's art of to-day.

Wherever a useful purpose is served by so doing, the proportion which the illustration of an animal bears to the animal illustrated is recorded in fractional numbers with the legend.

A plate of *solar spectrum* and *standard colors* is given in two sections, the upper part showing the spectrum, the lower part

being devoted to typical colors. Connected with this is the exact definition of the six primary colors of the *spectrum*, of which a table will be found, together with the analysis of several hundred shades and tints now before the public in various forms, many of which bear fancy names. This branch of the work was performed in the Department of Physics of Columbia University under the supervision of Prof. WILLIAM HALLOCK, Ph.D., and is based on the solar spectrum—nature's own standard of colors. It is to be hoped that Professor HALLOCK's labors may lead to the general use of the system he has devised, and prove a great step toward establishing that long-looked-for desideratum—a standard of colors.

## X. CHARACTERIZATION OF WORDS.

To aid those who consult the dictionary, certain words and meanings are characterized in such a way as to enable one to judge of their standing and application at a glance.

## Class and Use of Words Denoted.

If such a characterization indicates a language distinction—that is, if it classifies the word or meaning as foreign, non-reputable, or local—it is enclosed in brackets; as [P. I.] for Philippine Islands; [Colloq., Eng.] for colloquial in England; [Local, U. S.] for local in the United States. If it marks a class distinction—that is, if it designates the use or meaning of the word as principally confined to some class of persons or objects, as in technical or scientific use—it is italicized; as, *Med.* for *Medical* or *Medicine*, *Polit.* for *Politics*, *Bot.* for *Botany*, etc. In characterizing scientific and technical terms, care is taken to distinguish between words that properly belong to the scientific vocabulary and words that are common names of things of which the science treats; thus, *Mollusca* is marked *Zool.*, but *mollusk* has no characterization. In accordance with the plan of distribution of branches of art and science adopted in this work, a distinction is also made between terms and meanings confined to a branch of a science and those used more generally in that science; thus, *Pathol.*, *Anat.*, etc., have been used wherever practicable instead of *Med.*; *Entom.*, *Helminth.*, etc., instead of *Zool.*; and *Mech.*, *Optics*, *Elec.*, etc., instead of *Physics*. Sometimes, however, the characterization is embodied in the definition, preceded by "In" or "Among" (as, "In the Romance languages," "In astronomy," "Among zoologists," etc.); sometimes it is placed at the end; as, "said of birds of prey."

The definitions of foreign words that retain their original form and are always spoken with their original pronunciation are preceded by the abbreviated name of the language from which they were taken; as [F.] French, [It.] Italian. Foreign words partly modified in form or pronunciation, or words or senses used specifically in some foreign country, are usually marked by the name (generally abbreviated) of the country or region in which they are used or whence they come; as [S. Am.] South America, [Egypt.] Egyptian. The word *dialectic* is used to mark such words as have place in a recognized dialect, and *provincial* to mark rural as opposed to metropolitan usage, or that restricted to colonial or outlying regions, as distinguished from general usage. Words adopted from native tongues, or from the languages of previous colonists by English residents in India, etc., are marked [Anglo-Ind.], etc.

Words that are not used in the best literature are marked [Colloq.], [Slang], [Cant], etc. *Colloquial* words, altho not in literary use, are

**Rank and Worth of Words Indicated.** such as might be used in familiar conversation by the most cultivated people, while *slang* is intended to characterize such terms as have no proper place in cultivated language, altho not necessarily vulgar, but such as may perhaps be destined to attain reputable standing in the future.

If the living power of the English language is to be maintained it must continue to embrace the best that it can find in the common speech, as by natural processes it has done in the past. For these reasons slang words in considerable number will be found recorded in this work. Only that part of slang which is merely the expression of passing fancy or varying whim has not been included, because it is quickly displaced by that which is vigorous, expressive, and picturesque, and that alone is given place.

Variant forms are commonly placed directly after the ety-

mology (or, if they correspond only to a single meaning, directly after that meaning) and marked with a double dagger (‡) if they are living, otherwise with the usual mark for obsolescent forms (†). These forms include not only alternative spellings but also synonymous terms from different roots, as in the case of technical terms in which one of several names given to a thing has supplanted the others. Where variant forms are important, they are given also separate entry with a reference to the preferred form, but often, especially in the case of obsolescent and simple variations of spelling, entry as a variant is the only recognition given them. Where the variant form is of nearly the same importance as the preferred form, the two are braced together before the definition.

Words belonging rather to the past than to the present, such as obsolescent words, recently revived obsolescents, or affectedly old-fashioned forms, are designated as [Archaic]. In this work all terms are considered obsolete that have not been used by writers of authority since the year 1800. Obsolete words or senses are marked with a dagger (†). Such important words in the Bible and the Book of Common Prayer, however, as are no longer in use elsewhere have been marked [Archaic]. Words seldom used are marked [Rare].

A still broader characterization is made by printing many relatively unimportant words, with their definitions, in small type. In this class are included nearly all obsolescent and foreign words, and many rare, archaic, and technical terms, as well as phrases and compounds associated with a principal word.

Further features characteristic of this work are the giving in appropriate places, and only so far as it is permissible for the lexicographer so to do, certain fundamental rules, as of *grammatical* and *rhetorical construction*; rules correcting the common *errors of speech*; and rules governing the formation of the *plurals of nouns* and the correct *forms of address* used in writing.

Much help may be obtained from the plan followed of indicating the correct Prepositions to use in connection with other words.

The misuse of these little words is one of the most common errors, and one difficult to avoid; their correct use gives coherence, firmness, and compactness to style, and is an indispensable aid to lucidity.

After many verbs, adjectives, etc., will be found a note, "followed by *by*," "followed by *in*," or the like. At the end of many synonym groups, also, appears a heading "Prep.," with examples indicating how various prepositions may be used in connection with the key-word of the group in different connections.

Such foreign phrases as the English-speaking person may find it essential or desirable to know are given place in a separate department (pp. 2781-2791). In this department the

specific aim is to give the reader a clue to foreign phrases that occur in English literature, law, and speech. Some foreign words and phrases the use of which is frequent in English, and the commoner Latin law terms used in English law, will be found explained in their proper alphabetical place in the main vocabulary of the dictionary. Wherever possible, foreign quotations have been traced to original sources. It must be borne in mind that many foreign phrases, in actual English quotation, have been wrested more or less from their proper original meaning, and that phrases, such as mottoes of institutions and of persons, have from time to time been constructed with little reference to pure classic usage. Therefore, persons who consult this department will, perhaps, need occasionally to remember that a phrase required may be entered in an alphabetic place not answering to that which the form of the phrase, as encountered by them in reading, would demand. Care was taken to conform to the best text accessible in each case.

## XI. CHRONOLOGICAL DATA.

In the effort to present an accurate statement of the dates of historic and other events, much time has been consumed by careful examination of authorities. Where these differ, as is not infrequently the case, that date has been accepted which seems to have the greater historical basis of truth. While it has been necessary to consult a great many works, especially in the search for the more obscure

data, the broad plan was followed of accepting as correct the leading authorities of each country in each department of chronology—biographical, bibliographical, historical, etc. Thus for men and women of note in American history the editors relied chiefly upon American publications; for those in British history upon works published in Great Britain and its colonies; for those in German history upon the encyclopedias of BROCKHAUS and MEYER; and so on throughout. For Biblical characters and events, the chronology of Archbishop USSHER was followed in part, but in the majority of cases no attempt was made to fix definitely such dates as are conceded by scholars to be beyond the possibility of exact historical computation. The dates in church history were obtained from such standard sources as *The New Schaff-Herzog Encyclopedia of Religious Knowledge*, *The Catholic Encyclopedia*, etc., and for those connected with secular history and its personages recourse was had to the best histories of the various countries concerned, as *The Jewish Encyclopedia*, the *Dictionary of National Biography*, *The Encyclopædia Britannica* (eleventh edition), and other equally authoritative works of reference.

With regard to the facts of ancient history it should be borne in mind that many dates prior to the commencement of the Christian era must be considered as only approximately correct. This is due

### Lack of Harmony in Ancient Chronological Systems.

on the one hand to the almost complete absence of reliable written records among primitive races and on the other to the complications incident to the peculiar methods of chronological computation obtaining among ancient peoples. These systems were almost invariably based upon some salient event, from the time of which all subsequent dates were reckoned. It is also true that in the case of many comparatively recent events the authorities often differ considerably. This is largely due to the changes made from time to time in the calendar, notably that made by Pope GREGORY XIII. in 1582, which, while adopted at once in Spain, Portugal, and parts of Italy, was not introduced in the Protestant states of Germany until 1700 or in Great Britain until 1750. This led to two different systems of dating, one ten or eleven days ahead of the other, which greatly increase the difficulty of fixing the time of many contemporary events.

Dr. ISAAC K. FUNK, the Editor-in-Chief, brought to the conception and completion of this revision the genius for comprehensive plan joined with marvelous mastery of detail—the wide, accurate, and various scholarship in union with the keen practical sagacity, alert to perceive the needs of busy men in the modern world—by which he was able originally to make the STANDARD DICTIONARY a work of such acknowledged worth and power. Not less important, perhaps, was the remarkable gift for organization that could select, from all parts of the world and from every field of human endeavor, scholars of highest rank and practical experts foremost in their several departments, and so coordinate the labors of these as to secure one great unity of final result. With advance of years his ripe experience and constant studious review of the original work had convinced him that the principles on which the STANDARD DICTIONARY had been made admitted of more extended application on the same broad basis of simplicity combined with accuracy. He recognized not less clearly that the rapid advance of the world in knowledge and achievement required the addition of what is new to what was of proved excellence in the old to make a dictionary that should represent the present, and not alone the past. This great undertaking, thus devised, he had practically completed before his death. The NEW STANDARD DICTIONARY, now completed, stands as the crowning work of his great life.

To the Managing Editor, Dr. FRANK H. VIZETELLY, who was closely associated with Dr. FUNK in his work for more than twenty years, too high tribute cannot be paid for the administrative ability, the critical discernment, the wide lexicographic knowledge, and the loyal and tireless industry with which he has conducted the work from beginning to end.

To Prof. CALVIN THOMAS, Consulting Editor, hearty thanks are due for valued assistance and wise counsel during the initiatory stages and also during the progress of this work.

ESPECIAL APPRECIATION of the practical assistance rendered by the various SECRETARIES and DEPARTMENTS OF THE UNITED

STATES GOVERNMENT is hereby acknowledged. Thanks are tendered particularly to the SECRETARY OF STATE and his DEPARTMENT; to the DEPARTMENT OF AGRICULTURE, including the DIVISION OF ENTOMOLOGY and its CHIEF, and the WEATHER BUREAU, its CHIEF, and LIBRARIAN; to the POST-OFFICE DEPARTMENT; to the DEPARTMENT OF COMMERCE AND LABOR; to the DEPARTMENT OF THE INTERIOR, including the UNITED STATES GEOLOGICAL SURVEY and its CHIEF; to the DEPARTMENT OF WAR and its SECRETARY; to the DEPARTMENT OF THE NAVY and its SECRETARY; to the SECRETARY OF THE TREASURY and his DEPARTMENT, especially to the DEPUTY CONTROLLER OF THE CURRENCY, to the BOARD OF UNITED STATES GENERAL APPRAISERS, and to the BUREAU OF THE MINT; to the UNITED STATES NATIONAL MUSEUM, SMITHSONIAN INSTITUTION, Washington, D. C.; and to the COLLECTOR and the OFFICERS of the UNITED STATES CUSTOM-HOUSE at the Port of New York.

THANKS are tendered to the OFFICERS of NEW YORK UNIVERSITY, the NEW YORK PUBLIC LIBRARY, COLUMBIA UNIVERSITY LIBRARY,

and the MERCANTILE LIBRARY; to the AMERICAN MUSEUM OF NATURAL HISTORY, the METROPOLITAN MUSEUM OF ART, the NEW YORK ZOOLOGICAL SOCIETY, and the BOTANICAL GARDENS, New York; to the COMMISSIONER OF POLICE and the POLICE DEPARTMENT of New York city; to the COMMISSIONER and CHIEF of the FIRE DEPARTMENT, New York city; and to the OFFICERS of the NEW YORK POST-OFFICE, for courteous assistance; also to a large number of other contributors and friends distributed over all the world, who rendered great help by voluntary contributions and suggestions.

THE FUNK & WAGNALLS NEW STANDARD DICTIONARY OF THE ENGLISH LANGUAGE, which with each successive revision is kept abreast of the times, is now offered to the public with the confident hope that the favor so liberally granted to the original work may be extended in even larger measure to this, with its many new elements of value and efficiency.

# SPELLING AND PRONUNCIATION.

## 1. The Standard of Pronunciation.

THE primary function of an English dictionary is to record the facts of usage as regards the form, the meaning, and the pronunciation of English words. The book must be first of all a record of fact, not of opinion, dogma, or personal taste. Language in every phase of it is ultimately a matter of conventional usage, and there is no higher court of appeal. But this does not mean that the dictionary has no concern with what ought to be, in contradistinction to what is. On the contrary, it must often pass judgment and give counsel, thus becoming an "authority." This is what the public expects and has a right to expect.

There are two reasons why the dictionary can not, if it would, evade the responsibility of passing judgment. In the first place, usage is infinitely various, so that the whole of it can not possibly be recorded. It varies with the time and place, with the culture and social status of the individual, with the speech-habit of the community. A selection of the usages to be recorded must inevitably be made, and selection involves a critical act. To include or to exclude is to pass judgment.

In the second place, change is the law of life for a spoken language, and usage is therefore never absolutely binding. We call it binding in proportion as it has endured for a long time and has been accepted by everybody. Thus arise the so-called laws of language—brief, summary statements of accepted usage. Whatever runs counter to those laws must be regarded, provisionally at least, as incorrect or bad; and it is the plain duty of the lexicographer to state the fact as it is. But all things are in a flux, and that which is bad to-day may become good to-morrow. A fashion may spring up in defiance of previous usage, of logic, even of common sense; if it prevails it is a part of the language, and must be recognized as such by the lexicographer. But when may a usage be said to have prevailed? After a decade, or a century, or five centuries? How large a following must it have to give it entire respectability? To such questions no precise answer is possible. The dictionary is a record of fashion, and fashion varies with the time and place. Hence the lexicographer can not, if he would, avoid passing judgment on the facts of usage.

The bearing of all this on the subject of pronunciation should be obvious. It is customary to say that the "standard" is the usage of the best speakers. But who are the best speakers? Are they the literary class of London, or of New York, the scholars of New England, the merchants of Liverpool or Chicago, the gentry of the South? Shall we keep in view the language of refined conversation, that of formal public discourse, that of the stage, or that of the pulpit? To such questions, again, there is no scientific answer possible—no answer that is not more or less the voice of habit and prejudice. The educated person who is conscious of a good upbringing is apt to assume that his own way of speaking is normal English, and that those who speak differently speak "brogue" or "dialect." But the truth is that we all speak dialect—the dialect of our social group. This is the condition by which we make ourselves easily understood and avoid seeming odd.

It may be that at some future time the English-speaking peoples will call an international orthoepic congress, with a view to discussing and compromising dialectal differences and agreeing on a convenient eclectic norm, which could then be taught in the schools by means of standard phonographs. The lexicographer would then have a real if more or less artificial "standard"; but until then the idea of a standard pronunciation must remain somewhat chimerical. In the last analysis it must mean some one's preference. But no one has been appointed supreme arbiter or given the right to speak with "authority" for the two hundred millions, more or less, who now use the English language.

Under such circumstances the dictionary will do its duty best by faithfully reflecting the facts of refined usage and describing the more important of the existing differences, without claiming superiority for the speech-habit of any particular locality or social group on either side of the ocean. We say "refined usage"; for in general slang and vulgar speech and provincial dialect must be left to special dictionaries cover-

ing those fields. On the other hand, the larger differences that characterize the speech of great masses of educated folk in different parts of the English-speaking world must be taken into consideration. This means that we must have an alphabet capable of recording the differences in question.

## 2. The Necessity of Respelling.

It is unfortunate that pronunciation can not be exactly shown by means of the English alphabet as ordinarily employed, but such is the fact. This is because we are in the habit of denoting different sounds by the same letter and the same sound by different letters. The conditions are such that, if several educated persons were to hear a word for the first time, they would probably spell it differently; and if they were to see a word for the first time they would pronounce it differently. If, then, we wish to avoid ambiguity it is necessary either to employ diacritical marks or else to respell the word with symbols that are unmistakable.

The earlier lexicographers resorted to diacritical marks—dots, curves, numbers, or other signs—placed over or under the letter; and this method is still largely in use. But it is unsatisfactory because so many marks are required. If our spelling were nearly phonetic; if, for example, the letter *a* had only the two sounds it has in *bat* and *bar*, it would be easy to mark the latter, say, as *ā*, and there would be no need of respelling, so far as that particular letter is concerned. But the letter *a* is used also for the vowels heard in *fate*, *fare*, *fall*, *fast*, and in the first syllable of *about*. This necessitates five more marks for *a*; and since the total number available in the printing-office is not very great, it becomes practically necessary to use the same marks over and over again, in connection with other vowel letters, to denote various groups of sounds. There must be a mark to show when a letter is silent, a mark to show whether a vowel is long or short; and there must be accent-marks. And so it will often happen that the same letter must have two or three diacritics.

All this leads to confusion. The marks offend the eye, they make trouble for writer, printer, and proof-reader, they get worn and broken in the process of printing. Worst of all, they fail to do the work for which they are designed, since they leave us, just as in the ordinary spelling, with many different symbols for the same sound.

It is therefore better to respell, and this is the method adopted in recent years by most of the dictionaries. That we should be thus obliged to respell words in order to show how they are pronounced is a pity and an absurdity, since the original and proper function of spelling is to do that very thing. The maker of a German, an Italian, a Spanish dictionary has rarely any need to respell a word in order to tell his own countrymen how the word is pronounced. But in English that necessity exists and must continue to exist as long as our so-called orthography continues on its present footing. Hence arises the problem of a scientific alphabet—something not at all identical with the question of spelling-reform. The more tenaciously we cling to our present orthographic habits, the greater the need of an accepted notation which can be used, as the ordinary spelling can not be used, to show unmistakably and with a fair degree of precision how English words are pronounced.

## 3. The Problem of a Scientific Alphabet.

By a scientific alphabet is meant, ideally speaking, an alphabet in which each letter denotes one sound only, and each sound is invariably denoted by the same letter. The latter principle is more important than the former. To use two letters for the same sound does no harm except to cumber the alphabet with a useless symbol and to force on the writer the necessity of choosing between them on other than phonetic grounds. On the other hand, to denote two or more sounds by the same symbol may mislead the reader, which is a far more serious matter. For instance, if it is understood that *c* and *s* always have the same sound before *e*, the reader knows that *cent* is phonetically the same

as *sent*; but if *c* may also have the sound of *k*, he can not tell whether *cell*, for instance, means *settle* or *kettle*.

The ideal of a scientific alphabet is easy to formulate but hard to realize; nor is its complete realization practically of great importance. The total number of speech sounds used by mankind is beyond computation: a universal scientific alphabet would contain so many symbols that no one could read or remember them. And even if one regards only the English language and its dialects, the number of sounds that can be distinguished by an expert phonetician is much greater than is popularly supposed. At a moderate estimate he would need a hundred symbols. But such an alphabet, while useful in phonetic science, would be worse than useless in a dictionary for everybody. What is needed there is a golden mean between the expert's too many and the Latin alphabet's too few. Just as the housekeeper would be hindered rather than helped by a clock marking fractions of a second, so the average user of a dictionary is best served by a phonetic notation confined to what may be called the principal sounds of the language—those which can be discriminated by everybody who is willing to give a little attention to the subject—it being duly recognized that each symbol denotes not an invariable physical fact, but a type of sound that varies more or less within narrow limits. Thus the *n* of *tin* is not exactly the same as the *n* of *inch*, and the *t* of *bat* is slightly different from the *t* of *battle*; nevertheless, we can get along very well, even in an alphabet calling itself scientific, with one *t* and one *n*. What the "principal sounds" are, and how many symbols are therefore needed, is a question of some difficulty, about which there is room for a difference of opinion. It is a question to be answered by scientific analysis tempered by considerations of practical utility.

The prime requisites of a good notation are that it be easy to learn, easy to read, and easy to remember. This means that the familiar Roman letters are preferable to analphabetic characters such as those of Bell's "Visible Speech," which are eminently scientific but hard to learn and easy to forget. Minor requisites of a more esthetic nature are that the symbols be typographically congruous, *i. e.*, taken from the same type-font, without intermixture of Latin and non-Latin letters, or upper- and lower-case, or roman and italic forms. Diacritical marks should be as few as possible. Diphthongs should be denoted by their proper component parts; and if, for the reader's convenience, two letters are used for a simple sound, as *sh* for the consonant in *shy*, the two letters should be tied (*sh*), to show that the sound is not composite. Finally, it is better to use the fundamental vowel letters with their original Latin values. This brings the notation into accord with international phonetic science and makes it a help rather than a hindrance in the study of Latin, French, German, Spanish, and Italian. It is really quite impossible to devise a satisfactory scientific notation if the diphthong which we miscall "long *i*" is to be denoted by *i* and a different tho short sound by *ī*. The two sounds do not stand to each other in the relation of "long" and "short" any more than do the *a*'s of *fat* and *fate*, or the *e*'s of *evil* and *devil*.

#### 4. The Scientific Alphabet of 1877.

In the year 1877 the American Philological Association agreed on a notation which, with some slight modifications, was used in the first edition of this Dictionary and has often been referred to as the "scientific alphabet." The salient features of this notation were the use of the vowel forms *a*, *e*, *i*, *o*, *u* in their Latin values and the proposal of the three new letters *ā*, *ē*, *ū*. Thus the complete vowel-scheme consisted of the letters *a*, *a*, *e*, *i*, *o*, *e*, *u*, *ū*, which, when used without a mark of quantity, were to denote the sounds heard in *artistic*, *bat*, *pen*, *pin*, *poetic*, *not* (as pronounced with slight rounding), *full*, *but*. The corresponding long vowels, as heard in *art*, *bare*, *day*, *marine*, *note*, *north*, *fool*, *burn*, were to be marked if necessary with a sign of length.

The eminent scholars who devised this scheme hoped that the new vowels would gradually win their way into ordinary print. Just as, a few centuries ago, the public had accustomed itself to the useful differentiation of *u* and *v*, *i* and *j*, might not the public of the nineteenth century accustom itself to the no less useful differentiation of *a* and *ā*, *o* and *o*, *u* and *ū*? If this were to happen there would, of course, be a period of transition during which the new letters would be gradually gaining ground in public favor in the face of more or less opposition. To disarm this opposition, and facilitate the popular acceptance of the new way of spelling, it was deemed expedient not to insist on the strict ideal of a scientific alphabet, but to compromise somewhat freely

with the ordinary spelling. So the letter *c* was kept, but always with the sound of *k*. At the same time *k* was not rejected, and *q* and *x* were admitted as alternatives. Thus one might spell *quit*, *cwit*, or *kwit*; *fox*, *focs*, or *foks*. The digraphs *th*, *sh*, and *ng* were retained for the simple sounds heard in *thin*, *ship*, *sing*, and *dh* and *zh* were recommended for the simple sounds heard in *this* and *azure*. For the *ch* of *chin* and the *j* of *jaw* the familiar *ch* and *j* were retained.

#### 5. The Revised Scientific Alphabet.

It has been seen how, in the alphabet of 1877, scientific rigor was in some degree sacrificed to the hope of popular acceptance. But this hope was not fulfilled to a justifiable extent. In the course of time the question of a better notation—one somewhat more in accord with the new science of phonetics—began to be mooted among educationists. In the summer of 1903, on the initiative of the Department of Superintendence of the National Education Association, a conference was called at Boston for the purpose of taking steps toward the adoption of a phonetic alphabet of medium precision, such as could be used in the elementary teaching of phonetics, and also in dictionaries and textbooks where words are respelled for pronunciation. It was thought, naturally enough, that this double benefit could be got by this one effort; and that, if the experts could agree on a particular notation as on the whole the best, and if then the public could be induced to accept it, such a standard phonetic alphabet would have some very important educational uses in quickening the phonetic sense of our people.

The Boston conference, which comprised delegates from the Department of Superintendence of the National Education Association, the American Philological Association, and the Modern Language Association of America, quickly agreed that the alphabet of 1877 was excellent in its main features, but needed some revision in matters of detail. A joint committee of five was accordingly appointed, with instruction to consider the whole subject carefully and if possible to bring about an agreement of the experts on a phonetic alphabet, based on the alphabet of 1877. In 1904 this joint committee published an elaborate report, in which the entire problem was carefully traversed and an alphabet was submitted as a basis of agreement. The report of the joint committee, which was acceptable to the National Education Association Committee, was then sent to the two philological societies, which appointed committees of revision to investigate and report. The entire matter was then studied afresh by the two committees of revision, and the result of their labors was a second printed report, which in the main indorsed the report of the joint committee, but proposed certain amendments in identical form. This second report, with the amendments, was formally adopted by the two philological societies in 1905. We shall refer to it as the A. P. (American Philologists') alphabet. The A. P. alphabet, as finally adopted, was not altogether satisfactory to the Committee of the Department of Superintendence of the National Education Association, which committee accordingly submitted to the National Education Association at its meeting at Boston, July, 1910, an alphabet that seemed to it better adapted to educational needs. The Association ordered this alphabet printed and distributed among its members, and that it be submitted to the Department of Superintendence at its next meeting. It was so submitted at the meeting of the Department at Mobile, Ala., February 24, 1911, which body approved and adopted it. This is the alphabet employed in Key 1 of this Dictionary. We shall refer to it as the N. E. A. alphabet. The points in which it differs from the A. P. alphabet are as follows:

(1) *The notation of the a sounds.*—For the five sounds heard in *bat*, *bare*, *artistic*, *art*, *ask*, the A. P. alphabet has, respectively, the symbols *æ*, *ā*, *a*, *ā*, *ā*, whereas Key 1 employs *a*, *ā*, *a*, *ā*, *a*. The crux here lies in the selection of the best symbol for the vowel of *bat*, since, with that question settled, the other symbols follow almost as a matter of course. The ligature *æ* is employed for the sound in the alphabet of the International Phonetic Association, and hence, quite generally, in the literature of phonetic science. It is used in the great Oxford Dictionary. This is obviously a strong point in its favor, and it must be admitted that, for the purposes of an international alphabet, *æ* is the best symbol. The sound hardly occurs in French, German, Italian, or Spanish; it is thus quite natural that Continental phoneticians should prefer to use the ordinary print form *a* for their own ordinary *a* sound, and to denote the peculiar high English vowel by the Anglo-Saxon ligature *æ*.

But in an English dictionary such a notation has its inconveniences: It necessitates the virtual disuse of the familiar *a* (the sound of *a* in *artistic* being extremely rare in English), and the use of the ligature in an immense number of very common words ordinarily spelled with *a*. Such respellings as *kæt* for *cat* and *hænd* for *hand* seem to the ordinary reader to make a simple matter difficult.

This being so, and also because the upright italic *ā* (with a macron as sign of length) has from the first been used in this Dictionary for the so-called Italian *a* and is now familiar to a multitude of readers in that value, and because, finally, it is deemed desirable that the form *a* should come into use in ordinary print for the sound in question (there being no likelihood that the public will take up with the Anglo-Saxon *æ* for the vowel of *bat*), the old notation for the *a* sounds has been retained, with the exception that *α* is used for the shortened *ā* as heard in *artistic*, but not for the final vowel of *sofa*, and with the addition of *â* for the vowel that varies between *a* and *ā*. The use of these, as of all other symbols, will be explained below.

(2) *The y of yet and the j of jet.*—These two hang together. For the former the A. P. alphabet has *j*, for the latter *dʒ*, while Key 1 employs *y* and *j* respectively. Here again, from the point of view of international phonetic science, the former is the better notation; but for an eye accustomed only to the English language the latter is the more natural.

(3) *The sh of ship and the ch of chip.*—For the former the A. P. alphabet has *ʃ*, for the latter *tʃ*; Key 1 employs *sh* and *ch* respectively. This is again simply a concession to English visual habit.

(4) *The th sounds.*—For the *th* of *thin* the A. P. alphabet has *þ*, for the *th* of *this* *ð*; Key 1 employs *th* and *th*—another concession to English visual habit.

(5) *Syllabic l, m, n, r.*—For these the A. P. alphabet has *ˈl*, *ˈm*, *ˈn*, *ˈr*, spelling *battle*, *bottom*, *fasten*, *sinner* as *bætˈl*, *bətˈm*, *fæsˈn*, *sɪnˈr*. Omission of the apostrophe involves ignoring the very audible difference between the *l* of *battle* and the *l* of *battling*, for which a sign is really needed. But the apostrophe, which naturally suggests something omitted, is not a good sign for the purpose and might lead to confusion when used in connection with accent-marks, as in *batˈl*, *tɪˈketˈl*.

From what has been said it will be evident that the N. E. A. Alphabet, intended as it is for the general public, is sufficiently precise for all practical purposes, but occasionally sacrifices the extreme of precision to simplicity and distinctness. Just what this means will appear from the detailed explanation of the symbols in § 8 below. In this Dictionary, the syllable which has the principal stress is marked by an acute accent (ˈ) after it. Syllables that have less stress than the primary are marked with a secondary accent (ˈˈ).

## 6. The Symbols for the Unstressed Vowels.

It is one of the deeply ingrained characteristics of the English language that unstressed vowels are more or less "obscured" in the utterance. This is especially the case in the syllable just before or just after the primary accent. Thus the middle syllable of *monarchy*, *misery*, *primary*, *murmuring*, *martyrdom* is pronounced by most speakers with the same vowel. This vowel Key 1 denotes by the letter *ə*. It is a mistake to regard the "obscuration" of unstressed vowels as due to slovenly pronunciation or colloquial weakening. The phenomenon is a law of the language, and belongs not only to familiar talk, but also to the most formal and deliberate speech. There are, indeed, certain endings, such as *-ment* and *-tor*, which are more apt to have the *ə* in talk than in formal utterance; but these are exceptional cases. Speaking broadly, the "obscuration" of an unstressed vowel is just as much a part of the language as are its laws of grammar. One who should attempt to read a passage, it matters not whether lofty or colloquial, and to sound all the unstressed vowels "distinctly," *i. e.*, as they would be sounded in stressed syllables, would at once be set down as a person unacquainted with the English language.

Nor can we rightly say that the so-called obscuration is a matter of shortening, or of "variation" between two different types of stressed vowel. No amount of shortening of the *e* in *very* will produce the *e* in *misery*; the latter is a different vowel. Nor can we say that the *e* of *misery* is a vowel which "varies" between the *e* of *very* and the *u* of *but*. It does not vary at all, but is as uniform as any vowel in the language. Never does it sound like the *e* in *very* or the *u* in *but*. In short, it is a vowel *sui generis*, and as such should have a symbol in

any scientific alphabet. There are, indeed, cases in which some speakers avoid and disapprove the *ə* sound which the many pronounce; thus, some make a point of saying *rek'ərd* instead of *rek'ərd*. But if there are such differences of usage and opinion, a symbol is needed by which they can be clearly indicated to the eye. To have and use a letter capable of showing how one *does* pronounce has nothing to do with the question how one *should* pronounce. Phonetics is a matter of science; orthoepy, a matter of taste, depending on instruction or habit.

It is true that if there were but one unstressed vowel in English there would be no need of a letter for it, however variously the usual spelling might denote it. But there are several; and one in particular appears in such a variety of spellings that it is best to have a letter for that also. This is the vowel heard in the last syllable of *habit*, *candid*, and in the first syllable of *renew*. It is a little nearer to the *i* of *sit* than to any other accented vowel, but almost as near to the vowel of *set*. One must remember that in passing from the *e* of *set* to the *i* of *sit* the frontward movement of the tongue is very slight—only the minute fraction of an inch. If then the *i* in *sit* is uttered with a weak action of the tongue, such as regularly goes with an unstressed vowel, the result is slightly to "lower" the *i* toward *e*. Thus, one gets a vowel which is neither *i* nor *e*, but between the two and readily identifiable with either. One can easily imagine that one pronounces *habit* with an *i* and *valley* with an *e*; but it is not really so. It is the nature of this vowel, as also of *ə*, to be unstressed. If it be stressed ever so little, to show its kinship with some "distinct" vowel, its character is destroyed.

If the second vowel of *habit* were always written *i*, one could dispense with a special symbol for it and ignore the difference between the *i* of *bit* and the *i* of *habit*. Again, if the vowel in question were always written *e*, as it is in the first syllable in *renew*, *depress*, etc., one could get along with *e*. But one does not like to write *valley* as *vale*, or *city* as *cite*; nor does one wish to respell *palace*, *agate*, *average*, as *pales*, *aget*, *averej*, or *captain* as *kaptēn*, when it is stated expressly that *e* has the sound of *e* in *met*. It is sometimes best to keep a bad notation to which everybody is accustomed; but to change from a bad one that is familiar to another bad one that is new is indefensible.

Since the vowel under consideration is really a half-fledged or imperfectly formed *i*, it may very well be denoted by an *i* without the dot. Preference is given to that symbol instead of to the dotless *i* with a breve, suggested in the A. P. alphabet.

Aside from *ə* and *i*, there are no unstressed vowels that seem to require special symbols. See §§ 7, 8, and 9 under *o*, *e*, and *u*.

## 7. The Marking of the Quantity of Vowels.

By the quantity of a vowel is meant, properly speaking, the relative amount of time taken in uttering it. It is necessary to say the "relative" time, since no absolute unit of measurement is practicable. The tempo of speech varies greatly. Some persons habitually speak more rapidly than others, and the same person uses a different tempo according to the occasion or the state of his feelings. Vowels may be prolonged in singing, in calling, for emphasis, or under the varying influence of the sentence-accent. It is thus impossible to fix a unit of length with mathematical accuracy, but every one can perceive gradations of relative length. A close observer may grade vowels as very long, long, medium, short, and very short. Almost any one, with a little attention to the subject, may hear the three grades, long, medium, and short. For ordinary purposes, however, it suffices to distinguish graphically only the two grades, long and short. This is what our conventional spelling undertakes to do, but with very indifferent success.

The usual way of denoting a long vowel, in the conventional spelling, is by means of a biliteral symbol, like the *oa* of *soap*, the *oo* of *door*, the *ou* of *pour*, the *o*+consonant+silent *e* of *note*—all for long *o*. The device for showing that a vowel is short is to double the following consonant, as in *bitter*, *dapper*, *juggle*. Neither of these methods, however, has been applied systematically; many biliteral symbols may denote a short sound, like the *ay* of *says*, the *oe* of *does*, the *eo* of *leopard*, the *ea* of *head*, and very frequently, as in *epic*, *tonic*, *river*, the consonant is not doubled after a short vowel. In a scientific alphabet neither of these methods is acceptable, since every symbol ought to be self-contained, *i. e.*, to show in itself what it stands for without depending on anything else. There is but one *t* in *bitter*: to write two, for the purpose of distinguishing the word from *biter*, is

quite wrong, since the difference between the two words resides in the vowel, not in the consonant.

Another difficulty begotten of our conventional spelling and the confused terminology that has grown up in connection with it is that notions of quantity have come to be mixed up in the general mind with notions of quality. Thus one hears of the "long a" of *paste* and the "short a" of *past*, when both vowels are long. The vowel of *met* is called "short e" and that of *mete* "long e"; but the real long of the e in *met*, while common in some other languages, is little used in English, tho one may hear it at least half-long when it is followed by a voiced consonant in an accented syllable, as in *beg*, *says*, *blend*. So, too, the real short of the e in *mete* is very rare in English, tho it may be heard in the first syllable of *Eolian*. What is called "long u" is generally a diphthong having no quantitative relation whatever to the so-called "short u" of *but*. In brief, the words "long" and "short," as popularly used to define vowel-quantity, are meaningless and misleading.

Now, in any phonetic notation that aims at a high degree of precision it is important to have a sign of length that means prolongation and nothing else. To carry out that principle strictly, however, would require several symbols more than appear in the N. E. A. alphabet. Most of the vowels are either open or close, and each variety may be long or short. Thus, taking the historical e sounds for illustration, one would need to distinguish the open short in *met*, the open long in *blend*, the close long in *they*, and the close short in the first syllable of *aerial*. But such refinements would be more bewildering than helpful to the general reader. Therefore, this alphabet ignores the open long e of *blend*, which always takes care of itself in pronunciation, and also the close short in *aerial*, which is of rare occurrence. Thus only two signs are used for the e sounds: e for the open short, and ē for the close long. This means, however, that the macron, which is primarily a sign of simple length, usually connotes also a slight difference of quality. Thus, *magnate* is respelled as mag'nēt, tho the e is not really long—not much, if any, longer than the stressed e of *magnetic* (mag-net'ik).

Similar compromises are made in a few other cases—always for the sake of simplicity and on the general theory that, in a notation for popular use, a very little imprecision is better than a great deal of bewilderment. For details, see the following section.

## 8. The Symbols and the Sounds They Denote.

For the purpose of explaining how the symbols of the N. E. A. alphabet are used in Key 1 of this Dictionary, and how their use is related to the more important variations of English pronunciation, these symbols are now considered. As to the mode of production of the various sounds by the organs of speech, and the technical names they bear in phonetic science, the reader is referred to the Dictionary itself under the letters A, B, C, etc.

### A. Vowels and Diphthongs.

The symbols are: a, ā, a, ā, a, e, ē, i, ī, o, ō, e, ē, u, ū, u, ē, ai, au, ei, iu, iū.

#### (1) a and ā.

These denote the vowel heard short in *bat*, *cap*, *lack*, and long in *bare*, *fair*, *pear*, *heir*. Many speakers, especially in England, pronounce the vowel of *bear*, *fare*, etc. (ā before r), a little higher than that of *bat*, so that it sounds very much like the prolongation of the e in *met*, *very*. It is further to be noted that a is regularly prolonged before a voiced consonant in monosyllables, especially if they bear the sentence-accent. Thus in *stand*, *villain*, *stand!* the vowel of *stand* is long, while in *standing* it is half-long, and in *inkstand* it is short. Note the similar difference in *mankind* (a), *every man* (a), *behold the man* (ā)! and in *has* (a) *he come?* *he has* (ā). Strict accuracy would thus require that the pronunciation of *has* be given as haz or hāz, according as the word is used. It is also often heard as hāz or əz. In such cases a is used as representing the normal vowel, and the variants due to increase or decrease of stress are ignored.

#### (2) a and ā.

This vowel occurs chiefly before r; thus, a in *artistic*, *cartoon*, and ā in *art*, *hard*, *garden*, *calm*, *alms*, *father*. Most often the unstressed

or becomes ər, as in *separate*, *monarchy*, *partake*. There is some variation in the length of ā; thus, it is longer in *mart* than in *martyr*, longer in *garden* than in *garler*. These slight variations are ignored in respelling, ā being used wherever the vowel is notably longer than in *artistic*. In American English the so-called "short o" of *hot*, *not*, *poppy*, *rotten* has for the most part lost its rounding, so that these words are pronounced hat, nat, papı, ratn. In all such cases e is used and the variant with a is ignored.

#### (3) a.

This letter is used for a vowel which varies between a and a, or between ā and ā. It occurs before f, s, th, sometimes before n + consonant. Examples: *ask*, *glass*, *past*, *basket*, *laugh*, *after*, *quaff*, *bath*, *path*, *aunt*, *lancet*, *dance*, *France*. The prevailing vowel in the south of England is ā, in the United States ā. The ancestor of both sounds is ultimately a, which rose to a in very early times and then, in the seventeenth century, became ā before a voiceless fricative, and sometimes before n + consonant. Thus the words which had been ask, path, became āsk, pāth. In the eighteenth century the tendency set in, in the south of England, to convert this ā into ā, but conservatives resisted and clung to the old ā. Gradually ā prevailed in London, and then the idea took root that pās was vulgar and pās affected. So refined speakers made a virtue of pronouncing an intermediate vowel, higher than ā but not so high as ā. It is this "refined transition," as it has been called, that is denoted by a. It is generally long, but may be short in unstressed syllables, as *wine-glass*, *cow-path*, or half-long in words of more than one syllable, as *basket*, *pastime*. The symbol a is used not to express a preference for the intermediate sound as more correct or more elegant, but simply as a short way of indicating that the pronunciation varies. Thus the respelling bāth means that the word is either bāth or bāth or between the two.

#### (4) e and ē.

As above stated in § 7, ē is closer as well as longer than e. Usually e stands for the open short vowel of *met*, ē for the close long of *may*. But e is employed also for the open sound when lengthened before a voiced consonant in emphatic monosyllables, as in *beg*, *blend*, *says*; and ē for the close sound when shortened in an unstressed syllable, as in *magnate*, *aerial*, *always*. So, too, in French and Spanish words, ē is used for the close short vowel of an unstressed syllable; thus, *Médoc*, *León*, are respelled mē-dək', lē-ōn'.

Many speakers, both in England and the United States, make ē a diphthong, the first element being a little higher than e, the second a little lower than i. Such familiar spellings as *veil*, *skein*, *rein* are a fairly exact rendering of this pronunciation. But as the final element is apt to be very faint, and the first element is a little closer than the e of *met*, it was deemed best to denote the sound by ē rather than by ei.

Examples of e: *set*, *ten*, *well*, *wealth*, *said*, *says*, *leopard*, *heifer*, *very*, *merry*, *bury*, *confess*; *oulet*.

Examples of ē: *bay*, *bail*, *they*, *veil*, *gate*, *great*, *taste*, *savior*, *danger*, *aorta*, *magnate*.

#### (5) i and ī.

Usually i denotes the open short vowel of *sit*, ī the close long of *seat*. But i is also used for the open sound when prolonged in emphatic monosyllables before a voiced consonant, as in *bid*, *big*, *sinned*; and ī for the close sound when shortened in an unstressed syllable, as in *Eolian*, *athlete*.

Examples of i: *bit*, *bid*, *fill*, *busy*, *hymn*, *build*, *spirit*, *delirious*, *misfit*.

Examples of ī: *marine*, *lean*, *piece*, *seen*, *scene*, *Cæsar*, *Peter*, *people*, *fear*, *belief*, *receipt*, *athlete*, *regent*, *Socrates*.

#### (6) i.

See above, § 6. This sound results from the weakening of a high front vowel when unsupported by the stress. It occurs in obscure syllables having i, y, e, or a in the regular spelling, as in *ability*, *city*, *Sunday*, *visible*, *difficult*, *renew*, *debate*, *palace*, which are respelled as ə-bil'ı-tı, sit'ı, sun'dı, viz'ı-bl, dif'ı-kult, rı-nıū'ı, dı-bət'ı, pal'ıs.

An unstressed medial i in words of Latin origin is apt to vary in pronunciation between ı and ə; thus, *visible*, *difficult*, *agitate* are heard now as viz'ı-bl, dif'ı-kult, aj'ı-tēt, and now as viz'ə-bl, dif'ə-kult, aj'ə-tēt. Careful speakers prefer the former pronunciation, which accordingly is the one given in the Dictionary; but the other, altho unapproved, is very common in ordinary conversation.

Certain combinations of consonants tend to prevent *i* from becoming *ɪ*; thus the ending *-ism* is always *-izm*, never *-iz̩m*. The ending *-ist*, when immediately following the primary stress, as in *typist*, is frequently *-ɪst*; in the second remove, as in *fabulist*, *Darwinist*, the *i* is more distinctly pronounced.

(7) *o* and *ō*.

The short sound occurs only in unstressed syllables, as in *poetic*, *elbow*. Except when final, and especially before *r*, it is apt to become *ə*; thus, *original*, *agony*, *history* are often heard as *ə-rij'ɪ-nəl*, *ag'ə-nɪ*, *his'tə-rɪ*. In such cases, however, careful speakers still pronounce *o-rij'ɪ-nəl*, *ag'o-nɪ*, *his'to-rɪ*. In New England dialect *o*, instead of the usual *ō*, is sometimes heard in *coat*, *road*, *stone*. The long sound is often diphthongal, in the south of England regularly so. The first element of the diphthong is a little less rounded than *o*, being virtually identical with *ə*. This is then further rounded during the act of utterance and ends in the labial semivowel. Such familiar spellings as *shoulder*, *know*, represent this pronunciation.

Examples of *o*: *rotation*, *Bohemian*, *hero*, *shadow*, *potato*, *balcony*, *dissonant*.

Examples of *ō*: *boat*, *note*, *goes*, *pour*, *door*, *ford*, *motion*, *devote*.

(8) *e* and *ē*.

The vowel *e* differs from *o* in being less rounded, more open. It is heard short in *autum'nal*, long in *au'tumn*. *Or*, *for*, *nor*, etc., have *ē* when emphatic; when unemphatic, either *e* or, more commonly, *ə*. What is popularly called "short *o*," the vowel of *hot*, *not*, *pop*, etc., is historically the more open, slightly rounded vowel *e*, and is still so pronounced in England. In the United States, however, the *e* has for the most part completely lost its rounding, so that *hot*, *not*, *pop* are usually heard as *hat*, *nat*, *pap*. In southern English *ō* and *ē* are not usually distinguished before *r*, but come together in a vowel which is between the two: thus, *mourning* and *morning* are pronounced alike. So, too, the vowel of *story*, which we denote by *ō*, is in southern English half-way between *ō* and *ē*.

Examples of *e*: *august'*, *hot*, *cod*, *bog*, *stolid*, *begot*.

Examples of *ē*: *Au'gust*, *author*, *north*, *Paul*, *awl*, *call*, *bought*, *caught*, *lost*, *off*, *moss*, *cloth*.

(9) *u* and *ū*

Here again, as in the case of *e* and *ē*, *i* and *ī*, there is a difference of quality as well as of quantity, *ū* as in *pool* being a little more rounded than *u* as in *pull*. In the interest of simplicity *u* is used both for the stressed vowel of *pull* and for the unstressed vowel of *value* (*val'yū*), tho they are not exactly identical. The *u* of the ending *-ture* varies between *ə*, *u*, and *iū*, *nature* being heard as *nē'chər* or *nē'chur*, and *literature* as *lit'ər-ə-čhūr* or *lit'ər-ə-tiūr*, or sometimes *lit'ər-ə-čhur* or *lit'ər-ə-čhə(r)*.

Examples of *u*: *push*, *pull*, *handful*, *could*, *hood*, *manhood*, *issue*.

Examples of *ū*: *rule*, *rude*, *blue*, *lute* (see below, under *iū*), *pool*, *mood*, *balloon*, *ghoul*, *soup*, *détour*.

(10) *ʊ* and *ū*.

The symbol *ʊ* denotes the so-called "short *u*" of *but*, which is much more common than *u*. It is apt to be prolonged before a voiced consonant in emphatic monosyllables, as in *buzz*, *fund*. But this long *ʊ*, which easily takes care of itself, is left without a symbol, *ū* being used for a vowel of slightly different quality, heard only before *r*. In the ordinary spelling *ū* is denoted in a variety of ways.

Examples of *ʊ*: *but*, *cud*, *buzz*, *fund*, *gunned*, *insult*, *blood*, *rough*.

Examples of *ū*: *burn*, *learn*, *fern*, *urn*, *girl*, *whorl*, *return*, *concern*.

(11) *ə*.

The symbol *ə* may be called the low unstressed vowel, *ɪ* being the high. The position of the tongue in uttering it is nearly the same as for *ʊ*, but the difference between *ə* and *ʊ* is clearly audible in such pairs as *sup*, *hyssop*; *luck*, *hillock*; *sum*, *winsome*. Almost any vowel, especially any low vowel, tends to become *ə* when unsupported by the stress. The tendency toward *ə* is stronger in southern English than in northern. In the United States there is a difference of usage in the pronunciation of certain endings, notably *-or*, *-tor*, and *-ment*, *ə* or *e* being heard in formal utterance, *ə* in ordinary talk. Thus, *senat-*

*or*, *monument*, *president* are ordinarily *sen'ə-tər*, *mən'yū-mənt*, *prez'i-dənt*, but in more formal utterance *sen'ə-ter*, *mən'yū-ment*, *prez'i-dent*. The great majority of the common unstressed endings have *ə*, with little or no variation of usage. Compare *urban*, *gallant*, *balance*, *potence*, *potent*, *quotient*, *farmer*, *famous*, *poison*, *righteous*, *faction*, *crocus*, *kingdom*. The unstressed prefixes *ad-* (*ac-*, *af-*, *al-*, *an-*, *as-*), *ob-* (*oc-*, *of-*, *op-*), *con-* (*col-*, *com-*, *cor-*), *sub-* (*suc-*, *sup-*, *sur-*, *sus-*) often have *ə* in common speech, but the distinct vowel is heard in more formal or precise utterance, altho much shortened.

(12) *ai* and *au*.

The symbol *ai* is used for the diphthong commonly called "long *i*," and *au* for that heard in *now*. In both symbols the first element varies somewhat. In parts of the United States *house* is not pronounced *haus*, but *haus*, or even *heus*, but *au* may be regarded as normal.

Examples of *ai*: *aisle*, *kaiser*, *rite*, *right*, *iber*, *sleight*, *cry*, *die*, *dye*.

Examples of *au*: *sauerkraut*, *now*, *thou*, *bough*.

(13) *ei*.

The symbol *ei* is used for the diphthong heard in *avoid*, *choice*, *noise*, *hoist*, *alloy*, *boy*, *toy*.

(14) *iu* and *iū*.

What is popularly called "long *u*," as in *tube*, is denoted by *iū*, and *iu* is used for the same sound when shortened in an unstressed syllable, as in *mutation*. In southern English regularly, and to some extent in the United States, the sound is a diphthong consisting of a fully rounded *ū* as in *pool*, preceded by the palatal semivowel. This pronunciation would properly be denoted by *yū*; thus, for *tube*, *Tuesday*, we should have *tyūb*, *tyūz'dɪ*, rather than *tiūb*, *tiūz'dɪ*. But many speakers, probably the majority of Americans, pronounce *tube* and *Tuesday* without the palatal semivowel and with a *u*-sound slightly less rounded than the *ū* of *pool*. This pronunciation is not well represented either by *tyūb*, *tyūz'dɪ*, or by *tūb*, *tūz'dɪ*. It is this *u*-sound, which may or may not be diphthongal, that is denoted by *iū*. To a certain extent this sound is heard even after *r* and *l*, where no *y* is pronounced. Thus *lute* (*liūt*) is distinguished from *loot* (*lūt*).

Examples of *iu*: *curator*, *duration*, *mulatto*, *superior*.

Examples of *iū*: *cute*, *dew*, *few*, *feud*, *suit*, *lure*, *mutual*.

## B. Consonants and Semivowels.

The symbols are: *b*, *d*, *f*, *g*, *ŋ*, *h*, *j*, *ch*, *k*, *l*, *m*, *n*, *p*, *r*, *s*, *sh*, *t*, *th*, *th*, *v*, *w*, *y*, *z*, *g*. Of these, *b*, *d*, *f*, *h*, *k*, *p*, *t*, *v*, *z* have the familiar and unmistakable sounds heard in *be*, *do*, *fee*, *he*, *key*, *pea*, *tea*, *vow*, *zest*; *g* sounds always as in *gel*, never as in *gem*, and *s* always as in *sit*, never as in *rose* or in *sugar*. These eleven letters, then, require no further explanation.

(1) *ŋ*.

This denotes the guttural nasal heard in *sing*, *singer*. It is a simple sound, not a compound of *n* and *g*. The *ng* of *finger* is composed of *ŋ* + *g* (*fiŋ'gər*), the *nk* of *bank* of *ŋ* + *k* (*baŋk*).

(2) *ch* and *j*.

These denote, respectively, the composite consonants heard voiceless in *chew* and voiced in *jaw*. Phoneticians analyze the former as consisting of *t* + *sh*, the latter as consisting of *d* + *g*. The presence of a *t* and *d* is recognized by the ordinary spelling in such words as *batch*, *badge*. It is to be observed, however, that *ch* does not consist of a complete *t* as in *tin* followed by a complete *sh* as in *ship*, but rather of a variety of *t* followed by a variety of *sh*. The elements blend in such a way that each loses a part of its phonetic character, and the result is virtually a simple sound. In the sentence *that shall never be*, no matter how rapidly one may speak it, the words *that shall never* make an exact rime to *satchel*, as they would do if *ch* were exactly *t* + *sh*. A similar statement would hold of the equation *j* = *d* + *g*. It is this consideration which justifies the retention of the familiar symbols, in lieu of *tsh* and *dg*, for these sounds.

(3) *l*, *m*, *n*, *r*.

Both the initial sound of *let*, *met*, *net*, *red*, and the final sound of *able*, *prism*, *fasten*, *flour*, are denoted by these letters respectively. The final sounds are called syllabic *l*, *m*, *n*, *r*, it being a peculiarity of these open consonants that they may partake of the nature of a vowel and form

a syllable. Phoneticians usually distinguish syllabic *l*, *m*, *n*, *r* by a diacritic mark and are thus enabled to show the difference between the *l* of *battle* and that of *batling*; the *m* of *prism* and that of *prismatic*; the *n* of *lighten* and that of *lightning*; the *r* of *center* and that of *central*. As noted above in § 5, the alphabet employed in Key 1 ignores this difference. In most cases syllabic *l*, *m*, *n*, *r* derive from an ordinary *l*, *m*, *n*, *r* preceded by an unstressed vowel which first became *ə* and was then still further reduced to the slight vocalic resonance peculiar to the consonant itself; thus *little* was formerly *litel*, pronounced lit'el, then lit'əl, finally lit'l. In the case of many words in *-al*, *-el*, *-an*, *-en*, etc., there is a difference of pronunciation: thus some pronounce *metal*, *pedal*, *idol* as met'əl, ped'əl, ai'dəl, while others do not distinguish these words from *mettle*, *peddle*, *idle*. On account of this divergent utterance it is often hard to say what the prevailing usage is—whether *-əl*, *-əm*, *-ən*, or simply syllabic *l*, *m*, *n*; but the tendency is toward the latter. One hears ped'ənt and ped'nt, ūrbən and ūrbn, etc. In the ordinary spelling syllabic *m* appears as simple *m* in *-ism*, *chasm*, *prism*, and some other words, but as *-am* in *madam*, *Adams*, as *-om* in *bottom*, etc. Syllabic *r* appears as *r* sometimes after a long vowel or diphthong, as in *flour*, but after a consonant always as *-ar*, *-er*, *-or*, etc. Such words are respelled *-ər*, as riv'ər, mūr'tər, not riv'r, mūr'tr, etc. On variant pronunciations of this letter, see under *R* in the Dictionary.

#### (4) sh and z.

These are the signs employed, respectively, for the voiceless and voiced palatal sibilant heard in *ship*, *azure*. On the analogy of *sh* a tied *zh* might seem to be the logical symbol for the voiced sound, but, unlike *sh*, *zh* has no currency in English spelling. As this latter is a simple sound, it has been thought better to introduce the simple letter *z* to represent it, rather than to introduce an unfamiliar composite symbol for this purpose.

#### (5) th and th.

It was explained above in § 5 that these letters are simply a concession to English visual habit and take the place of the Anglo-Saxon *þ* and *ð*, now usually employed in phonetic alphabets. They have the sound of *th* in *thin* and *th* in *this* respectively.

#### (6) w and y.

These have the sounds of *w* in *wet* and *y* in *yet*, respectively. Neither is used as the final element of a diphthong. Such spellings as *blow*, *blowing*, *say*, *saying* appear as blō, blō'ŋ, sē, sē'ŋ.

### 9. Foreign Words and Proper Names.

The alphabet hitherto under consideration was devised solely with reference to the English language, and hence does not provide exactly for certain sounds heard in foreign words and proper names. No difficulty is presented, of course, by borrowed words and names that have become completely Anglicized. More difficult is the problem presented by recent borrowings that have not yet become fully Anglicized, such as *hinterland*, *chauffeur*, *machete*; by relatively obscure names of persons and places, such as the ordinary reader may see now and then, but never hears and never has occasion to pronounce; and by recondite technical terms that are perhaps book words pure and simple. It must be remembered that the awe-inspiring phrase "correct pronunciation" has no other meaning than the pronunciation usual with educated speakers. If a word is not pronounced, or is pronounced very rarely by speakers of English, there is no usage, no convention, hence no standard of correctness. Let it not be supposed that the native or local pronunciation affords an ideal standard; if this were so the only correct pronunciation of *Socrates* would be sō-krā'tēs, and of *Naples*, nā'po-li. The ideal is really the phonetic form which the word is destined to take should it become completely Anglicized. But this is often very uncertain; and we have also to deal with a vast number of words and names which are so little used by speakers of English that they will never become Anglicized. In such cases the lexicographer can only approximate the native or local pronunciation.

We say "approximate," because any attempt at great precision would involve the use of a universal phonetic alphabet capable of recording not only the languages ordinarily studied in school and college, but also many others. But no one could read such an alphabet without special training in phonetics, and the information given by it would be, in the vast majority of cases, utterly useless. For it is impossible to learn exactly how the words of a foreign language are pronounced except by studying the language long and carefully. This being so, there is little use of meticulous exactness in giving the native or local pronunciation of foreign words that have no real currency in English.

In this edition of the STANDARD DICTIONARY there are no separate lists of proper names. But as there was to be but one vocabulary and the key to pronunciation was to be repeated on every page, it was obviously impracticable to employ a different alphabet or to introduce many new symbols for the foreign words and proper names. It was therefore decided to use the N. E. A. alphabet as it has been described, with the addition only of those special symbols which were employed in the first edition. These are *ñ* to denote nasality of a preceding vowel; *ɲ* for the Scotch *ch* in *loch* (German *ch*, whether voiced or voiceless, guttural or palatal); and *ü* for French *u* (German *ü*), whether long or short. It should be distinctly understood that the pronunciations given, except in the case of words fully Anglicized, are but rough approximations.

The pronunciation of Latin presents a case by itself. Within the last few decades the so-called Roman pronunciation has been very generally adopted in the schools both of the United States and of England. The old-fashioned English pronunciation is no longer learned, or is learned only to a limited extent, and will soon become obsolete, so far as the reading of Latin authors is concerned. It persists, however, and will long persist, in proper names and in numerous words and stereotyped phrases pertaining, more especially, to law and medicine. Popular usage is already divided between the old and the new: one hears *ē* prai-ō'rai and *ū* pri-ō'ri; man-dē'mus and man-dū'mus (oftener man-dam'us). The ending *-itis* is regularly pronounced -ai'tis by Englishmen, while in the United States -ai'tis and -i'tis are about equally common. And there are other such cases of conflicting usage. It is probable that with the lapse of time the Roman pronunciation will prevail more and more, since modern scholarship is overwhelmingly in its favor. At the same time, the present facts have to be recognized. When the Dictionary gives the pronunciation of a Latin word or phrase according to the English method, it should by no means be understood that a preference for that method is thereby expressed. If, for example, *nisi prius* is given as noi'sai prai'us, the meaning is simply that the lawyer is apt to call it so in the court-room, albeit the same lawyer would probably say ni'si pri'us if he came upon the phrase in reading aloud from a Latin author.

### 11. Pronouncing by Use of the Old Alphabet.

Each respelling in the Dictionary is repeated in the familiar alphabet with diacritics, this notation being called Key 2. In Key 2 the vowels marked with a macron represent the sounds now commonly called long, and those with a breve represent the sounds commonly called short. The two diacritics indicate, except for the letter o, actual difference in quality of sound, not merely in quantity. The various letter-sounds are described above and in the articles treating the letters in alphabetical place in the vocabulary. References follow to the divisions (1), (2), etc., of the section "A, VOWELS AND DIPHTHONGS," above, for the sounds of the marked vowels. Unmarked vowels are explained separately.

For ā as in *art*, see (2). In Key 2 ā is always used for this sound, without distinction of length.

For ȃ as in *fale*, see (4). For ȁ as in *fat*, see (1).

For ȃ as in *bare*, see (1). For ȁ as in *ask*, see (3).

For ȃ as in *what* and ȁ as in *all*, see (8). These are the same as e and ē of Key 1, ȅ and ȅ of Key 2.

For ē as in *me*, see (5).

For ē as in *met* and ȅ as in *fête*, see (4). The sound of ȅ is the same as that of ē.

For ē as in *bear*, the same sound as ā, see (1).

For ē as in *fern*, see (10). For ī as in *tin*, see (5).

For ī as in *bite*, see (12).

For ī as in *girl*, see (10). This is the same as ū and ē.

For ī as in *marine*, the same sound as ē, see (5).

For ō as in *go*, see (7). For ō as in *not* and ō as in *corn*, see (8).

For q as in *woman*, ōō as in *boot*, and ōō as in *book*, see (9). These are sounds more commonly represented in regular spelling by u as in *full* and ū as in *rude*.

For ō as in *son*, the same sound as ū, see (10).

For q as in *tomb*, the same sound as ū, see (9).

For ū as in *cule*, see (14). This is the sound noted in Key 1 by iū or iu (internal) and yū or yu (initial). Only the internal sound is noted by ū in Key 2, length being disregarded.

For ū as in *cut* and ū as in *burn*, see (10).

For ū as in *put* and ū as in *rule*, see (9).

For the diphthongs ou, ow, see (12), and for oi, oy, see (13).

In Key 2 the plain vowel letters are used in obscure syllables, corresponding to ȅ and ȅ of Key 1. See (6) and (11). An exception is made in the use of o, in using it for the obscure sound in closed syllables as in *action*, *kingdom*, and for the o in *obey*, *history*, where the sound of ō is heard lessened in quantity. In closed syllables having the sound of o as in *obey*, seldom or never occurring in English words, ō is used in Key 2. Thus, in the German pronunciation of *Humboldt*, the second syllable is given as -bōlt in Key 1, -bōlt in Key 2.

In Key 2 y is used as a vowel exactly like i.

Consonant sounds are the same in both keys, with the following exceptions: In Key 2 the digraphs ch, sh, th as in *thin*, and zh are without the tie-mark used in Key 1. See B (2), (4), and (5).

For th, as in *this*, see B (5). For j, see B (2).

For ng as in *sing* and n as in *ink*, see B (1).

In Key 2 the k-sound of c is noted by c and the s-sound by c̄. These are always k and s in Key 1.

### 12. The Division of Words into Syllables.

Division of words into syllables is indicated in the vocabulary titles by insertion of hyphens and accent-marks as intended for practise in writing and printing. This work has been entrusted as a special department to Mr. F. HORACE TEALL. Respellings, the purpose of which is precise phonetic analysis, often necessarily differ in division from that shown in the titles, but agreement is preserved when possible. The approved division is always that shown in the heavy-faced print. Some words showing the conflict noted are *addi-tion*, *divi-sion*, *mea-sure*, *commu-nion*, *a-lien*, *na-tional*, *pecu-liar*, *spe-cial*, which are respelled a-dish'ən, dī-viz'ən, mez'ur, kə-miūn'yən, ēl'yen, nash'ən-əl, pī-kiūl'yər, spesh'əl.

The practise shown in the vocabulary is so simple and so unmistakably uniform that no elaborate system of rules is necessary. Every essential point is comprehended in the following four rules:

**Rule I.**—A consonant or a digraph or trigraph between two vowels goes into the later syllable when the first vowel is long, half-long, or obscure (except -er as in *gen-er-al*); as, *fa-tal*, *sea-son*, *sepa-rate*, *pro-gram*, *se-da-tive*, *omi-nous*, *mecha-nism*, *pecu-liar*, *pro-phetic*, *medi-cal*, *practi-cal*, *fa-ther*, *me-tallic*, *mo-nopo-ly*, *pre-sent* (v.), *de-throne*, *ca-pacity*, *pro-gress* (v.), *ca-pable*, *proce-dure*.

**Rule II.**—A consonant between two vowels goes into the earlier syllable when the first vowel is short and has any stress; as, *prod-uct*, *prog-ress* (n.), *rap-id*, *pres-ent* (n.), *vis-it*, *ton-ic*, *bus-y*, *crit-ic*, *proph-et*, *prophet-ic*, *cyn-ic*, *fath-om*, *flor-id*, *char-ity*, *sep-arate*.

**Rule III.**—Adjoining consonants usually separate into two syllables; as, *at-tract*, *con-demn*, *pam-phlet*, *syl-lable*, *prac-tical*, *moun-tain*, *infan-try*, *connec-tion*, *produc-tive*, *delec-tive*, *suc-ces-sor*, *defen-dant*, *cor-respon-dent*, *as-sis-tant*, *mal-ting*, *com-pel-ling*, *fret-ted*, *En-gland*.

**Note.**—Doubled consonants ending a primitive word are kept together before a purely English suffix; as, *tell-ing*, *hiss-ing*.

**Rule IV.**—Purely English suffixes (-ed, -er, -est, -eth, -ing, -ish, -y) are always kept distinct (except when the terminal letter of the primitive word is repeated, as in *compel-ling*); as, *heat-ed*, *hat-ed*, *bak-er*, *speak-er*, *speak-est*, *wak-eth*, *search-eth*, *hast-ing*, *baptiz-ing*, *brak-ing*, *break-ing*, *freak-ish*, *head-y*.

**Note.**—Terminations like -al, -ant, -ent, -ive, -or are treated as merely Anglicized endings (usually of Latin or Greek words taken into English entire, but with terminal change), not as separable English suffixes. Thus such confusion as *music-al*, *practi-cal*, *conjunc-tive*, *disjunct-ive*, *abun-dant*, *defend-ant*, which is found in some other works, is avoided. The treatment here given makes every one of these terminations begin with the consonant.

### 13. Spelling Reform.

The subject of spelling reform has lately received a large amount of attention, owing to the activities of the Simplified Spelling Board in the United States and the Simplified Spelling Society in Great Britain. Some simplifications, not at all radical in their character and consisting mainly in the dropping of superfluous letters, have already been promulgated. From the nature of the case these modified spellings will come into general literary use but slowly, if at all, but the weight of expert authority behind them clearly requires that they be taken note of in a dictionary for the people. As in all matters involving technical knowledge, the opinion of one expert is worth more than the practise of multitudes who have never studied the subject and merely follow the fashion as they have learned it. The proposals of the Simplified Spelling Board are recorded in this Dictionary. The rules adopted by the Board will be found in the APPENDIX, page 2780.

The scientific test of good spelling is tolerably simple. A language is well spelled if, when one has learned the letters and their sounds and has had practise enough to beget facility in their use, one can write correctly any new word that one hears and pronounce correctly any new word that one sees.

If now we apply the scientific test of good spelling to the English language in a large way, it will appear that much of it is good just as it stands. This is true of an immense number of monosyllabic words containing short vowels, and of a far larger number of polysyllabic derivatives from the Latin. Then there is another large group of words of which the spelling is not ideal, but good enough for practical purposes. It is a great mistake to speak of English spelling as if it were altogether bad and needed to be thrown into the melting-pot and recast. But there is a third portion which is bad in varying degrees of badness, and unfortunately this third portion comprises a pretty large number of the commonest words in the language—words of Germanic origin containing a long stressed vowel or a diphthong. If *go* is a good spelling, then it is obvious to any one that *though* and *road* and *door* and *hoe* and *note* are not good spellings. The lack of a uniform, or at least approximately uniform, notation for the long stressed vowels and diphthongs is the deep-seated fundamental fault of our spelling. Any reform which does not correct that will only touch the fringe of the difficulty.

How our spelling came to be so confused, so far as it is confused, is now well known to experts in English philology. Speaking very generally, the trouble is due to an ancient confusion of the phonetic standards of Anglo-Saxon and Norman French; to the retention of old spellings after they had ceased to be phonetically correct, and to the introduction of new spellings patterned after conflicting analogies or supposed to convey valuable information—which was often misinformation—about the etymology and provenience of words. The resulting chaos is not at all mysterious. We should have lost nothing precious, but should have gained very much, if our spelling had kept pace with our speech and were to-day as good, say, as that of Spanish.

The obstacle is the inertia and the prejudice of habit. The adult who has once learned to spell will always find it easier to go on in the beaten path. No matter how bad the path may be, it will always be for him personally the line of least resistance.

The reform must be solved gradually in the elementary schools. The associations that cluster about words are not transmitted from one generation to another. Each child acquires them for himself, and they can be made to cluster as fully about a good spelling as about a bad. In countless instances we have actually improved on the orthographic practise of our ancestors.

# METHOD OF COMPOUNDING WORDS.

PROFESSOR W. D. WHITNEY, in his book on *The Life and Growth of Language*, speaks of "a process which the general history of language shows to be more important than any other," and then says: "It is the composition of words, the putting two independent elements together to form a single designation." He shows distinctly that he includes here the union of word-pairs with a hyphen by citing *rest-day*, *learning-knights*, and *head-dress*. This is stated as a general language fact, not merely as English.

In such matters the lexicographer's record must show selection, especially in English, and undoubtedly that selection should accord with the best usage, as decided by some person or body of persons. For this Dictionary, originally, the decision was made by submission of the question, with the fullest possible detail, to hundreds of the men best qualified to answer it. But the department was controlled by one man, Mr. F. HORACE TEALL, who has again controlled it throughout the remaking. Mr. Teall had published the only book that ever treated the subject exhaustively, *The Compounding of English Words*, and was chosen because that book proved his fitness. The prevalent confusion of ideas had been shown in letters received before then, one of which, a fair sample, said, "I always use a hyphen whenever two words are to be written as one," and proved that its writer did not do so by containing *when* and *ever* united without a hyphen. Again, the question was, When should two words become one? And this was not answered at all.

Mr. Teall's first work for the STANDARD DICTIONARY was the making of a list of more than forty thousand words showing his answer to the question as he offered it for embodiment in the work. That list was printed separately and sent to scholars the world over—some even to Australia—with requests for suggestions and criticisms. Practically no criticism came, but much enthusiastic commendation; and the list was finally adopted for the Dictionary. Some persons, especially printers, say that fashions change in such matters so that what was once good is so no longer; but this is only an evidence of the common confusion, which is and has been always present in practise, and the forms selected originally are still held to be the best.

Every important dictionary of the English language published before 1890, and every one since then except one, has included thousands of word-pairs joined with the hyphen. Of course but one reason could be assigned for this practical universality of method, so far as the earlier workers had any definite policy in this respect. The similarity resulted from the fact that so only could they record the best usage, and that what they so recorded was best not only according to practise among leading writers and printers, but also in keeping with the art of grammar. Not only have the best writers used hyphenated compound words, but every grammarian who ever taught anything about them has evidently striven to lay a basis for analogical decision. Many grammar textbooks merely say that some compound words are written with a hyphen and some as continuous words, and then say, "Consult the dictionary."

The exceptional dictionary alluded to above is the one that very many people will consult, and they will find there *countingroom*, *dining room*, *drawing-room*; *taleteller*, *story-writer*, *letter writer*; *ropemaker*, *love-maker*, but *lace maker* and others (the two-word forms not given as titles); *devilfish*, but *angel fish*; these being merely a few specimens that indicate lack of system. Such differences found so frequently make it impossible for any one to know in a given instance without looking in the book whether this authority uses one form or another, except as frequent looking happens to impress a few distinctions upon the memory. Certainly no one can ever learn all the differences just as they appear in the book.

In that dictionary are *backbone*, *breastbone*, *jawbone*, but *cheek bone*, *haunch bone*, *hip bone*, *thigh bone*; in this work each bone-name is given with a hyphen, except that *backbone* is given for the

figurative sense. Provision is necessary (or at least more comfortable) for the use of one form for each literal name.

It is simply impossible to eliminate inconsistencies of form from the English language, even if it could be proved desirable to do so. No phase of the language is less amenable to such stricture than the question when to compound and when not to compound. Mr. Teall's claims are stated below. His platform as to consistency may be formulated in words used by Lindley Murray in writing about verbs: "A principle may be warrantably adopted, and carried to a precise convenient extent, without subjecting its supporters to the charge of inconsistency for not pursuing it beyond the line of use and propriety."

No principle of language can be adduced in support of a choice of form for *counting-room*, *dining-room*, or *drawing-room*, or for *story-writer* or *letter-writer*, or for *angel-fish* or *devil-fish*, that is not equally potent in every exactly similar instance. Various groups of similar words must have similar forms if they are to be on a basis of comfortable agreement; but no single group can ever be so absolutely differentiated that any critic could not find a point of objection, or at least of question.

A close study of English literature has been made and a system constructed in accordance with the rules of grammar, which was modified somewhat by such fully established usage as does not follow those rules. The aim has been to give a full exposition of the forms used by the best writers and printers, with the additional feature of an analogical systematizing of the forms in general literary use, so far as the genius of the language will permit. The editor believes that he thus comes closer than any of his predecessors to an actual record of prevailing good usage, and that he has provided a selection of forms worthy of adoption without change.

Each form is based upon grammatical analogy, according to the following

## General Principles.

1st. That all words should be separate when used in regular grammatical relation and construction, unless they are jointly applied in some arbitrary way.

2d. That abnormal association of words generally indicates unification in sense, and hence compounding in form.

3d. That no expression in the language should ever be changed from two or more words into one (either hyphenated or solid) without change of sense.

The first of these principles forbids joining an adjective and a noun in regular use (including in the classification as adjectives all words used with clear adjectival force); as, *spinal column*, *chestnut horse*, *brick house*, *fellow citizen*, *he bear*, *man servant*, *brother officer*, *Armstrong gun*.

Arbitrary application of such terms requires that they should be joined. Thus we have *blue coat* for the coat itself, but *bluecoat* for a man, and *redhead* is the common form of the name of a duck with a red head.

The first principle, moreover, keeps a regular adverb separate from the adjective it modifies, even when the two express one attribution; as, "*highly colored wings*," "*recently published book*."

The second principle makes two nouns used together as one name become one word, if the first is not really attributive. Thus, while *brick* is attributive in *brick house* (a house made of bricks), it is *not* attributive in *brick-yard* (a yard where bricks are made). *Brick* in the first instance has the same qualifying sense that *bricken* would have if that were used, and so is an adjective, properly standing alone; but in the second instance it has no sense other than the naming of what is made in the yard, and no quality or attribute of the yard is noted, except in the name as a whole.

The second principle requires compounding:

1. When two adjectives, a noun and an adjective, or any two or more parts of speech are abnormally associated to express one

attribution; as, a *down-stairs* room; *dark-brown* hair, or hair that is *dark-brown*; a *well-known* man; *knee-deep* snow, or the snow is *knee-deep*; *free-trade* doctrines; a *silk-and-cotton* fabric; *North-American* birds.

2. When one of two words used together as a verb, an adverb, or any part of speech, is in such use not placed in accordance with a rule of grammar; as, to go *down=down*; to *halter-break* a horse; a *cross-action*; a *counter-complaint*; *broad-mindedly*; *after=ages*.

### Rules for Selection of Forms.

The legitimate conclusion from these principles is, that if one term having elements of certain kinds is properly a compound word, so is every other exactly similar term. The following categories or rules are thus obtained:

1. Every name that shows mere ellipses and inversion of a phrase containing two nouns is a compound noun.

A "box for a hat" is commonly called a *hat-box*; "a brush for the hair," a *hair-brush*; "a stove for cooking," a *cooking-stove* or *cook-stove*. It may be safely affirmed that *hat-box* is printed as a hyphenated compound word much more frequently than it is printed as two words, and the same is true of *hair-brush*; so we select the compound form as fixed in the best usage. *Pill-box*, *shoe-box*, *paper-box*, *ribbon-box*, and *collar-box* properly have the same form as *hat-box*, and so on through the entire range of known or possible boxes that may be named by the word *box* preceded by the name of what the box is to contain. As of *boxes*, so of *brushes*, and so also of everything named in this way—every such name, except as noted below, is given as a hyphenated compound word. Some names that are unquestionably compounds in their nature have never been so written, and it would be pedantic to insist that they should be. In usage, almost universally, such words as *company*, *association*, *asylum*, have been kept separate, as in *railroad company*, *racing association*, *insane asylum*. There is no error in writing any one of these as a compound, but there is no urgent reason for doing so.

### Seeming Exceptions.

I. Some uses in which the first of two nouns really stands as an adjective are as follows:

(1) With the sense "made of," as in *silk dress*, *brick house*, *feather bed*, *pumpkin pie*, *stone wall*.

(2) With the sense "having the shape or the character or quality of," as in *barrel vault*, *alligator forceps*, *companion picture*, *he bear*, *man milliner*, *man servant*, *boy bishop*, *bull calf*, *brother officer*, *fellow citizen*, *mesh structure*.

(3) With the sense "pertaining to, suitable for, or representing," as in *parlor clock*, *city officer*, *district attorney*, *government employee*, *railroad supplies*, *insurance office*, *church furniture*.

(4) With the sense "characterized by," as in *diamond ring*, *cylinder press*, *cupola furnace*.

(5) With the sense "situated in, having a character naturally implied from situation or connection," as in *mountain streams*, *country gentleman*, *ocean steamer*, *school etiquette*, *society manners*.

[In specific names of this kind, however, compounding is required by the fact of specification, which is merely naming. For some common compounds other than such purely specifying names no reason is apparent, unless accent be taken as a reason; but here the indefinable border-line that exists in all human affairs seems to be encountered. Thus (a) we have *sea-anemone*, *sea-gull*, *field-mouse*, *house-fly*, *mountain=fringe* (a plant), etc., and, (b) while we

say and write as two words *o'cean steam'er*, we say as one word *wa'ter-an'im'al*, and it should be so written.]

(6) With the sense "acting in support of, advocating," as in *Jackson voters*, *silver advocates*, *silver man*, *prohibition speaker*.

(7) With the sense "residing, existing, or originating in, or coming from (a place)," as in *Brooklyn politics*, *Bath brick*, *New York schools*, *Florida oranges*.

(8) With the sense "originated or made by, or named after," as in *Armstrong gun*, *Williams College*.

II. *Apposition*.—Placing two nouns in apposition is very nearly the same in effect as using the first as an adjective, the difference being that in a case of real apposition either word may be used alone for the thing named, as in *monarch oak*, *knight templar*, *knight companion*.

2. Possessive phrases used as specific names are compound words.

Literature exhibits such names of plants, etc., in different forms. Certain books have some of them compounded and others as two words; as, *hare's-tail* for one plant and *lion's tail* for another. Certain other books have the difference reversed; as, *lion's tail* and *hare's tail*.

It is absolutely impossible to make a record of the use of these names showing differences in form that can be proved to be established. Every such name given in this Dictionary is joined by a hyphen, except a few long established in continuous form, as *colts-foot*, *sheepshead*.

3. Some words representing phrases in literal sense have become established in the solid form; as, *sunbeam*, *daylight*, *hillside*, *loophole*.

4. Some generic nouns are used, in certain classes of names, almost like mere suffixes; as, *man*, *way*, *weed*, *wort*.

Words like *footman*, *coachman*, *airway*, *entranceway*, *milkweed*, *seaweed*, and *motherwort* have the solid form in this Dictionary.

Every specific name of a fish that has a monosyllabic specifying element, with *fish* as the generic element, is given in continuous form; as, *goldfish*, *bluefish*, *hogfish*. Longer names of this kind (except *cuttlefish* and *silverfish*) have the hyphen.

5. Most words used to designate something named from having as a characteristic or adjunct that which is expressed by the elements of the name are given in the solid form.

A man who wears a *blue coat* is called a *bluecoat*; a man who watches or looks out is called a *lookout*, and said to be "on the *look-out*"; a plant that looks like a *golden rod* is called *goldenrod*; a fish with a *gill head* is called the *gillhead*; and many other things are named in this way—by making a word of the two words naming a prominent feature, likeness, characteristic, or the like. Predominance of the solid form in literature for such names is easily provable, tho they are printed in all three forms—two words, hyphenated, and continuous. Exceptional use of the hyphen in this work occurs in words that are made clearer by it, as *mouse=ear*, *abscess=root*.

The forms given in heavy type throughout the Dictionary are very carefully selected and recommended for use, even if an occasional form found in the text is not the one given in the vocabulary for the same word. Care has been exercised to make the vocabulary and the text agree throughout; but, as many compounds may properly be written either with or without a hyphen, it is much more than probable that absolute agreement in this respect has not been attained.

# FOREIGN LANGUAGE CHART.

The following table shows the usual values of the various letters and combinations of letters in the alphabets of the several foreign languages included in its scope. In column 2 the modern English alphabetic characters, and some of their combinations, are given for comparison with the foreign. For convenience the phonetic symbols of the Revised Scientific Alphabet, listed with English key-words in the first column, are numbered consecutively from 1 to 59, these numbers being repeated at the right-hand margin of each page, and, together with the symbols, at the left-hand margin of the second page. The figure before a letter in a language column

indicates the number of such letter in its alphabet, and the small figure at the right of a letter gives the number of the explanatory note below referring to that letter. Thus, in line 16 (phonetic symbol "g as in go"), there stands in the Danish column "7 g<sup>1</sup>." By this is meant that *g* is the seventh letter in the Danish alphabet, that it is (sometimes) to be pronounced as *g* in the English word *go*, and that the conditions in which the letter has this value are stated in remark 6 in the Notes on Danish. Letters placed in parenthesis-marks are either variants or else call for special attention because they stand for a sound a little different from that represented by

## GENERAL REMARKS ON SOUNDS FOREIGN TO ENGLISH.

[EXPLANATION.—In the following remarks and notes, all characters used as letters of an alphabet are set in italic form (Greek and Hebrew letters excepted), and all used as phonetic symbols are set in roman. That is to say, whenever a letter is italicized, the reader should call it "the letter so-and-so," and sound it as in the English alphabet (or, if preferred, in the alphabet of the language under discussion); when a letter is printed in the roman character, one should call it "the sound so-and-so," and pronounce it as directed in the column of phonetic symbols. The sign (=) is to be read "is pronounced as" or "pronounced as." For example, "e before a, o, u, = k" means "the letter e, when it stands before the letter a, o, or u, is pronounced as the sound k." Perhaps it should be added that letters and symbols introduced in the course of the remarks and notes are generally arranged not in alphabetical order but on the basis of the phonetic relations of the sounds that they represent.]

Syllables are called "open" when they end in a vowel. A single consonant between vowels, or any combination of consonants that can begin a word, is usually to be thrown with the following vowel. Hence a vowel, followed by a single consonant not final, is generally in an open syllable, but one followed by two or more consonants not final (unless the group is a combination that may stand at the beginning of a word) is in a closed syllable, because it is necessarily followed in its own syllable by a consonant. Thus, in *center* the *t* stands in an open syllable, in *pit-fer* the *t* stands in a closed syllable. A vowel may be phonetically in a closed syllable, but the spelling may show that it was formerly in an open syllable, as in the English word *dale* (dāl), which in early Middle English was pronounced dāle. The matter is of some importance because the length and the quality of vowels often depend upon whether they are (or were formerly) in an open or a closed syllable.

Other terms used in the notes, as "voiced," "voiceless," "palatal," "velar," "spirant," etc., will be found defined in the vocabulary.

An English-speaking person needs to be cautioned against pronouncing foreign long vowels as diphthongs. In English long ē with most speakers ends with a light i resonance (that is, as a diphthong, ēi); long ō is generally turned into ōi; long ū into ūi. But in German, French, and European languages generally, these vowels are to be pronounced without the i or u element at their close. Foreign vowels are generally tenser than English vowels.

### VOWELS.

"Rounding" is the effect on a speech-sound of pursing the lips till the orifice is roundish, as in sounding

English ū (*boot*). In English only back vowels are rounded; in some other languages certain front vowels are thus modified.

1. Rounded i. To make it, say i (as in *see, machine*), at the same time pursing the lips as for ū (in *rule*). The symbol used in this dictionary is i.
2. Rounded ē. Say ē (as in *fate*), at the same time pursing the lips. This is the sound heard in French (*eu*), German (*long ö*), etc.
3. Rounded e or a (really a sound between e and a). Make such a sound, at the same time pursing the lips. The sound is heard in French (*eu*), German (*short ö*), Danish (*ø*), etc.

The English sound nearest to these last two is the ū of *burn* (bŭrn), and hence the symbol here used for these two rounded vowels is ū. But the foreign sounds are not exactly ū. This English vowel is made at the middle of the mouth (by raising the middle portion of the tongue), and the lips are only slightly if at all pursed. The foreign sounds are made in the front of the mouth (by raising the front of the tongue, as for ē and e respectively), and are strongly "rounded."

4. In several languages, e. g., French, are heard "nasal" vowels, that is, vowels to which a nasal quality is imparted from the fact that, while they are being sounded, the passage through the nose is open as well as that through the mouth. Hence part of the voiced breath escapes through the nose and reverberates in the nasal cavities. The nasal vowels are not vowels followed by n or ŋ, but simply vowels that receive their quality or timbre from resonance in both mouth and nose instead of in mouth alone. In this dictionary nasality in a vowel is indicated by adding to the symbol of that vowel the symbol *ñ*: whence *āñ*=nasal a, *āñ*=nasal a, etc. Many Americans, in their normal speech, unconsciously pronounce some or all of their vowels with a nasal quality; hence they are in danger of making the foreign vowels too strongly nasal.

### CONSONANTS.

Consonants in foreign languages (with some exceptions) are more carefully, and often more firmly or energetically, enunciated than in English.

5. In Scotch (*ch*), German (*ch*), and some other languages there is heard a velar spirant, represented in this dictionary by the symbol *h*. The sound is made by raising the tongue at the back of the mouth (*toward* the position for *k*) until the breath makes a rasping noise as it is forced out through the narrowed place. It is

the strong *h* heard in an emphatic *who*. There is also a palatal spirant, the German *ch* heard in *mich*, and elsewhere after "front" vowels (i, e, ū). It is made by raising the front of the tongue (as if to whisper *yet*), and forcing the breath out with the tongue held tensely in that position. The sound is the strong *h* heard in an emphatic *how*. When English *y* (not the whispered *y*) is prolonged, the sound is a corresponding voiced palatal spirant. The velar spirant *h* (in Scotch *loch*, German *dach*, etc.) may also be voiced; and such a sound is heard in German and Danish (intervocalic *g*), and elsewhere. The sound does not occur in English, but would be heard if one pronounced the word *auger* (ōger) without raising the tongue for the *g* high enough to close the mouth passage completely. The velar spirants here described occur in association with a back vowel (g, ō, ū), and the palatal in association with a front vowel (i, e, a, ū).

6. What one may call "palatalized" consonants occur in some European languages; they are a characteristic of Russian and Polish (Slavic languages), and of Hungarian. These consonants are made by combining the sound *y* with the normal consonants. Palatalized *l*, for example, is not *l* followed by *y* (as one hears it in *brilliant*), but *l* and *y* merged into one—an *l* made by raising not the tip of the tongue to the upper gums, but the front of the tongue to the front part of the palate above it. Palatalized *n* is made not by pressing the edge of the tongue against the upper gums, or roots of the upper teeth, as for normal *n*, nor by pressing the back of the tongue up against the back part of the roof of the mouth, as for *ŋ* (heard in *sing*), but by raising the front of the tongue just as for *y*, but further, until it is pressed against the front palate. After such a palatalized consonant there will almost unavoidably be a more or less distinct *y* heard as a glide to a following vowel; and the symbol used in this dictionary for these consonants is a combination of the appropriate consonant symbol with the symbol *y* (ny, ly, etc.). But such a symbol as *ny* is not to be interpreted as *n* followed by *y*, but as *n* made at the same place in the mouth as *y* is made. It should be noted that the so-called *Lemvill* in French (spelled *-il, -ill*) and in Hungarian (spelled *ly*) has in the best standard pronunciation ceased to be an *l* at all, but is pronounced simply as *y*.
7. For most of the voiced consonants there are corresponding voiceless consonants: *as*, *b* and *p*; *d* and *t*; etc. But there is in English no "voiceless" *l*. It is heard in Welsh, however, spelled *ll*. To make it, place

# FOREIGN LANGUAGE CHART.

the parallel character in the column of phonetic symbols, the explanatory note giving the needed information in each case.

In the chart the several languages are grouped on the basis of their kinship, as follows: the Teutonic, the Slavonic, the classical (Greek and Latin), the Romance, and the Celtic, of the Aryan family; the Hungarian of the Altaic-Ural group; the Hebrew of the Semitic family. Such a grouping makes possible a comparison of the sound systems and of the spellings in related Aryan languages, suggesting how far the spelling has become archaic by the shift of the language sounds from an earlier

basis approximately represented in classic Latin. The chart shows the general agreement of the continental (European) languages in the values that they assign to the vowel letters.

The chart, and the notes which accompany it, supply only the main or more usual values of the letters, and particularly these as they occur in native words. In loan-words, as noticed here and there in the remarks, letters often preserve the value they have in the foreign language from which the words are taken—a value often quite other than that normal to them in the native words.

the tongue in position for l, and then simply send out breath instead of voice past the sides of the tongue.

8. At least three r's should be distinguished: (1) The usual English r, made by raising the tip of the tongue close to the upper gums. Many sound it only before vowels. (2) A trilled r heard in Scotch, French, German, etc., made by raising the tip of the tongue almost to the upper gums and setting the tip to vibrating or fluttering against the gums. (3) The "uvular" r, made by raising the back of the tongue close to the soft palate and by means of the stream of breath setting the uvula to flapping in the narrow passage. In continental (European) languages the uvular r is frequent. The words *trilled* and *uvular* are in the language chart abbreviated to *tr* and *uv* respectively.

9. Strictly native words in French, Italian, Spanish, and some other European languages, do not use the letter w, which appears, in the main, only in borrowed words. In some native words, however, a sound like w is heard, represented by other letters. In French, for example, there are two w's, one represented by u (as in *nuil*), the other by ou (as in *oui*). They differ in that the first (that represented by u) begins with the tongue and lips approximately in position for "rounded" i (see Rem. 1 above), and the second begins with a position similar to that for ū—is, in fact, about the normal English v. The sound of French ū would, then, be more nearly represented by ū; but to avoid multiplying symbols the one symbol w is used in this dictionary to represent both the normal v sound (which begins with ū) and this other w (which begins with ū).

10. English f and v are made by placing the lower lip against the upper teeth. In some other languages, as Spanish and Latin (Roman method), similar consonants are *bilabial*, that is, made between the two lips. Such a v is like an English w, except that the lips are not pursed into a roundish opening, but are spread, the voice escaping, not all at the center, but between the lips along their total length. When the lips separate, they do so all at once, not with the gradual widening that marks the English w.

## NOTES ON THE SEVERAL LANGUAGES.

### 1, 2. English and Anglo-Saxon.

Both modern English and Old English (Anglo-Saxon) have the Germanic accent—on the root syllable. The Anglo-Saxon letters here given are the Roman letters as used in Britain at the time of the conversion

of the Anglo-Saxons, with the addition of two runic letters, þ (wen) = w, and ƿ (thorn) = th, and the crossed roman d (ð) which was a variant of þ. In linguistic and phonetic work to-day, the last symbol (ð) is often used for th, in distinction from p = th.

- The diphthongs ai, au, ei are very rare in Anglo-Saxon manuscripts; æg = ay, in later Anglo-Saxon ai.
- Anglo-Saxon f, ƿ (ð), s = usually f, th, s; but medially between a vowel and another voiced sound f = v, p (ð) = th, and s = z.
- Anglo-Saxon g was probably a voiced palatal or velar spirant (= voiced h; Gen. Rem. 5); but gg = g, and g before i, e, y, and final after a front vowel = y.

Further description and discussion of the letters and their sounds may be found in the vocabulary under the corresponding English letters.

### 3. Dutch.

Dutch words are accented as German: chief stress on the root-syllable, which is usually the first.

- The Dutch vowel system is extremely simple. In open syllables, a, e, i, o, u, and in closed syllables a, ee, ii, oo, uu, are pronounced as ā, ē, ī, ō, ū; and in closed syllables a, e, i, o, u are pronounced as o, e, i, o, u. oe = ū. eu = ū ("rounded" ē; Gen. Rem. 2).
- The Dutch diphthongs are aai = ai; ei, ej = ai (almost ei); au, ou = eo (almost ai); ooi = ōi; eeu = ēu; iuu = ūi (almost ōi); oei = ōi; uu = ūu. That is, Dutch diphthongs consist of the two vowel sounds indicated by their spellings, except that ū = ei.
- b, d, g, as in English. But when final, b = p, d = t, g = h, unless the next word begins with a vowel or b or d. dt = t.
- f and s, when followed by a vowel or b, d, become v and z respectively.
- c before a, o, u = k; before e, i = s.
- ch (in native words) = h. Initial sch = sh; medial or final sch = s, and in the reformed spelling the ch is discarded. ʔ: borrowed words, ch = k or sh, according to the source of the words.
- sj after a "round" vowel (Gen. Rem. 1-3) is often pronounced sh; otherwise it is simply s followed by j, that is, sy.
- After k, p, t, ch, f, s, the letters v and z are sounded as f and s; bv = pf, gv = hf; bz = ps, vz = fs, gz = hs.

### 4. German.

The German alphabet has three letters, ä, ö, ü, which are treated not as independent letters, but as forms of

a, o, and u respectively. If these were counted, the alphabet would have 29 letters.

The chief accent of words is generally on the root syllables in simple and derivatives, and on the first member of compounds. German vowels are more explosively begun than the English or French: what phoneticians call the "glottal stop" (a faint cough) is usually heard before all accented initial vowels. This glottal stop prevents German words from "running together," as English and French words do.

- The vowels are generally long in open accented syllables, short in closed accented or in open unaccented syllables; but the short vowel has approximately the same quality as the long. In the older spelling, now being discarded, a silent h after a vowel is a sign of length. ei = ai, eu = oi, ē generally = i.
- There are several so-called "modified" (umlaut) vowels in German: ä = e (when long, it is really between e and a); ö = e when long = "rounded" ē; when short = "rounded" e or o (Gen. Rem. 2, 3); ü = "rounded" i (Gen. Rem. 1); äu = ei. ä, ö, ä, äu are sometimes printed as ae, oe, ue, au.
- ch is a velar spirant when following a, o, u, and a palatal spirant when following e, ä, i, z (see Gen. Rem. 5); the symbol used in this dictionary is h. Before s, ch = k. In foreign words ch may = k (generally Greek words), or sh (generally French words).
- g in native German words may in all cases be pronounced as g; but in present-day preferred usage it represents also two other sounds: (1) when final, it becomes equivalent to k (that is, h; see Note 3 just above); and (2) when between vowels, it is pronounced as a voiced h (see Gen. Rem. 5).
- German initial h is strongly aspirated—far more so than English h. It is often a silent sign of length in the preceding vowel, but the reformed orthography discards it in this value.
- c appears only in non-German words. In these, before a, o, u, it is pronounced as k; before e, ä, i, as ts. In preferred reformed spellings it is replaced by its German equivalents.
- b and d are sounded about as in English, except when final, or before a voiceless consonant, in which position b = p, d = t.
- In foreign words not fully nationalized the foreign values are preserved; hence in these u = ū in words from the French, y = ū in words from the Greek.
- s has the sound of s, or of z: s = s when final in a word or a syllable, when preceded by any consonant other

than *l, m, n, r*, and followed by a vowel, and when initial before *k* and *l*. *s* = *z* when initial before a vowel, and when between vowels or between *l, m, n, r*, and a vowel. In initial *sp-* and *st-*, *s* = *sh*.

10. In some words from the French, *qu* = *k*.

### 5. Danish.

1. In Danish, words are accented as in German.
2. *a, i, u*, whether long or short, are pronounced with the quality of *ä, i, ü*; except that *i* when followed by *nd, ng, nk, nm, nt, rk, rr, kk*, or final *k*, is pronounced as a very short *e*; and *u* before *ng, nk, m, rk, ot*, and in some monosyllables (especially before *k*) is sounded as *o*, *aa* when long = *ö*; when short = *e*.
3. *e* and *o* when long (accented in open syllables, or final in monosyllables, and generally in monosyllables ending in a single consonant) are pronounced as close *ë* and *ö*; but when short (in closed syllables, or in monosyllables ending with two or more consonants), they = *e* and *o*. Exceptions: final unstressed *e* = *a*; long *o* followed by final *-re*, frequently before *g* when it is a voiced *h* (Note 6 below and Gen. Rem. 5), and sometimes before final *r*, is sounded as *ö*.
4. *y* generally = *ü* (whether long or short); but (1) when before *nd, ng, nk, nm, nt*, (2) in a number of monosyllables, and (3) frequently before doubled consonants, *y* = *ü* ("rounded" *ë*; Gen. Rem. 2).
5. *x* = *e* lengthened (not *ë*) when long (in open syllables, etc.), and *e* when short (in closed syllables, etc.). *ø* and *ö* = "rounded" *ë* and "rounded" *ö* respectively (see Gen. Rem. 2 and 3).
6. Danish diphthongs end (1) in *-i* (represented in the spelling by *j*, or by *g* before *l, n*); as, *ej, aj, eg, ig* = *ai*, and *öj, ög, öj*, *ög* = *oi* — more nearly *üi*; and (2) in *-u* (represented in the spelling by *v* — see Note 10 below); as, *au* = *au*, *av* or *avv* = *eu*, *av* = *eu*, etc.; after *o*, *g* before *n* becomes *u*, whence *ogn* = *oun*.
7. (1) *b, d, g*, when initial = *b, d, g*; when medial between voiced sounds (vowels and voiced consonants) = *b, th, and voiced h* (Gen. Rem. 5) respectively; when final, = *p, t, k*. Exceptions: *d, g*, when final after a long vowel, are pronounced as when medial.  
(2) *p, t, k*, when initial, are strongly aspirated; medial between voiced sounds, they are pronounced as *b, d, g*, respectively; when final, as ordinary *p, t, k*. After initial *s*, *k* = *g*, and *t* = *d*.  
All these letters, when final before a word that begins with a voiced sound are often treated as medial.  
There are exceptions to these rules; and in foreign words *b, d, g, p, t, k* generally have their ordinary values.
8. *c* (only in foreign words) = *k* before *a, o, u*, and consonants, and *s* before *e, i, y, ø, ö*.
9. *n* (before *k*) and *ng*, are sounded as *ny*.
10. *sj* is pronounced as *sh*; by some as *sy*.
11. *v* = *v*; but when followed by a consonant, and in some cases when final, *v* forms with the preceding vowel a diphthong; as, *av* = *au*; *æv* = *eu*; *öv* = *ou*, etc.

### 6. Swedish.

- The stress in Swedish words is on the root-syllable. Diphthongs occur only in foreign words.
1. *a* when long, in open syllables = *ä*; short *a*, in closed syllables = *a*.
  2. *e* in open syllables = *ë*; *e* short, in closed syllables = *e*; before *r* followed by a consonant, short *e* = *a*. Unstressed final *e* = *a*. In a few words *e* = *i*.
  3. Long *o*, in monosyllables, or when it forms or ends a syllable, = *ü*; in a few words before *rl, rd, l, v*, long *o* = *ö*. Short *o*, in closed syllables, generally = *o*.
  4. Long *u* and long *y* in an open syllable or in monosyllables = *ü*.
  5. *ä* (also spelled *aa*), when it forms or ends a syllable, = *ö*; in closed syllables, *ä* = *o*.
  6. *a* before *r* and another consonant = *a* (long or short); otherwise, *ä* = *e* (more exactly, between *e* and *a*).
  7. *ö* = *ü* (sometimes "rounded" *ë*, sometimes "rounded" *ö*; for the value, see Gen. Rem. 2 and 3).
  8. *c* before *e, i (y)* = *s*; otherwise, *c* = *k* (except in some words from foreign languages). *ch* (in borrowed words) = *k, ch*, or *sh*, depending upon the source.
  9. *f* medial (except before *s, l* or final *v*); otherwise, = *f*.
  10. *g* before *e, i, y, d, ö* (except before *a, i* in short unstressed syllables), or after *r, l* in the same root-syllable, = *y*; otherwise, generally = *g*. But *g* before *s, t* = *k*; *g* when between a short vowel and *n* = *g*; *g* before *e, i* in some foreign words = *sh*.
  11. *h* = *h*; but it is silent before another consonant.
  12. *k* usually = *k*; but before *j, e, i, y* (not in suffix-syllables), *k* = *ch*.
  13. *ng*, and *n* before *k*, = *n*.
  14. *sk* (before *e, i, y, ä, ö*), *sch, sj, skj, stj* = *sh*; *dj* = *y*. *sc* in endings *-scent, -scens, -scion* = *sh*.
  15. *tj* = *ch*; *t* before *-ic* or *-ie* = *ts*; after a consonant, *ti* in *-tion* = *sh*; after a vowel, = *ch*.

### 7. Polish.

- Polish words are accented on the penult (with a few exceptions, especially of words in *-ika, -yka*).
1. The Polish vowels are all short; consequently, when a symbol with macron is used to indicate the value of a Polish vowel (as when one writes *i* = *i*), the symbol is to be understood as indicating a vowel of the quality of *i* in *machine*, but of the length of *i* in *hit*. So *u*, when used to interpret Polish *u* and *ö*, means a short vowel of the quality of *ü* in *rule*, not the short *u* heard in *good*. The vowel letters are generally consistent in value; but *i* varies, being pronounced as *i, y* or *ü* (Note 2), or *y* (Note 9).
  2. The letters *a, e, i, o, u* (and *ö, y*) represent the vowel sounds *a, e, i, o, u*, and *ö, y* respectively, with the following exceptions: (1) *e* (*ie*) between *l* or a palatal consonant and a following "palatalized" consonant (see Note 8 below) is pronounced with a close *ë* quality, rather than *e*; but it is still a short vowel. (2) *i*, if not preceded by a labial consonant, *l*, or a velar *k* or *g*, is pronounced *y*; if preceded by velar *k* or *g*, *i* is written for *y*, and so is to be pronounced *y*. (3) *y*, when preceded by *pr, z, c, s, d, dz*, is written for *i*, and so is pronounced *i*. (4) *i* before another vowel is a consonant, and pronounced as a light *y*.
  3. Most Polish vowels are heard also in a "palatalized" form, that is, with the sound of a light *y* before them. Initially this *y* is represented by *j*; elsewhere, the *y* is represented in the spelling by *i*.

4. The letters *g* and *ę* represent nasalized vowels, *on* and *en* respectively (see Gen. Rem. 4). But at the end of words the vowels lose almost all nasal quality.
5. Polish consonants approximately as English; but *cz* = *ch*; *dz* = *j*; *sz* = *sh*; *c* = *s*; *z* = *z*; *rz* = *g*; *w* = *v*.
6. *ch* initial or medial = *h*; final = *h*. The letter *h* appears in very few Polish words; it is merely equivalent to Polish *ch*.
7. When final, or before a voiceless consonant, all voiced consonants become voiceless; that is, *b* = *p*, *d* = *t*, *g* = *k*, *z* = *s*, *ż* = *sz*, *sz* = *ts*, *ts* = *t*, *z* = *z* (the letter *z* appears only in non-Polish words).
8. Polish *i* has a sound peculiar to Polish (and Russian). It is made farther back in the mouth than English *i*, by raising the back of the tongue toward the hard palate instead of the tip of the tongue to the upper gums. In parts of Poland it is pronounced initially much like English *w*, medially like the second part of the diphthong *au* — that is, a light *u* or *w*.
9. All consonants (except labials) are slightly "palatalized" (see Gen. Rem. 6; and *cp.* a Virginian pronunciation of *car, garden*, as *k'v, g'v'dn*) when they are followed by the vowels described in Note 3 above. Three of the consonants are wholly altered: *d* becomes *dz* (spelled *dz*), *t* becomes *ts* (spelled *c*), *r* becomes *z* (spelled *rz*). Certain of these palatalized consonants are heard also in other positions than before a *y*-vowel; they are then spelled with letters having an acute accent added (as *h, z, t, dz, h*). For their pronunciation, see Gen. Rem. 6.
10. The consonant *y* is heard in Polish only as the first part of the "palatalized" vowels (Note 3), or as a fleeting sound after the palatalized consonants (Note 9).

### 8. Russian.

- The accent in Russian is of great importance in the pronunciation and also in the meaning of words; but it is so variable — shifting in the varying grammatical forms of the same word — that no brief rule can be given for it. Russian, like Polish, has no distinction between long and short vowels; its vowel spellings, however, are far less phonetic and consistent than Polish because Russian spelling, in some details, has remained unchanged for ten centuries.
- Russian, as Polish, has two sets of vowels: (1) The so-called "hard" (or normal) vowels, *a, 3, i, o, y*, and (2) the so-called "soft" (or palatalized) vowels, *ä, e, ö, i, ö, i, ö*. It has further three consonantal vowels, two of which are heard (*li* = light *i*, *l* = light *y*), and one generally silent (*ü*, formerly = *u*).
1. *a* = *a* when stressed; when unstressed it varies from *a* to *ä*, and in very light syllables following the accented syllable it becomes almost *e*; when unstressed after *ж* (*zh*), *ц* (*ch*), *ш* (*sh*), *щ* (*sch*), *a* = *e*; and in the ending *-aro, a* = *o*. *3* is infrequent in Russian words, but frequent in foreign words in the value of *e, o*, when stressed, or final = *o*; when unstressed, however, *o* = *a* (almost the same as unstressed *a*). *y* is always pronounced *ü* (but it is short). *li* approximates in quality the "obscure" vowel *i* (heard in *renew, rinü*), but is not at all a "weak" or "obscure" vowel. It is somewhat like an *ü* pronounced without rounding the lips; tongue placed as for *i*, lips as for *i*. After *л* (*l*), *ф* (*f*), *в* (*v*), *м* (*m*), *li* is pronounced much like the *ui* in *win*.
  2. The so-called "soft" (or palatalized) vowels, *ä, e, ö, i, ö, i, ö*, all have normally a light *y* before them (*cp.* Polish, Note 3), and are pronounced approximately as *ya, ye, yi, yo, yü*; but when these vowels follow a consonant, the *y*-element is merged into the consonant, palatalizing it (see Note 6 below), and there is heard a very light *y*-glide between the consonant and the vowel.  
In detail: *ä* = *yä*, except when unstressed before *л* (consonantal *i*; see Note 3 just below), when it = *ye* (more exactly, between *ye* and *ya*). *e* (*ä*, a variant symbol) = *ye*, except unstressed after a consonant, when it = *e*. *e* also often = *yo* (and *o*), in conditions too varied to state briefly; in this value many now write *ë* instead of *e*. *li* and *l* have the same value (*li* standing before consonants and *l* before vowels); they = *i* (the initial light palatal *y* which marks the other "soft" vowels is not heard as a separate element). *io* (the symbol a tied *i* and *o*) = *iü*, except in foreign words, where it = *ü* (Gen. Rem. 1).
  3. The semivowel *л* forms the second element of a number of diphthongs: *äli, eli, öli, öli, öli, öli*, which are simply the respective vowels followed by a light *i*, as *ai, ei, etc.* The semivowel *л* (= *y*) stands after palatal consonants as a sign of "palatalization"; that is, the consonant is merged with *y*, and so is followed by a light *y*-glide (see Gen. Rem. 6). The symbol *л* (formerly a consonantal *l*) is now silent, and serves only to indicate that the preceding consonant is not "soft" (palatalized) and is to be pronounced with energy.
  4. *c* = *s*, *3* = *z*, *и* = *ts*, *у* = *ch*, *ш* = *sh*, *щ* = *sch*. Before *н* (*n*), *т* and *л* both = *sh*.
  5. *б* (*b*), *в* (*v*), *д* (*d*), *з* (*z*), when followed by a voiceless consonant or by *т*, *з* are to be pronounced as *p, t, s, sh*, respectively.
  6. Consonants before a "palatalized" vowel (see Note 2 above) become palatalized (*cp.* Polish, Note 9, and Gen. Rem. 6).
  7. *г* (*g*), when final, or before *к* (*k*), *т* (*t*), *ч* (*ch*), is pronounced as *ng*; before *д* (*d*), it is a voiced *h* (Gen. Rem. 5). Initial in some foreign words, *г* = *h*, in the genitive endings *aro, ero, ro*, *r* = *v*. *к* (*k*) before every vowel and consonant = *k*.
  8. Russian *л* (*l*), when associated with "hard" vowels (Note 1 above), or with the velar consonants *к* (*k*), *г* (*g*), is made far back in the mouth (like the Polish *l*; Polish, Note 8), the back of the tongue being raised, the tip lowered, and the lips a little rounded; it is almost a quick, light *u*. Otherwise, Russian *л* is palatalized — a lighter, clearer sound than English or German *l*.
  9. The letter *ѣ* (= *i*) appears in foreign words where *th* occurs.

### 9. Greek.

#### CLASSICAL.

In classical Greek, vowels were evenly stressed, the accent occasioning elevation of pitch in the musical

scale instead of increase of force in the expiration. The musical pitch of the old Greek, however, can not be accurately known or reproduced. Greek should be read with attention to the length of the vowels.

1. Greek vowels have each a constant value. *i* is always sounded like *ë* in quality, but short in quantity; *e* like *e*, but long. *o* is approximately *ö*, *u* is *ü*, and *ä, i* are *ä, i* respectively, whether long or short.
2. Diphthongs are pronounced simply by combining the sounds of their component vowels; as, *ai* = *ai*, *oi* = *oi*, *ui* = *ui* (in the Language Chart represented by *wi*; see Gen. Rem. 9); *g, p* and *q* are the same as *ai, ei* (= *ei*), and *oi, ev* are not diphthongs, but = *ö, ü*. *av* = *au*, *ev* = *eu*, *ov* = *ou*.
3. The "rough breathing" = *h*; the "soft breathing" = silent *h*. *ρ* (*r* with rough breathing) = strong voiceless *r*, like the Welsh *rh* (Welsh, Note 4).
4. *γ* before *κ, χ, ξ, η*; hence *γγ* = *ng*.
5. *σ* (*s*) = *s*; but before *β, γ, and μ*, *σ* = *z*.
6. *σσ* (*rr*) = *sh* (approximately); but in reading classical Greek one generally sounds them as *ss* and *tt*).
7. *φ, θ, χ* (originally *π, τ, κ*, strongly aspirated) were in the classical period probably becoming spirants (that is, *f, th, h* respectively), but still aspirated (that is, accompanied by a distinct *h*); they are usually sounded, however, as simply *f, th, h*.

### MODERN.

Literary modern Greek differs appreciably in some details of pronunciation from the modern popular speech.

The modern Greek vowel system is much simplified, but the spellings remain archaic. The rules for syllable stress are similar to those for Latin.

1. *a, ä*, whether long or short, have the quality of *a*; *e, ai* = *e*; *η, ι, υ, ε, ο, ι, υ* — all = *i* (whether long or short); *o*, *ω* = *ö* (long or short); but the sound is a shade toward *ö*, not the full *ö* heard in the English *loud*; *ou* = *ü* (but shortened).
2. *av, ev, uv* = *av, ev, uv* respectively; but the *v* being bilabial (Gen. Rem. 10), the effect is almost that of diphthongs ending in *u* — that is, *au, eu, iu*. However, before voiceless consonants (*θ, κ, ξ, π, τ, φ, χ, ψ*), the *v* is pronounced as *f*; that is, one hears *af, ef, if*, but it is a bilabial consonant (Gen. Rem. 10).
3. *β* = *v*; but it is a bilabial consonant (Gen. Rem. 10).
4. *γ* represents three sounds: (1) before *a, o, ω*, and consonants, it is pronounced as a voiced velar spirant (like German *g* between vowels; see Gen. Rem. 5); (2) before *e, η, ι, υ*, it is pronounced as *y*; (3) before *κ, ξ, χ, i* it is *h*.
5. *κ* = *k*; but before front vowels (those sounded as *i* or *e* — Note 1 above) *κ* becomes a palatal consonant like English *k* in *key*, followed by a slight *y*-glide. After *v* or *γ, κ* becomes *g*, and so *γκ, γκ* both = *ng*.
6. After *μ*, *κ* becomes *b*, and so *μκ, γκ* both = *ng*.
7. *χ* is sounded as *h*, a voiceless spirant, which is velar or palatal (Gen. Rem. 5) according as it is associated with back or front vowels.

### 10. Latin.

In the English pronunciation of Latin, the letters are given values such as they would have in like positions in English words to-day. The Roman pronunciation is an approximate restoration of the sounds as spoken by Romans of the classic period. The Continental pronunciation gives the letters mainly their modern continental values, and hence is but little removed from the restored historical (or Roman) pronunciation. When quoting Latin as Latin (especially when quoting literary passages), educated speakers now generally use the Roman method. But many Latin phrases have been so long fixed in the vocabularies of philosophy, law, medicine, etc., in the English values of the letters, that a public lecturer, a lawyer, or other professional man, quoting these familiar phrases, will usually pronounce them by the English method.

The accent in Latin words of two syllables rests upon the first syllable; in words of three or more syllables, upon the penult if that syllable contains a long vowel or a vowel followed by two consonants; otherwise, upon the antepenult.

#### ENGLISH METHOD.

1. In open accented syllables, *a* = *ä*, *e* (*æ*, *a*) = *i*, *i* = *ai*, *o* = *ö*, *u* = *iü* or *ü* (as in English). In closed accented syllables, *a* = *a* (except before *r* followed by another consonant, where *a* = *ä*), *e* (*æ*, *a*) = *e*, *i* (*y*) = *i*, *o* = *o*, *u* = *u*. *e* before *r*, and *i*, *u* before *r* followed by another consonant, = *ü*.
2. When final in unstressed syllables, *a* = *a*, *e* = *i*, *o* = *ö*, and *u* = *u* or *iü*; but when final in monosyllables, vowels are treated as in open accented syllables (Note 1).
3. *c* and *g* as in English; that is, before *a, o, u*, *c* = *k* and *g* = *g*, and before *e* (*æ*, *i*), *i* (*y*), *c* = *s* and *g* = *j*.
4. *s* = *s* or *z* (as in English); *ci, ti, ti*, in terminations, are sounded as in English, and *xi* = *ksh*.
5. *x* initial = *z*; otherwise, *x* = *ks*.

#### ROMAN METHOD.

6. Diphthongs are sounded as the spelling indicates: *ae* = *a + e* (approximately *ai*); *ui* = *ü + i* (approximately *wi*; Gen. Rem. 9), etc. But in the period following the classical Latin, *ae* had come to be pronounced as long *e*.
7. *b* before *s* or *t* becomes voiceless (= *p*).
8. *o* in open accented syllables is long and = *ö*; in closed syllables, is short and = *o*. In the case of the other vowels, the long and the short forms pair consistently, that is, they differ only in length, not in quality.
9. *n* before *c, g* = *ng*; hence *nc* = *ng*, not *n*.
10. Latin *u* (Roman method) is bilabial (see Gen. Rem. 9), and = (almost) *w*.
11. *u* unstressed before another vowel = *w*.

### 11. Italian.

The accent is generally on the penult, and is less energetic than in English, all syllables being uttered more evenly. The lighter-stressed vowels are rarely reduced, as in English.

The letters *k, v, z, y* are not in the Italian alphabet, but appear in some words adopted from other languages.

1. Italian *e* represents sometimes *ē*, sometimes *e* or *a* (more strictly, a sound between *e* and *a*). The best guide to the value of the *e* is the Latin source of the vowel. No brief rule can be stated. One may say that *e* when unaccented, when in monosyllables, when final and accented (always marked with a grave accent), and generally when in an open stressed syllable, has a sound near *ē*.
2. The several Italian diphthongs are simply combinations of the sounds represented in their spellings.
3. *c*, and the *c* in *sc*, before *a*, *o*, *u*, and *ch* in all cases, = *k*; *g* before *a*, *o*, *u*, and *gh* in all cases, = *g*.
4. *c*, *cc*, before *e*, *i*, = *ch*; *sc* before *e*, *i* = *sh*; *g*, *gg*, before *e*, *i*, = *j*.
5. *h* is silent. It is infrequent except after *c* and *g*.
6. *gl* (before *i*) and *gn* represent respectively the "palatal" *l* and *n* (see Gen. Rem. 6).
7. *n* before *g* = *ng*; hence *ng* always = *ng*, never *n*.
8. The value of *o* in Italian (as of *e*; Note 1 above) depends largely upon its Latin source, knowledge of which is an approximate guide. *o* when in unaccented syllables, and when in monosyllables ending in a consonant, = *ō* or *o*; but when final and accented, in monosyllables or otherwise, = *ō* or *o*.
9. *s* when initial before a vowel, or when followed by a voiceless consonant, or when doubled (*ss*), = *s*; when between vowels (but not the initial of the second part of a compound word), or when before a voiced consonant, = *z* (exceptions are numerous).
10. *u* as a vowel always = *ū*. It may be short, but still has the quality of *ū*, not of *u*. Unaccented *u* before a vowel is a consonant and = *w*.
11. Unaccented *i* before a vowel is a consonant and is sounded as a palatal *u* (see Gen. Rem. 5), but somewhat softer; it is, in fact, almost *y*. The letter *j* is simply a variant of *i* in this value.
12. *z*, *zz* when initial, or medial after a consonant, or before *i* followed by another vowel, = *ts*; when between two vowels, generally = *dz*.

## 12. French.

In French words no one syllable has a decided accent, but nearly all syllables are uttered with equal stress of voice. To an English ear a chief stress seems to fall on the final syllable; hence, in this dictionary, the primary accent (') has been placed over the last syllable of most French words, and the secondary accent (") on the other syllables (except over obscure *e*), to indicate a careful enunciation of all the unaccented syllables.

1. *a* represents sometimes *ā*, but generally a sound between *a* and *ā*: (1) *a* = *ā*, in the endings *-as*, *-as* when the *s* or *z* is pronounced, and often when *s* is silent, *-ase*, *-azon*, *-aille*; and when circumflexed *â*; (2) *a* (in most other cases), *ā*, and *ā* are pronounced with a sound near that of *a*, but not so "flat" as this English vowel. French *a* approaches the sound *a* especially before the final sounds *b*, *d*, *g*, *l*, *m*, *n*, *ny* (that is, the letters *b*, *d*, *g*, *l*, *m*, *n*, *gn* when these are pronounced), and before final *-re*, *-ge*. *oi* = *wā* when following *r*, and in the ending *-oie*; in most other cases *oi* = *ra* (with a not so "flat" as the English *a*).
2. (1) *e* before a pronounced consonant, before final silent *t*, *ts*, and final silent *s* in monosyllables; *ei*, *ai* (except the verbal ending *ai*); *ē*, *ē*, *ay*, *ey* — all are pronounced as *e* (really a sound between *e* and *ā*). (2) *ē*; *e* followed by a final silent consonant (other than *t*); *ai* (when it is a verbal ending) — all are pronounced as *ē*.
3. (1) *o* when it is the final sound in a syllable (that is, it may be followed by silent consonants), and *o* in the endings *-ose* (and generally before an *s* which has the value of *z*), *-me* and *-ne*; *ō*, *ad*, *au*, *eau* — all are pronounced as *ō*. (2) *o* not as above, and *au* before *r*, = *o*.
4. *eu*, *au* not followed in the same syllable by a pronounced consonant, or in a closed syllable ending with the sound of *z* or *t* (*-euse*, *-eute*, *-eure*), *ēu* = "rounded" *ē* (Gen. Rem. 2); otherwise, *eu*, *au*, and always *ue*, *œ* before *-ille*, *-ille* (= *y*), = "rounded" *e* (Gen. Rem. 3).
5. For pronunciation of *u*, *ū* = *ū*, see Gen. Rem. 1.
6. *e* when final in unstressed syllables = *ə*; at the end of a word it is usually silent (as in English).
7. Final *d*, *g*, *n*, *p*, *s*, *t*, *x*, and *z* are usually silent. But when the following word begins with a vowel, "liaison" may occur. These consonants (not in all cases; no rule can be given) are then pronounced as if beginning the following word, *d* being sounded as *t*, *g* as *k*, and *z* as *s*. *r* is silent in the final syllables *-er* and *-ier*. *h* is in most words silent.
8. *c* before *a*, *o*, *u* = *k*; before *e*, *i*, *y* = *s*; *ç* = *s*. *ch* = *sh*; but when final or before a consonant = *k*. *q* and *qu* generally = *k*.
9. *g* before *a*, *o*, *u* = *g*; before *e*, *i* (*y*) = *ʒ*; *ge* before *a*, *o*, *u* also = *ʒ*.
10. *gn* = "palatal" *n* (see Gen. Rem. 6).
11. *il* after a vowel = *y*; *il* = *ly* (see Gen. Rem. 6); also *i* before a vowel = *y*, unless a group of consonants precedes. By *y* is here meant the initial stage of the sound, not its consummation.
12. *m*, *n*, final or before a consonant, other than *m*, *n*, are silent, but impart to the preceding vowel a nasal quality. In such conditions, *am*, *an*, *em*, *en*, = *ān* (but final *n* preceded by the sound *y* = *ān*, not *ān*); *aim*, *ain*, *eim*, *ein*, *im*, *in*, *ym*, *yn* = *ān*; *om*, *on* = *ōn*; *oim* = *wān*; and *um*, *un* = *ūn* (or *ēn*). (See Gen. Rem. 4.)
13. *s* between vowels = *z*.
14. *-ti* = *-si*, or *-ty*; a rule can not be stated.
15. French has the letter *v* only in some foreign words; but the sound is heard in French words, spelled *ou* (as in *ouï*); and it is, further, the first element in the sound represented by *oi* (= *wa* or *xa*), and by *oin* (= *wañ*). A similar sound is spelled with *u* (as in *nuît*, *nuage*); but the sound of *u* in these words is not exactly *w*; it differs from *w* in that it begins with the organs in position for *ū*, not for *ū* (see Gen. Rem. 10).
16. *x* between vowels generally = *z*. Otherwise, *x* = *ks*.

## 13. Spanish.

In general, Spanish words ending in a vowel or diphthong, or inflectional *-s*, *-n*, have the accent on the penult; with any other ending, on the final syllable. When the stress varies from this position, its place is often indicated by an acute accent-mark over the

stressed vowel. Spanish vowels, whether stressed or unstressed, are enunciated fully and clearly.

1. *a*, *i* (*y*), *u*, whether long or short, have the sound of *ā*, *ē*, *ū*, respectively. *e* and *o*, when final in word or syllable, = *ē* and *ō*; when in a closed syllable, or before *ll*, *rr*, = *e* and *o* (or, more exactly, between *o* and *ō*). An unstressed *u* before another vowel = *w* (as in Italian, Note 10).
2. Spanish diphthongs, both "rising" (having the stronger stress on the second vowel) and "falling" (with stronger stress on the first vowel), are numerous, but are to be pronounced simply as the letters representing them indicate; *as*, *ai* = *ai*, *ao* = *au* (almost), etc.
3. *b* = *b*; but between vowels it becomes a bilabial *v* (see Gen. Rem. 10). *r* has virtually the same sound as *b*, but a little softened, the contact between the lips being not so firm. *d* = *d*; but when final = (almost) *th*.
4. *ch* = *ch*. *c* before *e*, *i* = *th* (in Spanish America, *s*); otherwise, *c*, and *qu* always = *k*; *cc* = *kth*.
5. *g* before *e*, *i* = *g* (Gen. Rem. 5); otherwise, *g*, and always *gu* before *e*, *i* = *g*; between vowels, *g* often approaches a voiced *h* (Gen. Rem. 5).
6. *h* is silent; initial *h* followed by another vowel = *hw*, as in *where*. *j* = a strong *h* (almost *n*).
7. *ll*, *ñ* represent the "palatal" *l* and *n* (Gen. Rem. 6). *n* before a *k* or *g* sound = *ŋ*.
8. *x* = *ks*; but before *p*, *t*, *c* often *x* = *s*.
9. *y* between vowels or initial before a vowel is a strong *y* (almost palatal *u*; Gen. Rem. 5). In other positions *y* is a vowel, being a variant of *i*, and = *i*.
10. *z* = *th* (in Spanish America, *s*).

## 14. Portuguese.

The accent in Portuguese is much as in Spanish.

1. Portuguese has many diphthongs: the so-called "rising" which begin with half-consonantal *i* or *u* (light and fleeting), and the so-called "falling" which end with half-consonantal *i* or *u*. The diphthongs are pronounced just as they are spelled, except that *ei* = *ai*.
2. *b*, *d*, *g*, when between voiced sounds (that is, when preceded by a vowel and followed by a vowel or a voiced consonant), are somewhat altered from the normal *b*, *d*, *g*; *d* becomes almost *th*; *g* becomes the voiced *h* (see Gen. Rem. 5); and *b* becomes a bilabial *v* (that is, a *v* made between the two lips instead of between the lower lip and upper teeth; see Gen. Rem. 9).
3. *ē*, and *e* when it is stressed and long, or before final *r*, = *ē*. *ē*, and *e* when stressed and short, or before *r* not final, or before *ss*, *ç*, or *c* (= *s*), = *e* (more exactly, a sound between *e* and *ā*).
4. *g* before *a*, *o*, *u*, and *gu* before *e*, *i*, = *g*; *g* before *e*, *i*, = *ʒ*; *gu* before *a* = *gw*. *ç*, *ch*, and *c* before *a*, *o*, *u*, = *k*; *ç*, and *c* before *e*, *i*, = *s*. *ch*, *x* (generally) = *sh*.
5. *e* in unstressed syllables generally = *ə*; but unstressed *e* before a front consonant (that is, one made in the front of the mouth), and unstressed *i*, = *i*.
6. *lh*, *l* (when final), and *nh*, are sounded as the "palatal" *l* and *n* (see Gen. Rem. 6).
7. *n* before the sounds *k* and *g* is pronounced *ŋ*, with the preceding vowel nasalized (Gen. Rem. 4); but the *ŋ* is very light — a mere glide from the nasal vowel to the following consonant.
8. Nasal vowels are numerous in Portuguese. They arise as in French; but the matter is simpler in Portuguese because the fundamental quality of the vowel is not changed, with the exception that *an* = nasal *au* (*auñ*). Otherwise, regularly: *an* = *ān*, *em*, *en* = *ēn*, *im*, *in* = *īn*, *oan* = *auñ*, etc. Sometimes nasal vowels in Portuguese are indicated by a tilde (as *ā*, *ē*).
9. *ou*, and sometimes *o*, = *ō*; *o* when short and in a closed syllable = *ə*; *o* when final, and generally when in an open syllable, = *ū*. When *o* stands before or after another stressed vowel, it forms with that vowel a diphthong, the *o* being sounded as a light *u*.
10. *s* initial and *ss* = *s*; *s* between vowels = *z*; *s* between a vowel and a following voiced consonant = *ʒ*; *s* final or before a voiceless consonant = *sh*. *z* initial or between vowels = *z*; when final or before voiceless consonants = *sh*; when before a voiced consonant = *ʒ*.
11. *y* in Portuguese is a variant of *i*, and = *i*.

## 15. Welsh.

Welsh words of more than one syllable are generally accented on the penult. Certain verbal endings, however, receive the stress; and a number of dissyllables with the prefixes *go-*, *ym-*, *ys-*, and substantives in *-awdr*, have the stress on the last syllable.

In the standard or approved spelling, every letter is sounded, and no letter (with few exceptions) has more than one sound.

1. *a*, *e*, *i*, *o*, *u*, *y*, when long, are sounded as *ā*, *ē*, *ī*, *ō*, *ū*, *y*, respectively; when short, they have approximately the same sounds, except that (1) short *a* = *ā*, and (2) *y* in monosyllables, in final syllables, in the prefixes *cyd-* and (sometimes) *cym-*, and when preceded by the vowel *u* (= *ū*), has the sound of *ū*. *i* before another full vowel is consonantal and pronounced as *y*.
2. Welsh diphthongs are numerous, but offer no difficulty; they are pronounced as the component letters of the spelling indicate.
3. *ch* = *h*; *f* = *f*; *dd* = *th*; *th* = *th*.
4. *ng* = *ŋ*; *ng* = *ŋh*. These sounds, never initial in English, may begin words in Welsh.
5. *l* is simply voiceless *l* (Gen. Rem. 7). Welsh *mh*, *nh*, *rh* are aspirated *m*, *n*, and *r*; they have much the effect of strong voiceless consonants.
6. *j*, *k*, *g*, *r*, *t*, *x* occur in foreign names; but many Welsh writers substitute the Welsh equivalents.

## 16. Hungarian.

Hungarian, the most important member of the Ural-Altaic group, is agglutinative in structure, words being built up by adding to a monosyllabic root successive formative suffixes. The vowels in these successive syllables are related to each other by the law of vowel harmony, or harmonic sequence. See HARMONIC SEQUENCE.

The accent in single words (simple or compound) rests upon the first syllable; in long words there is a secondary accent generally on the third syllable. But the lighter stressed syllables have scarcely less weight

than the fully stressed, and consequently every vowel is pronounced full and clear.

Hungarian spelling is very consistent: the letters and combinations of letters (in striking contrast with English spelling) generally keep each its one phonetic value, with the exception of *e*, which sometimes = *e*, and sometimes (especially before *r*) is more open, approaching *a*. Consequently, the values of the letters once learned, any one can pronounce any printed word or spell any spoken word without difficulty. An acute accent over the various letters serves to distinguish the long (and *tense*) vowels, the letters for the corresponding short (and *lax*) vowels being unmarked. Counting the accented letters and the digraphs, the alphabet has 38 letters.

1. The letters *ä*, *é*, *í*, *ó*, *ú*, *ü* are sounded as *ā*, *ē*, *ī*, *ō*, *ū* ("rounded") *ē* — Gen. Rem. 2), *ū*, *ū* ("rounded") *ī* — Gen. Rem. 1), respectively — all long vowels. *a*, *e*, *i*, *o*, *u*, *ü* = *o*, *e*, *i*, *o*, *ū* (but short), *ū* (but short), *ū*, respectively — all short vowels. Diphthongs are represented by the letters of their constituent elements: *ai* = *oi*; *ei* = *ei* (nearly *ai*); *au* = *au*.
2. Hungarian vowels are sounded as normally in English, except that *s* = *sh* and *j* = *y*. Consonant combinations as follows: *cs* = *ch*; *dsz* = *j*; *cz* = *ts*; *sz* = *s*; *zs* = *z*.
3. Several "palatalized" consonants are heard in Hungarian (cp. Polish *Ź* and Gen. Rem. 6), indicated in the spelling by placing the letter *y* after the proper consonant letter, as *dy*, *ly*, *ny*, *ty*. (*y* serves no other purpose in Hungarian.) These sounds are the respective *d*, *l*, *n*, *t* sounds modified by raising the front part of the tongue as if for *y* at the time the consonant is pronounced; the position of the tongue gives a light *y*-glide after the consonants. The effect is to make *dy* sound somewhat like *j*, *ty* somewhat like *ch*. *gy* is pronounced as *dy*, somewhat like *j*. The Hungarian "palatal" *l* (spelled *ly*) has become in present pronunciation a simple *y* (as in French; see Gen. Rem. 6).
4. *n* before *k*, *g* = *ŋ* (hence *ng* always = *ŋg*, as in *finger*, never *n* alone, as in *singer*).
5. A final consonant of one syllable is consistently assimilated to an initial consonant of the next syllable; that is, before a following voiceless consonant, all voiced consonants (except nasal and liquid consonants, *m*, *n*, *l*, *r*) are pronounced as the corresponding voiceless; and before a following voiced stop consonant, and *z*, *zs* (= *z*, *ʒ*), a voiceless consonant becomes voiced; before *p*, *t*, *k*, etc., *b* is pronounced as *p*, *d* as *t*, *g* as *k*, etc., and before *b*, *d*, *g*, etc., *p* is pronounced as *b*, *t* as *d*, *k* as *g*, etc.

## 17. Hebrew.

Hebrew is one of the Semitic languages, and has no close relations with the other languages represented in the chart. The others are all interrelated — members of the Aryan or Indo-European family, supposed to be developed from a common mother tongue.

Hebrew is written from right to left. Its alphabet consists of 23 consonants, the vowel sounds being represented by small dots and dashes placed (with three exceptions) under the consonants after which they are to be pronounced. In the table a horizontal dash indicates the position of the consonant, the vowel signs (except *·* for *o*) appearing under it. In two other exceptional cases (an alternate sign for *ō*, and the sign for *ū*) the dot is associated with the silent symbol *ʾ*; and the symbol for *ē*, *i* may also have a silent *ʾ* after the consonant that *ē*, *i* is to follow.

Three letters (*א*, *י*, *ו*), originally vowels (*a*, *i*, *u*, respectively), are now mere vowel-strengtheners, or else virtual consonants, being respectively the "soft breathing" (Greek *h* = English *h* in *hour*), *y* (consonant form of *i*), and *w* (consonant form of *u*).

1. Hebrew vowels are long in open (simple), short in closed (compound) syllables. Their values are further affected by the accent. The vowel signs are as follows:

$\overline{\text{—}}$	= $\bar{a}$	$\overline{\text{—}}$	= $\bar{e}$
$\overline{\text{—}}$ or $\overline{\text{—}}$	= $\bar{e}$	$\overline{\text{—}}$	= $\bar{e}$ (long or short)
$\overline{\text{—}}$	= $\bar{i}$	$\overline{\text{—}}$	= $\bar{i}$
$\overline{\text{—}}$ or $\overline{\text{—}}$	= $\bar{o}$	$\overline{\text{—}}$	= $\bar{o}$
$\overline{\text{—}}$	= $\bar{u}$	$\overline{\text{—}}$	= $\bar{u}$

The first vowel here ( $\overline{\text{—}}$ ) is not exactly  $\bar{a}$ , nor  $\bar{e}$ , but about Swedish  $\bar{a}$ , a sound between  $\bar{a}$  and  $\bar{e}$ . The same sign stands for the short  $\bar{e}$ .  $\overline{\text{—}}$  is an open  $\bar{e}$ , and may be long or short.

2. In unstressed syllables appear vowels that are much shortened and reduced or "obscured." One of these is either altogether silent, marking syllable division, or else an obscure vowel (*i*); its symbol is  $\overline{\text{—}}$ . But, especially when associated with velar consonants, the reduced vowel is represented in a more definite value by adjoining this sign ( $\overline{\text{—}}$ ) to the actual vowel sign; as,  $\overline{\text{—}}$  = reduced  $\bar{a}$ ;  $\overline{\text{—}}$  = reduced  $\bar{e}$ ;  $\overline{\text{—}}$  = reduced  $\bar{o}$ .
3. Five consonants have a special form when final. These forms in the Language Chart are enclosed in parenthesis-marks.
4.  $\overline{\text{—}}$  indicates not exactly the soft vowel beginning of the English (as in *hour*), but rather the energetic initial of the German vowel (as in *ein*). Three other characters represent consonant sounds more or less resembling *h*. These are: (1)  $\overline{\text{—}}$ , which is approximately *h*; but at the end of a word, unless furnished with a dot (cp. Note 6), it is silent. (2)  $\overline{\text{—}}$  usually = *h*; but at times it is much stronger, somewhat like an aspirated *g*, which may be transcribed as *gh*. (3)  $\overline{\text{—}}$  is usually a strong velar *h* (Gen. Rem. 5), but is sometimes weakened to an *h*.
5.  $\overline{\text{—}}$  and  $\overline{\text{—}}$  (both = *s*), originally differing in value, are now identical.  $\overline{\text{—}}$  (another *s*) differs from  $\overline{\text{—}}$  ( $\overline{\text{—}}$ ),  $\overline{\text{—}}$  (*t*) from  $\overline{\text{—}}$  (*k*) from  $\overline{\text{—}}$  (*k*), in that the first consonant in each pair is emphatic — enunciated with stronger articulation, and with compression of the larynx.
6. The stopped consonants (*p*, *b*, *t*, *d*, *k*, *g*) and their corresponding spirants (*f*, *v*, *th*, *dh*, *x*, "voiced" *h*) are represented by the same signs, namely,  $\overline{\text{—}}$ ,  $\overline{\text{—}}$ ,  $\overline{\text{—}}$ ,  $\overline{\text{—}}$ ,  $\overline{\text{—}}$ ; but the stops are distinguished by a dot placed within the sign; thus,  $\overline{\text{—}}$  = *p*,  $\overline{\text{—}}$  = *f*,  $\overline{\text{—}}$  = *t*,  $\overline{\text{—}}$  = *d*,  $\overline{\text{—}}$  = *k*, etc. In the case of all the other consonant letters, however, and also in the case of the six just mentioned when they stand between vowels, a dot thus placed is a sign merely of stronger enunciation (as if the consonant were doubled). Modern Jews pronounce  $\overline{\text{—}}$  as *s*.

Poet. Essay on Criticism pt. iii, l. 611.

Syn.: bad, corrupt, depraved, detestable, dissolute, forlorn, forsaken, incorrigible, irreclaimable, odious, profligate, reprobate, shameless, unprincipled, vicious, wicked. An abandoned person is one that has given himself up to evil without restraint. The corrupt and vicious, who still have some regard for the opinion of friends or of the public, are not yet abandoned. "Have you a single friend . . . so shameless, so thoroughly abandoned, as to undertake your defense?" JUNIUS Letters xxxv, 150. [M.] The dissolute and profligate may repent; the abandoned have ceased to care; the reprobate have passed beyond hope. See ADDICTED. — Ant.: conscientious, correct, excellent, good, meritorious, moral, righteous, self-controlled, steady, upright, virtuous, worthy.

2. To level; as, to abase a mountain. 3. [Rare.] To cast down; as, to abase the eye. 4. To reduce in value, as coin: debase now preferred. [*c.* F. abaisser, < LL. abasso, < ad, to + basso, lower; < bassus, low; see BASE, a.]

Syn.: bring low, cast down, debase, degrade, depress, disgrace, humble, humiliate, lower, reduce, sink. Abase refers only to outward conditions. "Exalt him that is low, and abase him that is high." Ezek. xli, 26. Debase applies to quality or character. The coinage is debased by excess of alloy, the man by vice. Humble in present use refers chiefly to feeling of heart; humiliate to outward conditions; even when one is said to humble himself, he either has or affects to have humility of heart. To disgrace may be to bring or inflict odium upon others or upon oneself; the noun disgrace retains more of the passive sense than the verb; he disgraced himself by his conduct; he brought disgrace upon his family. To dishonor a person is to deprive him of honor that should or might be given. To discredit one is to injure his reputation, as for veracity or solvency. A sense of unworthiness humbles; a shameful insult humiliates.

imprisonment for crime disgraces; vile practices lower. Degrade may refer to either station or character. An officer is degraded by being reduced to the ranks. Drunkenness is a degrading vice. Misfortune or injustice may abase the good; nothing but their own ill-doing can debase or disgrace them. — Ant.: aggrandize, dignify, elevate, exalt, honor, promote, raise, uplift. — Prep.: to abase by misfortune; abase oneself before a superior.

[A-BASHED] or [A-BASH'T]; a-bash'ing.

I. t. To confuse or confound, as by exciting a sudden consciousness of inferiority, guilt, or the like; deprive of self-possession; put to shame; disconcert. She ceased — and buried then her burning cheek.

Abashed, amid the lilies there. POE At Arafat pt. i, st. 7.

They heard and were abashed. MURTON P. L. bk. i, l. 332.

II. f. To stand confused or confounded; lose self-possession. [ME. abaschen, abaisen, < OF. esbahir (F. ébahir), astonish, < es- (< L. ex, out) + F. bahir, < bah, interj. of astonishment.]

Syn.: bewilder, confound, confuse, daunt, discompose, disconcert, dishearten, embarrass, humble, humiliate, mortify, overawe, shame. Any sense of inferiority abashes, with or without the sense of wrong. The poor are abashed at the splendor of wealth, the ignorant at the learning of the wise. To confuse is to bring into a state of mental bewilderment; to confound is to overwhelm the mental faculties; to daunt is to subject to a certain degree of fear. Embarrass is a strong word, signifying primarily hamper, hinder, impede. A pupil is confused by a perplexing question, a general confounded by overwhelming defeat. A hostess is discomposed by the tardiness of guests, a speaker disconcerted by a failure of memory. The criminal who is not abashed at detection may be daunted by the officer's weapon. Sudden joy may bewilder, but will not abash. The true worshiper is humbled rather than abashed before God. The parent is mortified by the child's rudeness, the child abashed at the parent's reproof. The embarrassed speaker finds it difficult to proceed. The mob is overawed by the military, the hypocrite shamed by exposure. "A man whom no denial, no scorn could abash." FIELDING Amelia bk. iii, ch. 9, p. 300. [n. & s. 1871.]

To mortify a person is to bring upon him a painful sense of humiliation, whether because of his own or another's fault or failure. See EMBARRASS. — Ant.: animate, buoy, cheer, embolden, encourage, inspirit, rally, uphold. — Prep.: abashed at discovery; abashed before the king; abashed in the presence of superior goodness or wisdom.

— a-bash'ed-ly, adv. In an abashed manner; confusedly. — a-bash'less, a. Not abashed; shameless. — a-bash'ment, n. Confusion, as from shame.

some larger object or whole; a summary or epitome, as of a book or document. 2. *Law*. A compendium; as, an *abstract* of a deed or title. 3. Anything viewed abstractly; a generality.

Women are always turning from the *abstract* to the individual and feeling where the philosopher only thinks.  
 HARRIET B. STOWE *Minister's Wooing* ch. 2, p. 25. [c. 1859.]  
 4. *Logic*. Any product of the mental act of abstracting; an abstract idea or term. 5. *Gram*. (1) A noun expressive of qualities or a general attribute; as, *virtue*, *vice*, *deformity*. (2) Especially, since the 13th century, such a noun formed from an adjective, as *goodness* from *good*, etc. 6. *Pharm*. A powder obtained by digesting a drug with some suitable solvent, such as sugar of milk, and so made that one part (of the abstract) represents two parts of the basic substance. An abstract is twice as strong as a fluid extract and ten times as strong as a tincture. *SYN*: see *ABSTRACT*.—*abstract* of title (*Law*), a document containing a brief and orderly statement of the original grant and subsequent conveyances and encumbrances relating to the title and ownership of real estate.—*a. received and forwarded* (*Railroad*), a report of freight received and dispatched from a station.—*In the a.*, conceived apart from concrete relations or embodiment; in its general reference or meaning; abstractly.

She has no idea of poverty but in the abstract.

LIVING Sketch-book, *The Wife* p. 32. [c. 1853.]

**ab-abstract**, 1 ab-strak'ted; 2 ab-strak'ted, *pa*. 1. Absent-minded. 2. Separated from everything else; apart; hence, *abstract*; difficult. 3. Refracted; ideal. *SYN*: absent, *abstract*, *absorbed*, *heedless*, *inattentive*, *indifferent*, *listless*, *negligent*, *oblivious*, *preoccupied*, *thoughtless*. As regards mental action, *absorbed*, *abstracted*, and *preoccupied* refer to the cause, *absent* or *absent-minded* to the effect. The man *absorbed* in one thing will appear *absent* in others. A *preoccupied* person may seem *listless* and *thoughtless*, but the really *listless* and *thoughtless* have no mental energy to be *preoccupied*. The *absent-minded* man is *oblivious* of ordinary matters simply through inattention or because his thoughts are elsewhere. One who is *preoccupied* is intensely busy in thought; one who is *absorbed* or *abstracted* may be merely in a reverie or day-dream. Compare synonyms for *ABSTRACT*, *a*.—*Ant*: alert, attentive, on hand, prompt, ready, thoughtful, wide-awake.—*ly*, *adv*.—*ness*, *n*.

**ab-strac'tion**, 1 ab-strak'shon; 2 ab-strak'shon, *n*. 1. The act, process, or product of abstracting, or withdrawing the attention from other qualities or aspects of an object, in order to concentrate it upon some one quality or aspect. *Specif*: (1) The mental operation of separating qualities or attributes from the individual objects to which they belong, or of contemplating them as thus separated; as, the *abstraction* of whiteness from white objects. *Abstraction* is the groundwork of classification, which is impossible without it.

The act of analytic attention by which that element in each of these objects which is like its fellow in every other way, is separately observed or noticed, is usually called *abstraction*, because the mind draws it from the other parts or percepts.

FOSTER *Human Intellect* pt. iii, ch. 2, p. 389. [c. 1890.]

(2) The condition of mind which results in its being withdrawn from certain objects, or parts or attributes of objects, and its being fixed upon some other objects, parts, or attributes.

*Abstraction* . . . is merely a negation to one or more objects, in consequence of its concentration on another.

HAMILTON *Metaphysics* lect. xxxiv, p. 469. [c. 1859.]  
 The precise nature of the mental activity or mental state called *abstraction* has been much debated. Many of the older writers on logic defined it as the qualities or attributes of the objects could somehow be withdrawn from the objects themselves, when considered as a number of individuals having something in common, and so be compounded into a general notion of quality or attribute. It is now commonly recognized, however, that the act of *abstraction* consists in the withdrawal of attention. Such *abstraction* is necessary to the formation of those mental schemata, or conceptions, for which words become the vehicle, as it were.

(3) In a wide sense, the formation of a conception. THOMSON *Laws of Thought* pt. i, pp. 95, 96. [sh. & co. 1863.] 2. A product of the mental process of abstracting; a concept or notion; as, beauty is an *abstraction*.

*Abstractions*, under the glowing genius of the orator, acquired . . . a power to thrill the blood.

WEBSTER *Works*, *Memoir* vol. i, ch. 6, p. 96. [L. & co. 1858.]

3. A conception existing only in the mind and answering to no reality; something visionary.

The general advantage is an *abstraction* which concerns only an *abstraction* called humanity.

W. S. LUTZ *Right and Wrong* ch. 2, p. 50. [c. 1891.]

4. The act or process of separating, taking, or removing, especially secretly or dishonestly; purloining. 5. Absence of mind; obliviousness of immediate surroundings, as from attention concentrated on something else. 6. Separation from worldly objects, pursuits, and enjoyments; seclusion of life, as by the hermit. 7. *Geol*. The draining of water from a stream by another having more rapid corrodng action. 8. *Chem*. Separation of a constituent from a compound or mixture by distillation.—*Platonic abstraction*, the mystical self-forgetfulness which leads the philosopher into a region of thought and spirit absolutely above his present condition. R. A. VAUGHAN *Hours with the Mystics* 4th ed., vol. i, p. 19.—*ab-stra'ction-al*, *a*.—*ab-stra'ction-ist*, *n*. One given to *abstractions*; an idealizer.—*ab-stra'ct-i'ous*, *a*. *Chem*. Produced by distillation.

**ab-stra'ct-ive**, 1 ab-strak'tiv; 2 ab-strak'tiv, *a*. 1. Of, *ab-stra'ct-ive*, pertaining to, or tending to abstraction; having the power of abstraction; epitomizing. 2. Having the nature of abstraction or an abstract. 3. *Abstrac-tive*, *ab-stra'ct-ive* (*ly*), *adv*.—*ab-stra'ct-ive-ness*, *n*. *ab-stra'ct-ly*, 1 ab-strak'tly; 2 ab-strak'tly, *adv*. In an abstract manner. (1) In the abstract. (2) In an epitome. *ab-stra'ct-ness*, 1 *ness*; 2 *ness*, *n*. The quality of being abstract; separateness from the actual concrete. *ab-stra'hent*, 1 ab-strahent; 2 ab-strahent, *a*. *Ab-stra'cting*, *te*nding to draw away; abstract.

**ab-strich**, 1 ap'strich; 2 ap'strich, *n*. [G.] The impure oxid that forms as a scum on molten lead in cupellation.

**ab-stric'ted**, 1 ab-strak'ted; 2 ab-strak'ted, *a*. 1. Bot. Separated by abstraction, as the spores of some fungi. 2. Not bound; loosened.

**ab-stric'tion**, 1 ab-strak'shon; 2 ab-strak'shon, *n*. 1. Bot. A process of spore-formation in certain fungi, in which the sporophore becomes constricted by septa at the place of division. 2. A loosening. [*< ab- + L. stric'tio* (*n*), *< stringo*, bind.]

**ab-stringe**, *vt*. To unbind or loosen.

**ab-strude**, *vt*, *ab-trude, *vt*. To thrust away.*

**ab-stru'se**, 1 ab-stru'se; 2 ab-stru'se, *a*. 1. Remote from the usual course of thought; hard to be understood; dealing with matters difficult to be understood; as, "paths of *abstruse* dogma," M. ARNOLD *Lyonesse* and *Dogma* ch. 1, p. 41. 2. Hidden; concealed. [*< L. abstrusus*, pp. of *abstrudo*, hide, *< ab*, from, + *trudo*, push.] *SYN*: see *COMPLEX*; *MYSTERIOUS*; *OBSCURE*.—*ab-stru'se-ly*, *adv*.—*ab-stru'se-ness*, *n*. The quality of being *abstruse*.—*ab-stru'sal-ty*, *n*. [Rare.] 1. *Abstruseness*. 2. Something *abstruse*. [*< L. abstrusus*, pp. of *abstrudo*, hide, *< ab*, from, + *trudo*, push.] *SYN*: see *COMPLEX*; *MYSTERIOUS*; *OBSCURE*.—*ab-stru'sion*, 1 ab-stru'shon; 2 ab-stru'shon, *n*. The act of *ab-stru'se, 1 ab-stru'd; 2 ab-stru'd, *a*. 1. Opposed to manifest truth or propriety; inconsistent with reason or common sense; unworthy of serious consideration; logically contradictory; irrational; as, an *absurd* proposition. 2. Talking, acting, or reasoning in a manner inconsistent with common sense or propriety; grotesque; ridiculous. 3. *Philos.* & *Logic*. Contradictory of some established rational principle; contradicting its own major premise. 4. *Discordant*; not in tune. [*< L. absurdus*, *< ab* (*intens.*) + *surdus*, deaf.]*

*SYN*: anomalous, chimerical, erroneous, false, foolish, ill-advised, ill-considered, ill-judged, inconclusive, incorrect, infatuated, irrational, mistaken, monstrous, nonsensical, paradoxical, preposterous, ridiculous, senseless, silly, stupid, unreasonable, wild. That is *absurd* which is contrary to the first principles of reasoning; as, that a part should be greater than the whole is *absurd*. A *paradoxical* statement appears at first thought contradictory, but *absurd*, while it may be really true, anything is *absurd* when clearly contrary to sound reason, *foolish* when contrary to practical good sense, *silly* when petty and contemptible in its folly, *erroneous* when containing error that vitiates the result, *unreasonable* when there seems a perverse bias or an intent to go wrong. *Monstrous* and *preposterous* refer to what is overwhelmingly *absurd*; as, "O monstrous! eleven buckram men grown out of two," SHAKESPEARE *1 King Henry IV*, act ii, sc. 4. The ridiculous or the nonsensical is worthy only to be laughed at. The lunatic's claim to be a king is *ridiculous*; the Mother Goose rimes are *nonsensical*. See *IDIOTIC*; *INCONGRUOUS*; *INSANE*; *RIDICULOUS*.—*Ant*: certain, consistent, demonstrable, demonstrated, established, incontestable, incontrovertible, indisputable, indubitable, infallible, logical, rational, reasonable, sagacious, sensible, sound, substantial, true, undeniable, unquestionable, wise.—*ab-surd*, *n*. [Rare.] An absurdity; a person or thing that is *absurd*.—*ly*, *adv*.—*ness*, *n*. **ab-surd-i-ty**, 1 ab-surd-i-ty; 2 ab-surd-i-ty, *n*. [*TYES*, 1 *ty*; 2 *ty*, *pl*.] 1. The state or quality of being *absurd*; absurdness. 2. A contradiction of obvious truth or sound reason; an absurd act, statement, habit, or thing. [*< L. absurditas* (*s*); see *ABSTURD*.]

The idea of being both a bad man and a good citizen is an *absurdity*.

MILTS *Science of Politics* ch. 5, p. 31. [p. & w. 1887.]

**ab-sur'dum**, 1 ab-sur'dum; 2 ab-sur'dum, *n*. [L.] An absurd or illogical conclusion or condition.

*Reductio ad absurdum*, see *REDUCTIO*.

**ab'sus**, 1 ab'us; 2 ab'us, *n*. *Bot*. A species of *Cassia* (*C. ab'us*), or its bitter aromatic seeds, used in Egypt for ophthalmia.

**Ab-syr'tus**, 1 ab-syr'tus; 2 ab-syr'tus, *n*. *Gr. Myth.* Brother of Medea, dismembered and cast into the Adriatic, whence *Ab-syr'ti*, 1 ab-syr'ti; 2 ab-syr'ti, *n*. [Scot.] An abbacy; erroneously, a superior thane. *ab'thanet*.—*ab'than-ry*, *n*. The see and jurisdiction of an abthanal; abbacy. *ab'than-age*; *ab'than-ric*.

**Ab't**, 1 apt; 2 apt, Franz Wilhelm (1791-1819-1855). A German music-composer; song-writer.

**ab't**, *abbr*. About.

**ab-ter'mi-nal**, 1 ab-tur'mi-nal; 2 ab-tur'mi-nal, *a*. *Physiol*. Passing from the end or ends of a muscle to the middle part; said of an electric current. [*< ab-*, and see *TERMINAL*.]

**ab'than**, 1 ab'than; 2 ab'than, *n*. [Scot.] An abbacy; erroneously, a superior thane. *ab'thanet*.—*ab'than-ry*, *n*. The see and jurisdiction of an abthanal; abbacy. *ab'than-age*; *ab'than-ric*.

**Ab'tu**, 1 ab'tu; 2 ab'tu, *n*. [Ar.] Father: an element in *Ab'tu*, many Arabic names.

**Ab'tu**, *n*. A mountain health resort in Rajputana, India, noted for old cave-temples of the Jains.

**Ab'u**, 1 ab'u; 2 ab'u, *n*. Same as *BOABDIL*.

**Ab'u-al-dal'ah Mo-ham-med**, 1 ab'u-al-dal'ah; 2 ab'u-al-dal'ah, *n*. *Arab*. A famous Arabian soldier, ruler, and author of geographical and historical works. [Yemen, Arabia.]

**Ab'u-al-rish**, 1 ab'u-al-rish; 2 ab'u-al-rish, *n*. A town in *Ab'u-Bek'r*, 1 ab'u-bek'r; 2 ab'u-bek'r, *n*. A call (573-574); Mohammed's first successor; father of Ayesha. [Ar., father of the virgin.]

**Ab'u-bus**, 1 ab'u-bus; 2 ab'u-bus, *n*. *Bib*. (Apocrypha). *Ab'u-bay*, 1 ab'u-bay; 2 ab'u-bay, *n*. A town in Bataan province, Luzon, P. I.

**Ab'u-bay**, 1 ab'u-bay; 2 ab'u-bay, *n*. A town in Bataan province, Luzon, P. I.

**Ab'u-buc'o**, 1 ab'u-buc'o; 2 ab'u-buc'o, *n*. A Burmese weight. See *Ab'u-dal, 1 ab'u-dal; 2 ab'u-dal, *n*. 1. In John Hughes's (1677-1720) drama *The Siege of Damascus*, an officer of the Arabian army who succeeds Calad as the commander, and makes peace with the Syrians. 2. In James Ridley's (1736-1765) *Tales of the Genii*, a rich Baghdad merchant who is haunted by a witch until he discovers that the talsman is "to fear God and keep his commandments."*

**Ab'u-ha'med**, 1 ab'u-ha'med; 2 ab'u-ha'med, *n*. A town on the Nile river, Egypt, near Berber; scene of defeat of derivishes, Aug. 7, 1897. [Etymological form.]

[*< OF. abundancia*, *< L. abundantia*, *< abundo*; see *ABUNDANT*.]

**ab-un'dan-cy**, 1 ab-un'dan-cy; 2 ab-un'dan-cy, *n*. Affluence; abundance.

**ab-un'dant**, 1 ab-un'dant; 2 ab-un'dant, *a*. Affording a large measure or an overplus; fully sufficient; plentiful; abounding; as, *abundant* reason; *abundant* fruitfulness.

The grace of our Lord was exceeding abundant. 1 Tim. i, 14.

[*OF. < L. abundans* (*s*), pp. of *abundo*; see *ABUNDANT*.]

*SYN*: abounding, affluent, ample, bountiful, brimming, copious, full, generous, large, lavish, liberal, luxuriant, overflowing, plentiful, profuse, rich, teeming. That is *abundant* which makes sure of sufficiency by evident overplus. *Affluent*, *lavish*, *luxuriant*, and *profuse* imply a decided excess, *lavish* and *profuse* oftenest in the ill sense. We rejoice in *abundant* resources, and honor *generous* hospitality; *lavish* and *profuse* expenditure suggests extravagance and wastefulness. See *AFFLUENCE*; *AMPLE*; *ENOUGH*; *LARGE*.—*Ant*: deficient, drained, dry, exhausted, impoverished, inadequate, insufficient, niggardly, poor, scant, scarce, scrimped, short, sparing, straitened.—*Prep*: abundant *in* resources.—*abundant* number, a number the sum of whose aliquot parts exceeds the number itself; as, 18, the sum of whose aliquot parts, 1, 2, 3, 6, 9, is 21; distinguished from a *deficient* number, the sum of whose aliquot parts is less than itself, and a *perfect* number, in which their sum equals the number.—*ab-un'dant-ly*, *adv*.

**ab'un-da'tion**, *n*. [Prov. Eng.] Abundance. [*ab-oon't*.]

**ab-u-ne**, 1 ab-u-ne; 2 ab-u-ne, *adv*. [*Scot*.] Above.

**ab'u-ra-ha'ye**, 1 ab'u-ra-ha'ye; 2 ab'u-ra-ha'ye, *n*. A Japanese cyprinoid fish (*Sarcocheilichthys variegatus*).

**ab-u-rst**, 1 ab-u-rst; 2 ab-u-rst, *adv*. & *a*. In a bursting condition; bursting.

**ab-u-r'ton**, 1 ab-u-r'ton; 2 ab-u-r'ton, *adv*. & *a*. *Naut*. Placed athwartship; said of casks thus stowed. [*< a-on*, + *ur-ton*.]

**Ab'ur-y**, 1 ab'ur-y; 2 ab'ur-y, *n*. A village in Wiltshire, England; site of Druid temple; megalithic remains.

**ab-u'saget**, *n*. Abuse.

**ab-u'se**, 1 ab-u'se; 2 ab-u'se, *vt*. [*ABUSED*, *AB-USE* (*ING*).]

**ab-uze**, 1 ab-uze; 2 ab-uze, *vt*. To use improperly or excessively; put to a bad use; misuse.

I believe it is in the power of every man, who has not too long abused himself, to lay aside every night his pack of mental care and anxiety. HOLLAND *Lessons in Life* lesson xx, p. 284. [c. 1867.]

2. To treat ill; wrong; use injuriously; hurt. 3. To wrong in speech; reproach coarsely; disparage; revile.

Yes, if a man's character is to be abused, say what you will, there's nobody like a relation to do the business.

THACKERAY *Vanity Fair* ch. 19, p. 175. [n. & co.]

4. *Law*. To violate; ravish. 5. To misuse. [*< F. abuser*, *< L. abusus*, pp. of *abutor*, *< ab*, from, + *utor*, use.]

*SYN*: aggrieve, damage, defame, defile, disparage, harm, ill-treat, impose on or upon, injure, malign, maltreat, misuse, molest, oppress, persecute, pervert, prostitute, rail at, ravish, reproach, revile, ruin, slander, victimize, vilify, violate, vituperate, wrong. *Abuse* covers all unreasonable or improper use or treatment by word or act. A tenant does not *abuse* rented property by "reasonable wear," tho that may damage the property and injure its sale; he may *abuse* it by needless defacement or neglect. It is possible to *abuse* a man without harming him, as when the criminal *clutbrates* the judge; or to harm a man without *abusing* him, as when the witness tells the truth about the criminal. *Defame*, *malign*, *rail at*, *revile*, *slander*, *villify*, and *vituperate* are used always in a bad sense. One may be justly *reproached*. To *impose on* or to *victimize* one is to *injure* him by *abusing* his confidence. To *persecute* one is to *ill-treat* him for opinion's sake, commonly for religious belief; to *oppress* is generally for political or pecuniary motives. "Thou shalt not oppress an hire servant that is poor and needy." *Deut*, xxiv, 14. *Misemployment*, *misuse*, and *pervert* are commonly applied to objects rather than to persons. A dissolute youth *misemploys* his time, *misuses* his money and opportunities, *harms* his associates, *perverts* his talents, *wrongs* his parents, *ruins* himself, *abuses* the gifts of God.—*Ant*: applaud, benefit, care for, cherish, conserve, consider, eulogize, extol, favor, laud, panegyricize, praise, protect, regard, respect, shield, sustain, tend, uphold, vindicate.

—*ab-u'se-a-ble*, *a*.—*ab-u'se-ed-ly*, *adv*.—*ab-u'se-see*, *n*. One who is *abused*.—*ab-u'se-ment*, *n*. Abuse; misuse.

**ab-u'ser**, *n*. 1. One who abuses. 2. *Law*. Insult; abuse.

**ab-u'se**, 1 ab-u'se; 2 ab-u'se, *n*. 1. Improper use, application, or treatment; a turning to a wrong purpose or use; excessive, imprudent, or unnatural use; unduly severe or cruel treatment; perversion; misuse; misapplication; as, *abuse* of confidence; *abuse* of one's body or its powers; to subject a child to *abuse*.

*Abuse of the Queen's English* . . . did not begin with Americans. MATTHEWS *Words* ch. 3, p. 104. [s. c. 1876.]

2. A corrupt, immoral, or improper practice, use, or act; as, we must remedy these *abuses*. 3. *Law*. (1) Any improper use of a right or privilege; as, *abuse* of a franchise. (2) Wrongful use of lawful authority; as, *abuse* of a judicial process or legal writ. 4. Reviling or abusive language; vituperation; slander. 5. Violation; rape. [*< F. abus*, *< L. abusus*; see *ABUSE*, *v*.] *ab-u'sion*.

*SYN*: see *OUTRAGE*.

**ab-u'sion**, 1 ab-u'sion; 2 ab-u'sion, *n*. [Rare.] Abuse.—*ab-u'sion-ful*, *ly*, *adv*.

**ab-u'sion-ness**, *n*. Capability of improper use; lack of use.

**Ab'u-sher**, 1 ab'u-sher; 2 ab'u-sher, *n*. Same as *ABUSHER*.

**Ab'u-sim-bel**, 1 ab'u-sim-bel; 2 ab'u-sim-bel, *n*. A site of ancient rock-temples and colossal statues of Rameses on the west bank of the Nile river, Egypt.

**ab-u'sive**, 1 ab-u'sive; 2 ab-u'sive, *a*. 1. Of the nature of *abuse*; of abusive; employing harsh words or ill treatment; hurtful; harsh. 2. Containing, marked by, or abounding in *abuse* or *abuses*; vituperative; scurrilous; corrupt; as, an *abusive* author or book. 3. Wrongly used;

**abut'**, 1 a-but'; 2 a-but', r. [A-BUTTING; A-BUTTING.]  
I. 1. To cause to adjoin, or touch at the end or side; project; as, one *abuts* his stable against another's dwelling.  
II. 1. To touch at the end or boundary-line; border; be contiguous; terminate; rest; as, his estate *abuts* upon mine; the bridge *abuts* against the pier.  
Knowledge has its boundary line, where it *abuts* on ignorance.  
H. MANN *Thoughts, Ignorance and Miracles* p. 93. [In n. r.]

[< OF. *abuter*, < a- (< L. *ad*), to + *but*; see BUTT.]  
Syn. approach, approximate, extend, impinge, project, reach, touch. —Ant: diverge, recede, recurve, retire, retreat. —Erg: abuts on or upon the highway; against the rock. —Abutting joint, see ARCTICUS, 2 (4).  
A-bu'ta, 1 a-bu'ta; 2 a-bu'ta, n. [Guiana.] Bot. A genus of tropical American plants of the moonseed family. The species *A. rufescens* furnishes the medicinal white pareira brava. See ABUTTA.

A-bu'ti-lon, 1 a-bu'ti-lon; 2 a-bu'ti-lon, n. Bot. 1. A genus of plants of the mallow family (*Malvaceae*), mainly tropical, closely resembling *Sida*, including many ornamental species, of which *A. stratum* is common in cultivation. *A. arizonicum* (Indian mallow) is a tall weed naturalized in the United States. 2. [a-] A plant of this genus. [< Ar. *abuttan*.]

**a-but'ment**, 1 a-but'ment or -mant; 2 a-but'ment, n. 1. The act or state of abutting. 2. That which abuts or is abutted upon. Especially: (1) Arch. A supporting or buttressing structure to sustain lateral pressure, as the thrust of an arch or vault, the impact of ice, or the force of currents; also, the point or place in which the thrust of an arch or vault is received. (2) Mech. Any relatively immovable part or surface for sustaining pressure or receiving reaction, as in a rotary steam-engine or pump, firearms, etc. (3) Improperly, the bed in which cables of a suspension bridge are anchored. (4) In carpentry, a joint or junction of two pieces where the fibers of one are at right angles with those of another. (5) A dam. —**abutting arch**, the arch of a bridge nearest the shore.

**a-but'tal**, 1 a-but'tal; 2 a-but'tal, n. 1. The condition or relation of abutting; abutment; as, the *abut'tal* of land on the highway. 2. An abutting part, especially the end of a tract of land or its boundary-line: usually in the plural. —**a-but'tal-ling**, n. The fixing or marking of boundaries.

**a-but'ter**, 1 a-but'ter; 2 a-but'ter, n. One who or that which abuts; one whose land or building abuts upon a highway or upon another's property.

**a-bu'tu-a**, 1 a-bu'tu-a; 2 a-bu'tu-a, n. [Guiana.] The root of a climbing woody plant (*Chondrodendron tomentosum*), of the moonseed family, which furnishes true pareira brava. See ABUTTA.

**a-bu'z**, 1 a-bu'z; 2 a-bu'z, & a. [Colloq.] In a buzz; buzzing.

**ab-va'tu-a**, 1 ab-va'tu-a; 2 ab-va'tu-a, n. Same as ABEVACUATION.

**ab-wab'**, 1 ab-wab'; 2 ab-wab', n. [Anglo-Ind.] A tax imposed upon the Moslems in India, now consolidated by the British in the land revenue, but still continued in some native states. Hindu and Moslem. See GEORGE BIRDWOOD. [Hind., < Ar. *abwad*, gates.]

**a-by'**, 1 a-by'; 2 a-by', r. 1. [Archaeol.] To pay the penalty for; expiate; suffer. 2. To buy. 3. To make restitution; atone; endure. [< AS. *abygan*, < a- + *bycan*; see A-OUT, and BUT.] —**a-by'e**, 1 a-by'e; 2 a-by'e, n. 1. A by. 2. By. 3. By. Christopher Theodor (?/1835-7/1855). A German anthropologist.

**a-by'dos**, 1 a-by'dos; 2 a-by'dos, n. 1. A city of ancient Egypt. 2. A city of ancient Mysia. —**a-by'dust**.

1-miz; 2-mis, pl.] 1. A place of instruction or training. Specif.: (1) A school intermediate between a common school and a college. (2) Any institution where the higher branches of learning are taught, or where pupils are trained in some special science or art; as, the U. S. Naval Academy. 2. [a-] Gr. *anti*. (1) The public pleasure-ground, including a gymnasium, near Athens, where Plato taught philosophy; hence, the pupils of Plato collectively. (2) The Platonic movement with its successive schools, including the doctrines taught.

The Academy of Plato became divided into several schools, of which Cicero recognizes two, also some authorities distinguished as many as five in the period between Plato and Cicero. Of these the chief were the Old Academy and the New Academy. The former consisted of Plato and his more immediate disciples and successors. In the 2d and 3d centuries B. C. arose the Middle Academy, so-called, the teaching of which was skeptical, altho, unlike dogmatic skepticism, it considered possible the attainment of probable knowledge. The New Academy (1st century B. C. to A. D. 529) returned to the Platonic interest in ethical doctrines and ideals, and practised a broad eclecticism in philosophy.

3. An association of literary men, artists, scientists, or the like, combined for the promotion of literature, art, or science; as, the Academy of Fine Arts; the French Academy. See INSTITUTE. < F. *académie*; < L. *academia*, < Gr. *akadēmeia*, < *akadēmos*, a reputed hero. —**academy board** (Ar), heavy cardboard with a surface especially prepared for use in painting with oils. —**a. figure**, a drawing in black and white chalks on tinted paper, or a photograph, from a nude model. —**a. of music**. 1. An institution for the study and teaching of music. 2. A choral or operatic organization for the study or interpretation of music. 3. A building in which musical entertainment, as a concert or recital, is provided. —**Acad'e-mism**, n. The teachings of the Academic school of philosophy; Platonism, in the various forms it assumed before the closing of the Academy, A. D. 529. —**Acad'e-mist**, n. 1. An Academic philosopher. 2. [a-] An academicalian. 3. [a-] A pupil in a riding-school. —**acad'e-mize** or **-mize**, v. [*-mized*; *-mizing*.] To cause to conform to the rules of an academy.

English Literature indeed made up its mind long since not to be inezimated or *academized*.

ac'ti-ta'tion, 1 ak'ti-tā'shən; 2 æ'ti-tā'shən, *n.* [Rare.]  
Quick and frequent action. [*L. actitatus*, pp. of *actio*,  
freq. of *ago*, act.] [shore form of life.  
ac'ti-um, 1 ak'shi-um; 2 æ'shi-um, *n.* *Ecol.* A rocky sca-  
le.—ac'ti-um, 1 ak'shi-um; 2 æ'shi-um, *n.* An ancient Grecian  
promontory; Augustus Caesar defeated Antony here, 31 B.C.  
ac'ti-vate, 1 ak'ti-vāt; 2 æ'ti-vāt, *vt.* [VAT-ēd; -VAT-ING.]  
1. *Physic.* To render radioactive, as a gas, by subject-  
ing to the action of a radioactive substance; ionize. 2.  
*Chem.* To render capable of adsorption. 3. To make active.  
ac'ti-vā'tor, 1 ak'ti-vā'tōr; 2 æ'ti-vā'tōr, *n.* A substance  
that renders active a ferment that is secreted in an in-  
active form.  
ac'tive, 1 ak'tiv; 2 æ'tiv, *a.* 1. Abounding in, exhibit-  
ing, or expressing action, as opposed to lacking  
in action, or sluggish. (1) Agile; quick; as, *active* as a  
squirrel. (2) Full of activity; busy; as, an *active* man.  
We are active beings, and our sympathy  
action. *DISRAELI Contarini Fleming* pt. ii, ch. 9, p. 141. [f. 1846.]  
(3) Brisk; lively; as, an *active* demand for wheat. (4)  
*Gram.* Expressing the action of verbs, as distinguished  
from being and state; also, as opposed to passivity.  
Verb-forms to which *active* is so applied are said to be-  
long to the *active* (opposed to the *passive*) voice. By some  
grammarians *active* is used in the sense of transitive.  
2. Being in or pertaining to a state of action: opposed to  
quiescent, extinct, or latent; as, an *active* volcano;  
kinetic energy is *active*, not latent. 3. Having the  
property of causing or promoting action: opposed to  
passive. (1) Originating or producing action.  
In our instinctive rebellion against pain we are children again,  
and demand an *active* will to wreak our vengeance on.  
GEORGE ELIOT *Adam Bede* ch. 27, p. 271. [a. c. & co. 1886.]  
(2) Inciting to or manifested in action: opposed to  
contemplative or speculative; as, an *active* Christianity.  
(3) Tending to action; practical, as opposed to theoretic-  
al; as, Reid divided the mental powers into intellectual  
and *active*. [ME. *actif*, < F. *actif*, < L. *actius*, < *ago*, act.]  
Syn.: agile, alert, brisk, bustling, busy, diligent, ener-  
getic, expeditious, industrious, lively, mobile, nimble,  
officious, prompt, quick, ready, restless, sprightly, spy,  
supple, vigorous, wide-awake. *Active* refers to both quick-  
ness and constancy of action; in the former sense it is  
allied with *agile*, *alert*, *brisk*, etc.; in the latter, with *busy*,  
*diligent*, *industrious*. The *active* love employment, the  
*busy* are actually employed, the *diligent* and the *industrious*  
are habitually *busy*. The *restless* are *active* from inability  
to keep quiet; their activity may be without purpose, or out  
of all proportion to the purpose contemplated. The *offi-  
cious* are undesirably *active* in the affairs of others. See  
ALERT; ALIVE; MENDACIOUS.—*Ant.* dull, heavy, idle, in-  
active, indolent, inert, lazy, quiescent, quiet, slow, sluggish,  
stupid.—*Prep.* active *in* work, in a cause; *for* an object,  
as *for* justice; *with* persons or instrumentalities; *about* some-  
thing, as *about* other people's business.  
—ac'tive-ly, *adv.*—ac'tive-ness, *n.*  
ac'ti-vism, *n.* *Philos.* A doctrine held by Christian Rud-  
olph Eucken that life is action and human duty lies in a  
world of strife.  
ac'ti-vi-tal, 1 ak'ti-vi-tāl; 2 æ'ti-vi-tāl, *a.* Of or pertaining  
to human activities; including all human actions of every kind.  
ac'ti-vi-ty, 1 ak'ti-vi-ti; 2 æ'ti-vi-ti, *n.* [TIES, 1 -tiz;  
-tis, pl.] 1. The state or quality of being active;  
exertion of energy; action. 2. Brisk or vigorous move-  
ment or action; hence, active force or operation in  
general; as, *activity* in trade; *activity* of a volcano; hu-  
man activities. 3. *Mech.* Work done in a unit of time.  
4. *Chem.* The ability, as of a carbon, to remove coloring  
matter or impurity from a liquid. 5. Bodily exercise; ac-  
tivities. [*F. activité*, < LL. *actiuitas* (< *L. actius*; see AC-  
TIVE).] Syn.: see ANIMATION. [live.

tive. 1 ak'to; 2 æ'to, *n.* *Sp.-Am. Lav.* An action; espe-  
cially, a judicial proceeding or decree.  
ac'tol, 1 ak'tol or -tōl; 2 æ'tol or -tōl, *n.* *Chem.* An antiseptic  
(*AgC<sub>10</sub>H<sub>17</sub>O<sub>11</sub>*) employed in dentistry, veterinary medi-  
cine, and surgery; silver lactate. [Coloed < LACTATE.]  
ac'ton, 1 ak'ton; 2 æ'ton, *n.* A quilted tunic worn  
under medieval armor to prevent chafing; also, a  
cuirass of plate armor. < OF. *acoton*, *f. hoqueion*, <  
Sp. *alcoton*, < Ar. *al-qūṭun*, < al, the, + *qūṭun*, cotton.]  
ac'ton-er, 1 ak'ton-er; 2 æ'ton-er, *n.* One who acts or plays  
a part; specif., one who represents a character, plays a  
part, or enacts a rôle, as in a theater; a stage-player;  
one whose business is acting. 2. Any doer of an act.  
3. *Lav.* (1) The plaintiff. (2) An advocate or pro-  
secutor. [L., < *ago*, drive.] [AGENT; cause.  
Syn.: comedian, performer, player, tragedian. See  
ac'tress, 1 ak'tres; 2 æ'tres, *n.* A woman or girl who  
acts or performs, especially on the stage. < [ACTOR].  
ac'tu-a-bil-i-ty, 1 ak'chu-a-bil-i-ti; 2 æ'chu-a-bil-i-ti, *n.*  
[Rare.] Capacity for being actuated or acted upon. [M.]  
ac'tu-al, 1 ak'chu-or -tiu-jāl; 2 æ'chu-or -tiu-jāl, *a.*  
1. Real in being or act; carried out or realized in  
practice; existing in fact, as opposed to merely possi-  
ble, constructive, conceivable, or ideal; as, *actual* cost.  
To the heart of Faith hopes are as *actual* as realities. FARRAR  
Early Days of Christianity bk. iii, ch. 18, p. 249. [f. & w.]  
2. *Lav.* Existing in fact; real, as distinguished from  
conjectural or imputed by construction; as, *actual* pos-  
session. 3. Being in existence or action now; existent;  
present.  
If there was any trouble, *actual* or impending, affecting those  
who had served, her place was with them.  
TOWNSHIP *Bricks without Straws* ch. 42, p. 323. [f. & w. 1880.]  
4. Active or involving action or results; practical. [*F.*  
actual < LL. *actualis*, practical, < *L. actus*; see ACT, v.]  
Syn.: authentic, certain, demonstrable, developed, genu-  
ine, positive, real, true, unquestionable, veritable. *Actual*  
has respect to a thing done or accomplished, *real* to a  
thing as existing, *positive* to that which is fixed or estab-

lished, developed to that which has reached completion by  
a natural process of unfolding. *Actual* is in opposition to  
the supposed, conceived, or reported, and furnishes the  
proof of its existence in itself; *real* is opposed to feigned,  
imaginary, and is capable of demonstration; *positive*, to  
the uncertain or doubtful; *developed*, to that which is un-  
developed or incomplete. The *developed* is susceptible of  
proof; the *positive* precludes the necessity for proof. The  
present condition of a thing is its *actual* condition; *ills* are  
*real* that have a substantial reason; proofs are *positive* when  
they give the mind certainty; a plant is *developed* when it  
has reached its completed state. See AUTHENTIC.—*Ant.*:  
fabulous, feigned, fictitious, hypothetical, imaginary, sup-  
posititious, theoretical, untrue, visionary.  
—ac'tu-al-ism, *n.* *Metaph.* The doctrine that "all  
existence is truly active or spiritual, as opposed to inert  
or dead." J. HINTON *Philosophy and Religion* pref., p. 13.  
[K. P. & co. 1881.]—ac'tu-al-ist, *n.* 1. One who deals with  
realities or facts, as opposed to theories or fancies. 2. An  
adherent of actualism.—ac'tu-al-ist-ic, *a.*  
ac'tu-al, *n.* 1. Something real or actually existing; as,  
the *actual* is the real, as opposed to the merely possible.  
2. *pl.* Specif., in finance, actual assets or receipts, as  
distinct from supposed or estimated.  
ac'tu-al-i-ty, 1 ak'chu-or -tiu-jāl-i-ti; 2 æ'chu-  
or -tiu-jāl-i-ti, *n.* [TIES, 1 -tiz; -tis, pl.] 1. The state  
of being actual, or real; as, the *actuality* of miracles. 2.  
That which is actual; any reality; as, war is a dreadful  
*actuality*. 3. Realism, as in art, or any instance of it.  
4. *Philos.* (1) In the Scholastic philosophy, the for-  
mal essence of an existent thing. (2) In the Hegelian  
philosophy, a more complete independence, or self-suffi-  
ciency, than belongs to phenomenal existence. [*L. LL.*  
*actualitas* (< *actualis*; see ACTUAL).—*actually*, *adv.*  
ac'tu-al-ize, 1 ak'chu-or -tiu-jāl-iz; 2 æ'chu-or -tiu-  
jāl-iz, *vt.* [TIES, 1 -tiz; -tis, pl.] To make real or realistic;  
realize; as, to *actualize* an ideal. ac'tu-al-ize.—  
ac'tu-al-ize, 1 ak'chu-or -tiu-jāl-iz; 2 æ'chu-or -tiu-  
jāl-iz, *adv.* 1. In act or fact; in reality; truly; as,  
he was *actually* there; the fool *actually* imagines himself  
wise. 2. *Actively*.  
ac'tu-al-ness, 1 ak'chu-or -tiu-jāl-nēs; 2 æ'chu-or  
-tiu-jāl-nēs, *n.* The quality of being actual.  
ac'tu-ary, 1 ak'chu-or -tiu-jāl-ri; 2 æ'chu-or -tiu-jāl-  
ri, *n.* [RIES, 1 -riz; -ris, pl.] 1. An officer, as of an in-  
surance company, who calculates and states the risks and  
premiums, compiles mortality tables, etc. 2. A public  
clerk or registrar; notary. [*L. LL.* *actuarius*, cleric, <  
*actus*; see ACT, v.]—ac'tu-ary, *a.* Of or pertaining to  
an actuary. ac'tu-ary-ant, ac'tu-ary-al-ly, *adv.*  
ac'tu-ate, 1 ak'chu-or -tiu-jēt; 2 æ'chu-or -tiu-  
jēt, *v.* [AT-ED; -ATING.] 1. *t.* To move or in-  
cite to action; influence, as by motives; impel; as, the  
spirit that *actuates* a man. 2. *t.* To perform; make ac-  
tual. 3. *t.* To quicken; rouse.  
II. *i.* To act. [*L. LL.* *actuatus*, pp. of *actuo*, < *L. ac-  
tus*; see ACT, v.]  
Syn.: compel, dispose, draw, drive, excite, impel, incite,  
incite, induce, influence, lead, move, persuade, prompt,  
stir, urge. *Actuate* refers solely to motives or influences  
from within. No one can directly *actuate* another; but  
one may be *actuated* to cruelty by hatred which another's  
misrepresentation has aroused. *Prompt* and *stir* are  
words of mere suggestion toward some course of action;  
*dispose*, *draw*, *incite*, *influence*, and *lead* refer to the use of  
mild means to awaken in another a purpose or disposition  
to act. To *excite* is to arouse one from lethargy or in-  
difference to action. *Incite* and *instigate* may be to good,  
while *instigate* is always to evil. (See ABET.) To *urge* and  
*impel* signify to produce strong excitation toward some  
act. We are *impelled* from without, *impelled* from within.  
*Drive* and *compel* imply irresistible influence accomplishing  
its object. One may be *driven* either by his own passions or  
by external force or urgency; one is *compelled* only by  
some external power; as, he was *compelled* by misfortunes  
to sell his estate.—*Ant.*: deter, discourage, dissuade, hinder,  
impede, inhibit, prevent, restrain, retard.—*Prep.*: actuated  
to crime by revenge.  
ac'tu-ate, *a.* Actuated; realized in fact.  
ac'tu-a-tion, 1 ak'chu-or -tiu-jā'shən; 2 æ'chu-or -tiu-  
jā'shən, *n.* A putting in action; moving; effectual opera-  
tion; as, creation is due to actuation of God's will.  
ac'tu-a-tor, 1 ak'chu-or -tiu-jā'tōr; 2 æ'chu-or -tiu-jā'tōr, *n.*  
One who or that which actuates; efficient cause; a motive.  
ac'tu-ose, *a.* Full of active power.  
ac'tu-ose-i-ty, 1 ak'chu-or -tiu-jōs-i-ti; 2 æ'chu-or  
-tiu-jōs-i-ti, *n.* [TIES, 1 -tiz; -tis, pl.] 1. *Metaph.*  
An activity considered as complete in itself, or in which  
the action and completion coincide, as to think, to see.  
2. *t.* The power to act; energy. [*L. LL.* *actuosity*, active,  
< *actus*; see ACT, v.]  
ac'ture, *n.* Action.  
ac'tu-ri-ence, 1 ak'tu-ri-ens; 2 æ'tu-ri-ens, *n.* [Rare.]  
The inward impulse or desire for action. [*L. LL.* *actus*, pp.  
of *ago*, act.]  
ac'tus, 1 ak'tus; 2 æ'tus, *n.* [ACTUS, pl.] [*L. LL.* *Actus*. A  
1. *Actus*, 1 ak'tus; 2 æ'tus, *n.* The exertion of force, physical  
or mental, as distinguished from the force itself; the  
exercise or manifestation of a property, as distinguished  
from the property itself; actuality, as distinguished  
from potentiality.  
The term *actus* was used in the discussions of the schol-  
astics, as shaped by the teachings of Aristotle. Matter or  
substance, form, and motion were included by Aristotle in  
the sphere of existence. Matter, in which form inheres,  
exists as possibility or capacity (Gr. *dynamis*, *L. potentia*).  
Form is the actualization, the realization (Gr. *entelechia*,  
*L. actus*), the evolution, or entelechy of this possibility.  
Motion or change (Gr. *kinesis*) is the passage of potentiality  
into reality. Anything, as, *e. g.*, explosive powder, is *in actu*  
when its energy, or possibility of activity, to distinguish it  
from its condition, *in potentia*, or as unrealized possibility of  
action. A similar distinction in modern physics results in  
the two recognized forms of energy, *potential* and *kinetic*.  
When a ton-weight is suspended in mid-air, its energy is *in po-  
tentia*, or potential; when let loose it becomes kinetic.  
See ENERGY. See KRAUTH-FLEMING Vocabulary of the  
Philosophical Sciences; UEBERWEG Hist. of Philos. vol. I,  
p. 157. [L., < *ago*, act.]  
—*actus primus*, the first act or primal energy, the  
essential energy of a thing, considered apart from its mani-  
festations in action; that which makes a thing what it is  
itself; in the scholastic philosophy, *est rei esse*, or *actus*  
*quiescentis*.—*a. purus*, the absolute or unrelated en-  
ergy; the actual moving cause, lying back of matter and  
motion; "a *tertium quid* [or third something] which is al-

ways imparting motion, but is itself unmoved; the abso-  
lute. This *tertium* is God, the immaterial and eternal  
Form, the pure Actuality in which is no potentiality, the  
self-thinking Reason or absolute Spirit." UEBERWEG Hist.  
of Philos. vol. I, p. 158.—*a. secundus*, the secondary  
act or manifested energy; the exercise or manifestation of  
that energy, as distinguished from the first act; that which  
makes a thing what it is in its form or manifestations; in  
the scholastic philosophy, *est rei operari*, or *actus entitativus*.

ac'u-men, 1 a-kiū'men; 2 æ-cū'men, *n.* 1. Quickness  
of intellectual discernment; keenness of discrimination;  
as, the critic and the metaphysician require unusual  
acumen. 2. *Bot.* A sharply tapering point. [L., point,  
< *acus*, sharpen.]  
Syn.: acuteness, cleverness, discernment, insight, keen-  
ness, penetration, perspicacity, sagacity, sharpness,  
shrewdness. *Sharpness*, *acuteness*, and *insight*, however  
keen, and *penetration*, however deep, fall short of the  
meaning of *acumen*, which implies also ability to use these  
qualities to advantage. There are persons of keen *insight*  
and great *penetration* to whom these powers are practi-  
cally useless. *Acumen* is *sharpness* to some purpose, and  
belongs to a mind that is comprehensive as well as keen.  
*Cleverness* is a practical aptitude for study or learning.  
*Insight* and *discernment* are applied oftenest to the judg-  
ment of character; *penetration* and *perspicacity* to other  
subjects of knowledge. *Sagacity* is an untroubled skill  
in using quick perceptions for a desired end, generally in  
practical affairs; *acumen* may increase with study, and ap-  
plies to the most erudite matters. *Shrewdness* is *keenness*  
or *sagacity*, often with a somewhat evil bias, as ready  
to take advantage of duller intellects. *Perspicacity* is the  
power to see clearly through that which is difficult or in-  
voluted. We speak of the *acuteness* of an observer or a  
reasoner, the *insight* and *discernment* of a student, a cler-  
gyman, or a merchant, the *sagacity* of a hound, the *keen-  
ness* of a debater, the *shrewdness* of a usurer, the *penetration*,  
*perspicacity*, and *acumen* of a philosopher.—*Ant.*: bluntness,  
dullness, obtuseness, stupidity.

2. To find the sum of; unite in one sum; as, to add a column of figures. 3. To say or write further or in addition; to go on to say; as, it may be added here. 4. [Archæol.] To bestow or inflict (upon one); give (to one). Long life shall they add to thee. Prov. iii. 2.

II. *v. i.* 1. To make or be an addition: with *to* or *unto*; as, to add to one's cares. 2. To perform the operation of addition; as, the child learns to add. [*L. addo. < ad, to, + do, put, give.*]

*Syn.*: adjoin, affix, amplify, annex, append, attach, augment, cast up, enlarge, extend, increase, join on, make up, subjoin, sum up. To add is to increase by adjoining or uniting; in distinction from multiply, which is to increase by repeating. To augment a thing is to increase it by any means whatever. We may enlarge a house, a farm, or an empire, extend influence or dominion, augment riches, attach or annex a building to one that it adjoins or papers to the document they refer to, annex a clause or a codicil, affix a seal or a signature, annex a territory, attach a condition to a promise. A speaker may amplify a discourse by a fuller treatment throughout than was originally planned, or he may append or subjoin certain remarks without change of what has gone before. We cast up or sum up an account, the add up and make out are now more usual expressions. —*Ant.*: abstract, deduct, diminish, disavow, lessen, reduce, remove, subtract, withdraw. —*Prep.*: to.

— ad'e-quate, 1 ad'i-kwat or kwit; 2 ad'e-kwat or kwit, a. 1. Equal to what is required; suitable to the case or occasion; fully sufficient; proportionate; as, an adequate supply of food; "Adequate to the demands of the nation." FRESCOTT *Cong. Mexico* vol. i, ch. 4, p. 97. 2. Equal in size, extent, value, etc. [*L. adæquatus, pp. of adæquo, make equal, < ad, to, + æquus, level.*]

Syn: able, adding, capable, commensurate, competent, equal, fit, fitted, fitting, qualified, satisfactory, sufficient, suitable. — Adequate, commensurate, and sufficient signify equal to some given occasion or work; as, a sum sufficient to meet expenses; an adequate remedy for the disease. — Commensurate is the more precise and learned word, signifying that which exactly measures the matter in question. — Adapted, fit, suitable, and qualified refer to the qualities which match or suit the occasion. A clergyman may have strength adequate to the work of a porter; but that would not be a fit or suitable occupation for him. Work is satisfactory if it satisfies those for whom it is done, tho it may be very poor work judged by some higher standard. — Qualified refers to acquired abilities; competent to both natural and acquired: a qualified teacher may be no longer competent, by reason of ill health. — Able and capable suggest general ability and reserved power, able being the higher word of the two. An able man will do something well in any position. A capable man will come up to any ordinary demand. — We say an able orator, a capable accountant. — Ant: disqualified, inadequate, unqualified, unsatisfactory, sufficient, poor, unequal, unfit, unsuitable, useless, worthless. — Prep: adequate to the demands for the purpose.

— ad'here', 1 ad'hī'r; 2 ad'hēr', r. [AD-HERED; AD-HER'ING.] 1. To stick fast or together; especially, to stick to by touch or because of the addition of a different substance; as, glue causes bodies to adhere. Opposed in this sense to *cohere*. See COHERE. 2. Figuratively: (1) To cleave; be attached or devoted, as to a party, promise, opinion, plan, etc.

The principle of free governments adheres to the American soil. WEBSTER *Works*, *Unlucky Monument*, June 17, 1825 vol. i, p. 77. [L. & M. 1864.]

(2) To belong or be closely related; as, all the rights that adhere to man. 3. *Scots Law*. (1) To affirm a previous decision. (2) To restore a conjugal right. 4. *Logic*. To belong as an accident or non-essentially; distinguished from *inhere*. 5. To consist; hold together, as parts of a whole. [*< F. adhérent, < L. adhaerere, < ad, to, + haerere, stick.*] Syn: see CLING. — Prep: to, ad'her'ence, 1 ad'hī'r-ens; 2 ad'hēr'enc, n. 1. The act, state, or condition of adhering, as one thing to another, or a person to a party, cause, or purpose; attachment; adhesion.

The loyal adherence of those states to the National Government was a profound disappointment to the Confederacy. BLAINE *Twenty Years of Congress* vol. i, ch. 14, p. 308. [L. & M. 1884.]

2. The effect of those parts of a painting which lack relief. 3. *Scots Law*. A judicial proceeding for the enforcement of the conjugal relation by either party. 4. Anything that adheres. 5. *Math*. The aggregate of such points in a point aggregate as are not limits of endless point-series: opposed to *coherence* (the aggregate of such limits). 6. An instance of adhering. [*< F. adhérence, < LL. adhaerentia, < L. adhaerent'is; see ADHERENT, a.*] — ad'her'ent-cy, n. Syn: see ATTACHMENT. — Prep: adherence of one object to another.

— ad'her'ent, n. 1. One who is attached to or follows a person, party, or principle; one who is devoted or attached; as, the adherents of monarchy; an adherent of James II. 2. [Rare.] An appendage. — ad'her'ent, n.

Syn: aid, alder, ally, backer, follower, partizan, supporter. One may be an *aid* and *supporter* of a party or church, while not an *adherent* to all its doctrines or claims. An *ally* is more independent still, as he may differ on every point except the specific ground of union. The *allies* who overthrew Napoleon were united only against him. *Allies* are regarded as equals; *adherents* and *disciples* are followers. An *adherent* is one who is devoted or attached to a person, party, principle, cause, creed, or the like. The *adherent* depends more on his individual judgment, the *disciple* is more subject to command and instruction; thus we say the *disciples* rather than the *adherents* of Christ. *Partizan* has the

Pertaining to or of the nature of an adjective. 2. *Gram.* Depending upon or standing in an adjunct relation to a noun; as, *an adjective attribute* or word. 3. Of the nature of an adjunct; dependent; secondary; as, *the adjective and substantive elements in law*. 4. *Dyeing*. Requiring the use of a mordant; as, *adjective dyes* or *dyeing*. [**L.** *adjectivus*, < *ad-jec-to*; see **ADJECT**, v.]—**ad-jec-tive**, *vt.* To make or change into an adjective.—**ad-jec-tive-ly**, *adv.*  
**ad-jec-tive**, n. 1. *Gram.* A word used to limit or qualify the application of a noun or a nominal phrase; as, *this book; sweet sounds; good men; a red brick house*. Adjectives are of two kinds: (1) *limiting adjectives*, which merely define or restrict the meaning of the noun, and which include (a) the article, (b) the pronominal adjective, and (c) the numeral adjective; (2) *qualifying adjectives*, which denote some attribute of the object named by the noun.  
2. [Rare.] A dependent or corollary.  
On the correct use of adjective and adverb: The adjective is correctly used in close association with a verb when some quality of the subject rather than of the action of the verb is to be expressed. As a general rule, if any phrase denoting manner could be substituted, the adverb should be used; but if some part of the verb to be employed as a connective, the adjective is required. As "The physician felt the pulse carefully (*i. e.*, in a careful manner, or with care), and observed that the patient's hand felt cold (*i. e.*, was cold to the touch)." Hence it is correct to say "He feels sad." "It looks bad." "It smells sweet." "He stood erect." In some cases either form would be correct, and the choice between them is a matter of force, emphasis, or individual taste.  
They escaped all safe (or safety) to land. *Acts xxvii*, 44. Special perplexity arises in connection with certain verbs, such as *appear*, *feel*, and *look*, that are used sometimes as active verbs and sometimes as substantive verbs (approaching equivalence to the verb to be). In the former sense these verbs take the adverb, in the latter the adjective, in accordance with the principle just stated; as, "The ship appeared (came into view) suddenly." "The decision appears (apparently is) unjust." "She looked (glanced) shyly at him." "She looked (had the appearance of being, or was) shy." Yet it is common to say "You are looking (or he is feeling) badly," doubtless because *bad* refers not merely to physical or mental, but also to moral qualities, so that (for fear of suggesting moral implications) we are disinclined to say "You look bad," "I feel bad," or the like. But when a man suddenly disappears leaving accounts unsettled, we very promptly say "That looks bad."

Adoration of the Magi.

Relief from the pulpit of the baptistry, Pisa, by Nicola Pisano.

The act of adoring as pertaining to the Deity; worship of God or special reverence given to some inferior person or object related to God; as, the adoration of the cross, host, Virgin Mary, or saints: not now used of inferior persons.

Wonder... enters largely into the adoration and worship which we pay to God. McCosh *Psychology* bk. ii, ch. 2, p. 119, is 1887. 2. [< *F. adorneur*, < *L. adorno*, < *ad*, to, + *orno*, deck.]

**Syn:** beautify, bedeck, deck, decorate, embellish, garnish, gild, illustrate, ornament. To embellish is to brighten and enliven by adding something that is not necessarily or very closely connected with that to which it is added; to illustrate is to add something so far like in kind as to cast a sidelight upon the principal matter. An author embellishes his narrative with fine descriptions, the artist illustrates it with beautiful engravings, the binder gilds and decorates the volume. *Garnish* is of a lower plane; as, the feast was garnished with flowers. *Deck* and *bedeck* are commonly said of apparel; as, a mother bedecks her daughter with silk and jewels. To adorn and to ornament alike signify to add that which makes anything beautiful and attractive, but ornament is more exclusively on the material plane. To ornament is to add what really confers beauty; as, the gateway was ornamented with delicate carving. *Adorn* is more lofty and spiritual, referring to a beauty which is not material, and can not be put on by ornaments or decorations, but seems in perfect harmony and unity with that to which it adds grace. We say of some admirable scholar or statesman, "he touched nothing that he did not adorn." —*Ant:* deface, deform, disfigure, mar, spoil. —*Prep:* with. —a-dörn', [*Archaic*]. I. a. Adorned. II. n. **a-dul'ter-ate**, 1 *a-dul'ter-ate*; 2 *a-dul'ter-ate*. [-AT-ED; -AT-ING.] I. *t.* 1. To make impure by admixture of other or baser ingredients; corrupt; render counterfeit; as, to adulterate sugar; to adulterate a language with slang.

In the United States the accepted view has been formulated thus:—“Except in special cases, a food in general is deemed to be adulterated if anything has been mixed with it so as to reduce or lower its quality or strength; or if anything inferior or cheaper has been substituted wholly or in part therefor; or if any valuable constituent has been abstracted wholly or in part from it; or if it consists wholly or in part of a diseased, decomposed, or putrid animal or vegetable substance; or if by coloring, coating, or otherwise it is made to appear of greater value than it really is; or if it contains any added poisonous or injurious substance; or if it is so adulterated as to be unfit for food.”

This definition is fairly satisfactory so far as it goes, but it is insufficient in extension. The main principle on which our Sale of Food and Drugs Act of 1875 is based should be included in it, namely, that under any circumstances an article shall be deemed to be adulterated if it can be proved that that article is not of the nature, substance, and quality demanded by the purchaser, or if it is not of the nature, substance, and quality which the purchaser is presumed to have expected. CHARLES E. CARSWELL, *The Adulteration of Food in Journal of the Royal Society of Arts*, Mar. 17, '11, p. 451.

No drug defined in the United States Pharmacopoeia or National Formulary shall be deemed to be adulterated under this provision if the standard of strength, quality, or purity be plainly stated upon the bottle, box, or other container thereof, although the standard may differ from that determined by the test laid down in the United States Pharmacopoeia or National Formulary.

The act of adulterating, or corrupting by admixture of foreign and baser elements, especially for fraudulent ends; debasement; as, the adulteration of tea, wine, etc. The chief articles subject to adulteration, and their adulterants, are *beer* (arsenic, phos. acid, cream of tartar, various herbs), *butter* (water, cheese, oleomargarine, oleic acid), *cheese* (color-matter, animal fat, tallow, and potato meal), *cocoa* and *chocolate* (starch, sugar, sawdust, oils, fats), *free* (chicory, carrots, turnips), *distilled liquors* (caramel, dilute alcohol), *flour and bread* (alum, sulfate of copper), *honey* (glucose, corn-starch), *tard* (stearin, cottonseed-oil, paraffin, wax, tallow), *milk* (by diluting, skimming, adding animal fats, coloring, borax, salt, carbonate of soda), *mustard* (starch, rape-seed, radish-seed, and turmeric powder), *olive-oil* (cottonseed- and peanut-oils), *pickles* and *preserved green vegetables* (colored green with extract of copper), *preserves* (gelatin, glue), *tea* (leaves of sloe, ash, etc.), *tobacco* (niter, glycerin, moisture, and flavored by artificial means), *wines* (water, alcohol, caramel, logwood, salicylic acid, gypsum).

Probably the sum devoted annually by England to provide drugs for the adulteration of its own beer would have founded lovely little museums, and perfect libraries, in every village.

## TABLE OF AFRICAN TRIBES.

The following table presents the principal ethnological groups of African tribes and their localities, as made known to science through the investigations of explorers. The names of stocks are printed in full-face type, as Bantu; the names of important tribes are printed in small capitals, as BECHUANA, and treated more fully in vocabulary place; and those of their branches, as Barolong, are printed in Roman type and indented.

It is impossible to give a complete list of the tribes inhabiting Africa, owing to the fact that the country is not fully explored. Even where the names of the tribes are known their ethnic relations are still a matter of uncertainty in many localities.

<sup>1</sup> Recently a connection has been traced between the Bushmen and the Pigmies.

<sup>2</sup> Of the primitive pygmy negroid stock the Hottentots, once considered the parent family, are now regarded as an offshoot of mixed Bantu-Bushman blood. Evidence has been produced of the presence of a belated Hottentot or Hottentot-Bushman group between Kilimanjaro and Victoria Nyanza. — *Encyc. Brit.* 11th ed., vol. iv, p. 871.

The natural filling up of the bed of a water-course at any point of weakening of the current, by deposition of detritus. 2. Specif., the building up by streams, in arid regions, of fan-like graded plains, by the shifting of streams and the loss of the water in the dry soil; contrasted with *degradation*, which always precedes it.

The waste plains of arid lands, on the other hand, are regions of *aggradation*. W. D. JOHNSON *21st Annual Rep. U. S. Geol. Survey pt. iv, p. 620.* [*gov. rrg. off. '01.*]  
 [*< L. ad- + GRADATION.*]—*aggradation plain* (Geol.), a topographic plain built up by *aggradation* in arid districts. It begins by the building up of the hollowed bed of a stream, at the foot of a declivity, forming a plain with a nearly straight longitudinal profile, which may become a very broad plain of deposition.

The last addition to an *aggradation plain* should exhibit the coarsest material. W. D. JOHNSON *21st Annual Rep. U. S. Geol. Survey pt. iv, p. 636.* [*gov. rrg. off. '01.*]

—ag-gra-da'tion, a. 1. Of, relating to, or caused by *aggradation*. 2. Producing *aggradation*.  
 ag-grade, 1 a-gréd; 2 a-grád, vt. [*-GRAD'ED; -GRAD'ING.*] Phys. Geog. To add to; opposed to *degrade*; as, the bed of a river is *aggraded* when silt is deposited on it. [*< AG + GRADE.*]

ag-gran-dize, 1 a-grán-daiz; 2 a-grán-diz, r. [*-DIZED; -DIZ'ING.*] 1. To make great or greater; increase or intensify; exalt in honor, wealth, influence, or power. The first act of Herod, after Augustus had aggrandized him, was to build a temple. GEORGE LIFE OF CHRIST vol. i, p. 51. [A. 1886.] 2. To cause to appear greater; give grandeur to; widen the scope of; as, Christianity has *aggrandized* the epic. II. 4. [*Rare.*] To make greater. [*< F. aggrandir.*]

ag-gran-dize, 1 a-grán-daiz; 2 a-grán-diz, r. [*-DIZED; -DIZ'ING.*] 1. To make great or greater; increase or intensify; exalt in honor, wealth, influence, or power. The first act of Herod, after Augustus had aggrandized him, was to build a temple. GEORGE LIFE OF CHRIST vol. i, p. 51. [A. 1886.] 2. To cause to appear greater; give grandeur to; widen the scope of; as, Christianity has *aggrandized* the epic. II. 4. [*Rare.*] To make greater. [*< F. aggrandir.*]

ag-grate, vt. 1. To please. 2. To thank.  
 ag-grate, 1 a-grá-té; 2 a-grá-té, vt. [*-VAT'ED; -VAT'ING.*] 1. To add weight or intensity to; make heavier, worse, or more burdensome; also, to make more heinous; increase the guilt of; as, sickness *aggravates* the ills of poverty.

The fullness of their knowledge *aggravated* the perversity of their ignorance. FARRAR *Early Days of Christ*, p. 127. [r. & w.] 2. [*Colloq.*] To provoke greatly; exasperate; annoy; as, he *aggravates* me beyond measure: an erroneous use perhaps from confusion with *aggraver*. 3. To increase inflammation in; irritate; as, to *aggravate* a wound. 4. [*Rare.*] To exaggerate; as, to *aggravate* details. 5. To burden, as with a weight or with accusation. [*< L. aggravatus, pp. of aggravare, < ad, to, + gravis, heavy.*]

Syn.: enhance, heighten, increase, intensify, magnify, make worse. To *aggravate* is etymologically to increase in weight, hence in gravity, severity, or intensity. A disease or other evil may be *aggravated* but not a person. *Enhance* and *magnify* are often used in the lofty and good sense; as, to *enhance* the glory of God; "I *magnify* mine office." Rom. xi, 13. *Aggravate* is used always in the bad sense, to make worse what is already bad; as, to *aggravate* a fever or an enemy. See AFFRONT; INCREASE.—Ant: alleviate, assuage, attenuate, diminish, lessen, palliate, reduce, soften.—ag-gra-va'tor, n.

ag-gra-va'tor, n. Burdened or weighed down; made more serious, as a crime.

ag-gra-va'ting, 1 a-grá-vét'ing; 2 a-grá-vát'ing, pa. 1. [*Colloq.*] Provoking or fitted to provoke; exasperating; irritating. 2. Making more intense, burdensome, heinous, etc.—ag-gra-va'ting-ly, adv.

ag-gra-va'tion, 1 a-grá-vé'shan; 2 a-grá-vá'shon, n. 1. The act of *aggravating*, or the state of being *aggravated*; a making, or the fact of being made, heavier or more heinous, as a crime, offense, misfortune, etc. 2. Originally, an enhancing circumstance; in law, some extrinsic circumstance considered as increasing the atrocity of a crime.

By itself, with *aggravations* not surcharged.  
 Or else with just allowance counterpoised.

3. [*Colloq.*] (1) The act of provoking; exasperation; annoyance; teasing. (2) Irritation; inflammation. 4. [*Rare.*] Exaggeration. 5. R. C. Canon Law. The censure following a third admonition; the curse denounced against an obstinate offender. 6. A charge; accusation.

ag-gra-va'tive, 1 a-grá-vé'tiv; 2 a-grá-vá'tiv, a. 1. Of, pertaining to, or tending toward *aggravation*. II. n. Anything causing *aggravation*.  
 ag-gre-gant, 1 a-gré-gant; 2 a-gré-gant, n. One of the constituents or particulars that make up an aggregate, or sum total.

ag-gre-gate, 1 a-gré-gé; 2 a-gré-géit, r. [*-GAT'ED; -GAT'ING.*] 1. To bring together, as into one place, mass, sum, or body; collect; mass; as, population and wealth are *aggregated* in cities. 2. To make as a sum or whole; amount to, as in number, weight, or the like; as, the ships *aggregate* 5,000 tons. 3. [*Rare.*] To add as a constituent part or member; unite to (rarely with) a body or association; as, Paul was *aggregated* to the twelve in the apostolic body.

II. 1. To form a mass or collection.—ag-gre-ga'tor, n. ag-gre-gate, a. Collected into a sum, mass, or total; gathered into a whole; also, formed by a collection of individuals; collective. (1) Bot. Agglomerate; collected together: said of (a) a flower like the teasel, consisting of a mass of small flowers gathered in a head, or (b) of a fruit like the raspberry, made up of distinct carpels of a single flower massed together. (2) Anat. Formed into clusters; as, *aggregate glands*. (3) Geol.

Composed of distinct minerals separable by mechanical means, as granite. (4) Zool. Compound: said of animals in which several individuals are united into a common organized mass or oecium, as in tunicates. (5) Logic. Held by more than one person; as, *aggregate meaning*, a form of common or catholic opinion or thought. See COMMUNITY. [*< L. aggrego, pp. aggregatus, < ad, to, + grex (greps), flock.*]—*corporation aggregate*, a body politic consisting of many individuals united in one association and kept up by succession of members, as a city corporation.—ag-gre-gate-ly, adv.—ag-gre-gate-ness, n. ag-gre-gate, n. 1. The entire number, sum, mass, or quantity of something; amount; complete whole; as, the *aggregate* of all virtues; wealth in the *aggregate*.

A nation is but the *aggregate* of . . . individuals. FROUDE *Short History of England*, p. 258. [1872.] The public happiness is to be the *aggregate* of the happiness of individuals. WEBSTER *Works* vol. i, p. 190. [L. & C. 1864.] 2. Mil. The combined force of enlisted men and officers in a command. 3. Building. Material for making concrete. 4. An assembly or mass of individuals or items; a collection; an aggregation; specif., a rock formed of a collection of minerals. 5. Math. The totality of all points or numbers satisfying a given condition; as, the *aggregate* of functions. An *aggregate* in which all points are limiting points, that is, within even an infinitesimal distance of each of which are found an infinite number of points of the *aggregate*, is termed a dense *aggregate*. If all the limiting points are points of the *aggregate* it is called a perfect *aggregate*. *Aggregates* of the same power are those which are susceptible of being brought into one-to-one correspondence. An *enumerable aggregate* is one which has the same power as the *aggregate* of natural numbers.

Syn.: agglomeration, aggregation, amount, collection, entirety, mass, sum, total, totality, whole. An *aggregate* of financial items is an *amount*, *sum*, or *total*. An *aggregate* of material objects is a *collection*, *mass*, or *whole*; an *agglomeration* is a heterogeneous mass. *Collection* points rather to the differences, *mass* to the unity. We say a *collection* of minerals, a *mass* of rock. The result of multiplication is a product, the result of addition a *sum*, *total*, or *aggregate*.—social *aggregate*, a group of beings carrying on a social existence by living or working together.

ag-gre-ga'tion, 1 a-gré-gé'shan; 2 a-gré-gé'shon, n. 1. The act of *aggregating*, or the state of being *aggregated*; collection or assemblage into one whole or mass; *aggregate condition*.

Our stellar universe . . . shows varieties of structure and of *aggregation* corresponding with . . . those which we recognize in the solar system. PROCTOR *Expansion of Matter*, p. 274. [1874.] There is among our population a tendency towards *aggregation*, which concentrates the strain upon our social and political fabric. STURGEON *Our Country* ch. 4, p. 44. [L. & C. 1885.]

2. Logic. The combination of species into a genus, or of terms into a general term whose truth is assured by that of any one or all of its parts. 3. That which is combined into a whole; a collection or mass, as of like particles; an *aggregate*.—*aggregation theory*, a theory that matter progresses from an imperceptible to a perceptible state by means of *aggregation*.—biologic a., the theory that a complex organism, such as one of the *Metazoa*, is the result of the *aggregation* of independent organisms represented by the structural units (as metameres) now morphologically separable. organic a.—genetic a. (Sociol.), a group of kinsmen who have spent their lives in one locality; also, a population persisting by births, rather than by the inclusion of aliens.—law of a., the tendency everywhere apparent of all material things, whether great or small, to group themselves.—primary a. (Physics), the process resulting in the present condition of inorganic matter; grouping of atoms into molecules and masses.—secondary a. (Biol.), the process resulting in the present condition of organisms; the grouping of biomolecules into living cells and organisms.—tertiary a. (Sociol.), the process resulting in the social grouping of individuals, as the gathering into populations.

ag-gre-ga'tive, 1 a-gré-gé'tiv; 2 a-gré-gé'tiv, a. 1. Of, pertaining to, or tending to *aggregation*; collective. 2. [*Rare.*] Associative; social; gregarious. ag-gre-gate, vt. To *aggravate*; exaggerate. ag-gre-gate, ag-gress', 1 a-gres; 2 a-grés, r. I. 1. To make the first attack; commit an *aggression*; also, to encroach; intrude. II. 4. Syn.: cultivation, culture, farming, floriculture, gardening, horticulture, husbandry, kitchen-gardening, market-gardening, tillage. Agriculture is the generic term. Including at once the science, the art, and the process of supplying human wants by raising the products of the soil, and by the associated industries; farming is the practise of agriculture as a business; there may be theoretical agriculture, but not theoretical farming; we speak of the science of agriculture, the business of farming; scientific agriculture may be wholly in books; scientific farming is practised upon the land; we say an agricultural college, rather than a college of farming.

Agriculture.—An Allegory from the Campanile di Giotto, Florence.

Farming refers to the cultivation of considerable portions of land, and the raising of the coarser crops; gardening is the close cultivation of a small area for small fruits, flowers, vegetables, etc., and while it may be done upon a farm is yet a distinct industry. Gardening in general, kitchen-gardening, the cultivation of vegetables, etc., for the household, market-gardening, the raising of the same for sale, floriculture, the culture of flowers and horticulture, the culture of fruits, flowers, or vegetables, are all departments of agriculture, but not strictly nor ordinarily of farming; farming is itself one department of agriculture. Husbandry is a general word for any form of practical agriculture, but is now chiefly poetical. Tillage refers directly to the work bestowed upon the land, as plowing, manuring, etc.; cultivation refers especially to the processes that bring forward the crop; we speak of the tillage of the soil, the cultivation of corn; we speak also of land as in a state of cultivation, under cultivation, etc. Culture is now applied to the careful development of any product to a state of perfection, especially by care through successive generations; the choice varieties of the strawberry have been produced by wise and patient culture; a good crop in any year is the result of good cultivation.

RUSKIN *Modern Painters* vol. v, pt. viii, ch. 3, p. 190. [W. v. 1860.]

**3**. The object or point aimed at or to be aimed at; a mark or target; as, to miss one's aim. 4. That which is intended; design; purpose; as, a noble aim.

A common error is that it may be allowable for a man to live a life of idleness, having no work, no aim.  
D. S. GRAYSON *Christian Ethics* pt. ii, p. 222. [S. v. 1875.]

**5f**. Conjecture.

**Syn**: aspiration, design, determination, end, endeavor, goal, inclination, intent, intention, mark, object, purpose, tendency. The aim is the direction in which one shoots, or sometimes that which is aimed at. The mark is that at which one shoots; the goal, that toward which one runs. All alike indicate the direction of endeavor. The end is the point at which one would close his labors; the object, that which he would grasp as the reward of his labors. Aspiration, design, endeavor, purpose, referring to the mental acts by which the aim is attained, are often used as interchangeable with aim. Aspiration applies to what are viewed as noble aims; endeavor, design, intention, purpose, indifferently to the best or worst. Aspiration has less of decision than the other terms; one may aspire to an object, and yet lack the fixedness of purpose by which alone it can be attained. Purpose is stronger than intention. Design especially denotes the adaptation of means to an end; endeavor refers to the exertions by which it is to be attained. One whose aims are worthy, whose aspirations are high, whose designs are wise, and whose purposes are steadfast, may hope to reach the goal of his ambition, and will surely win some object worthy of a life's endeavor. See AMBITION; DESIGN; DIRECTION; DUTY; PURPOSE. — Ant: aimlessness, avoidance, carelessness, heedlessness, neglect, negligence, oversight, purposelessness, thoughtlessness.

These and covered the world is the *Al'n-Soph'*, who is both immanent and transcendent.

Kabbala Demutia tr. by Mathers, intro. p. 38. [G. n. 1887.]

**Alns'worth**, 1 Alns'worth; 2 Alns'worth. n. 1. Henry (1571-1623), an English scholar and controversialist. 2. Robert (1660-1743), an English scholar; *Lat. Dict.*

**3. William Harrison** (1805-1882), an English novelist; *The Tower of London*, etc.

**aln't**, 1 aln't; 2 aln't. [Colloq.] Am not; are not: always inelegant; also, an illiterate ungrammatical form for the contractions *isn't*, *hasn't*, and *haven't*: a vulgarism. **ant't**.

**aln-tib'**, 1 aln-tib'; 2 aln-tib'. n. A city in Syria, Turkey; an Arabian mission station.

**Al'nu**, 1 Al'nu; 2 Al'nu. n. See AINO.

**Al'nv.**, abbr. *Freemasonry*. Anno Inventionis (in the year of the discovery).

**Al-oil-an**, 1 Al-oil-an; 2 Al-oil-an. n. Same as *EOILAN*, etc.

**Al-o-lis**, 1 Al-o-lis; 2 Al-o-lis. n. [Gr.] Same as *EOILIA*.

**Al'o-lo-bran'**, 1 Al'o-lo-bran'; 2 Al'o-lo-bran'. n. *pl. Conch.* A suborder of nudibranchiate gastropods with variable gills, including all except the *Anthobranchiata*. [*Gr. alolos*, quick-moving, *branchia*, gills.]

**al-phy'**, 1 al-phy'; 2 al-phy'. n. *Eccl.* An ultimate formation; the last stage of a succession.

**al'pim**, 1 al'pim; 2 al'pim. n. [Braz.] Bot. The sweet cassava: probably a Tupian name.

**alr**, 1 alr; 2 alr. v. i. t. 1. To expose to the air, especially to outdoor air; admit air into; purify or dry by exposing to the air; ventilate; as, to air a room. 2. To expose to heat; as, to air clothing or liquors. 3. To make public; show off; display; as, to air theories.

**II. i**. [Archaic.] To take the air, as in the street or park.

**alr't**, v. To set to music; compose an air for.

**alr**, n. 1. (1) The mixture of gases that forms the apparent blue envelop of the earth. (2) The atmosphere.

Air consists chiefly of the gases oxygen and nitrogen very nearly in the proportions one to four. Recently it has been found to contain newly discovered gaseous elements nearly allied chemically to nitrogen, which have been named argon, neon, krypton, and xenon; also helium, long known spectroscopically as a constituent of the solar atmosphere, and now believed to be a product of the disintegration of radium. These substances exist only as traces, with the exception of argon, which forms nearly 1 per cent. of the atmosphere by volume. There are also numerous impurities such as ammonia, sulfuric acid, etc. Carbonic dioxide, which is present in greater or less quantities, generally at 1 of 100,000, is usually regarded as a normal constituent.

**2**. The open space around and above the earth; as, a flaming sword hung in the air; to emerge into the air. And all the air a solemn stillness holds. *GRAY Elegy* st. 2.

**3**. An atmospheric movement or current; wind; breeze; frequently in the plural; as, the gentle airs fanned his cheeks. 4. Utterance abroad; publicity; as, the rumor has taken air. 5. Any gas; especially, gas arising from combustion or the like, as from furnaces in iron-works. 6. Paint. The representation of atmosphere; atmospheric perspective. 7. *Liturg.* The nephele. 8. Figuratively, something light and ethereal; wind; as, all air and no sense. 9f. Breath; hence, information; intelligence. [*Fr.*, *L. aer*, *Gr. aer*, *aemi*, breathe.] **alr't**; **alr't**; **alr't**; **alr't**. n. 1. An inflated bag used to raise or buoy up a sinking or sunken vessel. 2. In a pneumatic molding-machine, a device consisting of air-filled bags, which give the proper pressure to the sand; also, any device composed of air-filled bags for exerting a uniform pressure, as in printing-frames, bookbinders' case-making machines, etc. 3. [Slang.] A shallow, loquacious person. — **alr-ball**, n. A ball inflated with air, used for a toy. — **alr-barometer**, n. A device for recording slight oscillations, as in the level of well-water by recording changes of air-pressure. — **alr-base**, n. A place or region used as a basis of operation for one's air force. — **alr-bell**, n. A vibrating pulsation of air such as one felt mechanically from a vibrating object in which the waves are of extremely low frequency. — **alr-bell**, n. 1. *Zooph.* A roundish or pear-shaped organ acting probably as a gas-secreting gland for the swim-bladder in *Auronea*; an aurophore. 2. An air-globule, as a bubble formed in glass-making or in developing photographs; air-bladder. — **alr-billow**, n. A prolonged and moderate atmospheric wave, speed, an air-wave originating between two horizontal strata of varying velocity and direction. — **alr-bladder**, n. 1. A sac filled with air, the homolog of a lung, generally situated under the anterior part of the spinal column of fishes, aiding them to maintain an equilibrium in the water; the sound. 2. Any vesicle filled with air, as in seaweed, glass, iron-castings, etc. — **alr-blast**, n. An air-current (1) forced upon a fire to stimulate combustion; (2) directed on a dust or sand to prevent its settling, or (3) impinged upon surfaces for polishing and abrading. — **alr-boat**, n. A hydrocrafter. — **alr-bone**, n. A bone filled with air, as in birds. — **alr-bottle**, n. A portable metallic container for compressed air, used for inflating automobile tires. — **alr-bound**, a. Prevented by the presence of air from acting; said of suction-pipes and sewage-pipes. — **alr-box**, n. 1. The conduit through which

air for heating rooms is supplied to a furnace. See *Illus.* under FURNACE. 2. An air-compartment of a life-boat. 3. A duct to convey fresh air into a mine. — **alr-brake**, n. See BRAKE. — **alr-brush**, n. An implement for spraying liquid color by compressed air. — **alr-bucket**, n. A water-wheel bucket so arranged that the air may escape without interfering with the entering water. — **alr-bug**, n. Any true bug living in the open air and not in water; a land-bug. — **alr-built**, a. Baseless; chimerical; air-casting. n. A casting with an air-space between it and the mold, to prevent too great transmission or radiation of heat. — **alr-castle**, n. A visionary project or scheme; a day-dream. — **alr-cataract**, n. An apparatus for lessening the impact of a moving object suddenly stopped, in which the air acts as a cushion, and lessens the force of impact. — **alr-cavity**, n. Any cavity containing air, as the air-sacs in birds. — **alr-cell**, n. 1. *Zool.* A cavity for the reception of air. Specifically: (1) One of the minute compartments lining the alveolar passages and air-sacs of the lungs; an alveolus. (2) An air-sac of an insect. (3) A dilatation of the air-vessels or tracheae of an insect. (4) A cavity filled with air, in various parts of the tissues of plants. — **alr-chamber**, n. A chamber or enclosed space containing air; as, (1) to preserve buoyancy, as in a life-boat; (2) to serve as a cushion, as in a force-pump (see *Illus.* under FORCE-PUMP); (3) to receive air from a water-pipe; (4) an air-cell; (5) a compartment between the septa of various chambered *Cephalopoda*, as the nautilus; a camera; loculus. — **alr-chambered**, a. — **alr-channel**, n. 1. A channel through which air passes. 2. *pl.* Channels in the masonry of walls and fire-bridges and beneath the hearths of reverberatory furnaces intended to preheat the air admitted and to prevent injury to the foundations from the great heat of the furnace. — **alr-cock**, n. A faucet used to control the passage of air. — **alr-compartment**, n. An air-tight part, as of a shaft, for ventilating a mine. — **alr-cone**, n. In a marine engine, a cone to receive air and steam from the hot-well. — **alr-cooled**, a. — **alr-cooling**, a. Reducing the heat of the cylinder of a gasoline-engine, as in motor vehicles, by diffusing it over an enlarged surface through additional radiators and exposing it to a current of air. — **alr-craft**, n. The science of aerial navigation. 2. Aeroplanes and balloons collectively. — **alr-crossing**, n. — **alr-cushion**, n. A cushion where one air-current runs over or under another one, or over or under the level or gang-road. — **alr-cushion**, n. 1. A bag inflated with air, specif., one used (1) as a pillow, or (2) in a water-pipe to lessen the water-hammer. 2. An air-spring. — **alr-cylinder**, n. 1. A nearly air-tight cylinder having a piston playing in it: used to check the recoil of a gun. 2. A cylinder beneath a railway-car, in which is compressed air which operates brakes. — **alr-dew**, n. Manna. — **alr-door**, n. A door for controlling air-currents in a mine. — **alr-drain**, n. 1. A channel around a foundation to promote dryness by allowing free circulation of air. 2. A passage for the escape of gas from a mold while the molten metal is being poured in. — **alr-drawn**, a. Drawn in the air; imaginary. — **alr-dried**, a. Evaporated; dried in the air, as fruit. — **alr-driven**, a. Driven by air, especially by compressed air. — **alr-dry**, a. So thoroughly dry that no moisture is expelled upon exposure to the air. — **alr-drying**, n. Drying in air by exposure, as woods, fruits, etc. — **alr-duct**, n. 1. A tube or passage conveying air. 2. Specif., the duct connecting the air-bladder with the intestines collectively. — **alr-fish**, n. — **alr-fish**, n. *Pathol.* Embolism by bubbles of air in the veins. — **alr-float**, n. [Eng.] A passage made in a coal-seam for ventilation. — **alr-float**, n. Same as *ALR-BLADDER*. 2. — **alr-float**, a. Separated by an air-current; said of light substances, such as fine graphite. — **alr-flue**, n. A small flue in a chimney through which to draw the foul air from a room. — **alr-formed**, a. Made of or like the air. — **alr-fountain**, n. A fountain which ejects water by means of compressed air. — **alr-funnel**, n. 1. A ventilating-flue formed by leaving one end of a funnel open to the atmosphere above the water-line. 2. *Zool.* The inferior part of the pneumotocyst of a free-swimming amphipore in which the gas is secreted. — **alr-gap**, n. 1. The air-space between the armature and field in a dynamo or motor. 2. Same as *GAP*. 2. — **alr-gas**, n. Air mixed with hydrocarbon vapor: used for heating and as an illuminant. — **alr-gossamer**, n. An air-thread. — **alr-heading**, n. A smaller passage in a mine driven parallel with the gangway, and used for ventilation. — **alr-hack**, n. A lifting-jack operated by compressed air and consisting of a vertical cylinder and a piston, the rod of which serves as a lifting-arm. — **alr-jacket**, n. To furnish with an air-jacket. — **alr-jacket**, n. A garment, usually of rubber, inflated and used as a life-preserver. — **alr-jlg**, n. *Mining*. An apparatus which by means of currents of air separates minerals according to their specific gravity. — **alr-leak**, n. *Elec.* The loss of charge sustained by an insulated substance because of the discharging action of the surrounding atmosphere. — **alr-lift**, n. A pump in which the lifting power consists of air drawn up an inner pipe to force water up an outer one. — **alr-line**, n. 1. The shortest distance between two points on the earth's surface. 2. A direct railroad route. — **alr-liquefier**, n. A device for changing air into liquid air, as by means of compression and cooling. — **alr-lock**, n. 1. An air-tight antechamber of a submarine caisson: for graduating the air-pressure. 2. A stoppage of the flow of water in a pump caused by the presence of air. — **alr-logged**, a. Impeded by air, as a piston-head in a cylinder. — **alr-loop**, n. A narrow window. — **alr-machine**, n. A ventilating-machine for renewing the air, as in a mine. — **alr-monger**, n. A visionary. — **alr-passage**, n. Bot. An extended air-space between cells, as in stems of some water-plants. — **alr-pillow**, n. See AIR-CUSHION. — **alr-plane**, n. An aeroplane. — **alr-plant**, n. A plant unconnected with the ground, growing on tree or other object, but not parasitic and deriving its nourishment from the atmosphere. — **alr-plate**, n. A glass plate, or a glass plate, permitting only a given quantity of air to pass through: a perforated baffle-plate. — **alr-plug**, n. *Naut.* A plug that can be removed from a water-tight manhole-plate or scuttle-cover into which it is screwed. — **alr-pocket**, n. Same as *POCKET*. 2. — **alr-poise**, n. Instrument for weighing air. — **alr-pore**, n. Same as *STOMA*. — **alr-potato**, n. An East-Indian yam (*Dioscorea bulbifera*), a tuberous clematis, cultivated as an oddity, bearing very large aculeate axillary bulbs, edible like potatoes. — **alr-pressure**, n. Atmospheric pressure. — **alr-proof**, a. Impenetrable by air. — **alr-propeller**, n. 1. Any ventilating device that diffuses air, as a rotary fan. 2. A device for supplying air, as to an iceboat, to aid in its propulsion. — **alr-receiver**, n. A contrivance for equalizing the air-pressure in a furnace. — **alr-receptacle** or **alr-reservoir**, n. A place for air; an air-sac in a bird. — **alr-regulator**, n. The regulating apparatus of a gas-burner, which heats atmospheric air passing through it to a reheating or steel-melting furnace, coke-ovens, etc. — **alr-register**, n. Same as *REGISTER*. 4. — **alr-saller**, n. *Aero*. A glider. — **alr-separator**, n. Any apparatus, as a dust-separator, utilizing air-power, as for the separation of minerals. — **alr-setting**, a. Hardening by exposure to the air, as cement. — **alr-sickness**, n. Same as

**AERIAL SICKNESS.**—**air-sinus**, *n.* One of the hollow spaces in the bones of the skull that communicate with the nasal passages.—**air-slaked**, *a.* Slaked by exposure to the air, as lime. See **SLAKE**.—**air-slacked**.—**air-sollar**, *n.* See **SOLLAR**.—**air-speed**, *n.* *Aero*. Speed through the air, as of a flying-machine; distinguished from its speed before leaving the ground. See **LAND-SPEED**. **LOUGHEED** *Vehicles of the Air* p. 466. [R. & B. Co. 10.]—**air-stirring**, *a.* Vibrating the air; thrilling, as music.—**air-stone**, *n.* A meteor.—**air-streams**, *n. pl.* Currents of air artificially produced and charged with smoke; used in determining the movements of air in encountering various obstacles.

His [Marce's] method is to form a series of parallel air-streams within a large chamber, then to charge them with smoke. When an obstacle is placed in their path the movement of the air is clearly distinguished. *Scientific American* Feb. 1, '02, p. 75.

**air-tap**, *n.* A pet-cock for a series of hot-water pipes.—**air-thread**, *n.* A floating thread of spider's silk.—**air-threatening**, *a.* High-reaching; as, "air-threatening tops of cedars tall."—**air-tint**, *n.* *Paint*. An atmospheric modification of a tint.

The marvelous falls off and shades away into soft air-tints.

J. A. SIMONDS *Greek Poets* vol. 1, ch. 4, p. 149. [1880.]

—**air-trap**, *n.* 1. Same as **STENCH-TRAP**. 2. A small funnel to intercept air-bubbles, as in a barometer-tube.—**air-trunk**, *n.* A ventilating conduit, as in a public hall or theater.—**air-tumbler**, *n.* A tumbler-pigeon.—**air-twist**, *n.* An air-bubble, as in the stem of a glass receptacle, that becomes a hollow spiral by twisting.—**air-twisted**, *a.*—**air-valve**, *n.* See **VALVE**.—**air-vesicle**, *n.* *Bot.* A bladder-like air-chamber serving as a float for many water-plants, as in certain sea-weeds.—**air-volcano**, *n.* *Phys. Geog.* A non-volcanic opening from which gas, mud, and stones are ejected.—**air-washer**, *n.* A device for clearing air of foreign substances by circulating it through water.—**air-washings**, *n. pl.* The atmospheric impurities remaining in a liquid through which air has been passed for purification.—**air-way**, *n.* Any passageway for air; particularly, the ventilating passage of a mine.—**air-wood**, *n.* [Rare.] Wood dried in the air, *i. e.*, not kiln-dried.—**dephlogisticated air**, oxygen.—**fixed air**, carbon-dioxide gas.—**hot air** [Slang, U. S.], empty brag; boastfulness.—**in the air**, 1. Insecure; unsupported; also, abroad; prevalent; as, the battery is in the air; changes are in the air. 2. Without body or foundation in fact; undetermined; as, the project is as yet all in the air.—**to be or go up in the air** [Colloq., U. S.], to become excited; as, he went up in the air when told the cost.—**to beat the air**, to make vain or blind efforts.—**to take air**, to become public; as, the scandal is sure to take air.—**to take the air**, 1. *Falconry*. To try to rise above the falcon; said of a bird trying to escape. 2. To go into the air. 3. To make a trip in an airplane.

Air is used as the first element in self-explaining compound nouns naming: (1) Things containing air, as, air-holder, air-reservoir.

(2) Things conveying air or permitting it to pass; as, air-brick, air-grating, air-hole, air-shaft, air-course, air-level, air-stack, air-exhaust, air-pipe, air-strainer, air-faucet, air-pit, air-strake, air-gate, air-port, air-tube.

(3) Things operated by air, or using it as a motive fluid; as, air-balloon, air-hoist, air-telegraph, air-drill, air-locomotive, air-thermometer, air-engine, air-pistol, air-whistle, air-hammer, air-spring.

(4) Things designed to distribute or move air, to regulate its flow, or to act on it; as, air-circulator, air-condenser, air-injector, air-compressor, air-governor, air-regulator.

(5) Things used for measuring the humidity, purity, quantity, velocity, etc., of air; as, air-gage, air-manometer, air-meter, air-tester.

(6) Things in which air forms the principal or sole component or agent; as, air-bath, air-cure, air-current.

—**air-less**, *a.* Not open to the air; destitute of air; as, an airless vault; airless space.—**air-like**, *a.*

**air<sup>2</sup>**, *n.* 1. The peculiar or characteristic appearance, mien, or manner of a person or thing; as, a kingly air; an air of secrecy.

The great dome of St. Paul's looks down with an air of motherly protection. *Living Sketch-Book* p. 190. [J. N. A. 1886.]

2. Artificial or assumed manner or appearance; affectation; commonly in the plural.

Don't be haughty, and put on airs.

SAXE *Proud Miss McBride*, Moral.

**Syn.** appearance, bearing, behavior, carriage, demeanor, expression, fashion, look, manner, mien, port, sort, style, way.

Air is that combination of qualities which makes the entire impression we receive in a person's presence; as, we say he has the air of a scholar, or the air of a villain.

Appearance refers more to the dress and other externals. We might say of a travel-soiled pedestrian, he has the appearance of a tramp, but the air of a gentleman.

Expression is most often applied to that which is habitual; as, he has a pleasant expression of countenance; look may be momentary; as, he gave his comrade a significant look. We may, however, speak of the look or looks as indicating all that we look at; as, he had the look of an adventurer; I did not like his looks.

Bearing is rather a lofty word; as, he has a noble bearing; port is practically identical in meaning with bearing, but is more exclusively a literary word. Carriage, too, is generally used in a good sense; as, the lady has a good carriage.

Mien is closely synonymous with air, but less often used in a bad sense. We say a rakish air, rather than a rakish mien. Mien may be used to express some prevailing feeling as, "an indignant mien." Demeanor goes beyond appearance, including conduct, behavior; as, a modest demeanor.

Manner and style are, in large part at least, acquired. See **BEHAVIOR**; **MANNER**; **PRETENSE**.—**to give oneself airs**, to assume affected manners or superiority.

**air<sup>3</sup>**, *n.* *Mus.* A melody as contrasted with a harmonic succession of notes, rhythmically arranged; tune.

Sweet air, how every note brings back  
Some sunny hope, some day-dream bright!

MOORE *Come Play that Simple Air Again* st. 2.

2. The leading part in a harmonized piece; usually soprano; as, she sang the air, and I the alto. [F., < *It. aria*, < *L. aria*, atmosphere; see **AIR<sup>1</sup>**, *n.*] **Syn.** see **TUNE**.—**national air**, the tune of a popular patriotic song recognized either officially or by general consent.

**Al-bi-nism**, *n.* The state or condition of being an albino; leucopathy or leucism. See **ERYTHRISM**; **MELANISM**. **al-bi-no-ism**.

Albinism, found in all parts of the world, is most prevalent in the Indian and negro races, and may be complete or partial. It is caused by the absence of the minute particles of coloring-matter which usually are present in the lowest and finally deposited layers of the epidermis, and whence the skin derives its color. The eyes are peculiarly affected. The iris is a pale rose color, while the pupil is bright red due to the absence of the pigmentum nigrum, the coloring-matter of the eye membrane, which serves to protect the retina; consequently, the vision of the albino is very defective in a strong light.

**al-bum** *Græ'cum*, 1 al-bum *gr'icum*; 2 al-bum *gr'icum*. [*L.*] The excrement of dogs and some other animals, whitened by exposure to weather; used in tanning and formerly in medicine.

**al-bu-min**, 1 al-bu-min; 2 al-bu-min, *n.* *Chem.* The transparent, viscous, nitrogenous substance ( $\text{C}_{12}\text{H}_{11}\text{N}_{15}\text{O}_{22}$ ) found in the blood, in all serous fluids, and in many animal and vegetable juices and solids. It contains nearly 2 per cent. of sulfur, and is amorphous like all proteins; it is soluble in water and coagulable by heat, alcohol, and the stronger acids. Alb. min. is used for clarifying purposes, as in wine-making, sugar-refining, and cooking, and also in the printing of calico, in photography, etc. Compare **ALBUMEN**. [*< L. albumen* (*albumin*); see **ALBUMEN**]. — **albumin** process, a photographic process in which the plate is coated with sensitized albumin. — **alkali**, *a.* a modification of albumin formed by the action of an alkali. — **Bence Jones**, *a.* a true albumin which in urine suggests the presence of multiple myeloma: formerly, **Bence Jones albumose**. — **circulating**, *a.* albumin which occurs only in the fluids of the body. — **iodized**, *a.* (*Phot.*) albumin in which an iodine is present. — **toxic**, *a.* same as **TOXALBUMIN**. — **al-bu-min-ate**, *n.* *Chem.* A compound in which albumin acts as a weak acid radical. — **Weyl's albuminate**, a modified globulin, following its long exposure to water. — **al-bu-mina-tu-ri-a**, *n.* *Pathol.* An excess of albuminates in urine. — **al-bu-min'ic**, *a.* Relating to or obtained from albumin. — **al-bu-min'ifer-ous**, *a.* Yielding or containing albumin. — **al-bu-min'if-er-ous**, *a.* Resembling albumin. — **al-bu-min'if-er-ous**, *n.* *Chem.* An apparatus for determining the amount of albumin in a liquid; as, Esbach's *albuminometer* (a graduated tube used in measuring the precipitate resulting from admixture with a reagent). — **al-bu-min'om'e-ter**, — **al-bu-min'om'e-ter**, *n.* *Chem.* The substance of the cells that compose the tissue enclosing the whites of birds' eggs. — **al-bu-min'om'e-ter**, — **al-bu-min'om'e-ter**, *n.* Yielding or secreting albumin. — **al-bu-min-lze** or *-lze*, *tr.* 1. To change into albumin. 2. To coat or saturate with albumin. — **al-bu-men-lze**. — **al-bu-min-lze** or *-lze*, *tr.* **al-bu-min-lze**. — **al-bu-min-lze** or *-lze*, *tr.* Derived from **ALBUMEN** or **ALBUMIN**: a combining form; as, *albumino-fibrous* tissues.

**al-bu-min'oid**, 1 al-bu-min'oid; 2 al-bu-min'oid, *n.* Of the nature of or like albumen or albumin. [*< ALBUMINO- + -oid*]. — **al-bu-me-noid**. — **albuminoid** disease, a form of degeneration of certain organs into a peculiar wax-like substance, formerly supposed to be allied to starch; waxy degeneration. — **al-bu-min'oid**, *a.*

**al-bu-min'oid**, *n.* 1. *Chem.* One of a diversified subclass of the simple proteins derived mainly from the supporting and connective animal tissues. See **SCLERO-PROTEIN** and **PROTEIN**. 2. *Brewing*. The nitrogenous constituents of barley malt and hops, partly extracted and contained in beer; sometimes a cause of cloudiness in the liquid. **al-bu-me-noid**.

**al-bu-min'om'e-try**, *n.* Measurement of the proportion of albumin, as in urine. — **al-bu-min'om'e-try**, *n.* *Chem.* A substance obtained from an albuminoid; peptone. — **al-bu-min'om'e-try**, *n.* *Chem.* Albuminous. **II.** *n.* [*Rare*]. An albumose. — **al-bu-min'om'e-try**, *n.* *Pathol.* A morbid condition in which there is an excess of albumin in the blood or in the tissues.

**al-bu-min'ous**, 1 al-bu-min'ous; 2 al-bu-min'ous, *n.* Of, pertaining to, like, characterized by, or consisting of albumen or albumin. — **al-bu-min'ous-ness**, *n.* — **al-bu-min'ou-ri-a**, 1 al-bu-min'ou-ri-a; 2 al-bu-min'ou-ri-a, *n.* [*< L. albumino- + Gr. ouron*, urine.] — **cyclic albuminuria**, the appearance of a small amount of albumin in the urine at a definite time each day. — **al-bu-min'ou-ri-a**, *n.* — **al-bu-min'ou-ri-a**, 1 al-bu-min'ou-ri-a; 2 al-bu-min'ou-ri-a, *n.* *Chem.* 1. Same as **ALBUMINOID**. 2. An insoluble substance, difficult of digestion, yielding tyrosin, found in the cartilage of mature animals. Compare **TYROSIN**. [*< ALBUMIN + -oid*].

**al-bu-min'om'e-try**, 1 al-bu-min'om'e-try; 2 al-bu-min'om'e-try, *n.* An apparatus for ascertaining the presence and quantity of albumin in the urine. [*< ALBUMIN + -SCOPE*].

**al-bu-mose**, 1 al-bu-mos; 2 al-bu-mos; 2 al-bu-mos or al-bu-mos, *n.* A substance formed from albuminoids during digestion; also, any of the proteoses. During the process of digestion, *primary albumoses* are first formed, and these in turn become *deuteralbumoses* or *secondary albumoses*, which quickly result in peptones and simpler bodies.

**al-bu-mo-su-ri-a**, 1 al-bu-mo-su-ri-a; 2 al-bu-mo-su-ri-a, *n.* *Pathol.* A condition of the urine in which it contains albumose. Compare **ALBUMOSE**. [*< ALBUMINOSE + Gr. ouron*, urine.]

**Al-bu-quer-que**, 1 al-bu-quer-que; 2 al-bu-quer-que, *n.* 1. Alfonso d' (1453-1515), a Portuguese commander and navigator. 2. Mateo de (—1646), a Portuguese general. 3. A group of islands in the Caribbean sea. 4. 1 al-bu-quer-que; 2 al-bu-quer-que, *n.* A city, county-seat of Bernalillo county, N. Mex.; the seat of the University of New Mexico (non-sectarian), founded in 1892. 5. A manufacturing town in Extremadura province, Spain. 6. A town in Bohol, P. I.

**al-lit'er-ate**, 1 a. Characterized by alliteration. II. n. [Rare.] One given to alliteration.

**al-lit'er-a-tion**, 1 a-lit'er-a-shon; 2 ä-lit'er-a-shon (XII), n. 1. The successive use or frequent recurrence of the same initial letter or sound at the beginning of two or more words, also the product of such repetition: as in "What a tale of terror, now, their turbulency tells."

In no other lyric than "The Raven" is Poe so self-possessed. No other is so determinate in its repetitions and alliterations. E. C. STEDMAN *Poets of America* ch. 7, p. 242. [U. M. & Co. 1885.]

The Spaniard poured out his wrath, . . . calling his colleague with neat alliteration a poltroon, a pantaloon, and a pig. MOTLEY *John of Barneveldt* vol. 1, ch. 1, p. 34. [n.]

2. Specif., the regular recurrence of an initial letter or sound in the accented parts of words in poetry; initial rhyme. See ALLITERATIVE VERSE.

Alliteration was the characteristic principle of Anglo-Saxon, Icelandic, Old Frisian (Old Saxon, etc.) verse. It occurs also in later verse, as in *Piers Plowman*, and, more or less modified, in Chaucer, Spenser, Swinburne, etc. Alliterative phrases, such as might and main, life and limb, wretch and wad, etc., are numerous in English. Like consonants and like and unlike vowels alliterate.

**al-lit'ing**, 1 a-lit'ing; 2 ä-lit'ing, n. In a manner conformable to allopathy; by means of allopathy.

**al-lit'ing**, 1 a-lit'ing; 2 ä-lit'ing, n. *Med.* A system of remedial treatment in which it is sought to cure a disease by producing, through medicines, a condition incompatible with the disease: a term applied by some homeopaths, and widely in popular use, to the common or "regular" system of medical practice, to distinguish it from homeopathy. See *HETEROPATHY*.

Neither "homeopathy" nor "allopathy" was ever heard of till the [Hahnemann] chose to invent the terms, and taking one himself, gave the other the rest of the medical world. *Dr. H. Rogers' Green's Letter* to Dr. J. B. 314. [o. & L. 1859.]

**Syn.** *appoint*, *apportion*, *assign*, *award*, *destine*, *distribute*, *divide*, *give*, *grant*, *mete*, *out*, *portion*, *out*, *select*, *set apart*. A portion or extent of time is *allotted*; as I expect to live out my *allotted* time. A definite period is *appointed*; as, the audience assembled at the *appointed* hour. *Allot* may also refer to space; as, to *allot* a plot of ground for a cemetery; but we now often use *select*, *set apart*, or *assign*. *Allot* is not now used of persons. *Appoint* may be used of time, space, or person; as, the *appointed* hour; the *appointed* place; an officer was *appointed* to this station. *Destine* may also refer to time, place, or person, but it always has reference to what is considerably in the future; a man *appoints* to meet his friend in five minutes; he *destines* his son to follow his own profession. *Assign* is rarely used of work, but rather of places, persons, or things. We *assign* a work to be done and *assign* a man to do it, who, if he fails, must *assign* a reason for not doing it. That which is *allotted*, *appointed*, or *assigned* is more or less arbitrary; that which is *awarded* is the due requital of something the receiver has done, and he has right and claim to it; as, the medal was *awarded* for valor. See **APPORTION**.—**Ant.** appropriate, confiscate, deny, refuse, resume, retain, seize, withhold.—**Prep.** allot to a company for a purpose.

1. To interpose no obstacle in the way of; suffer to act, occur, or exist; indulge; as, he *allows* no one to pass. [*He allows himself in arch allusions or kind-hearted satire.*

**CHANNING Works**, *Fenelon* p. 557, (A. U. A. 1883.)

2. To grant as a right, privilege, or share; allow; give; afford; as, he *allows* his daughter a stipend. 3. To give consent to; approve; sanction; as, to *allow* an appeal; to *allow* an item in an account.

And the king . . . *allowing* it, the Prince and Enid rode.

**TENNISON Enid st. 1.**

4. To make allowance or provision for; take into account; deduct; abate; as, I *allow* much on account of his ignorance; to *allow* one-tenth for shrinkage. 5. To concede to be, or to be true; acknowledge; as, to *allow* one's guilt.

We may *allow*, or admit, that which we have disputed, but of which we have been convinced, or we may *allow* certain premises as the basis of argument; but we assert, not *allow*, our own opinions. **R. G. WURTE Words and their Uses** p. 90, (su. & co. 1870.)

6. [*Colloq.*, U. S.] (1) To assert or believe as true; affirm; calculate; conclude; opine. (2) To have in the mind, as an intention; propose; intend; used especially in the southern United States.

But I come back here *allowin'* To vote as I used to do.

**JOHN HAY Banty Tim st. 2.**

7. [*Prov. Eng. & Ir.*] To counsel; advise. 8. To praise. **II. i.** To make allowance, concession, or abatement; as, to *allow* for discrepancies. [*OF. alouer*, < *LL. allocare*; see **ALLOCATE**.]—*al-low'er*, *n.*

**Syn.** admit, concede, consent to, grant, let, permit, sanction, suffer, tolerate, yield. We *allow* that which we do not attempt to hinder; we *permit* that which we give some express authorization. When this is given verbally it is called permission; when in writing it is commonly called a permit. There are establishments that any one will be *allowed* to visit without challenge or hindrance; there are others that no one is *allowed* to visit without a permit from the manager; there are others to which visitors are *admitted* at specified times, without a formal permit. We *allow* a child's innocent intrusion; we *concede* a right; grant a request; *consent* to a sale of property; *permit* an inspection of accounts; *sanction* a marriage; *tolerate* the rudeness of a well-meaning servant; *submit* to a surgical operation; *yield* to demand or necessity against our wish or will, or *yield* something under compulsion; as, the sheriff *yielded* the keys at the muzzle of a revolver, and *allowed* the mob to enter. *Suffer*, in the sense of mild concession, is now becoming rare, its place being taken by *allow*, *permit*, or *tolerate*. See **CONCEDE**; **ENDURE**; **PERMIT**.—**Ant.** deny, resist, withhold.—**Prep.** allow of such an action; allow one *in* such a course; allow for spending-money.—to *allow* a thing to one [Local, U. **al-lo-y'**, *1 a-lōi*; *2 āl'ō'y*, *r.* **I. t.** 1. To mix with an alloy; reduce the purity of, or otherwise modify, by admixture; hence, to modify; temper; debase; impair.

Pauperism, pauper, poor man, are expressions of pity, but pity *alloyed* with contempt. **LAMB Essays of Elia** p. 15, l. r. & co. 1.

2. To form into an alloy; combine by mixing.

**II. i.** To enter into combination; form an alloy. [*F. aloyer*, < *OF. alier*, < *aligo*; see **ALIGATION**.]

**al-lo-y'**, *1 a-lōi* or *al'oi*; *2 a-lō'y* or *āl'ō'y*, *n.* 1. A homogeneous compound or mixture of two or more metals, as brass, formed by the fusion of copper and zinc, or bronze, consisting of copper and tin; commonly produced by fusing together the constituent metals. See **AMALGAM**.

The following are some of the most important alloys: (1) **Aluminum** combines with copper to form *aluminum bronze*, used in machinery, and with zinc to form *aluminum zinc*, used in parts of chemical apparatus requiring strength and lightness. (2) **Antimony** alloys with lead, potassium, sodium, and tin. With lead and tin it forms *type-metal*, with tin *musket-metal*, and with tin and other metals *plate metal*, *Britannia metal*, and *queen's-metal*, the last-named used in jewelry. (3) **Arsenic** is used in lead to produce metal for shot. With copper it yields *white copper* and *tombac*, used for imitation jewelry. (4) **Bismuth** alloys chiefly with lead, tin, and type-metal, forming *fusible alloy*, used for clichés, and *peutiers' soft solder*. (5) **Cadmium** combines with mercury to form an amalgam used to fill teeth, with gold and silver to form an alloy used by jewelers, and with tin, lead, and bismuth to form *Wood's fusible alloy*. (6) **Chromium** alloys with iron to form *ferro-chrome*, and also with tin and copper. (7) **Copper** combines with zinc to form *brass*, with tin to form *bronze*, *gun-metal*, and *bell-metal*, and with lead to form *pot-metal*, used for faucets and domestic utensils. Alloys of these four metals in varying proportions also exist. (8) **Gold** alloys with copper, silver, manganese, cobalt, nickel, antimony, tin, zinc, bismuth, lead, the platinum metals, arsenic, tellurium, and mercury. With copper it forms a reddish gold, and with silver a lighter-colored alloy called *jeweler's gold*. Gold coin is an alloy of gold and copper, generally with silver also. (9) **Iron** alloys with copper, zinc (forming *Aitch's metal*, used for casting cannon), tin, titanium, manganese (forming *ferromanganese*, used in the Bessemer steel process), tungsten, nickel (*metecite*), cobalt, gold, and platinum. (10) **Lead** combines with antimony and tin to form *type-metal*, with arsenic for shot, with tin to make *peutier* and *solder*, with bismuth to form *fusible alloy*. (11) **Manganese** is used with iron to form steel, as *spiegeleisen*. It is used in the Bessemer process to deoxidize the metal. (12) **Mercury** forms with tin an amalgam for sil-vering mirrors, with gold and tin one for gilding, with tin, gold, and silver one used for filling by dentists, with sodium one used for metallurgical purposes, and with zinc one used for coating the rubbers of electric machines. (13) **Nickel** alloys with copper and zinc to form white metals used largely in place of silver and called *alabaster*, *British plate*, *electrum*, *German silver*, *pagany*, *tutenag*, *white copper*, etc. (14) **Palladium** yields with silver and copper tough alloys used in the making of hard instruments. (15) **Platinum** alloys with gold, and with the various platinum metals with which it is found in nature. (16) **Rhodium** combines with platinum metals and with steel to form a fusible alloy. (17) **Silver** alloys with copper, as in *coin* and *solder*, and with tin, mercury, and other metals. (18) **Tin** combines with lead to form *peutier* and ordinary plumbers' or tinsmiths' solder, with copper and antimony to form *Babbitt metal*. (19) **Zinc** alloys with copper to form brass, and also with tin and lead as in *Burton's alloy*, used for plowshares.

2. The baser metal in such compound or mixture that reduces the commercial value of the compound or mixture as its proportion is increased; as, the *alloy* used for hardening gold and silver coins. 3. Anything that reduces the purity or excellence of what is good or desirable; as, a noble character without *alloy* of meanness.

There is . . . much of base alloy in our very best thoughts.

**SCOTT Pirate** p. 159, l. v. & co. 1.

Delight hath no taint of alloy. **PHRASE CARY A Canticle st. 1.**

4. **Standard**; fineness. [*F. aloi*; see **ALLOT**, *v.*]

**Syn.** admixture, adulteration, debasement, deterioration. *Adulteration*, *debasement*, and *deterioration* are always used in the bad sense; *admixture* is neutral, and may be good or bad; *alloy* is commonly good in the literal sense. An excess of alloy virtually amounts to *adulteration*; but *adulteration* is now mostly restricted to articles used for food, drink, medicine, and kindred uses. In the figurative sense, as applied to character, etc., *alloy* is unfavorable, because there the only standard is perfection.—**Prep.** an alloy of silver and copper; the alloy in the ornament.—**alloy balance**, an adjustable balance which is in equilibrium when the metals in the scale-pans are in the proper proportions for forming an alloy.—**Homburg a.**, a silver-white alloy made by mixing equal parts of lead, bismuth, and tin.—**Krafft's a.**, an alloy consisting of 5 parts bismuth, 2 parts lead, and 1 part tin, having its melting-point at 104° C. (220° Fahr.).—**Leichtenberg's a.**, see **FUSIBLE METAL**.—**Lipowitz's a.**, an easily fusible alloy of 15 parts bismuth, 8 of lead, 4 of tin, and 3 of cadmium, melting at 155° F., and used for soldering white metallic objects injured by high temperature, such as Britannia metal, and for fine or fragile castings.—**Prinsep's alloys**, in pyrometry, alloys of gold, silver, and platinum so combined that the temperature of a furnace may be found by placing them in it and noting those that are fused; so called from their inventor, James Prinsep.—**Retz a.**, an alloy which withstands well the corroding effect of alkalis or acids. It is constituted of 15 parts copper, 1 of antimony, 2.34 of tin, 1.82 of lead.

**al-lo-y'age**, *1 a-lōi'*; *2 āl'ō'ig*, *n.* The act or process of alloying; specifically, in minting, of alloying the precious metals with baser ones to harden them; also, the alloy.

**al'lu-a-dite**, 1 al'yū-dî't; 2 al'yū-dî't, n. Mineral. A brownish-red iron-manganese phosphate, massive or in nodules, and believed to be an alteration-product of triphylite. [*Francis Alluaud* (1778-1865), French mineralogist.]

**al-lude**, 1 al-lūd; 2 al-lūd, v. [*AL-LUD'ED; AL-LUD'ING.*] To refer incidentally, indirectly, or by suggestion; as, to allude to a past event.

Allude is in danger of losing its peculiar signification, which is delicate and serviceable. . . . [It] means to indicate jokingly, to hint at playfully. . . . Allusion is the by-play of language.

R. G. WATTS *Words and their Uses* ch. 5, p. 100. [See a. co. 1870.]

[*L. alludo*, treat lightly, < *ad*, at, + *ludo*, play.]  
Syn.: advert, hint, imply, indicate, insinuate, intimate, mention, point, refer, signify, suggest. These words divide into two classes along the line of the expressed or unexpressed; *advert*, *allude*, *mention*, and *refer* are used of language that more or less distinctly utters a certain thought; the others of language from which it may be inferred. We *allude* to a matter slightly, perhaps by a word or phrase, as it were in byplay; we *advert* to it when we turn from our path to treat it; we *refer* to it by any clear utterance that distinctly turns the mind or attention to it; as, marginal figures *refer* to a parallel passage; we *mention* a thing by explicit words, as by naming it. The speaker *adverted* to the recent disturbances; he *alluded* to the remissness of certain public officers; he *mentioned* no name, it was easy to see to whom he *referred*. One may *hint* at a thing in a friendly way, but what is *insinuated* is always unfavorable, generally both hostile and cowardly. One may *intimate* his wishes, *intimate* his plans, *imply* his opinion, *signify* his will, *suggest* a course of action. — *Frepp.* [*Her.* Glowing; red; shining; noting the eyes of a beast so represented on an escutcheon.]

**al'lu-mette**, 1 al'lū-met; 2 al'lū-met, n. [*F.*] A friction-match; formerly, a spill.  
I am twisting an allumette out of one of you now, and relighting my calumet. LOWELL *Poem for Critics* prelim. note to 2d ed.

**al'lun's**, 1 al'lūn's; 2 al'lūn's, n. Unsorted coal of all grades, except fine coal, raised from any seam.

**al-lur'ant**, a. Alluring.

**al-lure**, 1 al-lūr; 2 al-lūr, v. [*AL-LURED; AL-LUR'ING.*] 1. To draw with or as with a lure; attract by the prospect of pleasure or advantage. 2. To attract insidiously; charm; fascinate.

The ruddy square of comfortable light. . . .  
Allured him, as the beacon-blaze allures.  
The bird of passage. TENNYSON *Enoch Arden* st. 44.

**II. i.** To have a pleasing effect; exercise attraction.

Why should the west wind allure  
Which I could not on me endure? EMERSON *The Problem* st. 2.

[*OF. allurer*, < *all* (< *L. ad*), to, + *lurer*, leurrer; see *LURE*, n.]—**al-lur'er**, n.

Syn.: attract, cajole, entice, coax, decoy, draw, entice, inveigle, lure, seduce, tempt, win. We may *attract* others to a certain thing without intent; as, the good unconsciously *attract* others to virtue. We may *allure* to that which is evil, but also to that which is good and noble by purpose and endeavor, as in the famous line "Lead us not to brighter worlds, and lead the way." GOLDSMITH *Deserted Village* l. 170. *Lure* is rather more akin to the physical nature. It is the word we would use of drawing on an animal. *Coax* expresses the attraction of the person, not of the thing. A man may be *coaxed* to that which is by no means *alluring*. *Cajole* and *decoy* carry the idea of deceiving and ensnaring. To *inveigle* is to lead one blindly in. To *tempt* is to endeavor to lead one wrong; to *seduce* is to succeed in winning one from good to ill. *Win* may be used in either a bad or a good sense, in which latter it surpasses the highest sense of *allure*, because it succeeds in that which *allure* attempts; as, "he that winneth souls is wise." *Prov.* xl. 30. See *DRAW*. — *Ant.*: chill, damp, deter, dissuade, drive away, repel, warn. — *Prep.*: allure to a course; allure by hopes; allure from evil to good.

**al-lure**, 1 al-lūr; 2 al-lūr, n. The act of alluring, or that which allures. The covered promenade of the Burlington Arcade is, on rainy days, a great allure for a small chop-house hard by.

N. P. WILKS *People I have Met* p. 37. [*L. a.* & co. 1853.]

**al-lure**, 1 al-lūr; 2 al-lūr, n. [*Al.*] Allure; bearing.

O Spanish eyebrow, Spanish eyes. Voice and allure of Spain.

F. W. H. MYERS *Reminiscences* Youth l. 102.

**al-lure-ment**, 1 al-lūr-ment; 2 al-lūr-ment, n. 1. The act or process, or the quality or power, of alluring; enticement; fascination. 2. Anything that allures; a charm; a lure; or bait.

Difficulty, aberration, martyrdom, death are the allurements that act on the heart of man. CARLYLE *Heroes*, etc. p. 70. [*L. co.*] Syn.: see *ATTRACTION*; *BAIT*; *BLANDISHMENT*.

**al-lur'ing**, 1 al-lūr'ing; 2 al-lūr'ing, pa. So pleasing as to move one to draw near; attractive; tempting; fascinating. Syn.: see *ATTRACTIVE*. — *ly*, *adv.*—*ness*, n.

**al-lu'sion**, 1 al-lū'shun; 2 al-lū'zhon, n. 1. The act of alluding, or the words by which one alludes; an indirect and incidental reference to something without definite mention of it.

He who has actually to govern (must be perpetually guided by considerations to which no allusion can be found in the writings of Adam Smith. MACAULAY *Ess.* vol. i, p. 1046. [*W. T. A.* 1881.]

2. *Rhet.* A species of comparison in which the comparative words are omitted, yet the represented object is still made the leading theme; as, "the self-seeking will betray his friend or brother with a Judas kiss." [*L. allusio* (n), < *alludo*; see *ALLUDE*.]

**al-lu'sive**, 1 al-lū'siv; 2 al-lū'siv, a. 1. Of, pertaining to allusion, or to like allusion; referring to something not directly mentioned; suggestive.

Her helpless misery . . . she was trying to make present to Deronda in an allusive speech. ELIOT *Deronda* p. 207. [*L.* 1878.]  
Calmness, allusion, metaphysical, figurative. [*L. allusivus*, pp. of *alludo*; see *ALLUDE*.] **al-lu'so-ry**,—**al-lu'sive** (ly), *adv.*—**al-lu'sive-ness**, n.

**al-lu'vi-al**, 1 al-lū'vi-al; 2 al-lū'vi-al, a. Of, pertaining to, or composed of alluvion or alluvium; as, alluvial deposits or formations.

Alluvial plains are mostly flood-plains of rivers. [*L. alluvius*, < *alluo*, wash upon, < *ad*, to, + *luo*, wash.] **al-lu'vi-ant**, **al-lu'vi-ous**,—**alluvial cone** (*Phys. Geog.*), the fan-shaped accumulation of detritus deposited where a river issues from a steep course upon flat land. a. fan. — *a. epoch*, the latter part of the Champlain period (Quaternary), overlying the Illuvial period, and characterized by more quiet fluvial and lacustrine depositions.

**al-lu'vi-al**, n. Alluvial soil, especially in Australia such soil bearing gold.

**al-lu'vi-at'ed**, 1 al-lū'vi-at'ed; 2 al-lū'vi-at'ed, pa. Covered or filled with alluvium; as, an alluviated valley.

**al-lu'vi-a-tion**, 1 al-lū'vi-a-shun; 2 al-lū'vi-a-shon, n. *Geol.* The process of building alluvial cones and deltas.

The watersheds . . . are rearranged . . . by alluviation. G. K. GILBERT *U. S. Geol. Surv.*, 1880 p. 136. [*loov. rra. ovr.*]

**al-lu'vi-on**, 1 al-lū'vi-on; 2 al-lū'vi-on, n. 1. The earthy material deposited by floods; alluvium; used in this form especially in law. See note under *ALLUVIUM*. Such accretions, if gradual, belong legally to the owner of the soil at the water's edge; but otherwise, if the increase occur from some sudden and violent cause.

Unas pointed out the impression of a meocasin in the moist alluvion. COOPER *Last of the Mohicans* p. 168. [*L. a. c.*]

2. Inundation; flood. 3. The washing of sea-waves against a shore, or of a river along its banks. 4. A downpour of volcanic cinder-mud, which, consolidated, is called tufa. [*F.*, < *L. alluvio* (n), < *alluo*; see *ALLUVIAL*.] **al-lu'vi-ot**.

**al-lu'vi-um**, 1 al-lū'vi-um; 2 al-lū'vi-um, n. [*VI-A* or *VI-UM*, pl.] *Geol.* 1. Recent deposits of sand, gravel, or mud, formed wherever the flow is checked in the currents of rivers, lakes, or estuaries. Such deposits occur chiefly as flood-plains of rivers and lakes, as bars in rivers and at mouths of estuaries, or as deltas. 2. More loosely, any subaqueous deposits of fluvial detritus, in which sense many old strata are alluvial deposits. 3. [Rare.] Volcanic cinder-mud; alluvion.

*Alluvium* has been much confused with *allusion*, and some dictionaries treat them as identical. This is, however, plainly wrong, since *alluvion* has had an extensive usage as equivalent simply to *inundation*, which *alluvion* has not had. In a single book (Lyle's *Principles of Geology*) *alluvion* has, in the later editions, been substituted for the *alluvion* of the earlier editions, with the meaning of a flood of wet volcanic cinders. Moreover, *alluvion* has legal uses which *alluvium* does not have. [*L.* prop. neut. of *alluvius*; see *ALLUVIAL*.]

Aluminum does not oxidize or tarnish like most metals, when exposed to dry or moist air, and neither hot nor cold water has any effect on it. When hammered and rolled it becomes as hard as iron and it is lighter than glass. It has been proposed for use in many cases in which lightness and strength combined are desired, as for airships, as a substitute for iron in the manufacture of boats and bridges, and as a structural material. The tenacity with which aluminum clings to its oxygen made it at first an exceedingly expensive metal to extract from its ores, but since 1876, when the more recent advances in electricity began, methods have been devised for their electrolytic reduction.

The metal aluminum occurs widely and abundantly distributed in nature, but always in combination. . . . At the present day nearly all of the metal is made by the action of powerful electric currents on molten mixtures of its compounds; for example, the oxide dissolved in cryolite. Formerly it was quite expensive, but it is now so cheap that it may be considered among the common metals. . . . One pound cost about 20 dollars, now it is worth from 35 to 40 cents. . . . Its properties make it a highly useful metal, and it is being employed for many purposes for which iron was formerly used. Most of the metal is used for making alloys. *Nat. Stand. Dispens.* p. 146. [L. mos. & co. '03.]

[< L. *alumen*, alum.] **al'u-min'i-um**: aluminum brass, a malleable, ductile alloy of aluminum, copper, and zinc, in proportions varying from 1 to 5.8 parts, 55.8 to 77.5 parts and 21 to 43 parts of each metal, respectively. Its tensile strength is greater than that of the usual brass, and it keeps its color better in the air. — **a. bronze or gold**, an alloy of aluminum and copper resembling pale gold: used in cheap jewelry, etc. — **a. chlorid** (*Chem.*), a yellowish-white crystalline powder ( $\text{AlCl}_3 \cdot 6\text{H}_2\text{O}$ ) used as a remedy in locomotor ataxia and as a disinfectant. It is soluble in water, alcohol, and when dehydrated also in ether. — **a. hydroid** (*Chem.*), a compound ( $\text{Al}(\text{OH})_3$ ), obtained from alum by precipitation with alkali hydroxids or carbonates as a white, tasteless, odorless powder used in medicine, externally, as an astringent, and in the arts for manufacture of organic dyes. — **a. silver**, a bright alloy of aluminum and silver, used in instruments where lightness is desirable. — **a. sulfate**, *Chem.* 1. A white, odorless crystalline powder ( $\text{Al}(\text{SO}_4)_3 \cdot 18\text{H}_2\text{O}$ ) soluble in water, and used in medicine as an antiseptic for purulent ulcers, etc. According to the United States Pharmacopoeia it must be 99.5 per cent. pure. 2. A yellowish-white to bluish-white crystalline mass — the crude form — used in the arts, as for clarifying water, dressing leather, staining paper, and as a mordant in dyeing; concentrated or patent alum.

**al'um-ish**, 1 al'um-ish; 2 ä'üm-ish, *a.* Of the nature of or slightly like alum.

**a-lum-na**, 1 a-lum-na; 2 a-lüm-na, *n.* [*-næ*, 1-ni; 2-nē, pl.] A woman graduate. [*L.*, fem. of *alumnus*. See ALUMNUS.]

**a-lum'nal**, 1 a-lum'nal; 2 a-lüm'nal, *a.* Of or pertaining to alumni or alumnae.

**a-lum'ni-ate**, 1 a-lum'ni-ät; 2 a-lüm'ni-ät, *n.* The time during which one is under instruction; pupilage.

**a-lum'niol**, 1 a-lum'nöl or -nöl; 2 a-lüm'nöl or -nöl, *n.* Pharm. The aluminum salt of naphthol disulfonic acid. [*< ALUMINO- + -ol*.]

**a-lum'nus**, 1 a-lum'nus; 2 a-lüm'nus, *n.* [*-ni*, 1-nai; 2-ni, pl.] A male graduate from a school, college, or other institution of learning; loosely, any pupil of a college or school. [*L.*, foster-son, *< alio*, nourish.]

**al'um-root'**, *n.* See under ALUM.

**a-lum'dum**, 1 a-lum'dum; 2 a-lüm'dum, *n.* A crystalline aluminum abrasive made in electric furnaces: a protected trade-mark name. NORTON & COMPANY, Worcester, Mass.

**al'u-mif-er-ous**, *a.* Same as ALUMINIFEROUS.

**al'u-mite**, 1 al'u-mit; 2 ä'ly-mit, *n.* Mineral. A white hydrous potassium-aluminum sulfate ( $\text{H}_2\text{KAl}_2\text{S}_6\text{O}_{20}$ ), crystallizing in the hexagonal system. [*< F.* *alum*, ALUM.] **al'u-mit'i-lite**.

**a-lu'no-gen**, 1 a-lu'no-jen; 2 a-lü'nö-gēn, *n.* Mineral. A silky white hydrous aluminum sulfate ( $\text{H}_2\text{Al}_2\text{S}_6\text{O}_{20}$ ), crystallizing in the monoclinic system. [*< F.* *alun* (see ALUM) + *-gen*.]

**a-lu'pag**, 1 a-lu'pag; 2 ä-lu'päg, *n.* [*P.*] A tree, the alpag; Tagalog term.

**Al'u-re-dus**, *n.* Alfredus. See ALFRED.

**a-lur'ite**, 1 a-lur'it; 2 a-lür'it, *n.* Mineral. A purple to red scaly variety of mica ( $\text{H}_2\text{Al}_2(\text{OH})_2\text{Si}_2\text{O}_{10}$ ), found massive. [*< Gr.* *alourgēs*, purple.]

**al'us**, 1 ä'us; 2 ä'ūs, *n.* [*Anglo-Ind.*] The tree of a Mah-ratta plow.

**A'ush**, 1 ä'ush; 2 ä'ūsh, *n.* *Bib.* Num. xxxiii, 13.

**a-ut'a**, 1 a-ut'a; 2 a-lüt'a, *n.* [*L.*] 1. A soft leather, probably dressed with alum. 2. A plaster spread on wet leather. 3. A soft, pliable, non-laminated leather-stone.

**al'u-ta'ceous**, 1 al'u-tä'ceus; 2 ä'ly-tä'shūs, *a.* 1. Resembling tawed leather, as in its soft and pliable qualities or its color; leathery. 2. *Bot.* Pale-brown in color.

**A'ut-vi't**, 1 ä'ut-vi't; 2 ä'ü't-vi't, *n.* A town in Misamis district, Mindanao, P. I.

**Al'va**, 1 al'vo or (Sp.) ä'vä; 2 ä'l'va or (Sp.) ä'l'vä, *n.* 1. Duke of (1505-1582), Fernando Alvarez de Toledo, a Spanish general; ravaged the Netherlands. 2. A city in Woods county, Okla.

**Al'vah**, 1 al'va; 2 ä'l'va, *n.* *Bib.* Gen. xxxvi, 40.

**al'va ma-r'i-na**, 1 al'vo ma-r'i-na; 2 ä'l'va ma-r'i-na. Sea-sedge; dried edis used as a stuffing for cushions, mat-tresses, etc. [*For L. ulva*, sedge; *marina*, f. of *marinus*; see MARINE.]

**Al'va-ra'**, 1 al'va; 2 ä'l'van, *n.* *Bib.* Gen. xxxvi, 23.

**Al'va-ra'do**, 1 al'va-ra'do; 2 ä'l'vä-rä'thō, *n.* 1. Alonso de (1490-1556), a Spanish officer in Mexico and in Peru. 2. Pedro de (1495-1541), a Spanish officer with Cortez. 3. 1 al'vo-rä'do; 2 ä'l'vä-rä'do, a city in Johnson county, Tex.

**Al'va-rez**, 1 ä'l'va-rēz; 2 ä'l'vä-rēz, *n.* 1. Albert Raymond (1861- ) (died 1902), a French operatic tenor singer. 2. Francisco (died 1540?), a Portuguese traveler in Abyssinia. 3. Don José (1768-1830), a Spanish sculptor. 4. Juan (1780-1867), a Mexican general and statesman.

**Al'va-ry**, 1 ä'l'vä-ry; 2 ä'l'vä-ry, *Max* (1858-1898), A German operatic tenor.

**al'vat**, 1 al'vat; 2 ä'l'vāt, *n.* [*Anglo-Ind.*] A transverse beam fastened to a pole, used to move loads.

**al'v-e-ry**, 1 al'v-e-ry; 2 ä'l'v-ä-ry, *n.* [*Lat.*, 1-ry; 2-ry, pl.] 1. A beehive: a name given to an early dictionary of English, Latin, French, and Greek. [*M.*] 2. *Anat.* The hollow of the external ear: so called from the wax found there. [*< L.* *alvearum*, beehive, *< alveus*, cavity.] **al'v-e-ri-um**.

**al'v-e-ate**, 1 al'v-e-ät; 2 ä'l'v-ä't, *a.* [*Anglo-Ind.*] To shape like a dome or trough: hollow out. [*< L.* *alveatus*, hollowed.]

**al'v-e-ate**, 1 al'v-e-ät; 2 ä'l'v-ä't, *a.* [*Anglo-Ind.*] To shape like a dome or trough: hollow out. [*< L.* *alveatus*, hollowed.]

milky juice of a Brazilian tree (*Euphorbia heterodoxa*) of the euphorbia family. It is employed in medicine. **al'v-e-loz**.

**al'v-e-loz**, 1 al'v-e-loz; 2 ä'l'v-ä-lōz, *n.* *Bot.* 1. A deep angular cavity in the receptacle of a composite flower, as the cotton-thistle. 2. The depressed peritheum in certain ascomycetous fungi. 3. A pore in a fungus of the family Polyporaceae.

**al'v-e-o-lar**, 1 al'v-i-o-lar or al'v-i-o-lär; 2 ä'l'v-ä-o-lar or ä'l'v-ä-o-lär (XIII), *a.* 1. *Anat.* Of, pertaining to, or like alveoli; as, the alveolar membrane; the alveolar arch. See ALVEOLUS. **al'v-e-o-lä-ry**. 2. Pronounced with the tongue-tip pressed on the front upper alveolar processes.

— **alveolar echinococcus** disease, a disease affecting the liver and bile-ducts, characterized by a dark-greenish discoloration of the skin due to obstruction of the bile-ducts. — **a. hypothesis**, a theory that protoplasm consists of alveoli, or cells, in continuity, their common walls giving the characteristic reticulated aspect. — **a. index**, see INDEX. — **a. line** (*Crantom*), the prolongation of the line from the margin of the anterior nares to the anterior nasal spine. — **a. passages**, in the lungs, the terminal ramifications of the bronchioles, studded with alveoli. — **a. plasma** (*Bot.*), same as TROPHOPLASM. — **a. point**, the point on the outer edge of the upper jaw between the central incisors. See CRANTOM. — **a. processes**, the dental margins of those bones of the jaws in which the teeth are set. — **al'v-e-o-lis** or ä'l'v-ä-o-lis, 1 al'v-i-o-lis or ä'l'v-ä-o-lis; 2 ä'l'v-ä-o-lis or ä'l'v-ä-o-lis, *n.* *Pathol.* Inflammation of a dental alveolus.

**al'v-e-o-lus**, 1 al'v-i-o-lus; 2 ä'l'v-ä-lūs, *n.* [*-li*, 1-lai; 2-li, pl.] [*L.*] A small cavity, pit, cell, or the like, resembling a honeycomb-cell, as the socket for a tooth, an air-cell of the lungs, or a cavity in a coral or the like. **al'v-e-o-lēt**.

Each alveolus closely invests the fang contained within it. *MILNANT The Cat* 27. [*M.*]

— **al'v-e-o-lar'i-form**, *a.* Shaped like the cells of honeycomb. — **al'v-e-o-late**, *a.* Having alveoli arranged like the cells of a honeycomb; deeply pitted; like honeycomb. **al'v-e-o-lat'ed**. — **al'v-e-o-lä-tion**, *n.* The state of being alveolate; a formation, structure, or arrangement of alveoli. — **al'v-e-o-lä-form**, *a.* *Anat.* Formed like an alveolus. — **al'v-e-o-lä-fo'm**, *a.* *Anat.* Relating to the alveolar point and to the condyles of the occipital bone: applied to a reference plane. — **al'v-e-o-lä-dēn-tal**, *a.* Of or relating to the tooth-sockets; as, the alveodental canal. — **al'v-e-o-lä-lä-äl**, *a.* Relating or belonging to the alveoli of the teeth and the lips. — **al'v-e-o-lä-lä-guäl**, *a.* Relating or belonging to the alveoli of the teeth and the tongue. — **alveololinguäl sulci**, the channels or spaces between the tongue and the gums.

**Al'ver-stone**, 1 al'ver-stön; 2 ä'l'ver-stōn, *Lord* (1842-1891), Richard Everard Webster, a Lord Chief Justice of England.

**al've-us**, 1 al'v-i-us; 2 ä'l'v-ä-üs, *n.* [*-li*, 1-lai; 2-li, pl.] [*L.*] 1. *Anat.* A trough-like duct or surface, as the wider part of the thoracic duct. 2. The hollow or channel of a sea or river. 3. The utricle of the ear. 4. A layer of nerve-fibers on the ventricular surface of the hippocampus major.

**Al'vi-a-nö**, 1 ä'l'v-i-ä'nö; 2 ä'l'v-i-ä'nö, *Bartolommeo* (1455-1515). An Italian general and patron of literature.

**al'vi-du'cus**, 1 al'v-i-dü'cus; 2 ä'l'v-i-dü'cus, *a.* Pur-gative. [*< L.* *alvus*, belly, + *duco*, lead.]

**Al'vin**, 1 al'vin; 2 ä'l'vīn, *n.* A masculine personal name. *Teut.*, beloved by all.

**Al'vine'z**, 1 al'vin-äz; 2 ä'l'vīn-äz, *Joseph, Baron von* (1735-1810). An Austrian general. **Al'vin'zyt**.

**al'vīn**, 1 al'vīn or -vīn; 2 ä'l'vīn or -vīn, *a.* *Anat.* Of, pertaining to, or proceeding from the belly and lower intestines; as, *alvine* evacuations. [*< L.* *alvus*, belly.]

**Al'vīn**, *n.* See ALVIN.

**Al'vis**, 1 ä'l'vīs; 2 ä'l'vīs, *n.* *Norse Myth.* In the *Lay of Alvis*, Alvis, the dwarf suitor for Thor's daughter; frustrated by Thor, who piles him with questions until daylight compels him to retreat to his underground abode. — **Al'viss-mal**, *n.* One of the Eddic songs which relates the story of Alvis.

II. f. [Archaic.] To meet together; assemble. [*F. amasser*, < *a* (< *L. ad*), to, + *masser*, < *massee*; see MASS].  
Sms. accumulate, aggregate, collect, gather, heap up, hoard, hoard up, pile up, store up. With some occasional exceptions, *accumulate* is applied to the more gradual, *amass* to the more rapid gathering of money or materials, *amass* referring to the general result or bulk, *accumulate* to the particular process or rate of gain. We say interest is *accumulated* (or *accumulates*) rather than is *amassed*; he *accumulated* a fortune in the course of years; he rapidly *amassed* a fortune by shrewd speculations. Goods or money for immediate distribution are said to be *collected* rather than *amassed*. They may be *stored up* for a longer or shorter time; but to *hoard* is always with a view of permanent retention, generally selfish. *Aggregate* is now most commonly used of numbers and amounts; as, the expenses will *aggregate* a round million. — Ant: disperse, dissipate, divide, parcel, portion, scatter, spend, squander, waste. — Prep: amass for oneself, for a purpose, from a distance, with great labor, by industry.

2. Done, made, or practised by an amateur: often used disparagingly; as, amateur acting; amateur painting.  
am'a-teur, n. 1. One who practises an art, especially a fine art, not as a livelihood or professionally, but for the love of it; as, an amateur in music. See synonyms.  
The word *amateur* itself suggests a real interest.  
MACDONALD *Annals of Quiet Neighbourhood* p. 334. [n. & s.]  
2. Often, one who amuses himself with an art, but is not a master of it; one who makes more or less pretense to practising an art without having undergone professional preparation. 3. Sport. An athlete who has not engaged in contests open to professional athletes, or used any athletic art as a livelihood. The term varies in usage and definition according to the changeable regulations of athletic associations. 4. [Archaic.] One who is fond of or interested in anything; an admirer; as, an amateur of musical genius or of the table. [*F. < L. amator*, lover, < *amo*, love.]  
Sms. connoisseur, critic, dilettante, novice, professional, tyro. Etymologically, the *amateur* is one who loves, the *connoisseur* one who knows. In usage, the word *amateur* carries a natural implication of superficialness, though marked excellence is at times attained by amateurs. A *connoisseur* is supposed to be so thoroughly informed regarding any art or work as to be able to criticize or select intelligently and authoritatively; there are many incompetent critics, but there can not, in the true sense, be an incompetent connoisseur. The amateur practices to some extent that in regard to which he may not be well informed: the connoisseur is well informed in regard to that which he may not practice at all. A *novice* or *tyro* may be a *professional*; an amateur never is: the amateur may be skilled and experienced as the *novice* or *tyro* never is. *Dilettante*, which had originally the sense of *amateur*, has to some extent come to denote one who is superficial, pretentious, and affected, whether in theory or practise. — Prep: an amateur in art.  
— am'a-teur'dom, n. — am'a-teur'ish, a. Subjective of an amateur or his work; unskilful; feeble; crude; faulty. — *ly*, adverb, —ness, n. — am'a-teur'ism, n. The state of being an amateur; also, the general character or condition of being amateurish, unskilled, or faulty. — am'a-teur'ish, n. The character or quality of an amateur.

or penalty.—*amende honorable*, a reparation or reparation publicly or openly made to an injured person. It formerly consisted of a public avowal of guilt, and was inflicted

on traitors, forgers, and fraudulent bankrupts; the simple amende honorable was made before the judges in court; the amende honorable in figuris was made in the public square, before the populace, the guilty person being robed in white, with bare feet and head, and bearing a lighted candle in his hand and an inscription on his breast. This punishment formed part of the Roman, French, and Dutch systems; it was abolished in France in 1791, revived in 1825, and once more suppressed in 1830, but continued in the form of a reparation until abolished in 1894. The word continues to be used in the Roman Catholic Church to denote prayers of reparation for sacrilege.

*Amende honorable*, in France, was a degrading punishment inflicted on traitors, who were brought into court with a rope round their neck, and made to beg pardon.

[ME. *amidde*, < AS. *on middan*; *on*, in; *middan*, dat. of *midde*, < *mid*; see *mid*.]

Syn. *amidst*, among, amongst, between, betwixt, in the midst of. *Amid* or *amidst* denotes surrounded by; *among* or *amongst*, mingled with. *Between* (or, in old or poetic style, *betwixt*) is said of two persons or objects, or of two groups of persons or objects. "Let there be no strife, I pray thee, between me and thee, and between my herdmen and thy herdmen." *Gen. xlii, 9*; the reference being to two bodies of herdmen. *Amid* denotes mere position; *among*, some active relation, as of companionship, hostility, etc.

Lowell's "Among my Books" regards the books as companions; *amid* my books would suggest packing, storing, or some other incidental circumstance. We say among friends, or among enemies, *amidst* the woods, *amid* the shadows. In the midst of may have merely the local meaning; as, I found myself in the midst of a crowd; or it may express even closer association than *among*; as, "I found myself in the midst of friends" suggests their pressing up on every side, oneself the central object; so, "where two or three are met together in my name, there am I in the midst of them." *Matt. xviii, 20*; in which case it would be feeble to say "among them," impossible to say "amid them," not so well to say "amidst them."—Ant.: afar, away, beyond, outside, without.

*a-mi'd*, 1 a-mi'd; 2 a-mi'd, n. One of the five Buddhas of the present Kalpa, greatly honored in Japan.

The same center that swung before *Amida* could be refilled to wait Christian incense. GUERRIER *Mikado's Empire* p. 252. (in 1870.)

*a-mi'dah*, 1 a-mi'da; 2 a-mi'da, n. *Judaism*. The *Shema* prayer, or collection of nineteen benedictions recited morning, afternoon, and evening. It includes three praises, thirteen petitions, and three thanksgivings.

*am'i'da'd*, a. *Chem.* Changed into an *amid*.

*am'i'did*, 1 a-mi'did, -did or -doid; 2 a-mi'did, -did or -doid, n. *Chem.* A compound containing the group amidogen in union with an element or another radical.

*am'i'din*, 1 a-mi'din, -din or -din; 2 a-mi'din, -din or -din, n. *Chem.* A compound derived from acid amids through substitution of carbonyl oxygen by the imid (NH) group, as acetamidin (CH<sub>3</sub>C(NH).NH<sub>2</sub>). [*< AMID*.]

*am'i'din*, n. A transparent gelatinous solution of *am'i'dine*, starch in hot water. [*< am'id*, as in F. *amidon*, starch, L. *amylum*, < Gr. *amylon*, meal, < a-priv. + *mylo*, mill.]

*a-mi'dmost*, adv. & prep. In the very middle (of).

*am'i-do*, 1 am'i-do or am'i-do; 2 am'i-do or am'i-do. *Chem.* Derived from *amid*: a combining form indicating that the compound has had one atom of hydrogen (H) replaced by amidogen; as, *amido-benzene*, *amido-toluol*,—*am'i-do-a-cet'ic*, a. See *GLYCOCOLL*.—*amidoacetic acid*, glycolic.—*am'i-do-an'ti-py'rin*, n. A bright yellow crystalline substance (C<sub>10</sub>H<sub>7</sub>N<sub>3</sub>O.NH<sub>2</sub>), obtained by reducing nitroso-antipyrin.

*am'i-do-az'o*, 1 am'i-do-az'o; 2 am'i-do-az'o. *Chem.* A combining form indicating that the resulting compound contains both amido and azo radicals.—*am'i-do-az'o-benz'ene*, n. Aniline yellow.—*am'i-do-az'o-benz'ol*, n. *Chem.* An azobenzol (C<sub>6</sub>H<sub>5</sub>N=N.C<sub>6</sub>H<sub>5</sub>), into which the amido group has been introduced (C<sub>6</sub>H<sub>4</sub>N=N.C<sub>6</sub>H<sub>5</sub>).—*am'i-do-az'o-benz'ol*.

*a-mi'do-gen*, 1 a-mi'do-gen; 2 a-mi'do-gen, n. *Chem.* A hypothetical radical (NH<sub>2</sub>), not yet isolated, but known from its existence in various organic compounds. [*< AMIDO-*, + *-GEN*.]

*am'i-dol*, 1 am'i-dol or -dol; 2 am'i-dol or -dol, n. *Chem.* A white crystalline powder (C<sub>6</sub>H<sub>5</sub>(NH<sub>2</sub>)<sub>2</sub>OH) used in photography as a developer for bromid plates. [*< AMID*, + *-OL*.]

*a-mi'do-plast*, 1 a-mi'do-plast; 2 a-mi'do-plast, n. *Bot.* Same as *LEUCOPLASTID*. [*< am'id-* (see *AMIDIN*) + Gr. *plastō*, form.]—*a-mi'do-plas'tid*.

*am'i-do-thi'o-lac'tic*, 1 am'i-do-thi'o-lac'tic; 2 am'i-do-thi'o-lac'tic, a. *Chem.* Designating a derivative of lactic acid into which have been introduced the radicals NH<sub>2</sub> and SH.

*am'i-dox'im*, 1 am'i-dox'im, -im or -im; 2 am'i-dox'im, -im or -im, n. *Chem.* A compound in which a hydrogen of the amido or imido group is substituted for hydroxyl, as acetamidoxim (CH<sub>3</sub>C(NH)NH<sub>2</sub>). [*< AMID* + *OXIME*.]

*am'i-dox'yl*, 1 am'i-dox'yl; 2 am'i-dox'yl, n. *Chem.* The univalent radical NHOH.

*a-mi'd-ships*, 1 a-mi'd-ships; 2 a-mi'd-ships, adv. 1. In the middle part, as of a ship; half-way between stem and stern; as, she parted *amidships*. 2. On the fore-and-aft line; as, to put the helm *amidships*.

*a-mi'dst*, 1 a-mi'dst; 2 a-mi'dst, prep. In the center of; surrounded by; among; in the progress of; amid; as, *amidst* flying bullets; moving *amidst* the throng. The recent tendency seems to be to distinguish *amidst* from *amid* by using it especially of scattered things or of something moving in the midst of other things.

Isosbly safe *amidst* the conquering bands.  
FELICIA D. HEMANS *Wife of Asdrubal* st. 2.

Syn.: see *AMID*.

*a-mi'd-u-lin*, 1 a-mi'd-u-lin; 2 a-mi'd-u-lin, n. A starch made soluble by heating. [*< F. amidon*; see *AMIDIN*.]

*a-mi'd-wa'd*, adv. & prep. Toward the middle (of).

A. M. I. E. E., abbr. Associate Member of the Institute of Electrical Engineers.

*Am'i-ens*, 1 am'i-ens or (F.) *am'i'än*; 2 am'i-ens or (F.) *am'i'än*, n. A manufacturing city, the capital of Somme department, France, with a cathedral, built 1220; captured by Spain March 11, 1597; retaken by the French Sept. 25; the scene of a treaty of peace between Great Britain, Holland, France, and Spain, March 27, 1802, and of the defeat of the French, Nov. 27, 1870. Entered by German troops during the Great War (1914-18), Aug. 31, but evacuated by them Sept. 11, 1914; wantonly seized by them July, 1916, and from March to Aug., 1918.

*a-mi'l-dä*, 1 a-mi'l-dä; 2 a-mi'l-dä, n. *pl. Ich.* A family of elongated, broad-headed cyclozooids with 10 to 12 branchiostomal rays, and a long dorsal; including the bowfin. [*< AMIA*.]—*a-mi'l-dä*; *Am'i-l-dä*; *Am'i-l-dä*;—*a-mi'dan*, n.—*am'i'dä*, n.

*a-mi'l-gö-gö-sis*, 1 a-mi'l-gö-gö-sis; 2 a-mi'l-gö-gö-sis, n. *Biol.* The unequal mingling of parental characters in sexual reproduction.

*am'i'l*, 1 am'i'l or am'i'l; 2 am'i'l or am'i'l, n. Same as *AUMIL*.

*am'i-lar*, n. Same as *AUMILAR*.

*a-mi'm'i-a*, 1 a-mi'm'i-a; 2 a-mi'm'i-a, n. Absence or loss of the power to use gestures, pantomime, or the like. [*< Gr. a-priv. + mimos*, mimic.]

*a-mi'n'a*, 1 a-mi'n'a; 2 a-mi'n'a, n. Same as *AMEN*.

*am'in'e*, 1 am'in-e, -in or -in; 2 am'in-e, -in or -in (xiii), n. *Chem.* A compound derived from ammonia by substituting alkyl or hydrocarbon radicals for the hydrogen atoms. When only one hydrogen atom is replaced the amine is called *primary*; when two, *secondary*; and when three, *tertiary*. [*< AMMONIA*.]—*a-mi'n'ic*, a.

*Am'i-na*, 1 am'i-na; 2 am'i-na, n. A character in the Arabian Nights; half-sister of Zobeide.

*a-mi'nä*, 1 a-mi'nä; 2 a-mi'nä, n. In Bellini's *La Sonnambula*, the heroine of the opera; a sonnambulist.

*a-mi'nä-dab*, 1 a-mi'nä-dab; 2 a-mi'nä-dab, n. *Bib.* *Matt. i, 4.*

*a-mi'nä*, 1 a-mi'nä or a-mi'nä; 2 a-mi'nä or a-mi'nä, n. In the Arabian Nights: (1) The wife of Sidi, a ghoul who leapt her three sisters like a leash of hounds, in the *History of Sir Noman*. (2) Same as *AMINAL*.

*a-mi'nä-shit*, n. To diminish.

*a-mi'nä-trent*, n. To administer.

*am'i-no*, 1 am'i-no or a-mi'no; 2 am'i-no or a-mi'no. *Chem.* Derived from *amin*: a combining form indicating presence of the radical NH<sub>2</sub> in the compound.—*am'i-no-a-cet'ic*, a. See *GLYCOCOLL*.

*am'i-no-jaz'o*, 1 am'i-no-jaz'o or a-mi'no-jaz'o; 2 am'i-no-jaz'o or a-mi'no-jaz'o, n. *Chem.* Any one of the amines of azobenzene. The para-compound (C<sub>6</sub>H<sub>5</sub>N=N.C<sub>6</sub>H<sub>5</sub>) occurs in yellow crystals, and its hydrochloride constitutes the aniline yellow of commerce, which in turn forms a basis for the manufacture of the diazo-dyes and indulins.

*am'i-nol*, 1 am'i-nol or -nol; 2 am'i-nol or -nol, n. *Chem.* A turbid mixture of aqueous trimethylamine, calcium oxide, and sodium chloride, of disagreeable odor, used as an antiseptic and a disinfectant. [*< AMIN* + *-OL*.]

*a-mi'n'te*, 1 a-mi'n'te; 2 a-mi'n'te, n. In Molière's *Les Amants*, a character, a name assumed by Cathos.

*a-mi'n'tor*, 1 a-mi'n'tor; 2 a-mi'n'tor, n. In Beaumont and Fletcher's *The Maid's Tragedy*, a character who gives up Aspatia to marry Evadne at the king's command.

*am'i-oid*, 1 am'i-oid; 2 am'i-oid, n. I. a. Of or pertaining to the Amidae or the Amidiæ. II. n. One of the Amidae.

*am'i-ol'de*, 1 am'i-ol'de; 2 am'i-ol'de, n. *pl. Ich.* A suborder of ganoids with cycloid scales and branchiostomal rays. [*< AMIOL* + *-OID*.]—*am'i-ol'de-sis*; *Am'i-ol'de-sis*; *Am'i-ol'de-sis*; *Am'i-ol'de-sis*; a. & n.

*a-mi'r*, n. Same as *AMER*.—*a-mi'r-ship*, n.

*A'mis* or *A'milles*, 1 a'mi'z or a'mi'z; 2 a'mi'z or a'mi'z. A French medieval romance which describes the adventures of two knights who were bosom friends.

*Am'ish*, 1 am'ish; 2 am'ish, *Ch. Hist.* I. a. Relating to or designating the adherents of Jacob Amman (17th century). Compare *AMMANITE*. II. n. pl. A sect of Mennonites, the *Ober* (Upland) Mennonites; the popular name used interchangeably with *Amish*. See *AMMANITE*.

*Am'ish-man*, 1 am'ish-man; 2 am'ish-man, n. Done or occurring out of suitable order or relation; wrong; faulty; improper; used predicatively; as, something is *amish*. [*< A., on*, + *miss*, n.].—*a-mi'ss'ness*, n.

Syn.: abortive, bad, defective, false, inappropriate, ludicrous, inopportune, untimely, untrue, unwise, unworthy.—Ant.: appropriate, complete, effective, expedient, good, opportune, right, satisfactory, successful, true, wise, worthy. Prep.: there is something *amish* in his accounts; something *amish* with him.

**Am-mo-ni-a**, 1 a-mo'-ni-a; 2 a-mo'-ni-a, n. 1. A solution of gaseous anhydrous ammonia (see def. 2) in water; spirits of hartshorn. According to the United States Pharmacopœia, ordinary water of ammonia should contain 10 per cent. by weight of the gas, and the "stronger water of ammonia" 25 per cent. Liquid ammonia; water of ammonia.  
 2. A colorless pungent suffocating gas (NH<sub>3</sub>) found in small quantities in the air and in mineral waters, and obtained chiefly by the dry distillation of nitrogenous organic bodies, as bones, blood, coal, etc. It is very soluble in water. Liquefiable and solidifiable by cold and pressure, and strongly alkaline, combining with acids to form ammonium salts. It is used for artificial refrigeration (see *ILLUS.* of ICE-MACHINE) and for motors. It is of great value as a fertilizer, principally in the form of ammonium sulfate; it is also largely employed in the arts and in medicine.  
**Ammonia** was known to the early alchemists in the form of the carbonate under the name of spiritus salis urine. In the fifteenth century Basil Valentine showed that the same body may be obtained by the action of alkali upon sal ammoniac; and Glauber, in consequence, termed this body spiritus salis ammoniac. Roscoe and Schœnbein *Chemistry* vol. i, p. 378, 1875.]

**Am-mo-ni-an'**, a. Of or pertaining to the Egyptian god of life, Ammon, or his oracular temple in Libya.  
**am-mo-ni-a-phone**, 1 a-mo'-ni-a-fon; 2 a-mo'-ni-a-fon, n. A device for inhaling ammonia as a stimulant to the voice. [*L.* *AMMONIA* + *PHONE*.]  
**am-mo-ni-a-te**, 1 a-mo'-ni-a-tē; 2 a-mo'-ni-a-tē, n. 1. Any organic nitrogenous matter used in the manufacture of fertilizers as a source of ammonia. 2. *Chem.* A compound of ammonia and a metallic oxide; an ammoniuret.—**am-mo-ni-a-ted**, a. *Chem.* Saturated or combined with ammonia.—**ammoniated mercury**, same as WHITE PRECIPITATE.  
**am-mo-ni-a-ter**, 1 a-mo'-ni-a-tēr; 2 a-mo'-ni-a-tēr, n. A constituent of a fertilizing compound which yields ammonia when mixed with the soil.  
**am-mo-ni-ic**, 1 a-mo'-ni-ik; 2 a-mo'-ni-ic, a. Of, pertaining to, or derived from ammonium or ammonia. **am-mo-ni-cal**.  
**am-mo-ni-e-mi-a**, 1 a-mo'-ni-i-mi-a; 2 a-mo'-ni-e-mi-a, n. *Pathol.* A morbid condition in which the blood is poisoned by ammonium carbonate derived from decomposition of retained urea. [*L.* *AMMONIUM* + *Gr.* *haima*, blood.] **am-mo-ni-e-mi-a-t**.  
**am-mo-ni-i-d-ca'tion**, 1 a-mo'-ni-i-kā'shān; 2 a-mo'-ni-i-fī-cā'shōn, n. 1. The act or process of saturating with ammonia or an ammonium salt, as a soil or a fertilizer; also, the state of being so saturated. 2. The formation of ammonia, at the expense of other forms of nitrogen compounds, by the action of micro-organisms upon organic substances. [*L.* *AMMONIA* + *L.* *facio*, make.]  
**am-mo-ni-fy**, 1 a-mo'-ni-fai; 2 a-mo'-ni-fī, vt. & tr. [*TIED*; -FY'ING.] To treat with ammonia; to be subjected to ammonification. [*L.* *AMMONIA* + -FY'.]  
**am-mo-ni-o-**, 1 a-mo'-ni-o-; 2 a-mo'-ni-o-, n. 1. **am-mo-ni-o-**, 1 a-mo'-ni-o-; 2 a-mo'-ni-o-, n. From ammonia: combining forms used in chemistry and medicine; as, *ammonio-alumic*, containing ammonia and aluminum; *ammonio-acid*; *ammonio-salt*.  
 Words beginning with this prefix will be found in alphabetical place, either singly or in groups.  
**am-mo-ni-on**, 1 a-mo'-ni-on; 2 a-mo'-ni-on, n. *Chem.* The ammonium ion NH<sub>4</sub><sup>+</sup>. [*L.* *AMMONIUM* + *ION*.]  
**am-mo-ni-o-pla-tin'e**, a. Composed of both ammonia and platinum.—**ammonio-platinic chlorid**, a crystalline, yellow precipitate, (NH<sub>4</sub>)<sub>2</sub>PtCl<sub>6</sub>, used in chemical analyses to determine ammonia or nitrogen.  
**am-mo-ni-ite**, 1 a-mo'-ni-itē; 2 a-mo'-ni-itē, n. Any fossil ammonian cephalopod shell. Ammonites are common in Paleozoic and Mesozoic rocks of all parts of the world, and are usually ornamented outside with ribs, knobs, spines, etc., while the under layer is pearly, as in the nautilus. Some forms are between two and three feet broad.  
 The word is derived from the ancient Egyptian *Ammon* or *Ammon*, to whom the ram was sacred. It is from the form of the ram's horns of this deity that the fossil mollusk called *Ammonites* derives its name. See also the Greek *Ammon*, a form of Zeus with ram's horns, also called Jupiter-Ammon. Alexander the Great is represented on the coins of Lysimachus deified, with the horn of Ammon and diadem. Causing amnesia.  
**am-ne-si-ty**, 1 a-mo'-ni-si-ti; 2 a-mo'-ni-si-ti, n. [*TIED*; -TY'ING.] To grant amnesty to or for; pardon; as, to *amnesty* insurgents.  
 And so hereby all is *amnestied* and finished.  
 Carlyle *French Revolution* vol. ii, p. 19. [A.]  
**am-ne-si-ty**, n. [*TIED*, 1 -ty; 2 -tis, pl.] 1. An act of pardon or oblivion by which a government through its chief executive absolves a whole class or whole classes of offenders, without trial, from penalties and disabilities incurred, or pardons a whole class of offenses and all concerned therein.  
 To the executive alone is intrusted the power of pardon; and it is granted without limit. Pardon includes amnesty. It blots out the offense pardoned and removes its penal consequences.  
 U. S. Supreme Court Reports vol. xxx, p. 147.  
 The proclamation of the President extended unconditionally and without reservation a full pardon and amnesty for the offense of treason . . . with a restoration of all rights, privileges, and immunities under the Constitution. . . . All the benefits which can result to the claimant from both pardon and amnesty would equally have accrued to him if the term 'pardon' alone had been used in the proclamation.  
 U. S. Supreme Court Reports vol. xiv, pp. 152-3.  
 Under the régime established in 1871, the right of amnesty in France, is reserved to the national assembly.  
 A. HEBBARD in *Cyc. of Polit. Science* vol. i, p. 89.  
 2. Any intentional forgetfulness or overlooking, especially of past wrongdoing or the like; as, peace should bring *amnesty*. [*L.* *amnestia*, < *L.* *amnesia*, < *Gr.* *amnesia*, < *a-*, priv., + *mnēsis*, remember.]  
 Syn: absolution, acquittal, oblivion, pardon. *Acquittal* is a release from a charge, after trial, as not guilty. *Pardon* is a removal of penalty from one who has been adjudged guilty. *Acquittal* is by the decision of a court, commonly of a jury; *pardon* is the act of the executive. An innocent man may demand *acquittal*, and need not plead for *pardon*. *Pardon* supposes an offense; yet, as our laws stand, to grant a *pardon* is sometimes the only way to release one who has been wrongly convicted. *Oblivion*, from the Latin, signifies overlooking an offense, so that the offender stands before the law as if it had never been committed. *Amnesty* brings the same idea through the Greek. *Pardon* affects individuals; *amnesty* and *oblivion* are said of great numbers. *Pardon* is oftenest applied to the ordinary administration of law; *amnesty*, to national and military affairs. An *amnesty* is issued after war, insurrection, or rebellion; it is often granted by "an act of *oblivion*," and includes a full

2. Large in amount or degree; complete; free; full; as, ample strength; the amplest liberty; ample justice.  
No white men could have made more ample apologies than did the Kickapoo, Irving Washington vol. i, p. 332. [*r. p.* 1863.]  
3. Fully sufficient to meet all needs or requirements; abundant; liberal; as, ample provision; an ample supply. [*F.* < *L.* *amplus*, large, prob. < *am*, for *ambi*, around + *plus*, full; cp. *plenus*, full.] — **am-ple** (ness), n. Syn.: abundant, affluent, bountiful, complete, copious, enough, full, liberal, plentiful, sufficient. That is enough which just meets a given demand; that is ample which gives a safe, but not a large, margin beyond; that is abundant, affluent, bountiful, liberal, plentiful, which is largely in excess of manifest need. *Plentiful* is used of supplies, as of food, water, etc.; as, "a plentiful rain," *Ps.* lxxviii, 9. We may also say a copious rain; but *copious* can be applied to thought, language, etc., where *plentiful* can not well be used. *Affluent* and *liberal* both apply to riches, resources; *liberal*, with especial reference to giving or expending. (Compare synonyms for *AFFLUENCE*.) *Affluent* may be used of thought, feeling, etc. Neither *affluent*, *copious*, nor *plentiful* can be used of time or space; a field is called *plentiful*, not with reference to its extent, but to its productiveness. *Complete* expresses not excess or overplus, and yet not mere sufficiency, but harmony, proportion, fitness to a design or ideal. *Ample* and *abundant* may be applied to any subject. We have time enough means that we can reach our destination without haste, but also without delay; if we have ample time, we may move leisurely, and note what is by the way; if we have abundant time, we may pause to converse with a friend, to view the scenery, or to rest when weary. See *ABUNDANT*; *ENOUGH*; *LARGE*. — **Am-ple**, n. deficient, inadequate, insufficient, mean, miserly, narrow, niggardly, poor, scant, scanty, small, stingy. — **Prep.**: ample in dimensions, for the purpose.

of those who have more material and experience is to condense sufficiently. So in the early days of our literature *amplify* was used in the favorable sense; but at present this word and most kindred words are coming to share the derogatory meaning that has long attached to *exaltate*. We may develop a thought, expand an illustration, extend a discussion, expatiate on a hobby, dilate on something joyous or sad, enlarge a volume, unfold a scheme, widen the range of treatment. — **Ant.**: abbreviate, abridge, amputate, condense, curtail, cut down, epitomize, reduce, summarize, sum up. — **Prep.**: to amplify on or upon; amplified by illustrations.

The amplitude of his comprehension is the source of his felicity of expression. E. P. WHIFFLE *Essays and Reviews*, Daniel Webster in vol. i, p. 201. [*n. m.* & co. 1882.]

2. Math. (1) The absolute value or modulus of an imaginary quantity. (2) The limit of integration of an elliptical integral that is expressed in trigonometrical form.

3. Astron. Angular distance on the horizon from the east or west point; the arc of the horizon between the true east and west and the center of the sun, moon, or any star at its rising or setting. The difference between true and astronomical amplitude lies in the fact that reckoning from east to west it varies with the variations of the compass and is therefore called magnetic amplitude.

4. Mil. The range of a shot, or the horizontal right line measuring the distance over which it has passed. F. M. L. ENCYC. 5. Physics. The extent of the swing of a vibrating body on each side of the mean position.

6. Meteor. The extent of the variation of a meteorological element in a given time, as a day or a year; also called range. The periodic amplitude is the amplitude of a curve representing the mean march of the element for the period in question; the non-periodic amplitude is the difference between the mean of the maxima and the mean of the minima, or between the absolute maximum and the absolute minimum. [*L.* *amplitudo*, < *amplus*; see *AMPLE*.]

**am-pli-tude**, 1 am-pli-tūid; 2 am-pli-tūd, n. An azimuth-compass having its zeros at the east and west instead of at the north and south, so as to facilitate reading angles of amplitude. — **magnetic a.**, the amplitude of a star (see def. 3) as shown by a compass-needle: differing from the true amplitude by the amount of the magnetic declination.

**am-ple**, 1 am-ple; 2 am-ple, n. In an ample manner; so as to be ample; liberally; sufficiently; abundantly.

He passed several years in this pleasing amusement, and saw his care amply recompensed. JOHNSON *Rambler* Oct. 5, 1761.

**am-pouge**, 1 am-pōg; 2 am-pōg, n. [*Madagascar*.] The woolly lemur or avahis: native name.

**am-poule**, 1 am-pōl; 2 am-pōl, n. [*F.*] A vial containing one dose of a hypodermic solution.

**An-a-bē-na, 1 ā-nā-bē-na;** 2 ā-nā-bē-na, *n. Bot.* 1. A genus of fresh-water bluish-green algae of the nostoc family (*Nostochaceae*), consisting of strings of minute cells, growing in stagnant waters, in bog-pools, in hot springs, and sometimes epiphytic on living aquatic or land plants. It forms a bright bluish-green scum on the surface of bog-pools. The decay of some species is a main source of the foul odor and hurtful properties of stagnant water. 2. [a] Any plant of this genus. 3. A genus of euphorbia, a c. heterocyst. 4. A genus of flowering plants, now referred to as *Plukenetia*. [*Gr.* *anabēnō*, mount, < *ana*, up, + *bañō*, go.]

Hormogonia of *Anabaena flos-aquae*. 40x.  
a, a, heterocyst.

**a-nab-a-mous, 1 ā-nā-a-mus;** 2 ā-nā-a-mūs, *a. Ich.* Able to ascend (trebs): said of the climbing-fish (*Anabas*). [*Gr.* *ana*, + *bañō*, go.]

**An-a-ban-ti-dē, 1 ā-nā-ban-ti-dē;** 2 ā-nā-ban-ti-dē, *n. pl. Ich.* A family of fresh-water acanthopterygians, variously limited, including those with the upper element of the first gill-arch developed in a foliated manner and subservient to respiration, as in the climbing-fish. *An-a-bas, n. (t. g.)* [*Gr.* *anabas*]. — *an-a-ban-ti-dē, n.* — *an-a-ban-ti-dē, a. & n.*

**An-a-bap-tism, 1 ā-nā-bap-tizm;** 2 ā-nā-bap-tizm, *n.* 1. *Theol.* The doctrine or polity of the Anabaptists. 2. [a] Rebaptism. *An-a-bap-tist-ry, n.*

**An-a-bap-tist, 1 ā-nā-bap-tist;** 2 ā-nā-bap-tist, *n.* 1. *Ch. Hist.* One of a radical mystical sect, with various branches, that arose in Zurich in 1523 among the followers of Zwingli, who started the Reformation in Switzerland and advocated: (1) opposition to infant baptism as lacking Scriptural authority; (2) that only such persons as had been baptized after a confession of faith in Christ constituted a real church; (3) that church and state should be separate; (4) that there should be complete religious liberty. The persecution to which they were subjected led to a division, one branch adopting mysticism and the other fanaticism. Compare *BAPTIST*.  
There are two kinds of *Anabaptists*, the sober and the fanatical. . . . The fanatical *Anabaptists* were universally taken as typical and to the day when *Anabaptism* is mentioned it is supposed to be the equivalent of absurdity and intolerance of Scripture.

*New Schaff-Herzog Encyc.* i, pp. 161, 163.  
2. [a] One of those who deny the validity of infant baptism and insist upon baptism by immersion; a term applied opprobriously. — *an-a-bap-tist-ic, a.* — *an-a-bap-tist-ic-al, a.* — *an-a-bap-tist-ic-al-ly, adv.*

tools (*Phon.*), signs or symbols representing the elemental parts of sounds, the sound itself being graphically expressed by grouping the symbols.

an'a-ly's-a-ble, an'a-lyse, etc. See ANALYZABLE, etc.  
 an'a-ly's-sis, 1 a-nal'y-sis; 2 a-nal'y-sis, n. [-SES, 1-siz; 2-sis, pl.] 1. The resolution of a compound into its parts or elements; the act of ascertaining, separating, or unfolding in order the elements of a complex body, substance, or treatise: opposed to *synthesis*.  
 The analysis of style, for the purpose of systematic study, must respect the various classes of properties which by necessity or possibility belong to it. *Dart Art of Discourse* p. 209. [s. 1867.]  
 2. *Psychol.* That activity of intellect which, by discriminating differences and likenesses, and concentrating attention upon the latter, results in separating, more or less completely, a complex percept, or idea, into its elements.

Consciousness of resemblance . . . is itself, indeed, the very precondition and the constant accompaniment of all analysis.  
 G. T. Ladd *Psychol., Descriptive and Explanatory* p. 293. [s. 1894.]  
 3. A tabular or grouped statement of the elements, parts, or heads, reached by analytic resolution, as of a subject, treatise, collection of objects, etc.: a logical synopsis. 4. *Gram.* The resolution of the sentence into parts, and the bringing out of their definite relations to each other and to the whole sentence. 5. *Chem.* The determination of the elements of a compound, the proportions of the constituents, the proportion of a special ingredient, or the presence of impurities or adulterations.

Chemical analysis is either (1) qualitative, embracing (a) the wet method and (b) the dry method called blow-piping; or (2) quantitative, embracing (a) gravimetric, which includes the wet method and the dry method called assaying; and (b) volumetric, which treats either solutions or gases (eudiometry). See phrases, also the adjectives, and verbs.  
 6. *Math.* (1) The process of resolving a problem into its first elements. (2) That branch of mathematics which investigates the relations of variable or indeterminate quantities by means of symbols, including some branches of algebra and the infinitesimal calculus. 7. *Biol.* The identification of an organism by means of an analytic key: said especially of flowers. 8. *Logic.* (1) In strict sense, the resolution of a concept or class into its elements; logical division; logical partition. Physical analysis is the resolution of any physical object or substance into its parts, as a tree into trunk, branches, roots, leaves. Logical a. is the separation in thought of complex elements, as of a class or concept. It embraces division, or the separation of a genus or class into its species, and partition, or the resolution of a concept into its component attributes. See SYNTHESIS.

(2) In science and philosophy, the regressive method of investigation, said to have been invented by Plato, in which a subject or sphere of knowledge is resolved into its parts, elements, or facts, in order to arrive at the essential or ultimate elements, causes, or principle; as, the Kantian analysis.  
 The propaedeutic or [individual] method of investigation proceeds regressively or analytically to the knowledge of real principles; the purely scientific or constructive method proceeds progressively or synthetically from principles to particulars or individuals. UEBERWEG *System of Logic* tr. by T. M. Lindsay, p. 542. [l. g. & c. 1871.]

This is the fundamental procedure of philosophy, and is called by a Greek term *Analysis*.  
 HAMILTON *Metaphysics* lect. vi, p. 69. [c. & l. 1859.]  
 (3) Loosely, the inductive method; induction.  
 When we reason from the facts to the law, we call it analysis or induction. DONALDSON *New Cratylus* p. 11. [l. c. & c. 1868.]  
 [Ll. < Gr. *analysis*, < *ana*, back, & *lyō*, loose.]  
 an'a-lyst. *Syn.* See ABRIDGMENT; ANATOMY.—analysis stus (*Math.*), the study of geometric configuration irrespective of its form or size, as in Euler's theorem.—blowpipe a., the process of analyzing substances by means of their blowpipe reactions.—capillary a., a chemical analysis principally employed to determine the several coloring-matters in a mixture, and founded upon the varying speeds with which different substances in solution permeate porous materials by capillary attraction.—combinatory a., the theory of permutations and combinations.—harmonic a. 1. *Math.* The calculus of harmonic functions. 2. *Mus.* The analysis of the harmonic structure of a composition.—spherical harmonic a. (*Math.*), the calculus of special harmonic functions having values on the surface of a sphere.—polariscope a., analysis by means of the polariscope.—proximate a., the determination of the compounds contained in a mixture, as distinguished from ultimate analysis, which is the determination of the elements contained in a compound.—qualitative a., the process in chemistry of finding how many what elements are present.—quantitative a., the process of finding the bulk or amount of each element present. elementary a.—spectrum a., analysis by means of a spectroscope. Compare SPECTRUM.—tree-a-nal'y-sis, n. *Forestry*. A series of measurements and observations upon a felled tree to determine its life history. Two classes are distinguished: a stump a. includes measurements of the diameter-growth at given periods upon the stump only, no matter what other measurements it may comprise; a section a. includes measurements of the diameter-growth at given periods upon more than one section. When, in a stump or section analysis, the measurement of the diameter-growth at given periods covers only a portion of the total diameter-growth, the analysis is a partial stump a. or a partial section a. stem a. t.

an'a-lyst, 1 an'a-lyst; 2 an'a-lyst, n. One who analyzes or makes use of the analytical method, especially in chemistry or mathematics. [*< F. analyte, < analyzer; see ANALYZE.*]

an'a-lyt'ic, 1 an'a-lyt'ic, -kal; 2 an'a-lyt'ic, -j-cal, an'a-lyt'ic-al, a. 1. Of or pertaining to analysis; proceeding by analysis, as in the separation of anything into parts or original principles; resolving into first principles: opposed to *synthetic*; as, an analytic experiment or investigation. 2. Specif., naming or relating to a language distinguished by analysis.  
 —analytical judgment, in the Kantian logic, a judgment in which the predicate adds nothing to what is essentially contained in the conception employed as the subject. Analytical judgments (affirmative) are therefore those in which the connection of the predicate with the subject is conceived through identity. KANT *Critique of Pure Reason* tr. by MAX MILLER vol. ii, p. 1. [Waco, 1881.]  
 —a language, a language that expresses the modification of word-meanings by particles, auxiliaries, etc., rather than by inflection.—a method (*Logic*), the method which proceeds from known particulars to general principles: opposed to *synthetic method*.—a psychology, see PSYCHOLOGY.—a reference, in library catalogs, the registry of a part of a book, referring to the heading under which the book is entered in the catalog. An analytical.

an'a-lyt'ic, 1 an'a-lyt'ic, -kal; 2 an'a-lyt'ic, -j-cal, an'a-lyt'ic-al, a. 1. an'a-lyt'ic, n. 1. *Logic.* That division of logic which treats of the criteria for distinguishing good arguments from bad. 2. [Rare.] Mathematical analysis.  
 an'a-lyt'ic-al, 1 an'a-lyt'ic-al; 2 an'a-lyt'ic-al, n. In cataloging, an entry, not of a book as a whole, but of some section or division of that book; one of several entries analyzing a work into its parts. a reference.  
 an'a-lyt'ic-cal-ly, 1 an'a-lyt'ic-cal-ly; 2 an'a-lyt'ic-cal-ly, adv. In the manner of analysis; by way of separating a body into its constituent parts or a subject into its principles.  
 an'a-lyt'ics, 1 an'a-lyt'ic; 2 an'a-lyt'ics, n. 1. The science of analysis; the special branch of logic that treats of analysis; in particular, Aristotle's logical investigations and treatises.  
 His [Aristotle's] prior *Analytics*, . . . in which he develops the general forms of reasoning.  
 HAMILTON *Logic* lect. xii, p. 154. [c. & l. 1859.]

2. *Math.* Analysis; usually, analytical geometry.  
 an'a-lyze, 1 an'a-lyze; 2 an'a-lyze, vt. [-LYZED; -LYZ-ing.] To subject to analysis of any kind; make an analysis of; examine minutely or critically; as, to analyze a chemical compound, a sentence, a plant, a logical concept, etc. See ANALYSIS.  
 To attempt to analyze the tone of a poem would be useless.  
 E. P. Whipple *Essays and Reviews* vol. i, p. 41. [c. & c. 1870.]

[< F. *analyser*, < *analyse*, analysis, < LL. *analysis*; see ANALYSIS].—an'a-lyz'ic or -lyz'ic-bl'ly, n.—an'a-lyz'ic or -lyz'ic-bl'ly, n. Capable of being analyzed.—an'a-lyz'ic or -lyz'ic-bl'ly, n.—an'a-lyz'ic or -lyz'ic-bl'ly, n. The act of analyzing; analysis.  
 an'a-lyz'er, 1 an'a-lyz'er; 2 an'a-lyz'er, n. 1. One who or that which analyzes; an analyst. 2. *Optics.* That part of a polariscope which distinguishes the polarized light. an'a-lyz'er, harmonic analyzer (*Math.*), a mechanical device for resolving any periodic curve into its harmonic elements.

an'am, 1 an'am; 2 an'am, n. [P. I.] An inferior timber-tree (*Buchanania florida*) of the family *Anacardiaceae*: a Visayan term.

an'am', 1 an'am'; 2 an'am', n. [P. I.] An inferior timber-tree (*Buchanania florida*) of the family *Anacardiaceae*: a Visayan term.

3. *Bot.* A distortion or anomalous growth of any plant-organ. [*< Gr. anamorphosis, < ana, anew, + morphē, form.*] an'a-mor'pho-sy.  
 an'a-mor'phote, a. Producing distortion or anamorphosis.  
 an'a-mor'phous, 1 an'a-mor'phous; 2 an'a-mor'phous, n. 1. Pertaining to or characterized by anamorphosis; distorted. 2. Pertaining to anamorphism. an'a-mor'phic.  
 an'a-mo'sa, 1 an'a-mo'sa; 2 an'a-mo'sa, n. A city; county-seat of Jones county, Ia.  
 A'n'an, 1 A'n'an; 2 A'n'an, n. *Bib.* Neh. x. 26.  
 a-nan', 1 a-nan'; 2 a-nan', n. 1. *Interj.* (Prov. Eng. or Local U.S.) Eh? what? a response to a remark not heard or understood. *Int.* *adv.* Anon.  
 a-na-na'plas, 1 a-na-na'plas; 2 a-na-na'plas, n. [P. I.] A tall Old World tropical tree (*Albizia procera*) with bipinnate leaves and long terminal panicles of globular few-flowered heads of greenish-white flowers. Its wood, inferior as timber, serves for fuel and yields incense and a dye used in preparing hides for sole-leather, saddles, etc.: sometimes cultivated for ornament. an'a-na'ples.  
 a-na'nas, 1 a-na'nas or a-nā'nas; 2 a-na'nas or a-nā'nas, n. 1. [S. Am.] The pineapple or an allied fruit, as the pinguin (*Bromelia pinguin*). a-na'na'i.

Farewell, old Scotia's bleak domains,  
 Fairer than the torrid plains  
 Where rich ananas blow! Burns *Farewell* st. 1.

2. [A.] *Bot.* A genus of tropical American plants of the pineapple family (*Bromeliaceae*), including the pineapple (*A. sativa*). an'a-na'sa'. [Brazil, < Peru, *nanas*.]

an'an-chy't-dē, 1 an'an-chy't-dē; 2 an'an-chy't-dē, n. pl. *Echin.* A family of spatangoidae with an ovate or nearly cordate test, and ambulacra, in a bivium and trivium similar or slightly diverse, flush and apertures. an'an-chy'tes, n. (t. g.)—an'an-chy'tid, n.—an'an-chy'toid, a.

an-an'dri-ous, 1 an-an'dri-ous; 2 an-an'dri-ous, n. 1. Unmarried: said of women. 2. Not virile; impotent: said of men. 3. *Bot.* Androus. [*< Gr. andros, < an-priv. + anēr (andr-), man.*]

an-an'drous, 1 an-an'drous; 2 an-an'drous, a. 1. *Bot.* (1) Destitute of stamens, as a female flower. (2) Cryptogamous. 2. Androus. [*< Gr. andros, without a man.*]

an-a-nep'i-on'ic, 1 an-a-nep'i-on'ic; 2 an-a-nep'i-on'ic, a. Approaching the neplonic stage.

an-an'gi-oid, 1 an-an'gi-oid; 2 an-an'gi-oid, a. Without blood-vessels: said of the disk of the retina. an-an'gi-ot'ic, a.

an-an'gi-oid, 1 an-an'gi-oid; 2 an-an'gi-oid, n. pl. *Zool.* A group of mammals comprising those with anagoid eyes. an-an'gi-ol-ar, 1 an-an'gi-ol-ar; 2 an-an'gi-ol-ar, a. [Rare.] Not angular; having no angle. [*< AN-, not, + ANGULAR.*]

A-na'ni, 1 a-na'ni; 2 a-na'ni, n. *Bib.* 1 Chron. iii. 24.  
 A-na'ni-a, 1 a-na'ni-a; 2 a-na'ni-a, n. *Bib.* (Douai).  
 A-na'ni-a, 1 a-na'ni-a; 2 a-na'ni-a, n. *Bib.* Neh. xi. 32.  
 A-na'ni-as, 1 a-na'ni-as; 2 a-na'ni-as, n. 1. *Bib.* The husband of Sapphira, who, on being rebuked by Peter for lying, fell dead. *Acts* i. 5. 2. [Collig.] Any liar. 3. A disciple in Damascus who was sent by a vision to restore Paul's sight. *Acts* ix. 10-18. 4. The high priest in Jerusalem before whom Paul was brought for trial. *Acts* xxi. 2-5.

5. In Ben Jonson's comedy *The Alchemist*, a canting deacon sent from Amsterdam by his pastor and others to learn the whereabouts of their money. [*Heb.* grace of the Lord.]

A-na'ni-el, 1 a-na'ni-el; 2 a-na'ni-el, n. A town in Kherson. Ukraine.

A-nan'i-el, 1 a-nan'i-el; 2 a-nan'i-el, n. *Bib.* (Douai).  
 A-nan-ism, 1 a-nan-ism; 2 a-nan-ism, n. The tenets of an ascetic Hebrew sect founded by Anan: a form of Karalism which completely disappeared during the 10th century. See KARISM.—A-nan-ite, n. A follower of Anan.

A-na'ni-zap'ta, 1 a-na'ni-zap'ta; 2 a-na'ni-zap'ta, n. A word anciently engraved on stone, gems, etc., perhaps as a magical preventive of disease. a-na'ni-sab'or-zap'ta.  
 A-na'ni-ta, 1 a-na'ni-ta; 2 a-na'ni-ta, n. [Sansk.] *Hind. Myth.* The infinite: applied to the god Vishnu and to other deities.

The Holy One spoke:—and I am Anania among the Nazarenes. *Bhagavad Gita* tr. by J. C. Thomson, s. 29. [1874.]

An'an-ta-pur, 1 an'an-ta-pur; 2 an'an-ta-pur, n. A district in Madras, India.

an-an'ther-ous, 1 an-an'ther-ous; 2 an-an'ther-ous, a. *Bot.* Without anthers. [*< AN-, not, + ANTHER.*] an-an'ther-ate.

an-an'ther-um, 1 an-an'ther-um; 2 an-an'ther-um, n. *Bot.* A filament without an anther; a stamulodium.  
 an-an'thus, 1 an-an'thus; 2 an-an'thus, a. *Bot.* Flowerless. [*< Gr. ananthos, < an-priv. + anthos, flower.*]

an'a-nym, 1 an'a-nym; 2 an'a-nym, n. A real name written backward, as John *Dralloe* (*Collard*). See ROUSTROPHEON. [*< ANA- + Gr. onoma, name.*]

A-na'o, 1 a-na'o; 2 a-na'o, n. A town in Tarlac province, Luzon, P. I.

A-na'pa, 1 a-na'pa; 2 a-na'pa, n. A seaport of Kuban district, Russia, on the Black Sea.

an'a-pa'can-ize, vt. [Rare.] To repaganize.  
 a-na'pa-ite, 1 a-na'pa-ite or a-nap'ait; 2 a-na'pa-ite or a-nap'ait, n. *Mineral.* A greenish-white phosphate of calcium and iron containing water of crystallization and consisting of transparent crystals of the triclinic system. See CRYSTALLIZATION. [*< Anapa, in Russia.*]

an'a-pe'l-rat'ic, 1 an'a-pe'l-rat'ic; 2 an'a-pe'l-rat'ic, a. *Pathol.* Caused by the too frequent or prolonged exercise of the same muscles in the same way: said of writers' cramp, etc. [*< Gr. anapeirasthai, try again, < ana, again, + peirāō, try.*]

an'a-pe'st, 1 an'a-pe'st; 2 an'a-pe'st, n. *Pros.* 1. A three-syllable measure containing two short or unstressed syllables followed by one long or stressed syllable (— — —); the reverse of a dactyl. 2. A verse made up of or characterized by such measures; as,  
 The Assyrian came down like the wolf in the fold,  
 And his cohorts were gleam in his püls and gold.  
 Byron *Destruction of Sennacherib* st. 1.

3. A musical foot accented in like manner. [*< L. anapestus, < Gr. anapaistos, < ana, back, + paio, strike.*]

an'a-pe's'tic, 1 an'a-pe's'tic; 2 an'a-pe's'tic, a. Of an anapestic; pertaining to, or of the nature of an anapest; composed of anapests. -ti-cal, -ti-cal-ly, adv.

an'a-pe's'tic, n. An anapest; also, versification in anapestic measure.  
 an'a-phal'an-ti-a-sis, 1 an'a-phal'an-ti-a-sis; 2 an'a-phal'an-ti-a-sis, n. Baldness, especially of the front part of the head; loss of the eyebrows. [*< Gr. anaphalantasis, < ana, up, + phalanx, bald.*]

an'a-phase, 1 an'a-phase; 2 an'a-phase, n. *Biol.* The amphiphasic phase of karyokinesis in which chromatin accumulates at each extremity of the nuclear spindle. See KARYOKINESIS. [*< ANA- + PHASE.*]

an'a-phal-a, 1 an'a-phal-a; 2 an'a-phal-a, n. [Rare.] *Med.* Visual, auditory, gustatory, olfactory, thermal, or tactile anesthesia. [*< AN-, not, + Gr. aphē, touch.*]

**anaph'o-ra**, 1 a-naf'o-ra; 2 a-naf'o-ra, n. 1. *Rhet.* A figure consisting in the repetition of a word or phrase in the beginning of several successive verses, clauses, or sentences, as the voice of the Lord in Psalm xxxix. 2. *Astron.* The ascension of a star by a path oblique to the horizon. 3. *Eastern Ch.* The more solemn part of the eucharistic service, including the consecration, oblation, and communion. [*L.*, < *anaphora*, < *ana*, back, + *phērō*, bear.] — **a-naph'o-ra**, a.

**an'a-pho'r-i-a**, 1 an'a-pho'r-i-a; 2 an'a-pho'r-i-a, n. A tendency of both the visual axes to turn upward.

**an'a-pho'r-i-cal**, 1 an'a-pho'r-i-cal; 2 an'a-pho'r-i-cal, a. *Gram.* Relative, as a pronoun.

**an-aph'ro-dis'i-a**, 1 an-aph'ro-dis'i-a; 2 an-aph'ro-dis'i-a, n. *Pathol.* Absence or impairment of sexual desire; also, impotence. [*L.* < *Gr. anaphrodisia*, < *an* - priv. + *Aphrodisia*, Venus.] — **an-aph'ro-dis'i-a-c**, a. Of, pertaining to, or tending to produce anaphrodisia. — **an-aph'ro-dis'i-a-c**, n. An anaphrodisiac agent or treatment. — **an-aph'ro-dis'i-tous**, a. Affected with anaphrodisia.

**an-aph'ro-dis'i-c**, 1 an-aph'ro-dis'i-c; 2 an-aph'ro-dis'i-c, a. Produced without union of the sexes; agamogenetic.

**an'a-ph'i-lax**, n. See *PHRYNAXIS*.

**an'a-phyl-em'bry-on'i-c**, a. *Zool.* Approaching the phylogenetic stage.

**an'a-pla-na'tic**, a. Same as *APLANATIC*.

**an'a-pla's-i-a**, 1 an'a-pla's-i-a; 2 an'a-pla's-i-a, n. *Pathol.* 1. The totality of structural and other changes in a cell when becoming malignant. 2. Same as *ANAPLASIS*.

**an'a-pla's-i-s**, 1 an'a-pla's-i-s; 2 an'a-pla's-i-s, n. In oncology, the stage of progressive development.

Sociologically it belongs to the 19th century, and Pierre Joseph Proudhon is regarded as the father of the system; according to him anarchy is order, and man is naturally good. Anarchism, at least as excluding authority from society, and setting up extreme individualism, but generally speaking, it repudiates violent methods, and hopes for a gradual evolution toward its goal. The party of anarchy as a violent group dates from The Hague Congress of 1872, after which the Russian revolutionist, M. Bakunin, organized the terrorist section. It was in the 6th congress of the

Social party at Geneva in 1893 that the term *anarchist* was first applied to the militant section of that body.

2. Anarchy. — *Anarchism* is the philosophy of a new social order based on liberty unrestricted by man-made law, the theory that all forms of government are based on violence.

An'glo-Sax'on, n. 1. Eng. Hist. A member of the Anglo-Saxon race. (1) One of the Teutonic population of Britain. See *ANGLO; SAXON; JUTE*. (2) pl. An official native name of the subjects of Alfred, after he subdued the Angles; in Latin, *Angli et Saxones* (9th cent.); revived in the 17th century to distinguish the Saxons of England from the Old Saxons of the Continent (Camden, 1610). See *ANGLO-NORMAN*. (3) The entire English race wherever found, as in Europe, the United States, India, Australasia, etc., ancient as well as modern. 2. The Anglo-Saxon language. (1) The language of the Anglo-Saxons, at first called *Englisc* (Beda, 890), English; afterward, when Old English was mixed with Norman, called *Saxon* (see Robert of Gloucester, 1298); and finally *Anglo-Saxon*, in distinction from Old Saxon (Bailey, 1783). *Anglo-Saxon*, in this sense, includes the ancient dialects and the words and forms derived from them in Modern English. The dialect earliest cultivated was the Anglian. The surviving literature is almost all in West-Saxon. Modern English is from Mercian. (2) The dialect of the early Saxons in Wessex, Essex, Sussex, Middlesex, in distinction from Northumbrian, Mercian, and Kentish; a late and rare grammatical use. Anglo-Saxon is a Low-German, West-Germanic, Indo-European language. Several eminent English scholars, Palgrave, Freeman, Sweet, Cook, object to the word *Anglo-Saxon*, preferring "Old English," "Oldest English," etc. See *ENGLISH*.

There is no linguistic test by which the identity of *Anglo-Saxon* and modern English can be established. G. P. Marsh *Origin and Hist. Eng. Lang. lect. ii, p. 56. [s. 1871.]*

*an'i-mal*, *n.* 1. A sentient living organism broadly distinguished from a plant by incapacity to convert inorganic into organic matter; a sentient living being. Animals may usually be distinguished by taking food into a digestive cavity and by the power of voluntary motion, but it is impossible to establish absolute demarcation between plants and animals, the lowest forms of both lacking more and more of their respective characteristics and being distinguishable chiefly by their relations to other organisms. See ANIMAL KINGDOM; MAMMALIA; ZOOLOGY.

The most essential thing of all, that which makes every animal *an* is that it has come mode or other of reproduction, of motion, and of respiration.

LOTZE *System Philos.* tr. by Bosanquet, p. 31. [*cf.* r. 1887.]

2. In a restricted sense, a sentient creature inferior to man; a brute: often limited to mammals.

He [Plutarch] was probably the first writer who advocated very strongly humanity to *animals*, on the broad ground of universal benevolence. LECOCK *Hist. Eur. Morals* vol. i, p. 258. [*A.* 1836.]

3. A human being in whom the animal nature is predominant. 4. *pl.* [Colloq.] Domestic quadrupeds, especially horses and oxen used in harness or under saddle. 5. [Slang, U. S.] A newly arrived cadet at the Military Academy at West Point. [*L.* < *anima*, breath.]

*Syn.* beast, brute, creature. An *animal* is a sentient being, distinct from inanimate matter and from vegetable life on the one side and from mental and spiritual existence on the other. Thus man is properly classified as an *animal*. But because the animal life is the lowest and rudest part of being, we have which he shares with *inferior creatures*, to call any individual man an *animal* is to imply that the animal nature has undue supremacy, and so is deep condemnation or utter insult. The *brute* is the animal viewed as dull to all finer feeling; the *beast*, which, according to the Greek derivation of the word, is the feeding creature, is looked upon as a being of appetites. To call a man a *brute* is to imply that he is unfeeling and cruel; to call him a *beast* is to indicate that he is vilely sensual. We speak of the cruel father as a *brute* to his children; of the drunkard as making a *beast* of himself. So firmly are these figurative senses established that we now incline to avoid applying *brute* or *beast* to any creature, as a horse or dog, for which we have another affection; we prefer in such cases the word *animal*. *Creature* is a word of wide significance, including all the living things that God has created—plants, animals, angels, or men. The *animals* of a region are collectively called its *fauna*.—*Ant.*: angel, man, mind, soul, spirit, vegetable.—*an'i-mal'ful'ow'er*, *n.* A sea-anemone or other radiate resembling or likened to a flower.—*a.-worship*, *n.* Same as ZOOLOGY.—*an'i-mal'i'cul'ture*, *n.* [Rare.] The breeding and care of animals.

**an-te-ce-dence**, 1 an-ti-si'dens; 2 ä'n-te-ç'è'd'ènc, n. 1. The act of going before; the state of being before; antecedence.

The antecedence of a colder climate is proved by the arctic character of a large proportion of the shells.

LYELL Principles Geol. vol. i, p. 195. [a. 1872.]

2. The apparent retrograde motion of a planet. SYN: see PRECEDENCE.

**an-te-ce-den-cy**, 1 an-ti-si'den-si; 2 ä'n-te-ç'è'd'ènc-y, n. The state or quality of being antecedent; precedence; priority.

**an-te-ce-dent**, 1 an-ti-si'dent; 2 ä'n-te-ç'è'd'ènt, a. 1. Being, occurring, or going before; prior in time, place, or order; anterior: contrasted with consequent or subsequent.

Every movement forward in language must be determined by an antecedent movement, and thought.

HAMILTON Logic lect. viii, p. 99. [a. 1860.]

2. Depending on reasoning or analogy, before observation: presumptive; a priori; as, the antecedent probability of a miracle. 3. Geol. (1) Pertaining to or characterizing the internal movements of the earth concerned in the elevation of continental masses and their exposure to degradation: contrasted with consequent. (2) Established before the displacement of a terrace by faulting or folding; as, an antecedent valley; antecedent drainage: contrasted with consequent and superimposed (epigenetic). [*F. Antecedent*, < *L. antecedent* (-t-s), pp. of *antecedo*; see ANTECEDE.]—**an-te-ce-den-t-ly**, adv.

SYN: anterior, earlier, foregoing, former, introductory, precedent, preceding, preliminary, previous, prior. *Antecedent* may denote simply priority in time, implying no direct connection between that which goes before and that which follows; as, the striking of one clock may be always antecedent to the striking of another with no causal connection between them. When the words are used simply of time, *antecedent* refers to that which goes or happens at any distance in advance, preceding to that which is immediately or next before. *Foregoing* is used only of that which is spoken or written; as, the foregoing statements. See ANTERIOR.—*Ant-*: consequent, following, later, posterior, subsequent, succeeding.—*Prep-*: to.

**an-te-ce-den-t**, n. 1. One who or that which precedes or goes before, as in time, place, rank, order, or causality.

Man is no longer an isolated spirit without antecedent or relation here below. R. L. STEVENSON Familiar Studies p. 50. [s. 1887.]

2. *Gram.* The noun or phrase to which a pronoun, especially a relative, refers: generally preceding the pronoun.

The antecedent is the noun or substantive expression for which a pronoun stands. GREEN Eng. Gram. p. 70. [c. 1871.]

3. *Logic.* (1) A conditional proposition in hypothetical reasoning in which a cause or reason is assumed and upon which another proposition depends as effect or consequent; as, "if it rains, the ground will be wet." (2) The minor premise in a syllogism of the first figure in which the major premise is stated. (3) An event that precedes another event called (with respect to the former) the consequent; so used by nominalists. 4. *Math.* The first term of a ratio, corresponding to the numerator of the fraction expressed by the ratio; in the proportion, the terms indicated by odd numbers as the first, third, fifth, etc.; as, in 4 : 2 :: 6 : 3, 4 and 6 are antecedents. 5. *Mus.* A passage followed by an answer or consequent. 6. *pl.* The facts, circumstances, etc., collectively, that have gone before in the history of any person or thing, as a man's ancestry, habits, training, etc.

*Antecedents*, for which, also, we are indebted to France, is not yet a generation old. It well deserved the popularity which it speedily attained. F. HALL Modern English p. 302. [s. 1873.]

ISAAC TAYLOR *Fanaticism* viii, d. 304. [a. s. & c. 1843.]

3. *Pathol.* A morbid condition of restlessness and mental agitation with a distressful feeling of tightness and oppression in the region of the heart. [*< F. anxiété*, <

*L. anxieta* (t-s), < *anxi*; see ANXIOUS.] **anx-i'e-tude**; **anxious-ness**.

**Syn.** anguish, apprehension, care, concern, disquiet, disturbance, dread, fear, foreboding, fretfulness, fretting, mis-giving, perplexity, solicitude, trouble, worry. *Anxiety* is, according to its derivation, a choking disquiet, akin to *anguish*; *anxiety* is mental; *anguish* may be mental or physical; *anguish* is in regard to the known, *anxiety* in regard to the unknown; *anguish* is because of what has happened, *anxiety* because of what may happen. *Anxiety* refers to some future event, always suggesting hopeful possibility, and thus differing from *apprehension*, *fear*, *dread*, *foreboding*, *terror*, all of which may be quite despairing. In matters within our reach, *anxiety* always stirs the question whether something can not be done, and is thus a valuable spur to doing; in this respect it is allied to *care*. *Foreboding*, *dread*, etc., commonly incapacitate for all helpful thought or endeavor. *Worry* is a more petty, restless, and manifest *anxiety*; *anxiety* may be quiet and silent; *worry* is communicated to all around. *Solicitude* is a milder *anxiety*. *Fretting* or *fretfulness* is a weak complaining without thought of accomplishing or changing anything, but merely as a relief to one's own disquiet. *Perplexity* often involves *anxiety*, but may be quite free from it. A student may be perplexed regarding a translation, yet, if he has time enough, not at all anxious regarding it. *An-* apathy, assurance, calmness, carelessness, confidence, ease, light-heartedness, nonchalance, satisfaction, tranquillity. -*Prep.* anxiety for a friend's return; anxiety about, in regard to, or concerning the future. -*precordial anxiety* (*Pathol.*), same as ANXIETY. 3.

**anx'ious**, 1 ān-k'shūs; 2 ān-k'shūs, a. 1. Affected with anxiety; troubled, disquieted, or distressed in mind respecting some uncertain matter; subject to painful or disturbing suspense; as, *anxious* about a friend's safety.

The last thing we need be anxious about is property.

LOVELL *Democracy and Other Addresses* p. 9. [a. u. & c. 1887.]

None are so anxious as those who watch and wait.

DICKENS *Old Curiosity Shop* vol. i, p. 105. [a. n. & c. 1871.]

2. Frightened by or caused by solicitude or anxiety; worrying; distressing; as, *anxious* forebodings. 3. Having the desire intently fixed; earnestly desirous; intent; eager; as, *anxious* to start on a journey; *anxious* to avoid mistakes.

The bravest men are . . . the most anxious to avoid quarrels.

MATTHEWS *Getting On in the World* p. 154. [a. s. c. g. 1874.]

[*< L. anxius*, < *ango*, distress.]

**an'y-how**, 1 en'y-hau; 2 ēn'y-how, adv. 1. In any way whatever; by any means; however that may be; notwithstanding; in any case: used sometimes conjunctively; as, *anyhow*, I mean to go. 2. In a careless or indifferent manner; as, he rambled through his task *anyhow*.

**an'y-one**, n. Any one; erroneous form.

**an'y-thing**, 1 en'i-thing; 2 ēn'y-thing, pron. 1. A thing or matter of any sort or importance whatever; something or other: an indefinite demonstrative; as, I will do *anything*; he did not bring *anything*; originally written as two words, but when now so written laying stress upon *thing* as opposed to *person*; as, could *any thing* be as insane as the drunkard?

There was never *anything* that did not proceed from a thought.

EMERSON *lect. and Biog. Sketches* p. 258. [a. u. & c. 1889.]

2. A thing of any kind: a substantive use; as, he has no money, *no anything*; -*anything but*, by no means; far from; as, *anything but safe*. -*a. like*, nearly approaching; as, it will not bring *anything like* a fair price. -*as a. like* a. (Colloq.), exceedingly. -*if a.*, if at all: if there is any difference; as, *if anything*, a Judas is worse than a Nero. -*an'y-thing-a-ri-an*, n. One having no positive belief; one who is anything in creed; an indifferentist. -*ism*, n.

**an'y-thing, adv.** [Archaic.] To any degree; in any way.

**an'y-way**, 1 en'i-wē; 2 ēn'y-wā, adv. 1. No matter what happens; in any event; whether wanted or not; as, I'll do it *anyway*. 2. At all events; anyhow; nevertheless: used conjunctively; as, *anyway*, he had to pay it. **an'y-ways**; [Erroneous].

**an'y-when**, 1 en'i-hwen; 2 ēn'y-hwen, adv. [Rare.] At any time whatever.

**an'y-where**, 1 en'i-hwā; 2 ēn'y-hwā, adv. In or at any place whatever. **an'y-where** [Erroneous].

**2**. The mental state resulting from an apathetic condition; intellectual indifference or lack of interest in that which normally affects or concerns.

"What is called by the Stoics *apathy*, or dispassion; by the Sceptics, indurableness; by the Molinists, quietism; by common men, peace of conscience; seem all to mean but what tranquility of mind."

K.-F. Vocab. *Philos.*, n. 1. 1871.

**3. Occult.** A high state of emancipation from all forms of feeling; a spiritual indifference or zero-point of emotion. [ $\leq$  L. *apathia*,  $\leq$  Gr. *apathia*,  $\leq$  a-priv. + *pathos*, suffering,  $\leq$  *pasché*, suffer.]

**Syn**: calmness, composure, immobility, impassibility, indifference, insensibility, lethargy, phlegm, sluggishness, stoicism, unconcern, unfeelingness. *Apathy*, according to its Greek derivation, is a simple absence of feeling or emotion. There are persons to whom a certain degree of *apathy* is natural, an innate *sluggishness* of the emotional nature. In the *apathy* of despair, a person gives up, without resistance, or sensibility, to what he has fiercely struggled to avoid. *Composure* is freedom from action, or disturbance, resulting ordinarily from force of will, or from perfect confidence in one's own resources. *Impassibility* is a philosophical term applied to the Deity, as infinitely exalted above all stir of passion or emotion. *Unfeelingness*, the Saxon word that should be the exact equivalent of *apathy*, really means more, a lack of the feeling one ought to have, a censurable hardness of heart. *Indifference* and *insensibility* originate in the absence of feeling toward certain objects, or things, or persons, entire absence of feeling.—*Indifference* is a want of interest; *insensibility* is a want of feeling; *unconcern* has reference to consequences. We speak of *insensibility* of heart, *immobility* of countenance. *Stoicism* is an intentional suppression of feeling and deadening of sensibilities, while *apathy* is involuntary. See CALMNESS; STUPIDITY; STUPOR.—**Ant**: anxiety, care, eagerness, emotion, feeling, sensibility, sensitiveness, susceptibility, sympathy.—**Prep**: *apathy* of disposition; *apathy toward* food.

II. i. To appertain. [*F. Appandre*, < LL. & L. *appendo*, < ad, to, + *pendo*, hang.]

*Syn.*: see ADD; ATTACH.  
**ap-pen'dage**, 1 a-pen'dij; 2 ap-pēn'dag, n. 1. Anything appended; a subordinate addition or adjunct; as, a mere *appendage*.

That little pensive *appendage* or tender (the moon) to our fuming engine of an earth. *DR. QUINCY NARRATIVE PAPERS, On War* in vol. ii, p. 222. [r. & r. 1856.]

2. (1) *Zool.* Any part joined to or diverging from the axial trunk or from any adjunct of it. (2) *Bot.* A subordinate or subsidiary part, as a limb, tail, leaf, hair, etc.

*Syn.*: accessory, addendum, addition, adjunct, appendix, appendage, auxiliary, extension, supplement. An *adjunct* (something joined to) constitutes no real part of the thing or system to which it is joined, though a valuable addition; an *appendage* is commonly a real, though not an essential or necessary part of that with which it is connected; an *appendage* belongs subordinately to something by which it is employed, especially as an instrument to accomplish some purpose. A horse's tail is at once an ornamental *appendage* and a useful *appendage*; we could not call it an *adjunct*, though we might use that word of his iron shoes.

An *attachment* in machinery is some mechanism that can be brought into optional connection with the principal movement; a *hemmer* is a valuable *attachment* of a sewing-machine. An *extension*, as of railroad or of a factory, carries out further something already existing. See ACCESSORY; APPENDIX; AUXILIARY. *Ant.*: main body, original, total, whole. — *Prep.*: that which is thought of as added we call an *appendage*; that which is looked upon as an integral part is called an *appendage* of.

— *appendages* of the uterus, see ADNEXTUM. — *caecal appendage*, *vermicular a.*, the vermiform appendix. — *vermiform a.*, see APPENDIX.

**ap-pen'di-cal**, 1 a-pen'di-kal; 2 ap-pēn'di-kal, a. 1. *Anat.* Pertaining to the appendix. Compare APPENDICULAR. *ap-pen'di'cal'is*. 2. Supplementary.

**ap-pen'di-ces**, 1 a-pen'di-siz; 2 ap-pēn'di-sēs, n. A plural of APPENDIX.

**ap-pen'di-cl'itis**, 1 a-pen'di-sai'tis or -si'tis; 2 ap-pēn'di-cl'itis or -si'tis, n. *Pathol.* Inflammation of the vermiform appendix of the caecum. — *ap-pen'di-cl'itis obliterans* (*Pathol.*), a chronic form of appendicitis, during which the lumen of the appendix disappears. — *catarrhal a.*, the simplest form of appendicitis, which may subside under medical treatment alone. — *chronic or persistent a.*, appendicitis in which all febrile symptoms disappear, but there is tenderness on pressure and a condition of low inflammation which sooner or later causes a relapse. — *fulminating a.*, appendicitis characterized by a sudden attack and a rapid and usually fatal course. — *gangrenous a.*, the most dangerous form of appendicitis, accompanied by continued high fever, vomiting, abdominal distention, coma, etc. — *perforative a.*, that form of appendicitis in which perforation occurs during the gangrenous stage. — *purulent a.*, appendicitis characterized by extensive suppuration and resulting in a circumscribed peritonitis. — *recurrent a.*, chronic appendicitis marked by intermittent acute attacks followed by periods of seeming normal health. — *relapsing a.*, chronic appendicitis in which there is continued ill health with frequent attacks of severe pain. — *ulcerative a.*, same as PURULENT APPENDICITIS.

**ap-pen'di-cle**, 1 a-pen'di-kl; 2 ap-pēn'di-cl, n. A small appendage; specif., in entomology, a minute sclerite on the tip of the labrum, as in certain solitary bees (*genus Halictus*). [*< L. appendicula*, dim. of *appendix*; see APPENDIX.] — *ap-pen'di-cu-la*, n. [*L.E.*, pl.] An appendice; especially, in botany, a fine branching hair-like process borne at the summit of the sporocarp in certain hymenometeorous fungi. — *ap-pen'di-cu-lar*, a. 1. Of, pertaining to, or being an appendage, appendiculate, or appendiculate; appendiculate; esp. in anatomy, of or pertaining to the limbs or appendages; as, the *appendicular* skeleton. 2. *Pathol.* Of or pertaining to the vermiform appendix. — *Ap-pen'di-cu-lar'i-a*, n. *Ascid.* 1. A genus typical of *Appendicularia*. 2. [*a*] [*L.E.*, pl.] A tunicate of this genus. — *ap-pen'di-cu-lar'i-an*, a. & n. — *Ap-pen'di-cu-lar'i-dā*, n. pl. *Ascid.* A family of free-swimming tunicates with a tail-like appendage proceeding from the ventral surface of the body. — *ap-pen'di-cu-lar'i-d*, n. — *ap-pen'di-cu-lar'i-d*, a. — *ap-pen'di-cu-lar'i-d*, n. pl. 1. *Conch.* A section of tetrabranchiate or dibranchiate bivalves with gills extended backward into accessory appendages. 2. *Zool.* A phylum comprising the arthropods, worms, and rotifers. — *ap-pen'di-cu-late*, a. 1. Having appendages, as a leaf; of the nature of or forming an appendage or appendiculate; appendicular. 2. *Zool.* Of or pertaining to the *Appendicularia*. *ap-pen'di-cu-lat'* ed.

**ap-pen'ding**, 1 a-pen'ding; 2 ap-pēn'ding, pa. Appending; attached.

**ap-pen'ding**, n. Something added.

**ap-pen'dix**, 1 a-pen'diks; 2 ap-pēn'diks, n. To add as an appendix.

**ap-pen'dix**, n. [*DIX-ES* or *DI-CES*, 1 -siz; 2 -sēs, pl.] 1. Supplementary statistical, illustrative, or other matter placed at the end of a book or the like, or issued in separate form.

*Syn.*: allot, appoint, appropriate, assign, deal, dispense, divide, distribute, grant, share. *To allot or assign* may be to make an arbitrary division; the same is true of distribute

of divide. That which is apportioned is given by some fixed rule, which is meant to be uniform and fair; as, representatives are apportioned among the States according to population. To dispense is to give out freely; as, the sun dispenses light and heat. A thing is appropriated to or for a specific purpose (to which it thus becomes proper, in the original sense of being its own); money appropriated by Congress for one purpose can not be expended for any other. One may apportion what he only holds in trust; he shares what is his own. See ALLOT.—Ant: elug to, collect, consolidate, divide arbitrarily, gather together, keep together, receive, retain.—Prep: apportion to each a fair amount; apportion the property among the heirs, between two claimants; apportion according to numbers, etc.

Ready in speech or repartee. [C. L. appositus, pp. of appono, place by, < ad, to, + pono, place.] Syn: see APP.—ap-pō-sit-e-ly, adv.—ap-pō-sit-e-ness, n.

That magic of language and appositeness for which he [Shakespeare] stands preeminent.

Inverso Sketch-Book, Rural Funerals p. 170. [c. v. r. 1861.]

ap-pō-si-tion, 1 a-pō-zish-on; 2 a-pō-zish-on, n. 1. Gram. The relation between two or more nouns or their equivalents in the same case and denoting the same person or thing, when all are in the subject or all in the predicate and where one is in attributive or complementary relation.

Any or all of the appositive forms may be nouns, pronouns, or substantive clauses, and the one following serves generally to explain or amplify that which precedes, as in the clauses, "I, John, the King"; "James, my son"; "Henry VIII., Defender of the Faith."

2. The act of placing side by side, together, or in contact; state, position, or fact of juxtaposition; addition. It [evil] hangs, a huge blot in the universe, until the orb of divine love rises behind it. In that apposition we detect its meaning. E. H. CHAPIN Living Words p. 90. [L. v. 1860.]

3. Surg. (1) Growth of tissue or increase of parts by juxtaposition. (2) The act of bringing divided parts into their normal relations, or the state of being so restored. 4. [A.] The "Speech day" at St. Paul's school, Hammersmith, London. [C. LL. appositio(n), < L. appono; see APPOSITE.]—growth by apposition (Bot.), growth in thickness of cell-walls and increase in bulk of starch-grains, thought to be brought about by deposition of new particles or laminae upon the inner face of the cell-walls and upon the exterior of the starch-grains.—ap-pō-si-tion-al, a. 1. Gram. Of or pertaining to apposition; as, an appositional construction. 2. Bot. Lying together and partially united, as the branches of a tree.—ly, adv.

ap-pō-si-tive, 1 a-pō-zit-iv; 2 a-pō-zit-iv, n. 1. a. 1. ap-pō-si-tiv, Gram. Pertaining to or construed in apposition. 2. Apposite. II. n. A word or clause in apposition. [C. L. appositus; see APPOSITE.]—ly, adv.

ap-prais'al, 1 a-prēz'al; 2 a-prāz'al, n. The act of appraising; valuation; especially official valuation, as of an estate, etc.

ap-prais-e, 1 a-prēz; 2 a-prāz, vt. [AP-PRASED; AP-PRASE-ING.] 1. To estimate the money value of; set a price or value on, especially by authority of law or agreement of interested parties; as, to appraise a stock of goods. 2. To estimate the amount, quality, or worth of; judge. 3. [Rare.] To speak well of; praise. [C. OF. appretier; < LL. appretio, < L. ad, to, + pretium, price.]—ap-prais-a-ble, a.

ap-praise-ment, 1 a-prēz-ment or -ment; 2 a-prāz-ment, n. 1. The act of valuing, especially by an authorized or official appraiser; appraisal. 2. The estimated worth of property appraised.

Official appraisements in legal proceedings are regulated generally by statute. New Int. Encyc. p. 675. [D. M. & C. 105.]

ap-prais'er, 1 a-prēz-er; 2 a-prāz-er, n. 1. One who estimates or appraises; especially, one legally designated to estimate the value of property; as, town appraisers. 2. Insur. A person selected to ascertain the amount of a loss by fire. Where the question is in dispute, the insurance company selects one, the insured a second, and these two choose a third person as umpire.—Board of United States General Appraisers, a board of appraisers appointed by the government with full power to hear and determine all cases and questions that may be assigned to it in the operation of the Tariff Act. Nine general appraisers in all are appointed, three of whom are on duty daily at the port of New York.

The boards of general appraisers and the members thereof shall have and possess all the powers of a circuit court of the United States in preserving order, compelling the attendance of witnesses, and the production of evidence, and in punishing for contempt. U. S. Tariff Act of Aug. 5, '09, p. 99.

ap-pre-ci-a-ble, 1 a-prī-shi-a-ble; 2 a-prē-shi-a-ble, a. ap-pre-ci-a-ble, Capable of being appreciated, estimated, or discerned by the senses or intellect; perceptible; as, an appreciable addition.

When the collector of dead facts . . . fails to make clear any appreciable effects which these facts can produce on human welfare, he is obliged to admit that they are comparatively valueless. STRECHER Education ch. I, p. 30. [L. 1889.]

A fact which subtends an appreciable angle in the horizon of thought. HOLMES Professor p. 21. [L. 1864.]

ap-pre-ci-a-bly, 1 a-prī-shi-a-bly; 2 a-prē-shi-a-bly, adv. By an appreciable amount; in or to an appreciable degree. [Appreciative.]

highly; see the full import of; as, to appreciate a gift or one's opportunities.

To appreciate a man's work at the full . . . it is well to know the man himself, his circumstances, and the incidents of his career. PLUTARCH Lives ed. by B. J. Enell, p. 9. [w. a. 1886.]

2. To be keenly sensible of or sensitive to; have the power of sharply discriminating in reference to; adequately perceive or distinguish; as, to appreciate differences of color, of musical pitch, etc. 3. To cause to become greater in price or value; enhance the degree or force of; as, the resumption of specie payment appreciates the currency; opposed to depreciate. 4. To estimate the worth of; rate; as, the ancients appreciated all knowledge by a high standard.

II. t. To increase in value; rise in price; as, real estate appreciates as the city grows. [C. LL. appreciatus, pp. of appretio, < L. ad, to, + pretium, price.] ap-pre-ci-a-te, n.

Syn: esteem, estimate, prize, value. A jeweler estimates a diamond as worth so much cash; the owner may value it beyond all price, as a family heirloom, or he may prize it as the gift of an esteemed friend, without at all appreciating its commercial value. See ADMIRE.—Ant: depreciate, despise, misjudge, scorn, undervalue.

ap-pre-ci-a-t'ing-ly, 1 a-prī-shi-ēt'ing-ly; 2 a-prē-shi-ēt'ing-ly, adv. With appreciation.

ap-pre-ci-a-tiv, Having or manifesting appreciation; as, an appreciative critic. ap-pre-ci-a-to-ry, ap-pre-ci-a-tiv(-ly), ap-pre-ci-a-to-ri-ly, adv.—ap-pre-ci-a-tiv(-ness), n.

ap-pre-ci-a-tor, 1 a-prī-shi-ē-tor or -tor; 2 a-prē-shi-ē-tor, n. 1. One who appreciates. 2. An apparatus by means of which the proportion of gluten in flour is determined.

ap-pre-d'i-cate, 1 a-prēd'it; 2 a-prēd'it, n. Logic. The copula considered as separate from the remainder of the predicate. HAMILTON Logic p. 161. [G. & L. 1865.] [C. AD + PREDICATE, n.]

ap-pre-hend, 1 a-prī-n-hend; 2 a-prē-n-hend, r. I. t. 1. To lay hold of with the mind; grasp with the understanding and bring toward one so as to assimilate; cognize; as, to apprehend the situation.

The words nature and supernatural . . . have a meaning fixed and well apprehended in the popular judgment.

E. H. SEARS Fourth Gospel prelim. p. 7. [N. Y. 1872.]

2. To have a mental impression of; know partially; hold opinions concerning; imagine; as, to apprehend an abstruse subject; opposed to comprehend. 3. To look forward to; anticipate with distrust or suspicion; as, to apprehend disaster; to apprehend a hard winter.

As there is nothing which persons lay hold of more readily than that aspect of a subject in which it presents matter for fear, 'to apprehend' has acquired the sense of to regard with fear. TRENCH Select Glossary p. 10. [E. F. & C. 1890.]

4. To discover by observation; note. 5. To have a sensible impression or perception of. 6. To make a prisoner of (a person) in the name of the law; arrest by warrant; as, to apprehend a thief.

By the Fugitive Slave Law every Northern man was obliged when properly summoned to turn out and help apprehend the runaway slave of a Southern man. U. S. GRANT Personal Memoirs vol. II, p. 543. [C. L. W. 1885.]

7. To take hold of.

II. i. 1. To think or suppose anything to be or to be so; opine; surmise; conjecture; as, the truth, I apprehend, lies in quite another direction. 2. To look forward with foreboding; fear; as, it is foolish to apprehend. 3. To grasp with the intellect, as a truth, thought, or statement; perceive; as, she apprehends with great clearness. [C. F. apprehender, < L. apprehendo, < ad, to, + prehendo, seize.] ap-prend't, n.

Syn: comprehend, conceive, perceive, understand. We perceive what is presented through the senses. We apprehend what is presented to the mind whether through the senses or by any other means. Yet perceive is used in the figurative sense of seeing through to a conclusion, in a way for which usage would not allow us to substitute apprehend; as, "Sir, I perceive that thou art a prophet." John iv. 19. That which we apprehend we catch, as with the hand; that which we conceive we are able to analyze and recompose in our mind; that which we comprehend we, as it were, grasp around, take together, seize, embrace wholly within the mind. Many things may be apprehended which can not be comprehended; a child can apprehend the distinction between right and wrong, yet the philosopher can not comprehend it in its fullness. We can apprehend the will of God as revealed in conscience or the Scripture; we can conceive of certain attributes of Deity, as his truth and justice; but no finite intelligence can comprehend the Divine Nature, in its majesty, power, and perfection. See ANTICIPATE; AHERS; CERN; KNOW.—Ant: fail of, ignore, lose, misapprehend, misconceive, miss, overlook.

—ap-pre-hend'er, n. 1. One who arrests legally. 2. One who grasps mentally.—ap-pre-hend'ing-ly, adv.—ap-pre-hen'si-ble, a. Capable of being conceived or apprehended.—ap-pre-hen'si-bil'i-ty, n.—ap-pre-hen'si-bly, adv.

ap-pre-hen'sion, 1 a-prī-n-hen'shon; 2 a-prē-n-hen'shon, n. 1. A mental presentation to oneself of what may happen in the future, esp. as coupled with the expectation or fear that it may prove calamitous; distrust or dread concerning the future; apprehensiveness; as, apprehension of danger.

Apprehension always paints in black. LEW WALLACE Ben-Hur bk. v, p. 383. [N.]

2. The act of apprehending mentally; also, the state of being apprehended, or that which is apprehended.

Apprehension has been used to express almost any and every mental act or state, as intellect in general, cognition, understanding, conception, attention, memory, retention, imagination; formerly, also, emotion or sensibility.

For apprehension may be considered as an act of the understanding as well as a mere act of the fancy.

McCOSH First Truths p. 155. [S. 1889.]

For prevision—the perception of what is to turn up hereafter—is an apprehension of phenomena.

MARTINEAU Essays p. 27. [w. v. s. 1866.]

3. The result of taking in or grasping mentally; the formation of an intelligent estimate or idea, or the idea so formed; notion; opinion; as, a common apprehension.

All the persons [in Bunyan's Pilgrim's Progress] are to our apprehension not shadows, but beings of flesh and blood. CRAIN Eng. Lit. vol. i, p. 528. [S. 1877.]

4. The faculty or power that apprehends; capacity to apprehend, or ability to receive and assimilate; as, a man of large apprehension. 5. Lat. The seizure of a person, vessel, etc., on a criminal charge; the act of declaring to be seized by the law; arrest; as, a warrant for one's apprehension. 6. Immediate cognition by the mind. Specif.: (1) In logic, simple apprehension. See phrase below. (2) Philos. Knowledge gained immediately or intuitively, or the act of gaining such knowledge. By the word apprehension the scholastics understood knowledge through mentally grasping the essential idea of a thing. Kant used it of that mental act which imparts to the perceptions of sense the a priori forms of space and time. 7. [Rare.] The act of grasping or seizing physically; prehension. 8. A mental image; fantasm; long a prevalent English use. [C. L. apprehensio(n), < apprehendo, APPREHEND.] ap-pre-n'sion, n.

Syn: see ALARM; ANTICIPATION; ANXIETY; CONCEPTION; FEAR; IDEA; KNOWLEDGE.—Prep: of—implicit apprehension (Psychol.), apprehension of a composite idea or group as a whole, without discerning the details or elements composing it.—simple a., the act of the mind by which it receives a simple notion, as white, round, distinguished from the formation of a judgment, as this is white, or round. ap-pre-hen'sive, 1 a-prī-n-hen'siv; 2 a-prē-n-hen'siv, a. ap-pre-hen'siv, 1. Anticipative of evil; disquieted in mind by uncertainty or anxiety as to the future; fearful; as, apprehensive of the issue.

Mozart was painfully apprehensive at the thought of death. E. E. HALE Lights of Two Centuries p. 327. [L. s. n. 1837.]

2. Seizing quickly with the mind; apprehending readily.

And give the Mind that apprehensive power By which she is made quick to recognize The moral properties and scope of things.

Wordsworth Excursion bk. i, st. 8.

3. [Rare.] Quickly responsive to sense-impressions, as of pleasure, pain, etc.; sensitive. 4. Having cognizance or knowledge; conscious; sensible. 5. Inclined to doubt or suspect; suspicious. 6. Metaph. Of or pertaining to simple apprehension. 7. Apprehensible. Syn: see AFRAID; ANXIOUS.—Prep: apprehensive of danger; for one's safety, welfare, etc.—ly, adv.—ness, n.

ap-pre-n'tice, 1 a-prēn'tis; 2 a-prēn'tis, vt. [TICED, ap-pre-n'tis, -TISE, -TIC-ING, -TIS-ING.] To indenture as or put in the position of an apprentice; as, he apprenticed his son to a carpenter.

ap-pre-n'tice, n. 1. A person, usually a minor, who serves another in order to learn a trade, art, or profession, esp. when bound by indentures for a term of years. The contract between apprentice and master is a relation which can not be assigned at common law, but in Pennsylvania and some other States such assignment is authorized by statute.

The fatherless apprentice lad, who stops To feast his eyes before the glittering shops. TOWNSHEND Book of Gold pt. i, st. 15.

2. Any learner or beginner; as, a mere literary apprentice. 3. U. S. Navy. A boy enlisted to obtain, either on a training-ship or at a training-station, general instruction as well as the science of navigation and gunnery. 4. Old Eng. Law. A barrister of less than 16 years' standing. [C. OF. apprentice, < apprentice, learn, < L. appendo, contr. of appendo; see APPREHEND.]—hospital apprentice [U. S. Navy], an enlisted man of the United States hospital corps, eligible to promotion to hospital steward and thence to pharmacist.—parish or town a., a pauper child bound out to service by guardians or overseers of the poor.

ap-pre-n'tice-ment, n. [Rare.] The act or process of apprenticing; apprenticeship.

ap-pre-n'tice-ship, 1 a-prēn'tis-ship; 2 a-prēn'tis-ship, n. The state of being an apprentice; the method of learning as, or the term of service of, an apprentice, which in the absence of special arrangement was normally seven years; initiatory training.

Literature is a trade, like every other vocation, and . . . you must serve an apprenticeship if you expect to excel. HOWELLS Minister's Charge p. 19. [N. Y. 1887.]

**A'pril**, 1 *ē'pri*; 2 *ā'pri*, n. 1. The fourth month in the English calendar year. See CALENDAR. 2. Any opening and hopeful period, as of life; also, a period or state of emotional inconsistency: from the frequent alternation of showers and sunshine in April.

And hopes and light regrets that come  
Make April of her tender eyes.

TENNISON *In Memoriam* xxxix, et. 2.

[< F. *April*, < L. *Aprīlis*, < *aperio*, open; see APERIENT.] **Ap'ril'let**, < April fool. 1. The subject of a practical joke on April 1 (All Fools' day). 2. Local, U. S.] The pasquetower, which generally blossoms about Easter.—**A'gentleman**, a bridegroom.—**A'pril'esque**, a. Like April.

**a'pri-or'i**, 1 *ē* *prōi-or'i*; 2 *ā* *prī-or'i*. [L.; literally, from what is before.] 1. Logic. Proceeding, as an argument or inference, from antecedent to consequent, from cause to effect, or from any assumption to its logical consequences; of or pertaining to such reasoning; deductive: as an adverb, deductively: opposed to a *posteriori*.

From the time of Aristotle to that of David Hume and Kant, to argue *a priori*, meant to proceed from cause to effect, or from reason to consequent. . . . Since the rise of the Kantian philosophy, by the *a priori* method is meant proceeding from principles imbedded in the mind and independent of experience.

McCOSH *Logic* p. 74. [c. a. 1800, 1871.]

2. Philos. Prior to, in the sense of being independent of, experience and yet furnishing the basis of experience; innate; also, based upon innate ideas or postulates furnished by them.

The *A Priori* has a three-fold significance. It embraces (1) the formal law of mind, of which logic furnishes the best example; (2) the ideas generated by the mind; and (3) the contents of the absolute mind. *Encyc. Religion and Ethics*, vol. 1, p. 652. [s. '08.]

3. Previous to, or with insufficient, examination; in accordance with one's previous notions or prepossessions; presumptively; as, *a priori* theories of inspiration; to conclude *a priori* where one is ignorant of the facts.

We are told that miracles are impossible. This is an *a priori* assumption unproved by facts, turned against it.

**ar-ma-ture**, 1 ā-mā'-chur or -tūr; 2 ā-mā'-chur or -tūr, n. 1. *Elec.* (1) A piece of soft iron joining the poles of a horseshoe magnet; a keeper. (2) A core of laminated metal surrounded by a coil of wire or other conducting medium, rotating near the poles of a magnet in a dynamo-electric or a magneto-electric machine. See *DYNAMO*.

The work of the *armature* core is twofold. It acts as a portion of the magnetic circuit, conducting the lines of force, and by virtue of its high permeability or multiplying power concentrating a number of the lines of force through its own substance. It next acts as a support for the wires which are to be swept through the field of force. *SLOAN'S Standard Electrical Dictionary*.

Some dynamo-armatures are named from (1) their shape; as, cylindrical armature, drum a., glider a., spherical a., or (2) their construction or winding; as, bar a. (*Elec.*), an armature with inductors of copper bars, instead of copper wire; disk a., multipolar a., polarized a., ring a., shuttle a., unipolar a.

The brushes which are applied to the armature are maintained at different potentials when the machine is in action.

war (1855). The thickness increased to 12 inches by 1872. In 1876 wrought iron was replaced by steel. Steel-faced compound plates were made by the Wilson process and by the Ellis process. The Harvey process was generally adopted in 1891, and this was later superseded by the Krupp process. Krupp armor has about 15 per cent. greater resisting power than Harvey armor, while the latter is equal to double the thickness of wrought iron. Armor for fortifications is largely made by the Gruson process, and consists of heavy blocks of chilled cast iron.

The French were the first to apply in a practical shape the idea (which . . . originated in the United States) of reviving the use of armor, and placing it on the sides of ships.

To call in question for fault, especially in a public or quasi-judicial manner, as if before some tribunal; accuse gravely or formally; as, arraigned at the bar of public opinion.

Day by day the men who guide public affairs are arraigned before the judgment-seat of the race.  
*BLACKSTON United States* vol. vi, bk. i, p. 6. [t. 1884.]  
[< OF. *araigner*, < LL. *aratione*, < L. *ad, to, + ratio* (n); see REASON, n.]—ar-raign'er, n.

Syn.: accuse, censure, charge, cite, impeach, indict, summon. One may charge another with any fault, great or trifling, privately or publicly, formally or informally. Accuse suggests more of the formal and criminal; a person may charge a friend with unkindness or neglect; he may accuse a tramp of stealing. Censure carries the idea of fault, but not of crime; it may be private and individual, or public and official. A judge, a president, or other officer of high rank may be impeached before the appropriate tribunal for high crimes; the veracity of a witness may be impeached by damaging evidence. A person of the highest character may be summoned as defendant in a civil suit; or he may be cited to answer as administrator, etc. Indict and arraign apply strictly to criminal proceedings, and only an alleged criminal is indicted or arraigned. One is indicted by the grand jury, and arraigned before the appropriate court. See CONDEMN.—Ant.: acquit, condone, discharge, excuse, forgive, overlook, pardon, release, set free.—Prep.: arraign at the bar, before the tribunal, of or for a crime; on or upon an indictment.

How easy it is to arrange mentally a supposititious scene and conversation! *CHRISTIAN REID Morton House* ch. 5, p. 23. [t. 1872.]

2. To agree or plan as to the terms or details of; adjust; settle; as, to arrange a settlement; to arrange an excursion. 3. Mus. To change or adapt for certain purposes not in the composer's design.

II. i. 1. To get ready beforehand; make preparations; settle plans and details; as, to arrange for a journey. 2. To effect an agreement or settlement; come to an understanding; as, to arrange with creditors. [*< F. arranger, < A. L. ad, to, + ranger, range, < rang; see RANK.*]

Syn.: adjust, array, assort, classify, dispose, group, order, parcel, place, put in order, sort. See ADAPT; ARRAY; PREPARE; PROVIDE; REGULATE; SET; SETTLE.—Ant.: confuse, derange, disarrange, disorder, disturb, jumble, mislay, misplace, perturb, unsettle.—Prep.: arrange with a person for a thing; arrange in order; on a dish; on sound principles; according to or with reference to size; the matter was arranged between the parties, by or through the mediation of friends.—ar-range-a-ble (e), ar-range'er, n.

ar-range'ment, 1 a-rān'ment or -ment; 2 a-rān'ment, n. 1. The act of putting in proper order, or the state of being put in order; disposition in harmonious or suitable form.

We at once distinguish the man of education . . . by the unpremeditated and evidently habitual arrangement of his words.  
*J. W. DEVLIN New Crusade* p. 11. [t. c. & co. 1868.]

2. The result or mode of arranging, or that which is arranged; the style in which something is arranged; a system of parts arranged in due order; disposition; order; as, the arrangement of a library or museum.

Many of those who have become eminent in science and literature have adhered to a systematic arrangement of time.  
*LYDIA H. SIGOURNEY Letters to Young Ladies* p. 19. [t. 1839.]

3. A measure taken in advance or plan made, as for a particular purpose; usually in the plural; as, arrange-

ments for a journey. 4. The settlement of a dispute or matter of mutual concern; adjustment by agreement; a compromise, as between debtor and creditor; as, an equitable arrangement between parties. 5. Mus. (1) The adaptation of a composition to other instruments or voices than those for which it was originally designed. (2) The piece so adapted; as, a pianoforte arrangement of a symphony. 6. Math. Permutation.

Biometr.* The expression of a frequency distribution with respect to any measured character. In determining the coefficient of correlation a table is made up of squares arranged in horizontal and vertical columns. If the horizontal columns show differing lengths and the vertical differing weights, then any column shows the distribution of a class of the measured population having a given value of one character in terms of the other. 10. t. state of affairs; plight. [*< F. arroi, < OF. arreyer; see ARRAY, v.*]

Syn.: arrangement, battle array, collection, disposition, exhibition, line of battle, order, order of battle, parade, show, sight. The phrase battle array or array of battle is archaic and poetic; we now say in line or order of battle. The parade is for exhibition and oversight, and partial rehearsal of military manual and maneuvers. Array refers to a continuous arrangement of men, so that all may be seen or reviewed at once. This is practically impossible with the vast armies of our day. We say rather the disposition of troops, which expresses their location so as to sustain and support, the unable to see or readily communicate with each other. See DRESS.—to challenge the array, to take exception to the whole panel of jurymen. See CHALLENGE.

ar-ra-ya'do, 1 a-rā-yā'do; 2 a-rā-yā'do, n. A West-Indian grunt (*Hæmulus parra*). [*< Sp. rayado*, striped, < L. *radius*, ray.]

## ARTERIAL SYSTEM OF MAN.

The numbers preceding the names refer to the corresponding numbers upon the illustrations.

Two arterial trunks arise from the heart: the pulmonary artery from the right side (see 1 in illus.), distributed by right and left branches (see 2 and 3 in illus.) to the lungs, and the aorta from the left side, distributed to all other parts of the body. It is from the latter that the arteries having special names are derived. The principal branches are given below.

The style of type is intended to indicate approximately the size of vessels, as follows:

**Boldface** = 1/2 inch in diameter or larger  
**CAPS AND SMALL CAPS** = 1/4 inch in diameter  
**SMALL CAPS** = 1/8 inch in diameter  
*Italics* = 1/16 inch in diameter  
 Roman = 1/32 inch in diameter or smaller

The style of letters prefixed to the names indicates the order of derivation, as

A, B, C, etc. = a branch  
 A, B, C, etc. = a branch of a branch  
 a, b, c, etc. = a branch of a branch of a branch  
 a, b, c, etc. = a branch of a branch of a branch of a branch

fuses, grenades, etc. 41. One who uses artifice.

see ARTIST; ARTIZAN.—ar-tif-i-cer-ship, n. Workmanship.  
 ar-tif-i-cer-yi.  
 ar-tif-i-cial, 1 ar-ti-fish'al; 2 ar-ti-fish'al, a. 1. Produced or composed by art rather than by nature, but of the same materials, and with the same or nearly the same result; manufactured; distinguished from imitation; as, artificial rubies (real rubies produced chemically); artificial ice.  
 The invention of artificial light has extended the available term of life. *Darwin Intell. Devel. Europe* vol. 1, p. 27. [L.]  
 2. Produced by art to imitate nature, from different materials and with an inferior result; imitation; as, artificial flowers; artificial diamonds (as paste or quartz). 3. Imitating or aping nature; lacking genuineness or reality; affected; as, artificial manners.  
 The whole structure of society is so artificial, that to a child it is a perpetual mystery.  
 Lydia H. Sigourney *Letters to Mothers* letter iv, p. 39. [L. 1842.]  
 4. Based on accidental or prominent and easily observed features rather than on essential characteristics or properties; opposed to natural; as, the artificial system in botany. See LINNEAN.

In addition to other meanings, artificial once signified, 'devised with skill,' 'ingenious.' *Hall Mod. Eng.* ch. 6, p. 166. [S. 1873.]  
 That was 'artificial' once which wrought, or which was wrought, according to the true principles of art.  
 Trenchard *Select Glossary* p. 12. [K. P. & Co. 1890.]  
 5f. Given to artifice; crafty. [*F. artificiel*, < *L. artificialis*, < *artificium*; see ARTIFICER.] ar-tif-i-cious-ly, adv. See FACETIOUS.—artificial asphalt, a by-product from the refining of certain petroleum. a. light, any light other than that given by the solar system.—a. lines, the logarithmic sines and tangents represented on a sector or scale.—a. numbers, logarithms.—a. year, the artificial year distinguished from sidereal year.—ar-tif-i-cial-ism, n. An artificial principle or practice. [M.]—ar-tif-i-cial-ize, vt. To make artificial.—ar-tif-i-cial-ly, adv. In an artificial manner; by or with art or artifice.—ar-tif-i-cial-ness, n. The quality of being artificial.

ar-tif-i-cial-i-ty, 1 ar-ti-fish'-al-i-ty; 2 ar-ti-fish'-al-i-ty, n. [TIES, 1 -ty; 2 -tis, pl.] 1. That which is artificial. 2. Artificialness.  
 The truth is that a constant study of the beautiful ever tends to mannerism and artificiality. *Quart. Rev.* Apr., 1891, p. 284.  
 ar-tif-i-cial-ness, n. [Rare.] The working of an artificer.  
 ar-tif-gas, 1 ar-ti-gas; 2 ar-ti-gas, n. A department in Uruguay; 4,392 sq. m.; capital, San Eugenio.  
 ar-tif-fer, n. One who makes weapons, especially bows.  
 ar-tif-fer-ist, 1 ar-ti-f'er-ist; 2 ar-ti-f'er-ist, n. One skilled or employed in the designing, construction, or operation of artillery.

ar-tif-fer-y, 1 ar-ti-f'er-y; 2 ar-ti-f'er-y, n. 1. (1) Guns borne on wheeled carriages, or mounted on fortifications or in vessels of war; cannon of any sort, sometimes including all the explosives, appliances, etc., used with cannon. Artillery often receives special names, (a) from its character; as, flying artillery, heavy a., light a.; or (b) from the manner or place of use; as, field a., foot a., horse a., mountain a., seacoast a., siege a., etc.  
 (2) That branch of military service which operates ordnance, especially movable guns; also, the science that treats of it. (3) Any troops belonging to that branch of the service. 2. Engines or devices of any kind for discharging heavy missiles, as the catapult, ballista, and the like, used in ancient warfare.  
 Artillery... now only applied to the heavy ordnance of modern warfare, in earlier use any engine for the projecting of missiles, even to the bow and arrow, would have been included under this term.  
 Trenchard *Select Gloss.* p. 12. [K. P. & Co. 1890.]

3f. Implements of war. [*F. artillerie*, < *OF. artiller*, fortify, < *LL. artilla*, dim. of *L. ar(t)-is*, art.]—ar-tif-fer-y-blind, n. [Local, U. S.] The hermit-thrush.—a. jereh, n. See LEVEL.—a. plant, n. A low South American plant (*Pilea serpyllifolia*) of the nettle family (Urticaceae), named from the explosive discharge of the pollen from the anthers.—coast artillery, that branch of the United States artillery service in charge of the garrisoning of coastal fortifications and the handling of harbor defenses, including submarine mines.—park of a., see PARK, n. 5.—train of a., a number of cannon, with their equipments in readiness for marching or on the march.—ar-tif-fer-y-man, n. [JEXY, pl.] One who works artillery; a cannoneer.—ar-tif-fer-y-ship, n. Skill in gunnery.

artism, n. Same as ACCOMMODATION, 5 (2).  
 art'ist, 1 art'ist; 2 art'ist, n. 1. An adept in any of the fine arts, especially in painting; one who makes a fine art, especially a plastic art, his profession. Compare PAINTER; SCULPTOR.  
 The best artist is not the one who fixes his eye on posterity, but the one who loves the practice of his art.  
 R. L. Stevenson *Virginibus Puerisque* p. 201. [S. 1889.]  
 2. One who in any department does his work according to the constructive principles of art, or works artistically; as, the literary artist; an artist in elocution.  
 I find it asserted on all hands that a poet must be a greater artist for... picturing life as it is, not as it ought to be.  
 Horace *Epist.* vol. 1, p. 3. [MACK. 1880.]  
 The artist is... a person who has submitted (his work) to a law which it was painful to obey.  
 Ruskin *Fora Clavigera* vol. iii, letter lxx, p. 58. [J. B. A. 1885.]  
 3. [Colloq.] One skilled in any trade or business.  
 Artist has been beaten out so that it covers almost the whole field of human endeavor.... A cook is an artist; so is a barber; and Goldsmith soberly calls a cobbler an artist.  
 R. G. Warr *Words and their Uses* ch. 6, p. 93. [S. & Co.]  
 4. An actor. 5f. An artizan. 6f. One who uses artifice. 7f. An adept in the faculty of arts. [*F. artiste*, < *LL. artista*, < *L. art*, art.]  
 Syn: artificer, artizan, artist, artificer, and artizan are all from the root of art, but artist holds to the esthetic sense, while artificer and artizan follow the mechanical or industrial sense of the word (see ART, under SCIENCE). Artist thus comes only into accidental association with the other words of this group, not being a synonym of any one of them and having practically no synonym of its own. The work of the artist is creative; that of the artizan mechanical. The man who paints a beautiful picture is an artist; the man who makes pin-heads all day is an artizan. The artif-

icer is between the two, putting more thought, intelligence, and taste into his work than the artizan, but less of the idealizing, creative power than the artist. The sculptor, shaping his model in clay, is artificer as well as artist; patient artizans, working simply by rule and scale, chisel and polish the stone. See ARTIZAN.—art'ist-dom, n. The realm or condition of artists.—art'ist-like, a. & adv. Be fitting an artist; artistically. art'ist-ly, art'ist-ry, n. 1. The pursuits of the artist. 2. The artistic quality of genius.

 ar-yan, 1 ar-yen or ar-i-on; 2 ar-yan or ar-yen, a. Of or pertaining to the Aryans or their language.  
 The term was formerly used by some philologists as synonymous with Indo-European or Indo-Germanic, but is now restricted to the Eastern branch of the Indo-European family. Discoveries made in 1908, in the land of the Hittites, go to show that the Aryans of India are descended from the Aryans of Cappadocia, and some philologists incline to the opinion that Europe was the cradle of this primitive race. The more prevalent use of the word *Aryan* is to denote the language of the Indo-European family but not the family itself. The term is also sometimes loosely used as synonymous with *Japhetic*.  
 The whole framework of grammar... had become settled before the separation of the Aryan family.  
 MÖLLER *Science of Lang.* first series, p. 234. [S. 1875.]

tion of objects. [*< F. assemble, < OF. assembler; see ASSEMBLE.*] **as-sä-ize'-ble, n.**

*Syn.*: assemblage, collection, company, conclave, conference, congregation, convention, convocation, crowd, gathering, group, host, meeting, multitude. An *assemblage* may be of persons or of objects; an *assembly* is always of persons. An *assemblage* is promiscuous and unorganized; an *assembly* is organized and united in some common purpose. A *conclave* is a secret assembly. A *convocation* is an assembly called by authority for a special purpose; the term *convocation* suggests less dependence upon any superior authority or summons. *Collection, crowd, gathering, group, and multitude* have the unorganized and promiscuous character of the *assemblage*; the other terms come under the general idea of *assembly*. — *Ant.*: dispersion, loneliness, privacy, retirement, seclusion.

— *Assembly of Notables*, see **NOTABLE, n.** — *as-sä-ize'-bly-room', n.* A room in which assemblies are held. — *General A.* [U. S.] 1. Let our determination never to assent reach Rome. *O'CONNELL Speeches, Meeting at Lord Fernal's* in vol. i, p. 447. [1848.]

2. *Finance.* To agree to a proposed change, as of amount, character, status, etc.: said of bonds or stocks subject to such conditions when deposited.

*III.* 1. To agree to; determine. [*< OF. assenter, F. assentir, < L. assentor, irreg. freq. of assentior, < ad, to + sentio, feel.*]

*Syn.*: accede, accept, accord, acquiesce, admit, agree, approve, chime in, coincide, concur, consent, ratify, subscribe to, sustain, uphold. To assent is an act of the understanding; to consent, of the will. We may concur or agree with others, either in opinion or decision. "We may consent to what does not please us, but we can not assent to what we do not believe. We refuse what we do not consent to do; we deny what we do not assent to. Consent is used in an active, assent in a passive sense." *GRAHAM English Synonyms*. One may silently acquiesce in that which does not meet his views, but which he does not care to contend. He admits the charge brought against him to consent. — *as-sä-ent', n.* 1. Assenting. *II.* n. One who assents. — *as-sä-ent', n.* [Rare.] Ready or inclined to assent; compliant. — *as-sä-ent'-ive, n.*

**as-sä-ert', 1 a-sä-ert'; 2 ä-sä-ert', vt.** 1. To state positively or plainly; declare the truth of.

It is safe to assert that no government proper ever had a provision in its organic law for its own termination. *WILSON in Johnston's Am. Orations*, Mar. 4, 1801 vol. iii, p. 140. [c. v. r. 1834.]

2. To maintain by words or force; defend; vindicate; as, to assert rights or principles.

I will . . . assert the dignity, independence, and integrity of the English bar.

ENGLISH SPEECHES, *Defence of Paine* p. 233. [a. & t. 1880.]

3†. To set at liberty. 4†. To uphold; defend. [*L. assertus*, pp. of *asserto*, join to, + *ad*, to, + *sero*, bind.]

SYN.: affirm, allege, asseverate, aver, avouch, avow, claim, declare, maintain, pronounce, protest, say, state, tell. One may assert himself, or assert his right to what he is willing to contend for; or he may assert in discussion what he is ready to maintain by argument or evidence. To assert without proof is always to lay oneself open to the suspicion of having no proof to offer, and seems to arrogate too much to one's personal authority, and hence in such cases both the verb *assert* and its noun *assertion* have an unfavorable sense; we say a mere *assertion*, a bare *assertion*, his unsupported *assertion*; he asserted his innocence has less force than he affirmed or maintained his innocence. *Assert* has always a controversial sense, resisting or challenging opposition; affirm, state, and tell are simply declarative. To *vindicate* is to defend successfully what is assailed. Almost every criminal will assert his innocence; the honest man will seldom lack means to vindicate his integrity. See AFFIRM; ALLEGE; ASSURE; AVER.—ANT. contradict, contravene, controvert, deny, disprove, dispute, gainsay, oppose, repudiate, retract, waive.—to assert oneself, to put forward and defend one's own claim, authority, or right.—as-*ser'ta-bl*(e), as-*ser'ti-bl*(e), a.—as-*ser'ter*, as-*ser'tor*, n.—as-*ser'tress*, n.

as-*ser'tion*, 1 a-*sūr'shon*; 2 ā-*sēr'shon*, n. 1. The act of asserting; a positive or definite statement or affirmation concerning some particular thing, advanced without accompanying proof; declaration.

[This] would need some better proof than bare *assertion* to make it believed. HAMILTON *Metaphysics* p. 220. [a. & t. 1859.]

2. That which is asserted; a positive declaration, especially when unsupported.

We have seen strong assertions without proof.

JENES *Lettres* vol. i, p. 33. [a. & t. 1851.]

3. The act of maintaining a cause or principle; insistence upon a right or claim. 4†. Liberation. as-*ser'ta-ment*. SYN.: see ASSURANCE. Compare synonyms for AS-*ser't*—as-*ser'tion*-al, a.

The amount so fixed. 3. Finance. A fixed sum of money to be paid, usually in reorganization proceedings, the non-payment of which bars delinquent stockholders from further participation in dividends. 4. An official valuation of property, incomes, etc., for taxation; also, the value so assigned.

5. Marine Insur. The determining of the ratio of loss which saved property must sustain in compensation for property sacrificed to prevent a total loss.—assessment roll, a list of all taxpayers and taxable property in a town or ward, with the amount of tax levied in each case.—a work (*Mineral*), the work done annually on a mining claim to maintain possessory title.

as-*ses'sor*, 1 a-*ses'or* or -*or*; 2 ā-*sēs'or*, n. 1. An officer whose duty it is to assess taxes. 2. A specialist associated with a judge to give advice on difficult points involving his special knowledge. 3. Any person associated with another as an adviser or assistant; a sharer in rank or dignity.

In England the judges of the common-law courts and the King's counsel are ex-officio assessors of the House of Lords, advising the House on questions of law propounded to them.

Whence to his Son, The assessor of his throne, he thus began. MILTON *P. L. bk. vi*, l. 679.

4. In some universities, a member of the supreme governing body. ad-*ses'sor*†.

as-*ses-so-ri-al*, 1 a-*ses'sō-ri-al*; 2 ā-*sēs'sō-ri-al*, a. Of or pertaining to an assessor. as-*ses'so-ry*†.

as-*ses'sor-ship*, 1 a-*ses'sor-ship*; 2 ā-*sēs'sor-ship*, n. The office, position, or function of an assessor.

as-*set*, 1 a-*set*; 2 ā-*set*, n. An item in one's assets.

as-*sets*, 1 a-*sets*; 2 ā-*sets*, n. pl. 1. Law. (1) The property of an insolvent debtor applicable to the payment of his debts. (2) All the personal or movable property

of a deceased person that is convertible into money and held for the payment of debts or legacies.

The administrator made his report of sales, and, there being a deficiency of assets, obtained an order to sell the lands.

TOURNEZ *Fool's Errand* p. 36. [r. & n.]

(3) All the property, real and personal, of a deceased or bankrupt person, of a corporation, or of a partnership, which is or may be chargeable with the debts or legacies of such parties or persons.

It is fortunate for the assets of the corporation if each of the different interests has but one committee to represent it.

S. STRANGE *The Forum* Sept., 1890, p. 43.

2. In life insurance, the funds controlled or invested by a company in other forms than the future premiums secured to it by certain conditions named within its policies. 3. Property in general, regarded as applicable to the payment of debts. [*F. asseze*, < *L. ad*, to, + *satis*, to sufficiency. < *L. ad*, to, + *satis*, enough.]

—admitted assets, the assets remaining after deducting all amounts excluded by the insurance companies. net assets;—a, by descent, property in lands which descend to an heir charged with an obligation of the deceased ancestor, which the heir is bound to discharge from such property.—in hand (*Lat.*) the assets assigned to the executor or trustee of an estate to meet all claims against him in this capacity. a. *entre maint*—equitable a. (*Law*), all assets that are chargeable with the payment of debts or legacies in equity and which do not fall under the head of legal assets; specif., those portions of the property which usually are exempt by law from debts but which have been voluntarily charged as assets by the testator, or which, having no existence in law, have been created in equity.

In the United States the doctrine of equitable assets has been much restricted by statute, and in England, since the act of 1870, which provides that creditors are payable *par passu* out of both legal and equitable assets, it has lost its importance.—liquid a. (*Finance*), such securities and assets as can be realized immediately.—personal a., the personal property of all kinds belonging to a bankrupt, insolvent, or deceased person's estate, and distributable to creditors or heirs.—real a., any landed property belonging to the estate of a bankrupt or a deceased person, subject to the payment of debts by due administration of law.

as-*sev'er-ate*, 1 a-*sev'er-āt*; 2 ā-*sēr'ver-āt*, n. [*AT-ED*; -*AT-ING*.] To affirm or aver positively or with solemnity; assert or declare positively or emphatically; aver; avouch. As-*shur*, 1 a-*shūr*; 2 ā-*shūr*, n. Myth. The highest god of the Assyrians.

supposedly their deified patriarch mentioned in Gen. x, 11.

As-*sur*. The chief of the Assyrian pantheon, not found in the pantheon of Babylonia, was Symbol of the Assyrian god Ashur, fre-*As-shur*. His derivation and origin are obscure, though there is some plausibility in the suggestion that he was ultimately derived from Anu, the heaven-god of Babylonia. . . . The significance of Ashur is that he stands for nationalism. . . . His symbol or representation was not an image, but a winged disk surmounted by the figure of an archer discharging his shaft. Sayce was the first to point out that in this deity and the conceptions about him there was the possibility of all the greatness of a monotheism such as developed in the conception of Yahweh. GEORGE W. GILSON *New Schaff-Herzog Encyc.* i, p. 333. [r. & w. c. '08.]

Originally like Marduk, a solar deity with the winged disk, As-*sur* became an Assyrian deity devoted to a military power a god of war, indicated by the attachment of the figure of a man with a bow to the winged disk. *Encyc. Brit.* 11th ed., vol. ii, p. 788.

[*AT-ED*; -*AT-ING*.] To utter with a sibilant or hissing sound; change into a sibilant; alter by assibilation. See SIBILANT. [*L. assibilation*, pp. of *assibilo*, < *ad*, to, + *sibilo*, hiss.]

as-*shib'i-la'tion*, 1 a-*shib'i-lē'shon*; 2 ā-*shib'i-lā'shon*, n. Philol. The process of changing a mute into a sibilant, as t into s (Italian *z*) or into sh (as in *nation*); usually due to the influence of a following e, i, or y sound.

As-*si-de'an*, 1 a-*si-dē'an*; 2 ā-*sī-dē'an*, n. 1. One of a sect of Jews zealous for the law, the so-called "pious ones" (*1 Mac.* ii, 42), from whom sprang the Essenes and Pharisees. 2. See CHASIDIM; an improper form. [*Gr. Asidaion*, < Heb. *hasidim*, < *hásad*, be pious.]

as-*si-dent*, 1 a-*si-dent*; 2 ā-*sī-dēnt*, a. Pathol. Usually accompanying; concomitant; opposed to pathognomonic; said of symptoms in disease. [*L. assident*-(i)s, pp. of *assideo*; see ASSESS.]

as-*sid'er-a'tion*, 1 a-*sid'er-ā'shon*; 2 ā-*sīd'er-ā'shon*, n. Med. Law. Immersion in ice-cold water to cause death and at the same time conceal the manner in which it was effected; a form of infanticide. [*L. ad*, to, + *sidero*, palsy, numb.]

as-*si-du'i-ty*, 1 a-*si-dū'i-ti*; 2 ā-*sī-dū'i-ty*, n. [*AT-ES*; 1-ti; 2-tis, pl.] 1. Close and continuous application or effort; zeal; assiduousness.

The wildest, though unused to enterprises requiring time and assiduity, blocked the place closely. BANCROFT *United States* vol. iii, p. 43. [l. 1883.]

2. Faithful personal attention; carefulness; watchfulness; as, the assiduity of that faithful guardian.

It is the attention and assiduity of the women that prevent men from degenerating into swine. B. FRANKLIN *Essays*, Answer to American White-slavery p. 274. [l. & c. 1851.]

3†. Servility. [*L. assiduus*, < *assideo*; see AS-*siduous*.]

SYN.: application, attention, constancy, diligence, effort, exertion, industry, intentness, labor, pains, patience,

perseverance, persistence, sedulousness, watchfulness. As-*siduity* (as the etymology suggests) sits down to a task until it is done. *Diligence* invests more effort and exertion with love of the work or deep interest in its accomplishment; *application* concentrates all one's powers upon it with utmost intensity; hence, *application* can hardly be as continuous and enduring as *assiduity*. *Constancy* is a steady devotion of heart and principle. *Patience* works on in spite of annoyances; *perseverance* overcomes hindrances and difficulties; *persistence* strives relentlessly against opposition. *Industry* is *diligence* in some vocation, business, or profession. *Labor* and *pains* refer to the exertions of the worker and the tax upon him, while *assiduity*, *perseverance*, etc., refer to his continuance in the work.—ANT. change-*ableness*, fickleness, idleness, inattention, inconstancy, indolence, neglect, negligence, remissness.

as-*sid'u-ous*, 1 a-*sid'yū-us*; 2 ā-*sīd'yū-us*, a. 1. Devoted or constant, as in pursuit or attendance; having zealous and watchful regard or care; unremitting; diligent; careful.

To catch dame Fortune's golden smile, *Assiduous* wait upon her. Burns *Epistle to a Young Friend* st. 7.

2. Long and faithfully continued, pursued, or sustained; persistent; unremitting; constant.

These hollows were no doubt once very fruitful by *assiduous* cultivation. C. D. WARNER *In the Lertant* p. 118. [a. & c. 1877.]

3†. Frequent. [*L. assiduus*, < *assideo*; see ASSESS.] —as-*sid'u-ous-ly*, adv. With close or constant application; diligently; regularly.—as-*sid'u-ous-ness*, n. The quality of being assiduous; assiduity.

as-*si-g'e-t*, 1 a-*si-gē-t*; 2 ā-*sī-gē-t*, n. [*F*.] Bookbinding. A compound of bole, bloodstone, and galena, used as a gilding surface.

as-*si-en'tist*, 1 a-*si-ēn'tist*; 2 ā-*sī-ēn'tist*, n. A member of or contractor with a company holding an *assiento*.

as-*si-en'to*, 1 a-*si-ēn'to*; 2 ā-*sī-ēn'to*, n. A contract between Spain and a foreign country, or a company of foreign merchants, granting exclusive privileges for supplying the Spanish-American colonies with negro slaves. The last one was surrendered by England, Oct. 5, 1750, on payment of half a million dollars. [*Sp.* < *asiento*, agree, < *L. ad*, to, + *sedeo*, sit.] as-*si-en'to*†.

as-*si-ette*, 1 a-*si-ēt*; 2 ā-*sī-ēt*, n. [*F*.] Bookbinding. A compound of bole, bloodstone, and galena, used as a gilding surface.

as-*sign*, 1 a-*sein*; 2 ā-*sin*, n. 1. To set apart for a particular use, duty, or station; designate; appoint; apportion; allot; as, to assign a day for a hearing in court.

I was not assigned to the position of department commander until the 25th of October, 1862.

U. S. GRANT *Personal Memoirs* vol. i, p. 393. [a. & t. 1885.]

2. To point out with precision; particularize; specify; determine; set; as, to assign errors in a judicial record. God is infinitely being because no limit can be assigned to his perfections. C. HONOR *System. Theol.* vol. i, p. 383. [l. 1885.]

3. To account for with reasons; ascribe; attribute; as, to assign odd behavior to ill health. 4. Law. (1) To transfer ownership of in writing; make over to another, as a bond and mortgage, or shares or stock. (2) To surrender to an assignee for the benefit of creditors, as in bankruptcy or insolvency.

II. c. Law. To make an assignment, as for the benefit of creditors. [*OF. assigner*, < *L. assigno*, < *ad*, to, + *stigma*, mark.]

SYN.: see ALLEGE; ALLOT; APPORTION; ATTRIBUTE; AWARD.—PREP.: assign to a person, for a purpose.—to assign in blank, to transfer stock without writing the name of the person to whom the transfer is made in the place provided for it.

as-*sign*, n. 1. Law. A person to whom property, rights, or powers are transferred by another; as, heirs and assigns in a grant by deed. Compare ASSIGNEE.

Assign differs from assignee in that the latter is personally designated and holds immediately from his assignor; while the former, tho individually undesignated and however remote, may hold under the original grantor.

2†. An apportionment; belonging.

as-*sign'a-ble*, 1 a-*sein-a-bl*; 2 ā-*sin-a-bl*, a. 1. Capable of assign-a-bl(y), of being assigned, specified, or allotted; as, infinity is greater than any assignable quantity.

2. Law. (1) Transferable by assignment; negotiable; as, an assignable contract. (2) Attributable; predicable; as, perjury is not assignable of statements under illegal oath.—as-*sign'a-bl'i-ty*, n.—as-*sign'a-bly*, adv.

as-*sig-na't*, 1 a-*si-gnat* or (*F*.) a-*si'nyā*; 2 ā-*sī-gnāt* or (*F*.) a-*si'nyā*, n. 1. F. Hist. A promissory note of the French revolutionary government circulating as currency (1789-1796), secured by confiscated church lands, the national domain, and the estates of emigrés. These assignats were inconvertible except in payment for public land. In 1789 they bore interest at 5 per cent., which was lowered to 3 per cent. in 1790. By 1796 the issue of assignats had reached the enormous total of 457,000 billion francs exclusive of forgeries, while their value was but 30 to 1 of coin. At this value they were converted into 800 million francs' worth of land-warrants or *mandats territoriaux*, constituting a mortgage on all public lands. These mandats were unsuccessful and were finally redeemed by the state at one-seventieth of their face value. *Encyc. Brit.* 11th ed., vol. ii, p. 781.

2. [Rare.] F. Law. The assignment of an annuity as a rent-charge on an estate. [*F.* < *L. assignatus*, pp. of *assigno*; see ASSIGN, r.]

as-*sig-na'tion*, 1 a-*si-gnē'shon*; 2 ā-*sī-gnā'shon*, n. 1. The act of assigning, or the state of being assigned; apportionment. 2. An appointment of time and place for meeting; now used mostly of clandestine or illicit love-meetings.

And with the nymph made assignments there. *Poetice Course of Time* bk. v, l. 100.

3. Law. An assignment, the thing assigned, or the instrument or deed by which it is made. [*L. assignatio*-(n), < *assigno*; see ASSIGN, r.]—house of assignment, a house where persons meet by appointment for illicit sexual intercourse.

as-*sign'd*, pp. Assigned.

as-*sign-ee*, 1 a-*si-ni*; 2 ā-*sī-nē*, n. Law. 1. One to whom property or rights in action have been assigned either for himself or in trust; a trustee. 2. One who is appointed and empowered to act for another in the care and management of certain property and interests for a specified purpose. 3. An assigned servant. See under SERVANT.—assignee in bankruptcy, a person appointed to take possession of and manage the estate of a bankrupt for the benefit of his creditors.—a. *in insol-* vency, a person chosen and empowered by an insolvent party to receive by assignment all the property and assets

of the insolvent and to manage and dispose of the same for the benefit of creditors: distinguished from a receiver.  
—as'-sign-ee-ism, n. The practice of appointing assignees. [M.] —as'-sign-ee-ship, n.  
as'-sign-ment, 1 a-sain'ment or -mont; 2 ä-sin'ment, n. 1. The act of assigning, in any sense, or that which is assigned; allotment; designation; appointment; specification; attribution; as, assignment of duties; assignment of a reason. See ASSIGN.  
Thy sole assignment Some solitary confinement.

2. Law. (1) The transfer of a property, right, or interest.  
The assignment was very difficult to prove.  
LONGFELLOW *Outre-Mer*, The Seagoing par. 80. [in 1835.]

(2) The property transferred. (3) The instrument or writing of transfer in assigning rights or interests. (4) The act of designating or of pointing out exactly; as, assignment of error on a record. 3. [Austral.] Formerly, the allotment of convicts as servants to colonists. —assignment of dower, the setting apart of the widow's allotment from her deceased husband's real estate. —a. system [Austral.], a system of allotting convicts to settlers as farm-laborers or servants without pay. —general a. (Law), an assignment of one's entire property, not legally exempt, for the benefit of creditors, giving preference only to such as required by law.

as'-sign-or, 1 a-si-nör; 2 ä-si-nör, n. Law. One who assigns or makes an assignment of any property, right, or interest; as, the assignor of a lease. —as-sign-er-er, as-sin-lag; 2 ä-si-lär, n. [Scot.] A storm-petrel. —as-sim-i-lä-tion, 1 a-sim-i-lä-tion; 2 ä-sim-i-lä-tion, n. Ca-sim-i-lä-tion, n. The process of assimilating; used rarely as a substantive.

But truth in the doctrinal form is not natural, proper, assimilable food for the soul of man.  
DRUMMOND *Natural Law, Parasitism* p. 304. [in 1884.]

[< LL. *assimilabilis*, < L. *assimilare*; see ASSIMILATE.] —as-sim-i-lä-tion, 1 a-sim-i-lä-tion; 2 ä-sim-i-lä-tion, n. [LAT'ED; -LAT'ING.] I. t. 1. To take up, incorporate, or change by assimilation; hence, to cause to become, or transform into, a homogeneous part of something; as, to assimilate one's food.

The United States have been called on to absorb and assimilate enormous masses of foreign population. LOWELL *Democracy and Other Addresses* p. 26. [in 1887.]

2. To cause to become more harmonious or accordant with something or with each other; make like; render conformable; adapt.

He assimilates his life to the standard of ideal rectitude.  
HAWTHORNE *Mosses, Select Par. 74*. [in 1881.]

3. To represent as like; liken; compare.  
Marcus Aurelius mournfully assimilated the career of a conqueror to that of a simple robber.

4. To become conformed to; adapt oneself to. 5. Philol. To cause to become similar in sound by assimilation. 6. Finance. (1) To cause to enter into general circulation; launch upon the market: said of stocks or bonds. (2) To take out of the experimental or speculative stage, and give a recognized value and an ascertained value: said of stocks or bonds.

II. i. 1. To become incorporated into and made a part of something. 2. To receive food, or the like, and make it a homogeneous part of the substance or system.

A fresh germ cannot be formed . . . without organizable materials, prepared by the assimilating process.  
CARPENTER *Physiology*, p. 48. [in 1868.]

3. To become alike or similar; come into harmony or conformity. [< L. *assimilare*, pp. of *assimilare*, < ad, to, + *similis*, like.] —as-sim-i-lä-tion, n.

as-sim-i-lä-tion, 1 a-sim-i-lä-tion; 2 ä-sim-i-lä-tion, n. 1. The act or process of assimilating, or the state of being assimilated; the act, process, or result of making or becoming like, homogeneous, or harmonious; a modifying of one thing or element to make it harmonize with or resemble another.

Circumstances are the nutriment of character, the food which it converts into blood; and this process of assimilation presupposes individual power to act upon circumstances.  
E. P. WATKINS *Character*, p. 6. [in 1866.]

2. Physiol. The transformation of digested nutriment into an integral and homogeneous part of the solids or fluids of the organism, the last of the processes of nutrition, following digestion and absorption: strictly a form of constructive metabolism; specifically, in botany, the starch-making function of plants. Compare METABOLISM.

Assimilation . . . the power of an existing organized particle to impart its own organization to an adjoining particle having the proper chemical constitution. BAIN *Lect. 4*. [in 1874.]

3. Philol. The change or modification of a letter to cause it to approach a neighboring one in sound, as in correction, from *correctio*. 4. Psychol. The process by which all new concepts, when received into consciousness, are modified so as to be incorporated with the results of previous conscious processes. In its most general use, *assimilation* may include fusion, or looser and more intimate association, or conscious recognition. Its use by Wundt is more restricted.

Simultaneous associations made up of elements from different psychical compounds may be divided into two classes: into *assimilations*, or associations between elements of like compounds, and *combinations*, or associations between elements of unlike compounds.

WUNDT *Outlines of Psychol.*, trans., p. 227. —primary assimilation (Physiol.), the process whereby the lacteals absorb chyle. —progressive a. (Philol.), the assimilation of a sound to one coming before it, so as almost to merge into it.

—AT'ING.] I. t. 1. To bring, place, or link together, as in action, fellowship, position, condition, or purpose; bind together by certain formalities, as for a common purpose; join in company; bring into association; make an associate or partner; connect; unite; combine; ally. 2. To connect together in thought; think of in connection; especially in psychology, to link together in thought under the principles of association. See ASSOCIATION OF IDEAS, under ASSOCIATION.

Correggio, . . . that great master, whose name is associated in every one's mind with all that is gentle or delicate in the imitation of nature. A. ALTON, *Sn. Essays, Louvre in 1814* p. 112. [in 1874.]

The sight of a dog associates the image of its owner, because I have seen the two together; and the sound of the word 'stop' associates the image of its frequent companion-word 'chief.' M. W. CALKINS *Introduction to Psychology*, pp. 161, 162. [in 1901.]

3. To consort with; make an associate of; accompany. II. i. 1. To keep or to be in company; be in contiguity or some special relation; have fellowship or habitual intercourse; unite for a common purpose; join in action.

As long as we live, by associating with those who speak correctly, we are shown our own faults.  
WHITNEY *Language* p. 16. [in 1874.]

[< L. *associatus*, pp. of *associare*, < ad, to, + *socius*, united.] SYN.: see ATTRIBUTE; MIX; —PREP.: with.

as-so-ci-ate, a. 1. Joined together or with another or others; united; allied; existing or occurring together; concomitant: often before a title, implying coordinate or nearly coordinate powers or rank; as, an associate justice; an associate professor.

2. [Rare.] Devoid, through darkness, on your road with ease. W. H. MILTON *P. L. bk. x. l. 395.*

2. Admitted or entitled to a limited or specified participation, as in rights, privileges, and doings; as, an associate member of a society. 3. Pathol. Sympathetic. —associate antagonists, muscles that are antagonistic to each other when working separately, but which, when working together, effect a movement of the part to which they are attached. —a. movements. Physiol. 1. The coordinate movements by which a definite act is performed. The coordination is involuntary, tho the act may be voluntary. 2. Movements that sometimes occur in a paralyzed muscle with its corresponding non-paralyzed fellow is moved. associated movements. —a. numbers (Math), two numbers the product of which is congruent with unity to any modulus m.

as-so-ci-ate, n. 1. One who is habitually or frequently in the company or society of another; a companion; comrade; mate. 2. One who is associated with another, as in some business, act, interest, office, or position.

Southey was the associate of Wordsworth and Coleridge. CHASE *Eng. Lit. and Lang., Southey* vol. ii. p. 497. [in 1869.]

3. Anything that habitually or frequently accompanies or is associated with something else; a concomitant. Good health, and its associate in the most.

Good temper. LOCKE *Human Understanding* p. 261. [in 1690.]

4. One admitted to partial membership in an association, society, or institution, without the privileges or rights of a full member; as, an associate of the Royal Academy. 5. In some educational institutions, one who has finished a course shorter than that set for a degree; as, an associate in arts. 6. Psychol. A mental image or idea that has been connected with another, under the so-called laws of association.

The one [idea] no sooner . . . comes into the understanding, but its associate appears with it.

LOCKE *Human Understanding* p. 261. [in 1690.]

SYN.: ally, chum, condutor, colleague, companion, comrade, consort, fellow, friend, helpline, mate, partner, peer. An associate may imply a superior, leader, or principal, to whom the associate is not fully equal in rank. Associate may be used of mere friendly relations, but often implies some work, enterprise, or pursuit in which the associated persons unite. We rarely speak of associates in crime or wrong, using confederates instead. Companion gives itself with equal readiness to the good or evil sense, as also does comrade. One may be a companion in travel who would not readily become an associate at home. A lady advertises for a companion; she would not advertise for an associate. Peer implies equality rather than companionship; as, a jury of his peers. Comrade expresses more fellowship and good feeling than companion. Fellow has almost gone out of use in this connection, except in an inferior or patronizing sense. Consort is a word of equality and dignity, as applied especially to the marriage relation. See ACCESSORY; FRIEND. —ANT.: antagonist, enemy, foe, hinder, opponent, opposer, rival, stranger. —PREP.: associates of the leader in the enterprise.

as-so-ci-ate-ness, 1 a-so-shi-ät-ness; 2 ä-so-shi-ät-ness, n. The condition of being associated.

as-so-ci-ate-ship, 1 a-so-shi-ät-ship; 2 ä-so-shi-ät-ship, n. The condition, position, or office of an associate.

as-so-ci-a-tion, 1 a-so-shi-ät-shon; 2 ä-so-shi-ät-shon (XIII), n. 1. The act, process, or result of associating, or the state of being associated; the condition of having combined for a common purpose.

If the United States be not a government proper, but an association of States in the nature of contract merely, can it, as a contract, be peaceably unmade by less than all the parties who made it?

LINCOLN in Johnston's *Am. Orations* vol. iii. p. 146. [in 1864.]

2. Any connection or relation between objects or ideas that tends to unite them in thought; also, anything thus mentally associated. See ASSOCIATION OF IDEAS, below.

3. A society or association; an association by chance or necessity. RUSKIN *Seam and Lilies* lect. i. p. 11. [in 1865.]

Association, so far as the words stand for an effect, is between things thought of — it is things, not ideas, which are associated in the mind.

JAMES *Principles of Psychol.* vol. i. p. 554. [in 1890.]

3. The mental process or faculty by virtue of which objects or ideas are thus connected; associative power; specifically, in psychology, that process in reproduction in which past cognitions are brought back through connection with something present in the mind. Associations are classified as external or intrinsic association, association by contiguity; internal or intrinsic a., by resemblance; mediate a., by intermediate states which may be subconscious; simultaneous a., by a single simultaneous act; successive a., by successive stages. See LAWS OF ASSOCIATION, below.

4. A body of persons, as scholars, clergymen, etc., associated for some common purpose, especially of a public nature; as, an association for the advancement of science.

Association was first used among Congregationalists for a society consisting of a number of pastors of neighboring churches, united for promoting the interests of religion and the harmony of the churches, but claiming no ecclesiastical authority. Compare CONSOCIATION.

You cannot make an association out of insincere men.

CARLILE *Heroes and Hero-Worship* lect. iv, p. 150. [c. & h. 1870.]

5. *Ecol.* A major division of a formation in plant geography; consoci. 6. [U. S.] An organized but unchartered body analogous to but distinguished legally from a corporation.

Syn.: alliance, club, community, companionship, company, confederacy, confederation, conjunction, connection, corporation, familiarity, federation, fellowship, fraternity, friendship, lodge, partnership, society, union. We speak of an alliance of nations, a club of pleasure-seekers, a community of Shakers, a company of soldiers or of friends, a confederacy, confederation, federation, or union of separate states under one general government, a partnership or company of business men, a conjunction of planets. The whole body of Freemasons constitute a *fraternity*; one of their local organizations is called a *lodge*. A corporation or company is formed for purposes of business; an association or society (tho also incorporated) is for learning, literature, benevolence, religion, etc. Compare synonyms for ACQUAINTANCE; ASSOCIATE; FRIENDSHIP.—Ant: disintegration, independence, isolation, separation, solitude.—Pep: an association of scholars for the advancement of knowledge; association with the good is ennobling.

American Protective Association [U. S.], the official title of a secret society, formed in the State of Iowa in 1887, with the avowed purpose of protecting American institutions by endeavoring to cause the exclusion of Roman Catholics from public office; usually abbreviated A. P. A.—a. cultuelles [F.], literally, associations for worship; especially (F. Hist.), non-sectarian associations for public worship authorized by the Separation Law of Dec. 9, 1905, which empowered the associations to hold the churches and church property, the former for the total period of their existence, the latter only for a time.

By the Encyclical . . . of 10 August, 1906, the pope forbade the formation of these associations cultuelles.

George Goyau in *Catholic Encyclopedia*, vol. iv, p. 206. [n. a. & co. '08.]

—a. fibers, fibers that unite different, but not widely separated, areas of the cerebrospinal axis on the same side, as in the brain or the spinal cord.—a. football [Gt. Brit.], the game in which all players but the goal-keepers are forbidden to handle the ball while in play; soccer. See FOOTBALL.—a. of ideas. Psychol. That aspect of the process of mental reproduction which is thought to explain why present states of consciousness occur in pairs or series resembling those which have been connected in past states of consciousness.

The phrase 'association of' is fitted to mark the bare fact that complex ideas, which had a more or less independent origin, are in the habit of recurring in regular sequences (in pairs, or threes, or series of larger numbers). G. T. LADD *Psychol. Descriptive and Explanatory* p. 263. [s. 1894.]

2. The tendency of any conscious state or process to recall others that have previously been associated with it in consciousness. Locke, who invented this phrase, and his followers in Great Britain and France, used it as the same active influence were exerted by the so-called ideas as such. The observed facts of the mental life are now, however, much better interpreted by a psychology which studies them as coming under the physiological and psychical conditions of mental synthesis, the formation of habits, etc. Thus the association may be of so intimate and unanalyzable a character as to be more properly called a *fusion*, in which sense of the words no perception of a complex object would be possible without the association of ideas. Others would limit the term to the connection of universals in the processes of thought.—a. philosophy, see ASSOCIATIONISM.

—a. time, n. Psychophysics. The time supposed to be required for the central nervous processes connected with mental association; the time of associative reaction as distinguished from simple reaction. Laws of a., the principles that regulate the connection and recurrence of ideas in the mental processes of reproduction and representation. They include (1) the primary laws, those which hold true in every kind; and (2) the secondary laws (laws of preference), those which decide why one associated idea rather than another recurs in consciousness. Various attempts have been made to bring all cases of association of ideas under one law. as-so'ci-a'tion-al, 1 a-so'si-ē'shan-el; 2 ā-sō'ci-ā'shon-al, a. Of or pertaining to association or to the theory of associationism.

as-so'ci-a'tion-ism, 1 a-so'si-ē'shan-izm; 2 ā-sō'ci-ā'shon-izm, n. 1. The psychological doctrine that all mental development, including the activity of the so-called higher faculties, may be explained as the product of the association of ideas under the laws of association. 2. Cooperative socialism or communism; Fourierism. as-so'ci-a'tion-al-ism.

as-so'ci-a'tion-ist, n. One who holds or advocates associationism. as-so'ci-a'tion-al-ist.

as-so'ci-a'tive, 1 a-so'shi-a-tiv; 2 ā-sō'shi-a-tiv, a. 1. as-so'ci-a'tive, Resulting from or characterized by association; pertaining or tending to association; as, associative ideas, faculty, etc. 2. Math. Subject to the law that the final result of uniting three quantities, a, b, and c, by any operation (when two are first united and the third united to the result), is the same whether the first two or last two be united first; as, multiplication in ordinary arithmetic or algebra is associative because (ab)c = a(bc). as-so'ci-a-to-ry, -ly, adv. -ness, n.

as-so'ci-a'tor, 1 a-so'shi-ē'tar or -ter; 2 ā-sō'shi-ā'tor, n. One who or that which associates or is associated; a member of an association; a companion or confederate. as-so'cies, 1 a-so'shi-z; 2 ā-sō'shi-z, n. *slip. & pl. Ecol.* The association of plants considered from the history of their development, as it undergoes different changes.

as-so'ci-a'tion, 1 a-so'fū-dā; 2 ā-sō'fū-dā, n. A town in the Fula country, West Africa.

as-so'li, 1 a-so'li; 2 ā-sō'li, v. 1. To set free, as from the consequences of sin; absol. to acquit; pardon.

Barthemy Brown, whose father (God aso'd him therefore) modernized Walton. LAMM *Ethica* Lib. Etia p. 157. [w. l. & co.]

2. To atone for; dispel; expiate. 3. To absorb; clear up; remove. [*OF. assoller, < L. absolvo, < ab, from, + solvo, loose, < sc-, apart, + luo, loosen.*] a-soyle't [Scot.]; as-sol'ziet [Scot.].

as-so'li't, cf. [Archaic.] To so'li; sully; stain.

as-so'li'er, 1 a-so'li'er; 2 ā-sō'li'er, n. [Archaic.] The state of being assolated; acquittal; pardon; forgiveness.

as-so'li-ment, 1 a-so'li-ment or -ment; 2 ā-sō'li-ment, n. 1. The act of assolving, or the state of being assolated, as from guilt. 2. Reconciliation, as of that which conflicts. 3. Discharge, as of a duty.

as-so'li-ment', n. [Archaic.] Deafment; stain.

as-so'li-ment', 1 a-so'li-ment; 2 ā-sō'li-ment, n. A French author (1827-73/1886). A French author.

as-so'm-mo'ir, L. 1 l'ā'som-wā; 2 l'ā'som-wā, n. A novel by Emile Zola, published in 1877, exemplifying the evils of drink, in which the heroine, Gervaise, after being abandoned with her two children by her lover, Lantier, makes a brave

fight to support them and herself as a washerwoman. A zinc-worker, Coupeau, persuades her to marry him. They prosper, when he is disabled by an accident. Their savings are swallowed up and Coupeau, recovering, meets Lantier, whom he brings to his home. Impelled by the knowledge that he has been the cause of the renewal of the previous relations between his wife and Lantier, Coupeau takes to drink and dies of delirium tremens. The title is a slang French term for "bludgeon," and is used figuratively for a low drinking-house. The book was dramatized and a play produced in Paris in 1879.

as-so'nance, 1 a-so'nans; 2 ā-sō'nang, n. 1. Resemblance or correspondence in sound; hence, resemblance or correspondence in other respects; also, its result.

Cleopas, or Chalapai, is a Hebrew name, of which Alphaeus is the current assonance adopted for intercourse with the Gentile world.

FARRAR *Early Days of Christianity* p. 269. [n. r. p.]

2. Pros. Correspondence of the accented vowels, but not of the consonants, in riming syllables; used in Spanish and Italian poetry; also, the imperfect rime so formed, as in verses ended with *roaming* and *floating*.

In their lighter poetry the Spaniards frequently contented themselves with assonance, that is, with the correspondence of final syllables, wherein the vowel alone was the same.

HALLAM *Lit. Europe* vol. i, pt. i, ch. 2, p. 81. [n. 1854.]

[F. < assonant; see ASSONANT.]

as-so'nant, 1 a-so'nant; 2 ā-sō'nant, a. 1. Having resemblance of sound. 2. Pros. Of, pertaining to, or characterized by assonance. [F. < L. assonant(-)is, pp. of assona, < ad, to, + sono, sound, sound.] as-so'nant-ed; as-so'nant-ly; as-so'nant-ness.

as-so'nant, n. A word similar to another in its vowel sounds, especially one forming an assonance in poetry.

as-so'nate, 1 a-so'nēt; 2 ā-sō'nāt, vi. [-NAT'ED; -NAT'ING.] To accord in sound, esp., vowel sound; to form assonance. [*L. assonatus, pp. of assona; see ASSONANT a.*]

as-so'n-ē, 1 a-so'n-ē; 2 ā-sō'n-ē, n. Bot. Same as DOUB-REY. [*Ignacio Jordan de Asso y del Rio, Sp. botanist.*]

as-so'rt, 1 a-so'rt; 2 ā-sō'rt, v. 1. To distribute into classes or groups; arrange in order or in lots; classify.

It is only by assorting them [objects] in classes that we can reduce the infinity of nature to the finitude of mind.

HAMILTON *Metaphysics* lect. iv, p. 47. [c. & l. 1859.]

2. To make up of a variety; furnish with a suitable variety of things or goods; as, to assort a stock of goods.

Our cargo was an assorted one; that is, it consisted of everything under the sun.

R. H. DANA *Two Years* d. 85. [c. & co. 1876.]

3. To make of the same sort; adapt.

II. i. To fall into a class or group; harmonize; also, to associate; consort; as, to assort naturally with the others. [*F. assortir, < a, < L. ad, to, + sorte, < L. sor(-)is, lot.*] Syn: see ARRANGE.

as-so'rt-a-tive, 1 a-so'rt-a-tiv; 2 ā-sō'rt-a-tiv, a. Relating as-so'rt-a-tive, or tending to assortment or selection; assorting.—as-so'rt-a-tive, -assortative mating, the proclivity exhibited by individuals possessing a definite character in choosing to mate with individuals of the opposite sex possessing the same or another particular character.

as-sume, 1 a-sium; 2 ā-sūm, v. [AS-SUMED; AS-SUMING.] I. t. 1. To take to or put on oneself; arrogate to oneself; take up; take on; adopt; as, to assume the robes of office; to assume a haughty mien: sometimes approaching the sense of presume; as, do you assume to do thus?

Still let my song a nobler note assume.

TUOMSON *Seasons*, *Spring* 1. 567.

2. To take upon oneself; undertake; as, "to assume the duties of general in chief." GRANT *Memoirs* vol. i, p. 393. [c. l. w. 1855.] 3. To claim or treat as conceded; take for granted, as a basis for reasoning, supposing.

We assume that the forces in the world are essentially the same through all time. DANA *Geology* intro., p. 7. [n. s. & co. 1870.]

4. To put on deceitfully; take the semblance of; affect;

pretend; outwardly seem: often with the infinitive to be; as, to assume a virtuous air; to assume to be deaf. 5. To receive; adopt. 6. Logic. To add as a minor premise. 7. [Archaic.] To take in; subsume.

II. t. To be presumptuous. [*< L. assumo, < ad, to, + sumo, take (< sub, under, + emo, buy).*]

Syn: accept, affect, appropriate, arrogate, claim, feign, postulate, presume, pretend, put on, take, usurp. The distinctive idea of assume is to take by one's own independent volition, whether well or ill, rightly or wrongfully. One may accept an obligation or assume an authority that properly belongs to him, or he may assume an obligation or indebtedness that could not be required of him. He may assume authority or office that is his right; if he assumes what does not belong to him, he is said to arrogate or usurp it. A man may usurp the substance of power in the most unpretending way; what he arrogates to himself he assumes with a haughty and overbearing manner. One assumes the robes or insignia of office by putting them on, with or without right. If he takes to himself the credit and appearance of qualities he does not possess, he is said to affect or feign or to pretend to the character he thus assumes. What a debater postulates he openly states and takes for granted without proof; what he assumes he may take for granted without mention. A favorite trick of the sophist is quietly to assume as true what would at once be challenged if expressly stated. What a man claims he asserts his right to take; what he assumes he takes.

—as-sum'ed, a. Capable of being assumed.—ably, adv.—as-sum'ed, pa. 1. Taken for granted; conceded; as, an assumed premise. 2. Pretended; fictitious; as, an assumed name.—as-sum'ed-ly, adv.—as-sum'ent, n. 1. An addition. 2. One who assumes or takes.—as-sum'er, n.—as-sum'ing, pa. Disposed to arrogate to oneself more than is proper; presumptuous; arrogant.—as-sum'ing-ly, adv.—as-sum'ing-ness, n.

as-sump'sit, 1 a-sump'sit; 2 ā-sūmp'sit, n. Law. 1. An obligation not under seal. 2. A form of action at common law to enforce an obligation not under seal. Assumpsits are known from the purposes to which they are applied: express or special assumpsit, one in which the purpose is to secure damages on a contract not under seal; general or common a., one in which the purpose is to secure liquidated damages, as in express contracts and, by extension, often in cases involving financial obligations not recoverable as damages. [L., 3d per s. perf. ind. act. of assume; see ASSUME.]

as-sump'tion, 1 a-sump'shan; 2 ā-sūmp'shan, n. 1. The act of assuming, or that which is assumed; a taking for granted, or that which is taken for granted; postulate; esp., a taking for granted without reason or warrant; supposition; as, all science is based on the assumption of causation.

Nothing is more injurious in science than assumptions which do not rest on a broad basis of fact.

AGASSIZ *Geol. Sketches* sketch vi, p. 154. [n. & r. 1866.]

It is a mere assumption . . . that inability removes responsibility. SPENCER *Illustrations* p. 53. [n. & w.]

2. The act of taking up, or to oneself; appropriation; undertaking; as, the assumption of an office; the assumption of a mortgage. 3. A disposition to assume too much; arrogance; as, he has a deal of assumption.

I reverence these young Africans of our own growth—these almost clerical imps who sport their cloth without assumption. LAMB *Essays of Elia*, *Praise of Chimney-Sweepers* p. 169. [w. l. & co.]

4. Logic. A minor premise. Still more objectionable are the . . . terms Proposition and Assumption, as synonyms for the major and minor premises. . . . The term assumption does not express the distinctive peculiarity of the minor premise. HAMILTON *Logic* p. 200. [c. & l. 1860.]

5. The receiving up of a person into heaven. [*< L. assumptio(-n), < assumptus, pp. of assumo; see ASSUME.*]

Syn: see ARROGANCE; ASSURANCE; PRETENSE.—Feast of the Assumption (R. C. Ch.), the festival, celebrated on the 15th of August, commemorating the taking up into heaven of the Virgin Mary in body and soul.

as-sump'tion, n. 1. A parish in Louisiana; 485 sq. m.; parish-seat, Napoleonville. 2. A village in Christian county, Ill.

as-sump'tious, a. [Rare.] Disposed to assume; assuming; presuming. as-sump'tious-ness, n.

as-sump'tive, 1 a-sump'tiv; 2 ā-sūmp'tiv, a. Characterized by assumption; assumed; assuming.—assumptive arms (Her.), arms not inherited, but borne by permission of authority or without sanction.—as-sump'tive-ly, adv.

as-sump'tu-al, 1 a-sump'thu- (or -tiu-)al; 2 ā-sūmp'thu- (or -tiu-)al, a. Law. Pertaining to the obligation created by assumpsit, or simple promise. [*< L. assumptus; see ASSUMPTION.*]

as-sur, 1 a-sūr; 2 ā-sūr, n. Bib. (Apocrypha). 1 Ed. v, 31.

as-sur-a-ble, 1 a-shūr-a-bl; 2 ā-shūr-a-bl, a. 1. That as-sur-a-bl' can be assured. 2. Insurable.

as-sur-ance, 1 a-shūr-ans; 2 ā-shūr-ang, n. 1. The act of assuring; a declaration that inspires confidence or is intended to do so; promise; pledge; as, I received full assurances that our neutrality should be respected. 2. The mental state or feeling of being assured; confidence; conviction; trust; reliance; as, to have full assurance of safety.

The assurance that God gives us perfect confidence.

O. B. FROTHINGHAM *Religion of Humanity* p. 55. [n. o. r. 1873.]

3. The state of being free from timidity; often in a bad sense; as, his assurance amazed me. 4. Insurance, as of life or property.

The law of averages in life assurance societies is now the pedestal of adamant on which stands . . . the principle of total abstinence. JOSEPH COOK *Occident* p. 153. [n. m. & co. 1884.]

5. Law. The legal evidence of the transfer of property whereby a man's estate is assured to him.

Common assurance is a conveyance or muniment or title to lands by (1) deed, (2) record, (3) special custom, or (4) covenant. Further a. is the covenant in a deed whereby the grantor engages to supply any further confirmation of title requisite to make good any defect in his grant. Compare INSURANCE.

6. Theol. The full confidence of present personal salvation, wrought by the witness of the Divine Spirit in him who believes in Christ. 7. [Archaic.] Firmness of mind; courage. [F., < LL. assecurantia, < assecurus; see ASSURE.]

Syn: arrogance, assertion, assumption, boldness, confidence, effrontery, impudence, presumption, self-assertion, self-confidence, self-reliance. Assurance may have a good sense, as, the saint's assurance of heaven. Confidence is founded upon reasons; assurance is largely a matter of feeling. In the bad sense, assurance is belief in one's ability to outwit or defy others; the hardened criminal is remarkable for habitual assurance. For the calm convic-

1. The network nebula in Cygnus. 2. The great nebula in Andromeda. 3. The great nebula in Orion. 4. The Pleiades.

By permission of Lick Observatory.

He accounted the fair spoken courtesy . . . as a false and astu-  
 cious mark of the most dangerous designs against their neighbors.  
 Scott *Talisman* p. 73. [b. r. & co.]

as-tu'tious; -as-tu'clous-ly, adv. -as-tu'cl-ty, n. As-  
 tuteness.

as-tu'ti-ct, To stun.  
 as-tu'ti-an, 1 as-tu'ti-an; 2 as-tu'ti-an. I. a. Of or pertaining  
 to Asturias. II. n. An inhabitant of Asturias. -  
 Asturian rose (Pathol.), a skin-disease resembling leprosy,  
 peculiar to Asturias. See PELLAGRA.

As-tu'ti-as, 1 as-tu'ti-as; 2 as-tu'ti-as, n. 1. A former  
 province in N. W. Spain, named Oviedo province in 1833.  
 2. A town in Cebu, P. I.

As-tu'ti-næ, 1 as-tu'ti-næ; 2 as-tu'ti-næ, n. pl. Ornith. A  
 group of raptorial birds, variously ranked and limited, but  
 always including the goshawks; the *Accipitrinæ*. As-tu'ti-  
 næ (t. g.) [*L. astur*, goshawk.] -as-tu'ti-næ, a. & n.

as-tute', 1 as-tute'; 2 as-tute', a. Keen in discernment;  
 having acute penetration; sharp-sighted. [*L. astutus*,  
 < *astus*, cunning.] -as-tute'ly, adv. -as-tute'ness, n.

Syn: acute, crafty, cunning, discerning, discriminating,  
 keen, knowing, penetrating, penetrative, sagacious, sharp,  
 shrewd, subtle, subtle. *Acute*, from the Latin, suggests  
 the sharpness of the needle's point; *keen*, from the Saxon,  
 the sharpness of the cutting edge. *Astute* has come to have  
 a meaning that combines the sense of *acute* or *keen* with  
 that of *sagacious*. The *astute* mind adds to *astuteness* and  
*keenness* an element of cunning or shrewdness. The *astute* de-  
 baucher leads his opponents into a snare by getting them to  
 make admissions or urge arguments, of which he sees a  
 result that they do not perceive. The *acute*, keen intellect  
 may take no special advantage of these qualities; the *astute*  
 mind has always a point to make for itself, and seldom fails  
 to make it. -Ant: blind, dull, idiotic, imbecile, shallow,  
 short-sighted, stolid, stupid.

As-tu'ty-a-ges, 1 as-tu'ty-a-ges; 2 as-tu'ty-a-ges, n. Last king of Media  
 (584-560 B. C.), dethroned by his grandson, Cyrus the Great.

As-tu'ty-a-nax, 1 as-tu'ty-a-nax; 2 as-tu'ty-a-nax, n. Myth. The  
 son of Hector and Andromache. He figures in the *Iliad*,  
 and after the fall of Troy the Greeks hurled him from the  
 walls of the city, that the prophecy of Calchas, that Asty-  
 anax would restore the kingdom, might not be fulfilled. In  
 Racine's *Andromache*, Astyanax goes with his mother to  
 Epirus and becomes king of that country.

A-sty'ta, 1 a-sty'ta; 2 a-sty'ta, n. pl. Crust. A section of  
 trichobranchiate macrurus without appendages to the first  
 abdominal somite. [*Gr. astylos*; see ASTYLAR.] -a-sty'ta-  
 lar, a. & n.

a-sty'tar, 1 a-sty'tar; 2 a-sty'tar, a. Arch. Having nei-  
 ther column nor pilaster. [*Gr. astylos*, < a-priv. +  
*stylos*, pillar.] -a-sty'tic, a.

a-sty'ten, 1 a-sty'ten; 2 a-sty'ten, n. [Eng.] Mining. A low  
 dam in an adit or drift.

As-ty'n-o-me, 1 as-ty'n-o-me; 2 as-ty'n-o-me, n. Daughter of  
 Chryses and captive of Agamemnon, a character in the *Iliad*.

A'su'ang, 1 a'su'ang; 2 a'su'ang, n. [P. I.] A demon sup-  
 posed to attack parturient women and to suck from them  
 the fetus at the moment of birth; the degenerated god of  
 fertility, usually invisible, the not invulnerable. [*Tag.*  
*Aswang*, monster.]

A'su'den, 1 a'su'den; 2 a'su'den, n. Same as AZUAT.

A'su'den, 1 a'su'den; 2 a'su'den, adv. Of a sudden; at once.

A-sun'cl-on-ay, 1 a-sun'cl-on-ay; 2 a-sun'cl-on-ay, n. A city, cap-  
 ital of Paraguay.

a-sun'der, 1 a-sun'der; 2 a-sun'der, adv. 1. In or into  
 a different place or direction; apart; as, wide asunder  
 as the poles.

Every star is gone but three, And they hang far asunder.  
 JEAN INGELWOLD *Songs of the Night Watches*, Morning st. 1.

2. In or into pieces, as by rending, explosion, etc.  
 The frail confederacy falls asunder like a rope of sand.  
 MORRIS *Dutch Republic* vol. i, p. 11. [a. 1862.]

as'uret, a. Azure.

As'vins, 1 as'vins; 2 as'vins, 2 as'vins, n. pl. Vedic  
 Myth. Twin brothers, gods of dawn, yvins, beautiful,  
 physicians of heaven, and beneficent to man.

As'wad, 1 as'wad; 2 as'wad, n. In Southey's *Thalaba*, a noble  
 who freed a starving camel that had been bound to its dead  
 master's grave, and for this act was spared in the overthrow  
 of the kingdom.

as'wall, 1 as'wall; 2 as'wall, n. [E. Ind.] The sloth-bear.

a-swarm, 1 a-swarm; 2 a-swarm, n. [E. Ind.] A swarming.

a-sway, 1 a-sway; 2 a-sway, n. [E. Ind.] A swaying.

a-sweat, 1 a-sweat; 2 a-sweat, n. [E. Ind.] A sweating state;  
 sweat.

a-swell, 1 a-swell; 2 a-swell, n. [E. Ind.] A swelling.

a-swerve, 1 a-swerve; 2 a-swerve, n. [E. Ind.] A swerving.

a-swim, 1 a-swim; 2 a-swim, n. [E. Ind.] A swimming.

a-swing, 1 a-swing; 2 a-swing, n. [E. Ind.] A swinging.

lege. See EXTRATERRITORIALITY. [*L.* < *Gr. asylon*, < a-  
 priv. + *syon*, right of seizure.] -right of asylum, the  
 right anciently recognized for Greek and some other sanctu-  
 aries, and for Christian churches, monasteries, etc., of pro-  
 tecting from molestation any one who fled to them.

as-sym-bo'il-a, 1 as-sym-bo'il-a; 2 as-sym-bo'il-a, n. Inability  
 to understand the meaning of objects, due to cerebral dis-  
 order; especially, the loss of power to appreciate the signs  
 or symbols of thought. [*L.* not, + SYMBOL.]

a'sym-bo'lic, 1 a'sym-bo'lic; 2 a'sym-bo'lic, a. Not sym-  
 bolic. -a'sym-bo'lic-ly, adv.

a-sym'me-tran'thus, 1 a-sym'me-tran'thus; 2 a-sym'me-  
 tran'thus, a. Bot. Having the flowers asymmetrical.  
 [*Gr. asymmetron* + *Gr. anthos*, flower.]

a'sym-met'ric, 1 a'sym-met'ric; 2 a'sym-met'ric, a. 1. Without  
 proper proportion of parts; unsymmetrical. 2. Org.  
 Chem. Designating any benzene-produced compound  
 when three hydrogen atoms (only two of which are ad-  
 jacent) are replaced by similar atoms or radicals.

If the same radical is substituted for all three atoms of hydro-  
 gen, there are three triisomeric substitution-compounds;  
 thus, there are three triisomeric benzene derivatives, distinguished as  
*ortho* (1, 2), *meta* (1, 3), and *para* (1, 4), fusing at 87° C., symmetrical (1, 3); 6, fus-  
 ing at 120° C., and asymmetrical (1, 2, 4), fusing at 44° C.

C. L. BLOOM *Chemistry* p. 745. [r. & co. 1890.]

3. Crystal. Not divisible into similar halves by a plane;  
 triclinic. 4. Absolutely devoid of attempt to be sym-  
 metrical; distinguished by Herbert Spencer from un-  
 symmetrical. 5. Math. Not commensurable. 6. Not  
 reconcilable. a-sym'me-trait; a-sym'me-trous.

a-sym'me-trous, 1 a-sym'me-trous; 2 a-sym'me-trous, a. A tetra-  
 valent carbon atom (Chem.), a tetra- or four-valent carbon  
 atom which is combined with four dissimilar groups or  
 atoms. See STEREOSOMERISM.

Compounds which act on polarized light contain one or more  
 asymmetric carbon atoms, that is, carbon atoms linked to four dis-  
 similar radicals. C. L. BLOOM *Chemistry* p. 740. [r. & co. 1890.]

-a system, see CRYSTALLIZATION. -a'sym-met'ric-cal-  
 ly, adv.

a-sym'me-tro-car'pous, 1 a-sym'me-tro-car'pous; 2 a-sym'me-  
 tro-car'pous, a. Bot. Having the fruit asym-  
 metrical. [*Gr. asymmetron* + *Gr. karpous*, fruit.]

a-sym'me-try, 1 a-sym'me-try; 2 a-sym'me-try, n. 1. Abs-  
 ence of symmetry or proportion. 2. Want of co-  
 ordination of interrelated parts, as of the eyes. 3. Chem.  
 Lack of symmetrical arrangement of particular  
 atoms in the molecule of a compound substance. 4. Math.  
 Incommensurability. [*Gr. asymmetria*, < a-  
 priv. + see SYMMETRY.]

a-sym'phy-note, 1 a-sym'phy-note; 2 a-sym'phy-note, a. Conch.  
 Not soldered at the hinge, as the valves of most +  
 river-mussels. Compare SYMPHYNOTE. [*L.* a-, not, +  
 SYMPHYNOTE.]

as-y'm-ptote, 1 as-y'm-ptote; 2 as-y'm-ptote, n. Math. A  
 right line which an infinite branch of  
 a curve continually approaches but  
 does not reach, and which can be re-  
 garded as a tangent to the curve at in-  
 finity. [*Gr. asymptotus*, < a-priv. +  
 syn, together, + *ptipō*, fall.] -parabolic  
 asymptote, a parabola which touches  
 the cubic at infinity in a 5-pointed con-  
 tact. -as-y'm-ptot-sy, n. The quality  
 of being asymptotic. [M.] -as-y'm-  
 ptot'ic, a. Of or pertaining to an asym-  
 ptote; approaching a state slowly but un-  
 ceasingly, as a curve approaches its  
 asymptote. -as-y'm-ptot'ic-ly, adv.

a-sym'ar-tete, 1 a-sym'ar-tete; 2 a-sym'ar-tete, n. 1. Not  
 fitted together; unconnected; incongruous. 2. Anc.  
 Pros. (1) Composed of differing meters. (2) Having in-  
 terior catalexis at either the ending or beginning of the  
 sections of a verse. [*Gr. asymartētos*, < a-priv. +  
 syn, together, + *artōō*, join.] -a-sym'ar-te'tic, a.

a-sym'euro-nism, 1 a-sym'euro-nism; 2 a-sym'euro-nism, n. Want  
 of coincidence in time. -a-sym'euro-nous, a.

A-syn'eri-tus, 1 a-syn'eri-tus; 2 a-syn'eri-tus, n. Bib. Rom.  
 xvi, 14.

a-syn'de-ton, 1 a-syn'de-ton; 2 a-syn'de-ton, n. 1. Gram.  
 Absence of connection or coherence of parts.

In all continuous writing the connection of sentences is the rule,  
 the absence of connection (asyndeton) the exception. There are  
 two kinds of asyndeton, the grammatical and the rhetorical.

WIKER *Gram. N. T. Greek* tr. by Moulton, § 60. [r. & c. 1877.]

2. Rhet. Absence of connectives; a figure securing en-  
 ergy by omitting connectives, as in *veni, vidi, vici*; con-  
 trasted with polysyndeton. [*L.* < *Gr. asyndeton*, neut.  
 of *asyndetos*, unconnected, < a-priv. + syn, together, +  
 deō, bind.] -as-y'n-de'tic, a. Of or pertaining to asyn-  
 deton; specif., without cross-references: said of a library cat-  
 alog. -as-y'n-de'tic-ly, adv.

as-y'ner'gi-a, 1 as-y'ner'gi-a; 2 as-y'ner'gi-a, n. Pathol. De-  
 fective central coordination of the muscles. [*Gr. a-*  
 priv. + *synergia*, synergy.] -as-y'ner'gy, a.

as-y'ne'si-a, 1 as-y'ne'si-a; 2 as-y'ne'si-a, n. Pathol. Great  
 mental dullness; stupidity. [*Gr. asynesia*, < a-  
 priv. + syn, together, + *hēmi*, put.]

as-y'n-ga'mi-a, 1 as-y'n-ga'mi-a; 2 as-y'n-ga'mi-a, n. Bot.  
 The maturity of anthers and stigmas in a flower at different  
 times; opposed to *syngamy* or *syngamiesis*. [*Gr. a-*  
 priv. + *syngama*, marriage.] -as-y'n-ga'mi-ty, a.

As-y'n-ja, 1 as-y'n-ja; 2 as-y'n-ja, n. [Juv.] -y'n-ja, pl. Norse  
 Myth. A goddess; feminine of AS. As-y'n-jet.

as-y'n-tac'tic, 1 as-y'n-tac'tic; 2 as-y'n-tac'tic, a. Lack-  
 ing syntactic construction; irregular; ungrammatical.

a-sys'to-le, 1 a-sys'to-le; 2 a-sys'to-le, n. Pathol. A  
 condition in heart-disease in which the contraction is in-  
 sufficient to free the ventricles of blood. [*L.* < a-, not, +  
 SYSTOLE.] -as-y's-to-llist, a.

a-syz'y-get'ic, 1 a-syz'y-get'ic; 2 a-syz'y-get'ic, a. With-  
 out syzygy or conjunction.

at, 1 at; 2 at, prep. [At primarily denotes simple occupan-  
 cy of a point in space; whence arise numerous allied and fig-  
 urative meanings, as of time, direction, etc., by which the  
 word partakes of the meaning of numerous other preposi-  
 tions and prepositional phrases.]

1. Of a point in space: (1) Occupying the exact position  
 of; as, at the center; at the intersection of two lines. (2)  
 In contact with; on; upon: with the relation somewhat  
 indefinite; as, at the top of the ladder; at the bottom of  
 the sea. (3) In proximity to; near; as, at my side; fig-  
 uratively, often suggesting connection or responsibility.

(4) Within the limits of; in; within; present in; as, at  
 the ball-ground; at college. 2. Of motion: (1) In the  
 direction of; in reference to; upon the thought of; in  
 pursuit of; in quest of; applying to; to; toward; after;

as, he shot at the mark; to mock at the preacher; they  
 are at me for money.

A great blow was about to be aimed at the Protestant religion.  
 MACAULAY *England* vol. i, p. 180. [r. & co. 1849.]

He endeavored at grace and grandeur of manner.  
 JOSHUA REYNOLDS *Literary Works* vol. ii, p. 105. [w. n. 1835.]

[By ellipsis of a verb, at in colloquial use sometimes ap-  
 proaches a verbal sense; as, she up and at him.]

(2) By way of; through; as in entrance or exit; as, smoke  
 came out at the windows.

And with grim laughter thrust us out at gates.  
 TENNYSON *Princess* iv, at. 35.

3. Of time: (1) On or upon the point or stroke of; upon  
 the coming of; as, the train will start at 6.14 A. M.; Con-  
 gress will adjourn at noon to-morrow.

At break of day I ventured forth.  
 WORDSWORTH *The Oak and the Broom* st. 11.

(2) During the lapse of; in; by; as, to lie awake at  
 night; to muse at twilight; it is at present uncertain.

I live in constant expectation of hearing something worse, and  
 at the long run, am seldom disappointed. COWPER *Works*, To  
 S. Rose, Mar. 11, 1790, p. 345. [r. & co. 1856.]

4. Of occasion, cause, or instrument; on the happening  
 of; on the utterance of; in response to; because of; by  
 means of; through the agency of; as, rise at the word of  
 command; at these words the audience broke into ap-  
 plause; pleased at something; sell goods at auction.

At thy rebuke they fled; at the voice of thy thunder they hastened  
 away. Ps. civ, 7.

5. Of degree, rate, value, etc.: up to; amounting to; to  
 the extent of; corresponding to; as, at least; at a dollar  
 a yard; at eighty degrees.

Stories like these must be taken at what they are worth. E. A.  
 FREEMAN *Norman Conquest* vol. ii, ch. 10, p. 476. [c. 1868.]

6. Of relations in general; in; engaged in; occupied with;  
 connected with; dependent on; in a state or con-  
 dition of; as, at school; at prayer; at war; at bay; at  
 one's mercy; at liberty; they soon saw what he was at.  
 These are suggestions of a mind at ease. ADDISON *Calo* act i, sc. 1.

7. [Colloq., So. U. S.] Of purpose, relation, occupation,  
 or the like; used simply as an intensive; as, where have  
 you been at? where does he live at? With, by, or  
 beside (a person). [ME. at, < AS. *at* (= Goth. *at*, to, to.)

Syn: about, because of, by, during, from, in, near, on, on  
 occasion of, to, toward, with, within. As regards place, at  
 is not used with names of countries; we say in England, in  
 France, etc.; with names of cities and towns the use of at  
 depends not chiefly upon the size of the place, but upon  
 the point of view; when we think merely of the local or geo-  
 graphical point, we use at; when we think of inclusive space,  
 we employ in; as, we arrived at Liverpool: there are few  
 rich men in this village.

-at that [Colloq., in addition; as well: an intensive use;  
 as, only a penny -at a bad one at that. -to be at it, to  
 be actively employed.]

**a'the-ism,** 1 **e'thi-lizm;** 2 **á'the-ism, n. 1.** The denial of or disbelief in God, as a First Cause, or Ground, of the universe. As dogmatic atheism is defined, as negative atheism it does not believe in, and as critical, or RéeVedal, or agnosticism (or agnosticism) it doubts, the existence of God. What is called *critical* or dogmatic *atheism*, so far from being the only kind of atheism, is the rarest of all kinds. Every man is an atheist who does not believe that there is a God.

R. FLINT *Agnosticism* sec. 3, p. 53. [s. '03.]

Theism affirms, *Atheism* denies, Agnosticism ignores, the existence of any such Soul.

WARDHOUGH *Sophisms* p. 247. [r. f. w. 1833.]

On its metaphysical side, *atheism* is the denial of anything psychical in the universe outside of human consciousness.

FISKE *Desting of Man* p. 13. [m. m. c. 1855.]

2. Disregard of God; godlessness in life or conduct. What is called practical *atheism* is not a kind of thought or opinion, but a mode of life. . . . It is the living as if there were no God. R. FLINT *Atheistic Theories* lect. i, p. 5. [w. p. 1879.]

**a-the-'na,** 1 **a-thí-ne;** 2 **a-thé-'na, n. Gr. Myth.** The daughter of Zeus and Metis who sprang from the head of Zeus with a mighty war-very and in complete armor. She is the Greek goddess of wisdom, war, counsel, protectress of Greek cities, and patroness of the useful and elegant arts, and supplies the type for the later Roman conception of Minerva: one of the chief of the usual deities of Athens; especially, as Pallas Athena, the tutelary deity of Athens; her attributes are the serpent, the owl, and the griffin adorned with Medusa's head. Her images, Palladas, guarded the places where they were kept, especially that guarded in the citadel of Troy. The festivals in her honor were the Three Sacred Plots (seed-time), Procharistia

(for all the magistrates at the end of winter), *Skrophoria* (for priests in summer), *Oschophoria* (the vintage), *Chalketa* (industrial arts), *Phlynteria* and *Callynteria* (cleaning the image in the Erechtheum), *Arrhephoria* (bringing of sacred objects from the temple of Aphrodite by night to the Acropolis through an underground passage), *Panathēnaia* (new robes for adorning the image).

In the reign of Cecrops both Poseidon and Athena contended for the possession of Athens. The gods resolved that whichever of them produced a gift most useful to mortals should have possession. . . . Poseidon struck the ground with his trident and straightway a horse appeared. Athena then planted the olive. The gods . . . gave the city to the goddess from whom it was called Athens.

See *Classical Dict.* ed. by E. H. Blakney, p. 85. Under specific names Athena has been variously identified as goddess or patroness; as Athena Alea (birth, fosterage, and light); A. 2. *Class. Antiq.* One who took part in the public games. [*L.* *athleta*, < Gr. *athlētēs*, < *athlon*, prize.]—*Athlete* of Christendom, Scanderbeg (1403-1468), an Albanian chieftain who stemmed the invasions of the Turks.

*ath-let'ic*, 1 *ath-lit'ic*; 2 *ath-lit'ic*, a. 1. Of or pertaining to athletes or their contests and sports.

*Athletic* sports, if followed properly, . . . are admirable for developing character. T. ROOSEVELT in *N. Am. Rev.*, 1890.

2. Having the qualities of an athlete; strong; vigorous; muscular. *ath-let'ic*, a.

*Syn.* able-bodied, brawny, burly, lusty, mighty, muscular, powerful, robust, sinewy, stalwart, strong, vigorous, —*Ant.* effeminate, feeble, nerveless, powerless, puny, weak.

*ath-let'ic*, n. 1. An athlete. 2. Athletics.—*ath-let'ic-ism*, 1 *ath-lit'ic-ism*; 2 *ath-lit'ic-ism*, n. The practice of or devotion to athletics.

*ath-let'ic-ism*, 1 *ath-lit'ic-ism*; 2 *ath-lit'ic-ism*, n. 1. Games and sports, collectively, that depend wholly or partly on feats of physical strength, such as baseball, cricket, rowing, and swimming. 2. In a restricted sense, feats of strength performed for their own sake, and not as an incident of any game, as throwing the hammer, running, leaping, tumbling, etc.; especially, outdoor feats in which the maintenance of health is not the prime object. Compare *Gymnastics*. 3. Any system of physical training by gymnastic exercises and outdoor sports; also figuratively.

*Ath-lete*, 1 *ath-lit*; 2 *ath-lit*, n. 1. *Her.* A pursuivant of the king's arms. See *HERALDS*. 2. *COLLEGE*, under *HERALD*, n. 2. Earl of, see GINKEL. 3. A town in Roscommon county, Ireland; unsuccessfully besieged by the English, 1688. [*For* of the moon.]

*ath-lo-the-tic*, 1 *ath-lit'ic*; 2 *ath-lit'ic*, n. *Gr. Antiq.* An agonothete. [*Gr.* *athlotheitēs*, < *athlon*, prize, + *tithēmi*, place.]

*Ath-mal'ik*, 1 *at-mul'ik*; 2 *āt-mūl'ik*, n. A state in the province of Orissa, India; 730 sq. m. *Ath-mul'ik*, a.

*Ath-ma-tha*, 1 *ath-ma-tha*; 2 *ath-ma-tha*, n. *Bib.* (Doual.)

*Ath-ni*, 1 *at-ni*; 2 *āt-ni*, n. A town in the Belgium district, Bombay, India.

*Ath-ol*, 1 *ath-ol*; 2 *ath-ol*, n. A manufacturing town in the county of Mass.

*ath-ol-brose*, 1 *ath-ol-brōs*; 2 *ath-ol-brōs*, n. [*Scot.*] A drink containing brandy or whisky and honey or oatmeal.

*Ath-ole*, 1 *ath-ol*; 2 *ath-ol*, n. A northern district in Perthshire, Scotland; 450 sq. m. *Ath-oll*, a.

*Ath-ore*, 1 *ath-ore*; 2 *ath-ore*, n. Same as *ATHOR*.

*Ath-os*, 1 *ath-os*; 2 *ath-os*, n. 1. A headland projecting from Saloniki department, Greece, into the *Ægean* sea; 6,350 ft. high; the Holy Mountain of the modern Greeks and the site of 22 convents. 2. In Dumas' *Three Musketeers*, a French aristocrat, the eldest of the Musketeers.

*Ath-ros*, 1 *ath-ros*; 2 *ath-ros*, n. 1. In three divisions. CHAUCER *C. T.* l. 2,935.

*Ath-ros*, 1 *ath-ros*; 2 *ath-ros*, n. *Pathol.* A condition, especially in children. [*L.* < *a-*, not, + *Gr.* *threpsis*, nourishment.]—*Ath-ros-ic*, a.

*Ath-rill*, 1 *ath-rill*; 2 *ath-rill*, a. & n. In a thrill; thrilling.

*Ath-rub*, 1 *ath-rub*; 2 *ath-rub*, a. & n. Thrubbing.

*Ath-throng*, 1 *ath-throng*; 2 *ath-throng*, a. & n. Thronging.

*Ath-tar*, 1 *ath-tar*; 2 *ath-tar*, n. The supreme deity of the ancient Minnans of southwestern Arabia, corresponding to Ashtoreth or Ishtar.

The Babylonian and Assyrian form Ishtar is modified from 'Ashtar' [which is identical with the South Arabian 'Ashtar' in *New Schaff-Herzog Encyc.* vol. i, p. 313. [*s.* *a. w. co.* '08].

*Ath-twart*, 1 *ath-twart*; 2 *ath-twart*, a. 1. From side to side; across; transversely. 2. [*Rare.*] So as to thwart; contrariwise; perversely.—*Ath-twart*'ships, a. *Naut.* Crosswise of the ship.—*Ath-twart*'wise, a. *Crosswise*.

*Ath-twart*, prep. 1. *Naut.* Across the course of; as, *athwart* the bow of the ship. 2. From side to side of; in the direction of the breadth of; as, *athwart* the deck.

Countless stars pass into view as the telescope is swayed by the earth's rotation *athwart* the rich regions of the galaxy.

R. A. PROCTOR *Expanse of Heaven, Drifting Stars* p. 299. [*s.* 1874.]

3. In opposition to; contrary to; against; as, *athwart* one's plans. [*L.* < *a-*, on, +

Landing. 3. A city, county-seat of Cass county, Ia. 4. A City, seashore resort in Atlantic county, N. J. 5. A Highlands, a village and resort on New York Bay in Monmouth county, N. J. 6. A Mine, a village in Houghton county, Mich. 7. A Peak, a summit at the S. end of Wind River Mts. in Wyoming; 12,794 ft. high.—A. Sisters, the Atlantes.—A. stone, ivory.—A. time, same as Colonial time. See STANDARD time, under TIME, n.

at-lan'tid, 1 at-lan'tid; 2 at-lan'tid, n. An atlantoid gastropod.

at-lan'ti-dae, 1 at-lan'ti-di; 2 at-lan'ti-dae, n. pl. 1. Conch. A family of heteropodous gastropods with a spiral visceral bump and hyaline spiral shell. 2. Ethnol. The Mediterranean race: an old term. [*Gr. Atlas (Atlant-), Mount Atlas; see ATLAS.*]

at-lan'ti-dēs, 1 at-lan'ti-diz; 2 at-lan'ti-dēs, n. pl. 1. The Pleiades, the daughters of Atlas. 2. The inhabitants of Atlantis. 3. Same as HESPERIDES. [*L., < Gr. Atlantes, pl. of Atlantis, Atlantis, daughter of Atlas; see ATLAS.*]

at-lan'tis, 1 at-lan'tis; 2 at-lan'tis, n. [*L.*] A supposed prehistoric continent or island, located by Plato and other ancient writers in the far west, and believed to have been engulfed in the ocean by an earthquake and its site occupied by the present Atlantic ocean.—the New Atlantis, a philosophical allegory by Lord Bacon, the scenes of which are set in a mythical Atlantean island, on the shores of which he is shipwrecked and there finds an organization for the development of natural science, etc.

at-lan'to, 1 at-lan'to; 2 at-lan'to, n. Pertaining to the atlas of the vertebrae: a combining form of ATLAS.—at-lan'to-epi-strophi-al, a. Of or pertaining to the atlas and the axis or epistrophe. —at-lan'to-axi-al, —at-lan'to-mas'toid, a. Of or pertaining to the atlas and the mastoid process in common. —at-lan'to-oc-ci-pi-tal, a. Of or pertaining to the atlas and the occipital bone. —at-lan'to-o-don'toid, a. Of or pertaining to the atlas and the odontoid process.

at-lan'toid, 1 at-lan'toid; 2 at-lan'toid, a. Conch. Of or pertaining to the Atlantidae. [*ATLANTOID, -OID.*]

at-lan'to-Med'i-ter-ra-ne-an race. Anthropol. Same as LITTORAL RACE.

at-lan'to-sau'ri-dae, 1 at-lan'to-sau'ri-di; 2 at-lan'to-sau'ri-dae, n. pl. Herp. A Jurassic family of huge saurpoidous dinosaurs with the chevron-bones of the caudal vertebrae united and subconic teeth slightly incurved. [*Gr. Atlas (Atlant-), Atlas, & sauros, lizard.*] —at-lan'to-sau'ri-d, n. —at-lan'to-sau'rid, a. & n.

at-lan'to-sau'rus, 1 at-lan'to-sau'rus; 2 at-lan'to-sau'rus, n. Herp. 1. A genus typical of Atlantosauridae. 2. [a.] A huge dinosaurian reptile of this genus. at-lan'to-sau'ri-tas, 1 at-lan'tas; 2 at-lan'tas, n. To support; to carry on one's head or shoulders, like Atlas.

at-las, 1 at-las; 2 at-las, n. 1. A volume of maps usually bound together with letterpress: so called probably from representations of the Titan Atlas supporting a globe, which formerly adorned the title-page of such collections. 2. Hence: (1) Any bound collection of plates or engravings showing systematically the development of a subject. (2) Any work producing such effect by tabular arrangement. (3) A size of paper, 26 by 33 (34) inches. 3. Arch. See ATLANTIDES. 4. [A.] Class. Myth. One of the older family of gods, a Titan who was supposed to support the pillars of heaven on his shoulders as a punishment for making war against Zeus; hence, fig., one who sustains a great burden. 5. Anat. The first cervical vertebra or topmost bone of the spine. It articulates above with the condyles of the occipital bone, allowing nodding movement of the head, and rests on the second vertebra, upon which it turns in rotation of the head. See ARTICULATION. 6. A large Oriental scarab beetle (*Chalcosoma atlas*), brilliant olive-green in color. 7. [A.] A double range of mountains in N. W. Africa, culminating in Tamjurt peak, in S. Morocco, about 14,500 ft. high. [*L., < Gr. Atlas, Atlas, < a-euphonic + tlaō, bear.*] —at-las'fo'lio, n. A large square folio book made of atlas paper.

at-las, n. [E. Ind.] A silk fabric interlaced with satin-weaves.—at-las'weaves', n. pl. Same as SATIN-WEAVES.

at-las'ite, 1 at-las'it; 2 at-las'it, n. Mineral. A cupric carbonate containing chlorin: probably a mixture of atacamite and azurite. [*ATLAS, -I.*]

at-las'ti, 1 at-las'ti; 2 at-las'ti, n. [Mex.] The ancient Mexican spear-thrower or throwing-stick.

at-le, 1 at-le; 2 at-le, n. [Egypt.] The Oriental tamarisk (*Tamarix orientalis*). at-le't, —at-le'e-gal', n. A gall produced upon the atlee and filled with a deep-scarlet liquid.

at'li, 1 at'li; 2 at'li, n. Scand. Myth. A king in the Volungia Saga, who makes Gudrun his wife and later murders her brothers. She avenges their death by killing Atli and his sons. Compare EVIL.

at'lo, 1 at'lo; 2 at'lo, n. From ATLAS, 5: a combining form used to denote connection with the atlas of the vertebral column. Compare ATLANTO.—at'lo-ax'oid, a. Anat. Of or pertaining to the bones called the atlas and the axis. See ARTICULATION.—at'lo-o-don'toid, a. Of or pertaining to the atlas and odontoid process in common.

at'loid, 1 at'loid; 2 at'loid, a. Anat. Pertaining to, connected with, or turning toward the atlas. [*ATLAS, -I.*]

at-loi'do-, 1 at-loi'do-; 2 at-loi'do-. From ATLOID: a combining form used to denote relation to, or connection with the atlas of the vertebral column.—at-loi'do-ax'oid, a. Relating to the atlas and axis.

at'luk, 1 at'luk; 2 at'luk, n. [Greenland.] A seal's breathing-hole in the ice.

The bearded seals have no atluk. They depend for respiration upon the accidental chasms in the ice.

at'lu-nak, 1 at'lu-nak; 2 at'lu-nak, n. [Greenland.] A seal-skin line used for catching walrus.

at'man, 1 at'man; 2 at'man, n. [Sansk.] 1. The soul, or selfhood; the spark in man emanating from divinity. 2. [A.] The spirit, or highest principle of life in the universe; the supreme Self or ego. In the Upanishads the Atman is regarded as the sole reality. "He created the whole world, whatever exists; having created it he entered into it as the individual soul." at'mā, n.

For Atman, originally breath or spirit, comes to mean Self and Self alone.

at'mi-a-try, 1 at-mi-a-try; 2 at-mi-a-try, n. Med. The treatment of disease by natural or medicated vapors. [*Gr. atmis, vapor, & iatreia, healing.*] at'mi-a-try; at'mi-d'i-a-try.

at'mic, 1 at'mic; 2 at'mic, a. 1. Meteor. Pertaining to humidity; as, an atmic wind-rose. 2. Of or belonging to atman. [*Gr. atmis, vapor.*]

at'mid-, 1 at'mid-; 2 at'mid-. From Greek atmis, vapor;

a combining form used in chemistry to denote formation by the hydrolyzing action of superheated water; used also adjectively; as, atmid compounds.—at'mid-at'bu-s, n. Chem. A substance resembling albumose, derived from protid through the action of superheated water.—at'mid-dom'e-ter, n. An atomometer.—at'mid-dom'e-try, n. Same as ATMOMETRY.—at'mid'o-me'tric, a.—at'mid'o-scope, n. See ATMETER.

at'mis-mom'e-ter, 1 at'mis-mom'ter; 2 at'mis-mom'e-ter, n. See ATMETER.

at'mo, 1 at'mo; 2 at'mo, n. Physics. The pressure of 760 millimeters of mercury in the latitude of Paris, at sea-level, and at 0° C.: a standard of pressure. [*ATMOSPHERE.*]

at'mo-, 1 at'mo-; 2 at'mo-. From Greek atmos, vapor: a combining form.

at'mo-cau'sis, 1 at'mo-cau'sis; 2 at'mo-cau'sis, n. Med. Cauterization with steam as a therapeutic agent. [*Gr. atmos, vapor, & kausis, a burning.*] at'mo-cau'sis't.

at'mo-cau'ter-y, 1 at'mo-cau'ter-y; 2 at'mo-cau'ter-y, n. Med. An instrument for applying superheated steam. [*Gr. atmos, vapor, & cauteriz.*]

at'mo-gen'ic, 1 at'mo-gen'ic; 2 at'mo-gen'ic, a. Petrol. 1. Pertaining to deposits formed by fumeroles. 2. Eollan.

at'mo-graph, 1 at'mo-graf; 2 at'mo-graf, n. Med. An apparatus registering the movements of respiration. [*Gr. atmos, vapor, & graphō, write.*]

at'mol'o-gy, 1 at'mol'o-gi; 2 at'mol'o-gy, n. The branch of science that treats of the laws of aqueous vapor. [*Gr. atmos, vapor, & logia, a discourse.*] at'mol'o-gist, n. One skilled in atmology.

at'mol'y-sis, 1 at'mol'y-sis; 2 at'mol'y-sis, n. Chem. The act or process of partially separating mixtures of gases into their ingredients by means of their different diffusibility through porous substances. See OSMOSIS.

at'mo-lyze, 1 at'mo-lyze; 2 at'mo-lyze, v. To separate by atmology. [*Gr. atmos, vapor, & lyzo, to loose.*] at'mo-lyze, n. —at'mo-ly-zal', —at'mo-ly-zation, n. —at'mo-ly-ter, or —ly-ter, n. Chem. An instrument for the separation of gases by diffusion.

at'mom'e-ter, 1 at'mom'i-ter; 2 at'mom'e-ter, n. Meteorol. An instrument for measuring the rate of evaporation. Many instruments have been devised for measuring evaporation, variously known as atmidometers, atmometers, atmidometers, atmometers, evaporimeters, evaporimeters, and evaporimeters. Also frequently referred to under the names of their inventors; as, Leslie's atmometer; the Piche evaporimeter; or with mention of some feature of the construction; as, micrometer, weighing, a. [*Gr. atmos, vapor, & metron, measure.*] —at'mo-met'ric, a.

at'mo-met'ro-hy-grom'e-ter, 1 at'mo-met'ro-hy-grom'i-ter; 2 at'mo-met'ro-hy-grom'e-ter, n. Meteorol. A combined atmometer and hygrometer.

at'mom'e-try, 1 at'mom'i-try; 2 at'mom'e-try, n. a. atmometer test; b. p. The measurement of evaporation; atmology.

at'mos-phere, 1 at'mas-fer; 2 at'mos-fer, n. 1. The mass or body of gases, chiefly air, that surrounds the earth. See AIR.

If it were everywhere as dense as it is at sea-level, the upper limit of our atmosphere would be about five miles high.

J. D. STEELE Physics p. 112. [CHAUR. 1889.]

2. The gaseous envelop surrounding any heavenly body, especially the sun or a planet; as, the atmosphere of Mars.

3. The climatic condition of any place or region regarded as dependent on the air; as, the atmosphere of the Campagna is malarial.

4. The surrounding element or influence, social or moral; environment.

In "Philothea" (1835) Mrs. Child told a tale of Pericles and Aspeia with an atmosphere of Swedish romanticism and Bostonian transcendentalism. Edinburgh Review Jan. 1891, p. 44.

5. A conventional unit of pressure per unit of area.

The unit in use in England and the United States is the equivalent of the weight of a vertical mercury-column 1 centimeter wide and 30 inches high, at the sea-level at London, at a temperature of 0° C. For the French unit see ATM.

6. Entom. The outer ring of an ocellus or eye-spot.

7. Paint. The feeling or effect, as of air, light, space, or warmth, given as an environment of any subject.

8. A supposed force-producing medium surrounding a body. [*Gr. atmos, vapor, & sphaira, sphere.*]

at'mos-pher'ic, 1 at'mos-fer'ic; 2 at'mos-fer'ic, a. 1. at'mos-fer'ic, of, or pertaining to, or belonging to the atmosphere; as, an atmospheric effect.

2. Dependent on the atmosphere as a cause or motor; as, an atmospheric engine.

at'mos-pher'ic-cal, —at'mos-pher'ic brake, a vacuum-brake. Compare Westinghouse brake, a. —at'mos-pher'ic HAMMER, n. A line.

1. A line on an indicator-diagram representing the position of the indicator-piston when there is neither steam-pressure nor vacuum in the cylinder. 2. A dark line in the solar spectrum, due to the absorption of the earth's atmosphere.

a. pressure, the pressure of 14.7 pounds per square inch exerted at sea-level in all directions by the atmosphere under certain standard conditions. See ATMOSPHERE, 5.—a. railway, see PNEUMATIC RAILWAY, under PNEUMATIC.

a. spring, an air-spring.—at'mos-pher'ic-cal-ly, adv.

at'mos-pher'ol'o-gy, n. [Rare.] The science of the atmosphere; at'mos-pher'ics.

at'mos'te-on, 1 at'mos'te-on; 2 at'mos'te-on, n. [A. pl.] Ornith. An ossified tube that carries air into a bone; an air-bone. [*Gr. atmos, air, & osteon, bone.*] —at'mos'te-al, a. Of or pertaining to the atmosteon; pneumatic.

at'mu, 1 at'mu; 2 at'mu, n. Same as TUM.

at'o, 1 at'o; 2 at'o, n. [P. I.] A division of a town or ward among the Bontoc Igorots.

A-to'e, 1 a-to'e; 2 a-to'e, n. A town in the Benguet district of Luzon, P. I.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

a-to'e'ia, 1 a-to'e'ia; 2 a-to'e'ia, n. [Sp.] Esparto-grass.

Island consisting of a reef formed from the petrified skeletons of coral polyps and enclosing a central lagoon. Some atolls are very large, being nearly 100 miles in circumference, while the lagoons have a mean depth of 25 fathoms. Atolls are common in the Pacific, often support a considerable amount of vegetation, and are frequently inhabited.

The formation of coral islands has been explained by Darwin on the hypothesis of a subsidence of the sea floor. The circular islands, or atolls, . . . rise with sometimes tolerably steep slopes from profound depths until they reach the surface of the sea. But as the coral polyps do not live at a greater depth than about 15 or 20 fathoms and could not have grown upward therefore from the bottom of a deep sea, Darwin inferred that the sites of these coral reefs had undergone a progressive subsidence, the rate of their upward growth keeping pace, on the whole, with that of their depression. . . . On this view what is termed a fringing reef would first be formed fringing the land. . . . Fringing reefs of this character are of common occurrence at the present time. In the case of a continent, they front its coast for a long distance, but they may entirely surround an island. . . . Prolonged slow depression would continually diminish the area of the land thus encircled, while the reef might retain much the same size and position. At last the final peak of the original island might disappear under the lagoon and an atoll, or true island, would be formed. GEORGE TEXT-BOOK OF GEOLOGY vol. i, p. 618. [MACC. '03.]

at'om, 1 at'om; 2 at'om, n. 1. One of the hypothetical indivisible parts of which all matter is supposed to be formed. (1) In modern scientific usage, the smallest portion into which matter can be divided, even by chemical separation, and still preserve its identity; the chemists' unit: now held to be made up of electrically charged particles. See ELECTRON; PROTON. Some undergo spontaneous disintegration. See RADIUM.

The molecule may be made up of many differing atoms, and all the chemical qualities of substances are held to depend on the number, properties, and relative positions of these constituent atoms. Thus, in chemistry, two atoms of hydrogen and one of oxygen make up a molecule of water. (2) A group of particles forming a specific radical; as, an atom of amidogen (NH<sub>2</sub>). (3) Physics. Sometimes, a molecule. (4) Ancient Philos. One of the ultimate particles composing the universe; a microcosm. See ATOMIC PHILOSOPHY, ATOMISM.

Atom . . . now considered as a stable collection of numerous electrons forming a sort of planetary system in orbital motion. The Science Year-Book, 1910, p. 83

2. Any very small thing or degree; a particle; an iota; as, not an atom of evidence. [*Gr. atome, a small atom; < Gr. atomos, a, or priv., & temnō, cut.*] Sm. see PART, PARTICLE, at'om-soul', n. Primitive consciousness, or that which corresponds to consciousness, conceived of as existing in atomic form. See PANPSYCHISM.

gram a. (Chem.), the atomic weight of an atom expressed in grams, as, gram atom oxygen 16.

—at'om-e-chanc'es, n. The mechanics of atoms.—at'om'i-cule, n. Chem. A proposed subdivision of atoms whose valence exceeds unity. Am. Jour. of Math. vol. i, p. 64.—at'om-i-fer-ous, a. That bears atoms, leaving an atom.

a-tom'ic, 1 a-tom'ic; 2 a-tom'ic, a. 1. Of or pertaining to an atom or atoms, or the chemical or philosophical doctrine of atoms.

The latest atomic hypothesis is one which assigns an electrical structure to the atom. . . . It is rendered probable by the fact that electric charges put into a liquid will decompose it, and by the fact that one of the chief sources of electricity is in voltaic cells in which chemical combination occurs and charges are given out. Encyc. of Religion and Ethics vol. ii, pp. 208, 209. [S. '10.]

2. Very minute; infinitesimal; also, simple; elemental.

at'om-at'ic; a-tom'i-cal.

—atomic heat, the specific heat of an atom of a chemical element as compared with that of an atom of hydrogen; obtained by multiplying the specific heat of the element by its atomic weight. It is practically the same in nearly every element, approximating 6.4. —a. or atomistic philosophy, the philosophy of atomism. See ATOMISM.—a. theory, (Chem.) the doctrine of definite combining proportions, or the theory that chemical elements unite with one another, atom by atom, and in definite simple proportions.—a. value, see VALENCE.—a. volume, or specific volume, the space occupied by a quantity of an element as compared with its atomic weight; obtained by dividing the specific gravity of the element by its atomic weight.—a. weight, the weight of an atom or a chemical element as compared with that of an atom of hydrogen. See COMBINING WEIGHT, under COMBINE.—a-tom'i-cal-ly, adv. In an atomic manner; as, or regarded as an atom or atoms.—at'om-i-fer, n. An atomist.

at'om-i-ty, 1 at'om-i-ty; 2 at'om-i-ty, n. Chem. 1. The number of atoms in a molecule. 2. Valence.

3. In the molecule of a compound the number of replaceable atoms or groups.

A-tom'i-o-so'ma, 1 a-tom'i-o-so'ma; 2 a-tom'i-o-so'ma, n. pl. Same as MONOTETRA.

at'om-ism, 1 at'om-izm; 2 at'om-izm, n. 1. The philosophy which attempts to account for all material existence, or even for the entire universe, as constituted of simple, indivisible, and minute particles or atoms.

Atomism is one of the most ancient of philosophical doctrines. It was first clearly proclaimed by Leucippus and Democritus (about 460 B. C.), who explained everything as due to the ceaseless movement of atoms differing in shape, order, and position. Democritus held that even the soul consists of fine, round, and smooth atoms.

Leaving us fancy-sick. KEATS *Endymion* bk. i, st. 26.  
**at-ō-my**, 1 at-ō-mī; 2 at-ō-mī, n. [-MIES, ī-mīz; 2 -mīs, pl.] An anatomy or skeleton; hence, a very lean or skeleton-like person or creature; an erroneously formed word, originating in a misunderstanding of *anatomy* as an *atomy*. [**ANATOMY**.]  
**A-ton**, 1 at-ōn; 2 at-ōn, n. *Egypt. Myth.* The sun's disk, whose worship Amenophis IV. (c. 1466 B. C.) introduced into Egypt.  
The new dogmas were known as 'the teachings' and their tenets, as revealed in the poems composed in honor of the Aton, breathe the purest and most exalted monotheistic spirit.  
A. H. GARDNER in *Encyc. Brit.* 11th ed. vol. ix, p. 52.  
**a-tone**, 1 a-tōn; 2 a-tōn, n. [-TONED, a-TON-ING.] 1. To make expiation for; render satisfaction for; make amends for. 2. [Archaic.] To bring into harmony or agreement; propitiate; satisfy; appease.  
Can naught but blood our feud atone!  
SCOTT *Lady of the Lake* can. 5, st. 13.  
So strives every gracious nature to atone itself with law.  
LOWELL *Anti-vapors* st. 3.  
II. 1. To make an expiation or propitiation, as for sin or a sinner; make amends, reparation, or satisfaction, as for an offense or wrong; serve as a set-off, as for an error or defect.  
Thy purpose hath atoned for thy hasty rashness.  
SCOTT *Iranhoe* ch. 34, p. 287. [r. & c.]  
'Twas but in giving that thou couldst atone  
For too much wealth amid their poverty.  
GEORGE ELIOT *Legend of Jubal* st. 36.

2. To be at one; agree.  
At one, for 'reconciled,' is as old as Robert Mannyng: 'make an onement with God,' 'set at onement,' are expressions of the sixteenth century; and I am not aware that atonement and atone are of an earlier date. Further, atonement seems to have preceded atone. The latter nowhere occurs in the Bible.  
F. HALL *Fals Philology* p. 5. [s. 1872.]  
[ME. at on (see AT, ONE), in phrases be at on, be at one, t. c., agree; set at on, set at one, t. c., reconcile.] — a-to-na-bil(e), a-tone-a-bil(e), a-at-one†, adv. At one; at once. — a-ton-er, n. — a-ton-ing-ly, adv. — at-one-ness, n. [Rare.] A state of harmony.  
**a-tone†**, n. Reconciliation; expiation; reparation.  
**a-tone-ment**, 1 a-ton-ment or -ment; 2 a-ton-ment, n. 1. The act of atoning, or its results. 2. That which atones; any satisfaction, amends, reparation, or expiation made for wrong or injury; something suffered, done, or given by way of propitiation or equivalent.  
The least atonement I can make is to become no longer free.  
BRYAN *Lines to a Young Lady* st. 7.  
When a man has been guilty of any vice or folly, I think the best atonement he can make for it, is to warn others not to fall into the like.  
ADISON *Spectator* Mar. 9, 1710.  
3. *Theol.* (1) The expiation of sin and the propitiation of God by the incarnation, life, sufferings, and death of Christ; the obedience and death of Christ in behalf of sinners as the ground of redemption; in the narrow sense, the sacrificial work of Christ for sinners. In the theology of many, including nearly all Universalists and Unitarians, atonement signifies the act of bringing men to God, in contradistinction to the idea of reconciling an offended God to men.  
Redemption implies the complete deliverance from the penalty power, and all the consequences, of sin; atonement in the sense of the sacrificial work, whereby the redemption from the condemning power of the law was insured.  
H. B. SWIN *Christian Theology* p. 437. [a. & s. 1884.]  
(2) The work of Christ in the reconciliation of God and man, considered as mediatorial rather than sacrificial, or as an uplifting moral power or influence upon the minds of men.  
Th' answer, but dreamed of before, to creation's enigmas,—  
Atonement! LONGFELLOW *Children of the Lord's Supper* st. 6.  
The theories by which theologians attempt to explain the facts of the atonement are mainly three: (1) the *Atonement* or *sacrificial*, that the atonement consists fundamentally in Christ's sacrifice for man's sins; (2) the *remedial*, that God, through the Incarnation, entered into humanity so as to eliminate sin by the ethical process of Christ's life and death, and make the human race at one with himself; (3) the *Social* or *moral influence*, that Christ's work consists in influencing men to lead better lives. The *sacrificial* theory takes two general forms: (a) the *governmental*, that Christ's work was intended to meet the demands of the law of God and make such a moral impression upon men in favor of the divine government as to render the forgiveness of man safe; (b) the *satisfaction*, that it was intended to satisfy divine justice and make the forgiveness of man possible and right. Manifest shades of opinion are embraced under these various theories.  
4. *Christian Science*. See the quotation:  
Atonement is the exemplification of man's unity with God, whereby man reflects divine Truth, Life, and Love.  
MARR B. EDDY *Science and Health* p. 18. [a. v. s. 10.]  
5. [Archaic.] Reconciliation; agreement.  
SENZ see PROPITIATION.

 It must be better to attempt a duty, though we fail, than never to attempt it at all.  
 W. B. BOOTH *In Darkest England* pt. ii, p. 282. [R. & W. 1891.]  
 2. To try to overcome, master, win, seduce, or take by force; attack; assault; make an effort against; as, to *attempt* a fort. 3. To make an essay of, or adventure upon, as something perilous or untried; as, to "*attempt* the future's portal." LOWELL *Present Crisis* st. 18.  
 4. To endeavor to gain; test; prove.  
 III. t. 1. To make an attempt. [**F.** *attemper*, < *L.* *attemperō*, < *ad*, to, + *temperō*, try, freq. of *tendo*, stretch.]  
 Syn. endeavor, essay, strive, try, undertake. To *attempt* expresses a single act; to *endeavor*, a continuous exertion; we say I will *endeavor* (not I will *attempt*) while I live. To *attempt* is with the view of accomplishing; to *essay*, with a view of testing our own powers. To *undertake* is to accept or take upon oneself as an obligation, as some business, labor, or trust; the word often implies complete assurance of success; as, I will *undertake* to produce the witness. To *strive* suggests little of the result, much of toll, strain, and contest, in seeking it; I will *strive* to fulfill your wishes, i. e., I will spare no labor and exertion to do it. *Try* is the most comprehensive of these words. The original idea of testing or experimenting is not thought of when a man says "I will *try*." To *attempt* suggests giving up, if the thing is not accomplished at a stroke; to *try* implies using other means and studying out other ways if it is not at first successful. *Endeavor* is more mild and formal; the pilot in the burning pilot-house does not say "I will *endeavor*" or "I will *attempt* to hold the ship to her course," but "I'll *try*, sir!" - **Ant.** abandon, dismiss, drop, give up, let go, neglect, omit, overlook, pass by, throw away, throw over, throw up. - *at-tempt'a-ble* (ē), a. - *at-tempt'er*, n. 1. One who attempts. 2. One who makes a criminal attempt, an assailant. 3. A tempter. - *at-tempt'fort*, -*at-tempt'ing*, I. p. Venturous; enterprising. II. n. An attempt; endeavor. - *at-tempt'iv* (ē), a. Ready for bold attempts; venturous.  
 Daniel (1603), among other grand qualities which he ascribes to the English race, describes them as '*attemper*,' or prompt for high attempts. TRENCH *English, Past and Present* lect. v, p. 230. [O. P. F. 1889.]  
**at-tempt'**, n. 1. A putting forth of effort, especially of unsuccessful effort, to effect or to do something or to attain an end; an undertaking; trial; endeavor; essay. The poorest success, provided the attempt has been genuine, will enable one to enter into any art ten times better than before. MACDONALD *Annals of a New-Worlder* p. 236. [O. P. F. 1889.]  
 2. An effort to effect an object or purpose by violence; an attack; assault. 3. Law. An act which, if consummated, would effectuate a criminal intent; as, an attempt to commit a crime. Criminal attempt is distinguished from criminal intent in that the former implies a physical endeavor to accomplish an act, the latter the quality or condition of mind with which the endeavor is made or the act done. 4. The object attempted or aimed at. Syn. see *EFFORT*.  
**at-tempt'a-ble** (ē), 1 a-tempt'a-ble; 2 ā-tē-mpt'a-ble, n. [**AT-TEMPT**, 1 -**AT-TEMPT**, 2 -**AT-TEMPT**, pl.] 1. The state or quality of being attemptable. 2. That which may be attempted.

The persons collectively that attend any service, entertainment, etc. 3. A body of attendants; retinue. 4. Attendance. 5. Act of awaiting; expectation. - *at-tend'an-cy*; -*at-tend'ance*, n.  
**at-tend'ant**, 1 a-tend'ant; 2 ā-tēnd'ant, a. 1. Following or accompanying in causal connection; accompanying; consequent; as, vice and its attendant miseries.  
 The separation of friends and families is, perhaps, one of the most distressful circumstances attendant on penury.  
 GOLDSMITH *Vicar of Wakefield* p. 11. [O. A. B. 1880.]  
 2. Following as an attendant or attendant; as, the king and his attendant retinue. 3. Law. Owing service or duty (to); dependent; as, his wife shall be *attendant* to his heir. 4. Attentive. - *at-tend'ant-ly*, adv.  
**at-tend'ant**, n. 1. One who attends in a subordinate capacity; a servant; follower; retainer; companion; as, the attendants of the crown prince. 2. One who attends with hope of favor, etc.; a sutor. 3. Something that accompanies; accompaniment; consequent; concomitant. Beauty, Sublimity and Romance, are to his mind ever *attendant* of man and nature. E. P. WHIFFLE *Essays, Wordsworth* in vol. i, p. 245. [O. A. B. 1882.]  
 4. One who is present; as, an attendant at divine service. 5. One who owes service or is dependent, as a retainer. Syn. see *ACCOMPANY*. - **Prep.** an attendant of the king, or an attendant to, on, or upon the royal person; an attendant of the service, - master attendant (Eng.), an executive officer acting as assistant of the superintendent of naval dockyards.  
**at-tent'**, 1 a-tent'; 2 ā-tēnt', a. Full of attention; eagerly or sedulously attentive or directed; intent.  
 His eyes *attended* their conscious look and ran around the bushied circle of attend faces.  
 TOWNSEND *Fool's Errand* p. 93. [O. A. B. 1882.]  
 [**L.** *attentus*, pp. of *attendo*; see *ATTEND*.]  
**at-tent'at**, 1 a-tent'at; 2 ā-tēnt'at, n. [F.] 1. Cfr. & Canon Law. An improper step in a cause, taken by a judge of an inferior court, pending an appeal. 2. An assault; a criminal attempt. - *at-tent'ate*, n.  
**at-tent'ion**, 1 a-tent'shon; 2 ā-tēnt'shon, n. 1. The direction of the mental powers to a specific object or objects, especially when vigorous, voluntary, and concentrated; close or earnest attending.  
 Attention . . . is another term for tension or effort, and was doubtless first transferred to the spiritual operation from the strained condition of the part or whole of the bodily organism, which accompanied or followed such effort.  
 PORTER *Human Intellect* prelim., § 53, p. 69. [O. A. B. 1870.]  
 Thus the difference between an ordinary mind and the mind of a Newton, consists principally in this, that the one is capable of the application of a more continuous attention than the other.  
 HAMILTON *Metaphysics* lect. xiv, p. 178. [O. A. B. 1859.]  
 2. Psychol. (1) The act or process of giving especial clearness to one or more particulars in the complex content of consciousness. (2) The form of mental functioning, or so-called faculty, which makes possible the selection of certain of the contents of consciousness, for the purpose of giving to them an increased clearness.  
 The general fact of experience from which the conception and doctrine of attention in modern psychology take their rise is that some objects, or parts of objects, in the field of consciousness are more clearly and vividly impressed than others, or are apprehended and recognized, while others are only dimly, or scarcely at all, apprehended. The additional fact that this difference in clearness often seems to be dependent on a selective act, or process, of the subject has led to a further division into (a) reflex or non-voluntary attention, where either through the intensity of the stimulus or the advantage of special interest, the object seems to force itself upon the mind; or (b) voluntary a., where the subject, in order to gratify curiosity or carry out some other purpose, seems to choose the object which shall be more clearly apprehended. The distinction, the valid, is a matter of degrees. In the one case, the consciousness of passivity, in the other, of activity, is emphasized.  
 The conclusion is then warranted, in a preliminary way, that primary attention is a form of psychical energy which necessarily enters into the determination of the character of every field of consciousness.  
 G. T. LADD *Psychol. Descrip. and Explan.* ch. 5, p. 65. [O. A. B. 1894.]  
 The word attention, if we consider its derivation, would seem to be a synonym of conation. It ought to mean 'tendency toward an object.' G. F. STOUT *Analytic Psychology* vol. i, ch. 6, p. 122. [O. A. B. 1896.]  
 3. An act of courtesy or gallantry, especially on the part of a lover; a service: often in the plural; as, his attentions were assiduous. 4. Droton of the energies; watchful observation; practical consideration; notice; also, the object to which the service is directed.

His [Spenser's] attention to metre and rhythm is sometimes . . . extremely minute. COLERIDGE *Table Talk* July 24, 1827.  
 5. Mil. An order to assume a posture of readiness preparatory to some military maneuver; also, the posture itself; as, the company stood at attention. See *TACTICS*.  
 The commanding officer . . . said: '*Attention*, men! your colors are on the top of that hill. Charge!' And they did charge.  
 J. B. GOUGH *Platform Echoes* p. 238. [O. A. B. 1886.]  
 [**L.** *attentio* (n.), < *attendo*; see *ATTEND*.] - *at-tent'clout*, n. Syn. care, circumspection, consideration, notice, observation, regard, study, vigilance, watchfulness. He [Talleyrand] attributes his own reputation for wit a good deal to the power of holding his tongue.

ACTON in *Nineteenth Century* Apr. 1891, p. 678.

[*L. attributus*, pp. of *attribuo*, < *ad*, to, + *tribuo*; see TRIBUTE.]

Syn.: ascribe, assign, associate, charge, connect, impute, refer. 'We may attribute to a person either that which really belongs to him or that which we merely suppose to be his. We attribute to God infinite power. We may attribute a wrong intent to an innocent person. We may attribute a result, rightly or wrongly, to a certain cause; in such case, however, attribute carries always a concession of uncertainty. Where we are quite sure, we simply refer a matter to the cause or class to which it belongs. Many diseases formerly attributed to witchcraft are now referred to the action of micro-organisms. We may attribute a matter in silent thought; we ascribe anything openly in speech or writing; King Saul said of the singing women, "They have ascribed unto David ten thousands, and to me they have ascribed but thousands." We associate things which may have no necessary or causal relation; as, we may associate the striking of a clock with the serving of dinner, tho the two are not necessarily connected. We charge a person with what we deem to be blameworthy. We may impute good or evil, but more commonly evil.—ANT: deny, disconnect, disassociate, separate, sever, sunder.—PREP: it is uncharacteristic to attribute evil motives to (or unto) others.

at-tri-bute, 1 a-tri'bute; 2 a-tri'bute, n. 1. That which is attributed; that which is considered as belonging to, inherent in, or characteristic of a person or thing; a characteristic; in loose usage, a quality; as, the attributes of God; extension is an attribute of matter. See synonyms.

The term attribute simply directs the attention to the fact that we attribute to, or ascribe to, a being, or thing, which we distinguish from itself; but what we distinguish, or what it is distinguished from, is in no way explained.

PONTEN Human Intellect pt. iv, p. 621. [s. 1890.]

Power is thy essence, with thy attribute.

DARWIN The Medal 1.92.

2. Art & Myth. A distinctive mark or symbol added to or accompanying a figure as characteristic of it; as, the hammer is the attribute of Thor, the eggs of Athena, the lyre of Apollo, etc. 3. Gram. An adjective or equivalent of an adjective; an attributive adjunct; a word expressive of quality or characteristic, as *old* soldier, *iron* duke, *Havelock* the *hero*, etc. See ADJECTIVE. 4. Logic. That which is predicated of anything; the affirmed quality, state, or accident of the subject. See under SPINOZISM. 5. Metaph. A quality indispensable to material or spiritual substance, as constituting its so-called essence.

For attribute is that which the intellect perceives of substance, as if constituting its essence, and therefore it must be conceived through itself.

SPINOZA *Ethics* trans. by White and Stirling, p. 8. [tr. a. co. 1883.]

6. Honor; credit; repute. [*L. attributum*, neut. of *attributus*; see ATTRIBUTE, t.]

Syn.: property, quality. A quality (*L. qualis*, such)—the "suchness" of anything, according to the German idiom—denotes what a thing really is in some one respect; an attribute is what we conceive a thing to be in some one respect; thus, while attribute may, quality must, express something of the real nature of that to which it is ascribed; we speak of the attributes of God, the qualities of matter.

Originally "the attributes of God" was preferred, probably because men assumed no knowledge of the actual qualities of the Deity, but only of those more or less fitly attributed to him." J. A. H. MURRAY. [M.] Holiness is an attribute of God; the attributes of many heathen deities have been only the qualities of wicked men joined to superhuman power. A property (*L. proprius*, one's own) is what belongs especially to one thing as its own peculiar possession, in distinction from all other things; when we speak of the qualities or the properties of matter, quality is the more general, property the more limited term. A quality is inherent; a property may be transient; physicists now, however, prefer to term those qualities manifested by all bodies (such as impenetrability, extension, etc.), general properties of matter, while those peculiar to certain substances or to certain states of those substances (as fluidity, malleability, etc.) are termed specific properties; in this wider use of the word

property, it becomes strictly synonymous with quality. See CHARACTERISTIC; EMBLEM.—ANT: being, essence, nature, substance.

at-tri-bu-tion, 1 a-tri-bu'tion; 2 a-tri-bu'tion, n. 1. The act of attributing, as a property, quality, or characteristic to a person or thing, a work to its author or supposed author, date, or place, or an effect to its cause; ascription; as, the attribution of intelligence to man.

Nationality and peculiarities marked by immemorial attribution. HOWELLS *Venetian Life* p. 79. [tr. & h. 1871.]

2. The attribute or thing ascribed.

Little Book, surmamed of white. Clean as yet, and fair to sight, Keep thy attribution right. LAMB *In the Album*, etc. st. 1.

3. The authority, power, or function granted, as to a delegate, ruler, or officer. 4. Logic. Predication of an attribute. 5. [Archaic or Obs.] The act of bestowing (in fact); bestowal; as, the attribution of rights, honors, and privileges.

at-tri-bu-tive, 1 a-tri-bu'tiv; 2 a-tri-bu'tiv, a. 1. Of at-tri-bu-tive, } pertaining to, or of the nature of an attribute; expressing or assigning an attribute; in grammar, expressing an attribute without predication; as, in the expression "a silver watch," silver is an attributive word. 2. So assigned; so ascribed: said of a painting or work of art; as, an attributive Veronese, i. e., a painting attributed by critics or dealers to Paolo Veronese.

at-tri-bu-tive, n. Gram. A word or phrase expressing an attribute without predication; an attributive word or words; an adjective or its equivalent.

at-tri-bu-tive, 1 a-tri'bute; 2 a-tri'bute, n. Theol. Having attribution. See ATTRIBUTION. 2. Worn by rubbing or friction.

Or, by collision of two bodies, grind.

The air attrite to fire. MITCHELL P. L. bk. x, l. 1073.

[*L. attritus*, pp. of *attrito*, < *ad*, to, + *tero*, rub.] at-tri-tute.

at-tri-tion, 1 a-tri'tion; 2 a-tri'tion, n. 1. The act of wearing out by rubbing or grinding by friction, or the state of being so worn or ground; as, the attrition of the shore by waves; the attrition of character by hard experience. 2. R. C. Theol. A form of repentance or sorrow for sin falling short of contrition because arising from an imperfect motive.

If the detestation of sin arise from . . . any other motive, such as loss of heaven, fear of hell, the heinousness of guilt, then it is termed imperfect contrition or attrition.

Catholic Encyc. vol. ii, p. 65. [tr. a. c. '07.]

[*L. attritus* (to-), < *L. attritus*; see ATTRITE.]—at-tri-tive, a. [Rare.] Characterized by attrition.—at-tri-tor, n. [Rare.] A person or thing that rubs away.—at-tri-tus, n. The pulverized matter resultant from attrition.

voucher for what he *arouches*; he *arows* openly a belief or intention that he has silently held, yet there is always the suggestion that some will be ready to challenge or censure what one *arows*; as, the clergyman *arowed* his dissent from the doctrine of his church. *Arow* and *arouch* take a direct object; *arer* is followed by a conjunction: a man *arows* his faith, *arouches* a deed, *arers* that he was present. *Arow* has usually a good sense; what a person *arows* he at least does not treat as blameworthy, criminal, or shameful; if he did, he would be said to *confess*. *Own* applies to all things, good or bad, great or small, which one takes as his own. See ACKNOWLEDGE; ASSERT; CONFESS.—*Ant.*: contradict, deny, disavow, disclaim, disown, ignore, repudiate.

The question as to the origin of the worship of *Baal* among the Hebrews can only be settled by tracing it among the Semites in general. The word *Baal* is a common name of various deities, the name (*Bel*) is that of one of the earliest and most honored of national deities. *Bel* was the special god of Nippur, perhaps the oldest of Babylonian cities. Nippur was in the earliest known times the seat of the government of the Babylonian empire, and when the six of Babylonian cities were united, it was known as the

*bal'lis-ta*, 1 *bal'is-ta*; 2 *bal'is-ta*, *n.* [*-tæ*, 1 -ti; 2 -të, pl.] 1. An engine used in ancient and medieval warfare for hurling stones, arrows, spears, or other missiles.

Its classic form is doubtful, but it is said to have operated on the principle of the bow. In medieval warfare the term was applied to various engines, as the mangonel, petronel, and catapult.

His only son, a beautiful and valiant youth, was pierced through the thigh by an arrow, shot from one of the ballistæ.  
Ginnon Rome vol. ii, p. 226. [*s. a. co. 1852.*]

2. *Anat.* The ankle-bone. [*L.*, < *Gr. ballô, throw.*]

*bal'lis-ta*, 1 *bal'is-ta*; 2 *bal'is-ta*, *n.* A baluster.

*bal'lis-tic*, 1 *bal'is-tic*; 2 *bal'is-tic*, *n.* A baluster.  
*bal'lis-tic*, 1 *bal'is-tic*; 2 *bal'is-tic*, *n.* Of or pertaining to (1) the ballista, or (2) projectiles, or the science of their use, movements, or construction.—*ballistic board* (*Ordnance*), a board on which ballistic records, as of distance, wind-pressure, etc., are placed in such a way as to assist in securing precision in firing sea-coast ordnance.—*b. curve*, the curve which a projectile describes when thrown in any except a vertical direction. The parabola is the theoretical curve of a projectile, the form of a vanometer for measuring transitory currents; its deflected element has a considerable moment of inertia, in which respect it is the exact opposite of an aperiodic galvanometer, and all damping is carefully eliminated. In this type of galvanometer, a reading is taken of the single throw or impulse communicated to the needle by a sudden current in the coils, instead of noting the permanent deflection.

See GALVANOMETER.—*b. pendulum*. 1. A contrivance for measuring the velocity of projectiles, usually consisting of a pendulum with a block at its lower part into which the ball is shot at short distance. The force of the impact is determined from the amount of oscillation of the pendulum and the weights of the pendulum and of the projectile. 2. A gun pendulum.

*bal'lis-tic*, 1 *bal'is-tic*; 2 *bal'is-tic*, *n.* One skilled in the use or science of projectiles.  
*bal'lis-tics*, 1 *bal'is-tics*; 2 *bal'is-tics*, *n. Mil.* The science that deals with the impact, path, and velocity of projectiles.—*exterior ballistics*, the science of the forces operating upon a projectile during its flight.—*interior b.*, the science of the forces operating in the bore of the gun, behind the projectile.

*bal'lis-tic*, 1 *bal'is-tic*; 2 *bal'is-tic*, *n.* See LIST OF EXPLOSIVES.

*bal'li-um*, 1 *bal'i-um*; 2 *bal'i-um*, *n.* [*L.*] Same as BAILEY.  
*bal'li-um*, 1 *bal'i-um*; 2 *bal'i-um*, *n.* See *BALL*, *n.*  
*bal'li-on*, 1 *bal'i-on*; 2 *bal'i-on*, *n.* [*F.*] 1. A form of geological upheaval resulting in rounded dome-shaped mountains. The Ballons of the Vosges and of Normandy,—so called from the rounded, balloon-like domes characteristic of the mountains of that time. *AGASSIZ Geol. Sketches sketch v, p. 146. [r. a. 1866.]* 2. *bal'lot*, *n.* 1. The written or printed paper that expresses a voter's choice; often called a *ticket*. 2. A method of election or choice by voting with tickets or balls, which are placed in a box or urn in such manner that the voter can conceal his choice if he so desires. In balloting with balls, a white ball approves a candidate or measure, and a black one rejects.  
On the 25th of April (1833) he [George Grote] moved, "that it be expedient that the votes at elections for members of Parliament be taken by way of ballot."

In 1872 Mr. Forster's Ballot Act produced the ballot in all parliamentary and municipal elections, except parliamentary elections for universities. *Encyc. Brit.* 11th ed. vol. iii, p. 280. 3. The act of voting as described above; also, the whole number of votes so cast at any one time or place; as, three ballots were taken; the ballot was unusually large. 4. A little ball used in voting; the original sense. [*< F. ballotte, ballot, < balle; see BALL, n.*]

—*Australian ballot*, a method of voting in which the ballots, printed by the government and bearing the names of all the candidates of all parties, are given to each voter as he enters a stall, alone, that he may, while thus secluded, designate the candidate he desires to vote for, thus securing absolute secrecy and liberty. Many States of the United States have adopted this system, or some modification of it.—*bal'lot-box*, *n.* A closed box with an aperture for receiving ballots.—*b. stuffing*, *n.* *U. S. Polit.
